ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomise the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

 $\label{thm:condition} \mbox{Vehicle shown is Discovery Commercial HSE in Silicon Silver.}$

Vehicles shown are from the Land Rover global range. Specifications, options and availability may vary between markets and should be verified with your local Land Rover Retailer. CO_2 and fuel economy figures may vary according to wheel fitment and optional extras fitted.

INTRODUCTION

THE CONCEPT OF DISCOVERY COMMERCIAL

Ever since it first took to the streets, mud tracks and deserts in 1989, Discovery has blazed its own trail. It has become synonymous with capability and versatility, whether off road or in the city. Discovery Commercial takes those characteristics, together with several innovations pioneered by Land Rover, to bring you a vehicle of bold contemporary looks and exceptional practicality.

A quantum leap forward in premium commercial vehicle design, Discovery Commercial combines outstanding comfort and refinement with class-leading versatility and capability.

Delivering impressive loadspace, additional underfloor storage and unrivalled towing capability for its class, it also offers a range of innovative features to enhance performance and convenience.

So wherever you want to go and whatever you want to take, Discovery Commercial is every vehicle you'll ever need.

Vehicle shown is Discovery Commercial HSE in Silicon Silver.

DISCOVERY COMMERCIAL THE FACTS

Form, function and exemplary levels of finesse are brought together to help create one of Land Rover's most compelling vehicles to date. Its inherent strength and off-road capabilities are matched only by its bold contemporary looks and alluring touches of luxury. Inside, astute use of space coupled with high-quality design and use of premium materials enhance the vehicle's bold horizontal and vertical lines.

The versatility of the cabin is highlighted by the plentiful stowage, clever use of space and refined comfort.

ACTIVITY KEY

Wherever your work takes you, the Activity Key* ensures you don't have to carry your conventional key fob. Housed in a robust and fully waterproof wristband, it can be used to conveniently lock and unlock your vehicle without having to use your hands. See page 41 for details.

Discovery Commercial offers a large, flexible loadspace with a full height of 842mm and length of 1,635mm. It's an ideal choice for a business demanding versatility; ease of loading is enhanced through both side and rear door access, and spacious underfloor stowage accommodates fragile and valuable items. See page 11 for details.

UNRIVALLED TOWING

Discovery Commercial delivers an impressive towing capacity of up to 3,500kg along with a suite of optional features, including Advanced Tow Assist*. This feature reduces driver workload and enhances manoeuvrability and safety, by enabling the driver to guide a trailer into position by simply following its trajectory on the main Touchscreen. See pages 16-19 for details.

DESIGN

VERSATILE LOADSPACE

Discovery Commercial offers a large, flexible loadspace with a full height of 842mm and length of 1,635mm. It's an ideal choice for a business demanding versatility; ease of loading is enhanced through both side and rear door access and spacious underfloor stowage accommodates fragile and valuable items.

SIDE LOADING

Versatility is also enhanced through Discovery Commercial's two side doors. The wide door aperture allows easy loading and unloading and also ensures convenient access to underfloor stowage.

REAR LOADING

Discovery Commercial can carry items up to 1,635mm long. Access to the rear space is made even easier with features such as the powered gesture tailgate*, which can be operated simply by a kicking gesture underneath the sensors on either side of the tailgate.

^{*}Standard on HSE. Optional on SE. Not available on S.

STOWAGE

Discovery Commercial comes with a range of convenient stowage features including the front glovebox, central armrest and the option of a cooler compartment. There are also two generous underfloor compartments for carrying and storing more fragile items, or those which you wish to keep out of sight.

FORWARD UNDERFLOOR STOWAGE

Stretching the width of the vehicle, this 76 litre compartment is located behind the driver's partition and is designed for longer items. It can be accessed via either of the side doors and, for increased security, includes a latching side hatch on either side.

REAR UNDERFLOOR STOWAGE

This 132 litre compartment is easily accessible from the tailgate. It features a hinged lid that is self-supporting on hydraulic struts to allow convenient two-handed access.

