RANGE ROVER EVOQUE

ABOVE & BEYOND

> FIND A RETAILER

> BUILD YOUR OWN

OVERVIEW

SPECIFICATION

THE EVOQUE MARKS A BOLD EVOLUTION OF RANGE ROVER DESIGN. WITH ITS DRAMATIC RISING BELTLINE, A MUSCULAR SHOULDER RUNNING THE LENGTH OF THE CAR, AND A DISTINCTIVE TAPER TO THE FLOATING ROOFLINE, THE RANGE ROVER EVOQUE ADOPTS A VERY DYNAMIC PROFILE WITH A POWERFUL AND ATHLETIC STANCE.

Gerry McGovern.

Land Rover Design Director and Chief Creative Officer.

OVERVIEW

SPECIFICATION

DESIGN EXTERIOR

With its striking lines, muscular shoulders and tapered roof, Range Rover Evoque sets itself apart from its contemporaries. Whether discovering hidden parts of town or being seen in all the right places, it's always ready for action. Striking the perfect balance between distinctive exterior design, a contoured cabin, capability and performance, the vehicle defines contemporary city life.

Optional adaptive full LED headlamps complement the vehicle's design cues by combining a distinctive look with enhanced light output for better visibility and safety at night. The headlamps adaptive function enables light beams to be automatically aligned with steering inputs and follow curves in the road. The Daytime Running Lights (DRLs) have a new shape creating a distinctive signature which also serves as the directional indicator where it flashes amber.

OVERVIEW

SPECIFICATION

COUPÉ

With its sleek lines Range Rover Evoque Coupé delivers a bold interpretation of contemporary British design. Its athletic profile, uncompromising contours and striking touches are guaranteed to turn heads. Whilst inside, the cabin provides a modern, well-appointed and finished space that guarantees you always travel in style.

Vehicle shown is HSE Dynamic Coupé in Firenze Red with Santorini Black roof and optional 20 inch five split-spoke Style '508' alloy wheels.

OVERVIEW

SPECIFICATION

FIVE-DOOR

While the five-door Range Rover Evoque ensures practicality, it doesn't lose in design and contemporary styling. The floating roof, rising belt line and athletic form truly reflects living in the city today. Whilst the interior space is both thoughtfully planned and well finished. Whether you're taking family or friends around town or heading off to some quiet spot in the countryside for lunch, the vehicle has enough comfortable seating and loadspace to ensure you all arrive feeling relaxed and ready to go.

Vehicle shown is HSE Dynamic five-door in Fuji White with optional 20 inch five split-spoke Style '508' alloy wheels.

INTERIOR

A range of individual features provides added appeal to the clean, architectural shapes of the vehicle's interior. The all-new front and rear seats incorporate the latest technologies such as climate control options to ensure a truly relaxed and comfortable ride. Details include the use of premium materials such as Oxford leather and twin-needle stitching.

The cabin is also complemented by new-look door insert finishings which are enhanced further by deeply padded premium materials you'll simply want to touch.

For the ultimate in comfort, optional front massage seats allow both the driver and front passenger to select individual programmes via the Touch-screen. Varying in intensity, there are five settings to choose from; each one delivers a soothing massage to improve both passenger and driver's comfort.

The infotainment centre in Range Rover Evoque lets you hear and feel music the way you should. Bright trebles. Deep bass notes. Rich tones that let every instrument sing. These are the characteristics of the optional Meridian™ Sound System. Added to which, the vehicle's eight-inch Touch-screen has 800 x 480 pixel resolution, InControl Touch, DAB, Bluetooth® streaming and phone connectivity for two phones simultaneously.

Finally, Configurable Interior Mood Lighting is also controlled via the Touch-screen. With a range of ten colours on offer, you can dial the brightness up or down to suit your temperament. A 'Stealth' setting is also available to reduce cabin illumination to a minimum.

OVERVIEW

SPECIFICATION

DESIGN TECHNOLOGY

TERRAIN RESPONSE WITH ALL-TERRAIN PROGRESS CONTROL

Developed by Land Rover's industry-leading all-terrain specialists, Terrain Response®* acts as an off-road expert that reconfigures the vehicle's engine, transmission, throttle and traction settings to ensure greater off-road capability. Our proprietary system is enhanced by the addition of optional All-Terrain Progress Control (ATPC).

This new state-of-the art technology enables drivers to set and sustain a steady speed when driving off-road. Operating like a cruise control system, it functions at very low speeds between 1.1 mph and 18.6 mph, helping the driver to maintain full concentration on steering and finding a path through obstacles.

* Not available on eD4.

ACTIVE DRIVELINE

The optional Active Driveline delivers benefits in both on and off-road situations. In many on-road driving conditions, the system is able to disconnect drive to the rear of the vehicle, providing maximum two-wheel drive fuel economy. A sophisticated control strategy continuously monitors key vehicle

and environmental parameters. If the requirements for four-wheel drive are met, the system seamlessly and imperceptibly reconnects that drive within 300 milliseconds.

WADE SENSING

This optional feature is designed to aid you when the vehicle is going through water, sensors in the door mirrors provide real-time information of water depth and presents this on the Touch-screen along with the vehicle's maximum wading capability. So you can negotiate your way with the utmost confidence.

E-CAPABILITY

Land Rover's current range of vehicles already utilise a wide range of innovative and efficient technologies including intelligent Stop/Start and brake energy regeneration. Range Rover Evoque's latest engine range is just the latest testament of innovation to provide further efficiency whilst not compromising on capability.

A blue EVOQUE badge on the rear of eD4 vehicles denotes E-Capability status.

INGENIUM DIESEL

The all-new Ingenium diesel engine delivers a step change in efficiency, showing an average 17 percent improvement in both fuel economy and CO₂ emissions over its predecessor.

The 2.0 litre four-cylinder Ingenium engine is available as either a two-wheel drive with six-speed manual transmission or a four-wheel drive with a choice of six-speed manual or nine-speed automatic transmission.

Land Rover engineers have paid particular attention to reducing weight while maintaining excellent strength and high levels of refinement. The all-aluminium Ingenium engine is 20-30kg lighter than predecessors. An efficient solenoid common-rail system feeds fuel into the combustion chambers which provides precision injection with low noise levels. Added to which internal friction is reduced by 17 percent compared with the previous-generation turbodiesel engine, boosting efficiency, smoothness and responsiveness.

Not only is the new Ingenium engine substantially lighter, more fuel-efficient and more refined than its predecessor, it's also more affordable and convenient to own thanks to servicing intervals extended from 16,000 to 21,000 miles on four-wheel drive models, with no impact on longevity.

OVERVIEW

SPECIFICATION

DRIVELINE, ENGINE PERFORMANCE AND FUEL ECONOMY

The all-new Ingenium diesel engines are fully EU6 compliant, and coupled with lightweight all-aluminium construction, six-speed manual transmission or optional nine-speed automatic transmission (TD4), deliver greatly improved fuel efficiency and lower CO₂ emissions.

The powerful Si4 engine is also fully EU6 compliant, yet has lost nothing in performance, accelerating from 0-60mph in just 7.1 seconds.

All engines feature Intelligent Stop/Start technology, automatically shutting down the engine at rest when possible, and re-starting it again as soon as you lift your foot off the brake.

IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up to date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

All Land Rover Approved Accessories fitted by a Land Rover Retailer within one month or 1,600 kilometres/1,000 miles (which ever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to a 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Retailer who will be pleased to advise you on current specifications and any query you may have.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Retailer.

Castrol EDGE Professional exclusively recommended by Land Rover.
