ADVANCED TECHNOLOGY SUITE

FEEL EMPOWERED. Sense the protection and response delivered by Nissan's smart monitoring technologies and advanced Safety Shield. New JUKE is fully equipped for safer, more exciting driving.

AROUND VIEW MONITOR

Using 4 cameras, Around View Monitor delivers a panoramic

view all around JUKE to help cover blind spots and make reversing and parking a breeze.

4 X MORE CONTROL*

New JUKE's All Mode 4x4i technology brings off-road intelligence and agility to the road. It measures wheel slip and instantly distributes torque to the wheels with the most grip - up to 50/50 front/rear if necessary.

NISSAN DYNAMIC CONTROL SYSTEM

Sport, Normal or Eco: choose a driving mode that suits your mood and check your fuel consumption and eco-score on screen.

NISSAN SAFETY SHIELD

Using cameras & sensors, a variety of safety systems work together to build your confidence and keep you in control.

LANE DEPARTURE WARNING. Warns you if you start to drift out of lane. It can detect road markings, and unless you are indicating, quickly remind you to straighten up.

BLIND SPOT WARNING. What you can't see, new JUKE can. If there's a vehicle in the blind spot area on either side of your car, a light will illuminate in the wing mirror. If you're indicating to change lanes and a vehicle is dangerously close, the light will flash and you'll hear a warning too.

MOVING OBJECT DETECTION. Whether it's a shopping trolley or a child wandering behind the car, New Juke has got it covered.

TYRE PRESSURE MONITORING SYSTEM & GEAR SHIFT INDICATOR

The tyre pressure monitoring system warns you if your tyres are low in pressure by displaying a light on the dashboard - and for fluid gear changes, an arrow indicates when it's time to shift up or down.