Centre console stowage behind the climate controls¹

Upper and lower glovebox²

Cupholders with additional stowage beneath¹

Push operated hook¹

POWERED INNER TAILGATE

Pioneered by Land Rover, Discovery Commercial features a powered inner tailgate, which when deployed can provide a platform for use at social and sporting events, coupled with greater protection from the elements. This platform also allows for easier loading and acts as a retainer when the loadspace area is filled. Powered inner tailgate is fitted as standard.

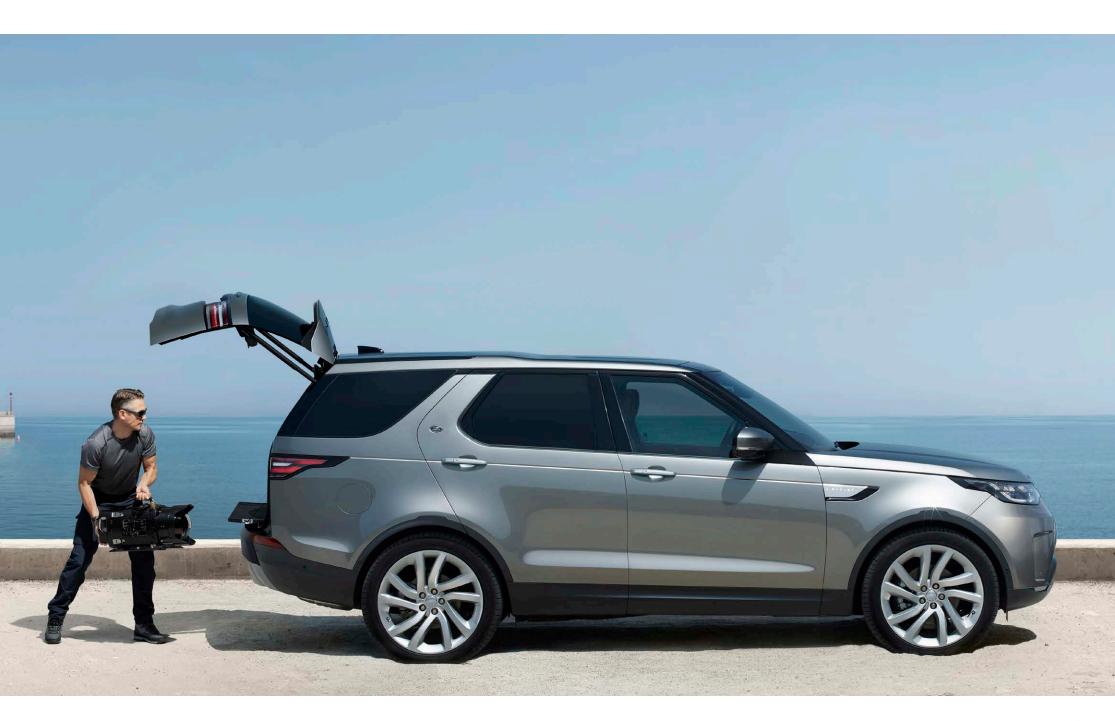

POWERED GESTURE TAILGATE

Powered gesture tailgate allows you to operate the tailgate (both to open and close) from outside the vehicle, without needing to physically touch the vehicle or the smart key. Provided that the smart key is detected, the tailgate may be operated by a kicking gesture underneath the rear of the vehicle.

Two sensors mounted on either side of the tailgate allow kerbside operation, rather than needing to be immediately behind the vehicle; and as the system is compatible with towing solutions, you can still open and close the tailgate with the least amount of fuss. Powered gesture tailgate is available as an option on SE and standard on HSE. Additionally, a button located inside the tailgate or on the smart key allows the tailgate to be closed automatically with powered tailgate.

DRIVING CAPABILITY

TOWING AIDS

Discovery Commercial takes towing capability to a new level, with a capacity of up to 3,500kg and a suite of features available to help make towing effortless and assured.

1 ELECTRICALLY DEPLOYABLE TOW BAR

Discovery Commercial has the option of an electrically deployable tow bar on SE and HSE. This is deployed using a convenient button in the loadspace compartment, or via the Touchscreen.

2 TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualise the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen. Standard with 360° Surround Camera.

3 NOSE LOAD MEASUREMENT

Discovery Commercial HSE vehicles fitted with the electrically deployable tow bar feature Nose Load Measurement, which allows you to quickly and easily measure the nose load of your trailer. This system can be operated via the Touchscreen.

4 REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the loadspace or on the key fob to lower the rear ride height - useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer. This feature is standard on Discovery Commercial.

5 TRAILER LIGHT TEST

This industry-first feature enables you to easily test your trailer lights from outside the vehicle. When an optional electrically deployable tow bar is fitted, the automatic system is used to pulse the lights in a sequence, and is triggered via the Touchscreen or a button in the loadspace compartment.

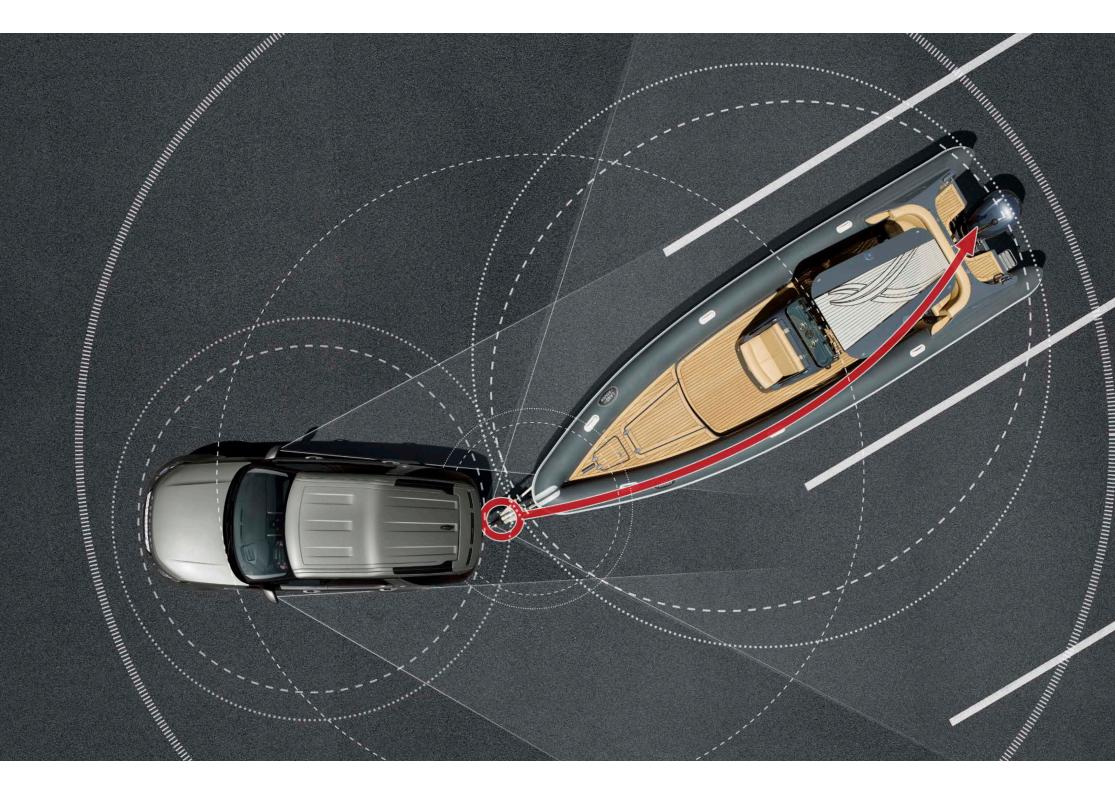

6 TOW ASSIST

On the road, the Tow Assist feature helps with reversing by predicting the trailer's direction. You can even choose your trailer's width for precise guidelines displayed on the Touchscreen. Standard with 360° Surround Camera.

Towing feature compatibility may be affected by trailers equipped with LED lights. Please consult your nearest Land Rover Retailer for more information. Towing features and regulations vary by market. Please ensure you comply with relevant legislation in your country. Vehicle shown is Discovery Commercial HSE in Silicon Silver.

ADVANCED TOW ASSIST¹

Discovery Commercial features our most advanced trailer reversing aid to date. The optional Advanced Tow Assist* enables the driver to guide a trailer into position by simply following its trajectory on the main Touchscreen, and controlling its path using the rotary knob from the Terrain Response 2 system on the centre console. This is much more intuitive than using the steering wheel, because within one field of vision it effectively steers the trailer along the desired path. This is rather than the opposing direction method which is what happens with conventional steering.

In addition to significantly reducing driver workload, the feature enhances manoeuvrability and safety when reversing, and will alert the driver when approaching a jackknife situation.

Advanced Tow Assist is only available with 360° Surround Camera and Advanced Off-Road Capability pack.
A Land Rover approved tow bar is required in order to enable this feature.

360° SURROUND CAMERA²

For a complete, all-round view, the optional 360° Surround Camera - incorporating T-junction View - helps to see everything clearly on the high-resolution, full-colour Touchscreen. Using four digital cameras discreetly placed around the vehicle, the system provides an almost complete 360° view, including a bird's-eye overhead view. It is perfect for more complex driving assignments such as towing a yacht or a horsebox, as features such as Hitch and Load Assist work seamlessly through this system. Along with the ability to display several different views at the same time, this technology can also zoom and pan, ensuring objects and angles normally below the line of sight, can be seen.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) is a standard feature that monitors the vehicle to detect movements in the trailer, and then uses selective braking to help correct potentially hazardous situations.

¹Not available on S. ²Requires Auto-dimming, power fold, heated door mirrors with memory and approach lights.

TESTING

Before any vehicle can carry the Land Rover badge, it must complete a series of rigorous tests to establish the very highest levels of luxury, performance and capability.

SUSPENSION

You're unlikely to push any Land Rover harder than we have. For an unrivalled breadth of dynamic capability, both on and off road, the vehicles have been exposed to 10 years of the most extreme driving pressures in a fraction of the time using our state-of-the-art test rig.

WIND SPEED

Discovery Commercial was developed in state-of-the-art wind tunnels and a suite of climatic chambers to recreate some of the most challenging aerodynamic conditions it will face. Only by pushing all systems to their limits do we develop true reliability.

HOT AND COLD CLIMATE

In real-world environments and our climate chambers, we freeze vehicles to -40°C and bake them to 50°C. Key functions and systems are then scrutinised to our exacting standards. So even in the most remote locations, comfort and peace of mind are never far away.

OFF-ROAD

From the icy proving grounds of Arjeplog, Sweden, to Dubai's unforgiving desert sands, we ensure our legendary all-terrain performance is innate in every vehicle. Prototypes are developed across approximately 5,280 miles of the most demanding off-road routes.

SEMI-ANECHOIC CHAMBER

In the 'neutral sound' of our semi-anechoic chamber we precisely expose the cabin to a range of frequencies and vibrations, making certain that Discovery Commercial sounds refined at every speed and across every surface.

MONSOON

Our water testing facilities ensure each vehicle can enter and exit a body of water without a single droplet entering the cabin. In the monsoon simulator, each one is drenched with some 85,000 litres of specially dyed water, while tilting it by as much as 45°, checking for even the slightest leak with UV lights.

ALL TERRAIN TECHNOLOGY

Discovery Commercial not only looks truly at home in the city, but also drives impeccably off road. Its optimised geometry coupled with unique Land Rover technologies ensure it delivers class-leading all-terrain capabilities.

TERRAIN RESPONSE

With 70 years of all terrain expertise, this vehicle has Land Rover capability at its heart. Our unique Terrain Response systems enable the driver to optimise the vehicle's engine, gearbox, centre differential and chassis systems to match the demands of the terrain, by selecting one of the easily identifiable driving modes.

Introduced to Discovery Commercial for the first time, the optional Terrain Response 2 system¹ enhances this even further, by monitoring driving conditions and automatically selecting the driving modes to achieve the best possible chassis and powertrain set up for the conditions.

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC)² is a state-of-the-art optional system that enables drivers to set and maintain a steady speed in challenging conditions.

Operating like a cruise control system, it functions at very low speeds between 1mph and 19mph, enabling the driver to maintain full concentration on steering and finding a path through obstacles.

Developed by Land Rover's industry-leading all terrain specialists, the system works seamlessly alongside the Terrain Response 2 and All Wheel Drive (AWD) traction and braking systems.

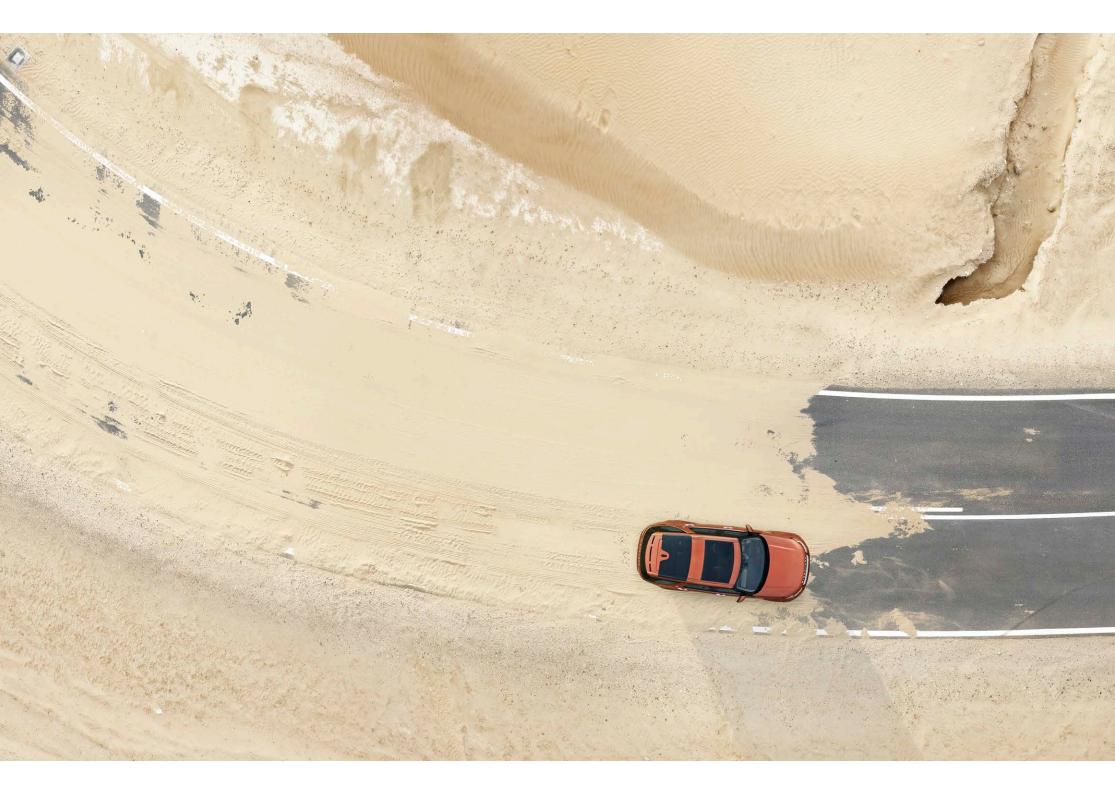

Once ATPC is activated, the standard steering wheel +/- cruise control buttons are used to set the speed. Brake and accelerator pedals can still override the chosen settings, with gentle braking achieving a reduction in speed.

General Driving

Grass, Gravel, Snow

Mud and Ruts

¹Optional on SE and HSE. Not available on S. ²Optional on SE and HSE as part of the Advanced Off-Road Capability Pack only. Not available on S.

PERMANENT ALL WHEEL DRIVE SYSTEMS

Discovery Commercial features a range of intelligent, permanent Land Rover All Wheel Drive (AWD) systems to deliver unrivalled all-weather and all-surface capability.

TWIN-SPEED TRANSFER BOX (HIGH/LOW RANGE)

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. This system gives you precise speed and control in such instances. The heart of the twin-speed system is the electronic centre differential that offers a 50:50 torque split between front and rear axles, with the ability to pre-emptively lock the axles before slip commences. This system is standard on all Discovery Commercial models.

ACTIVE REAR LOCKING DIFFERENTIAL

The Active Rear Locking Differential* offers an additional benefit of controlling the slip between the left and right wheels on the rear axle. This can be especially useful in low-grip conditions such as on wet grass, where the vehicle monitors the slip and torque between front and rear axles, as well as from one wheel to another on the rear axle to deliver effortless capability.

SUSPENSION

FLECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest four-corner air suspension which provides exceptional wheel articulation and poise.

Capable of taking on tough situations, this system is designed to keep Discovery Commercial stable no matter how rough the terrain. For unprecedented ride quality, it switches heights seamlessly when necessary.

Electronic air suspension also allows for innovative new access features to enhance versatility and ease of use.

Automatic Access Height is a feature which automatically lowers the ride height by 40mm when the vehicle is parked.

Rear Height Adjust allows the use of switches in the loadspace or on the key fob to lower the rear ride height. See page 16 for more information. Standard on all Discovery Commercial models

FFFICIENT TECHNOLOGIES

SUSTAINABLE CONSTRUCTION

The aluminium alloy used for much of Discovery Commercial's construction is from a high level of recycled aluminium. Using significantly less energy than primary aluminium to produce, it minimises the vehicle's environmental impact.

STOP/START

Discovery Commercial's engines are all available with Stop/Start. This system shuts down the engine when you come to a complete halt and restarts the engine immediately when required, helping to save fuel, especially during urban driving.

LIGHTWEIGHT MATERIALS

At every stage of the development process, engineers maximised weight saving across all the vehicle's elements. This produces an optimum balance between best performance and weight saving for greater efficiency. Discovery Commercial adopts an advanced all-aluminium body structure, delivering significantly reduced weight, improved performance and enhanced sustainability. Its tailgate is made from a lightweight plastic composite material which is also very stiff and strong, whilst high-precision lightweight magnesium castings are used for some of the body and chassis components.

ADBLUE®*

Discovery Commercial models are fitted with AdBlue to help clean exhaust gases. AdBlue is a non-toxic, non-flammable, biodegradable additive that cleanses the gases in the vehicle's exhaust system to reduce harmful nitrogen oxide emissions by up to 98 percent.

LOW FRICTION TECHNOLOGIES

Discovery Commercial's diesel engine range uses smart coating technologies on pistons, needle roller bearings and other mechanical parts. This helps to reduce friction, especially at low engine temperatures, so the vehicle performs at its efficient best.

ADVANCED AFRODYNAMICS

The modern streamlined design has been carefully optimised using advanced Computational Fluid Dynamics software and a state-of-the-art wind tunnel. This has led to an improvement of up to 15 percent in drag coefficient reduction when compared to its predecessor. An enhanced rear spoiler has been designed with slots to direct airflow over the tailgate to minimise rear screen soiling and produce a reduction in drag. Discovery is the first Land Rover to optimise airflow past the front wheels, creating an 'air curtain' by feeding air to the inner wheelarch from ducts in the front bumper. The pressure change in the wheelarch helps to reduce drag and improve air flow down the vehicle's sides.

With standard electronic air suspension, Discovery Commercial benefits from speed lowering where the vehicle automatically lowers by 13mm to reduce drag when cruising at motorway speeds.

ON-ROAD DYNAMICS

Discovery Commercial has been designed to deliver a confident, comfortable and engaging driving experience to make the miles go by virtually unnoticed.

With its wide-spaced double wishbone design at the front and advanced multi-link layout at the rear, the suspension delivers more responsive handling without compromising Land Rover's hallmark all-terrain capability.

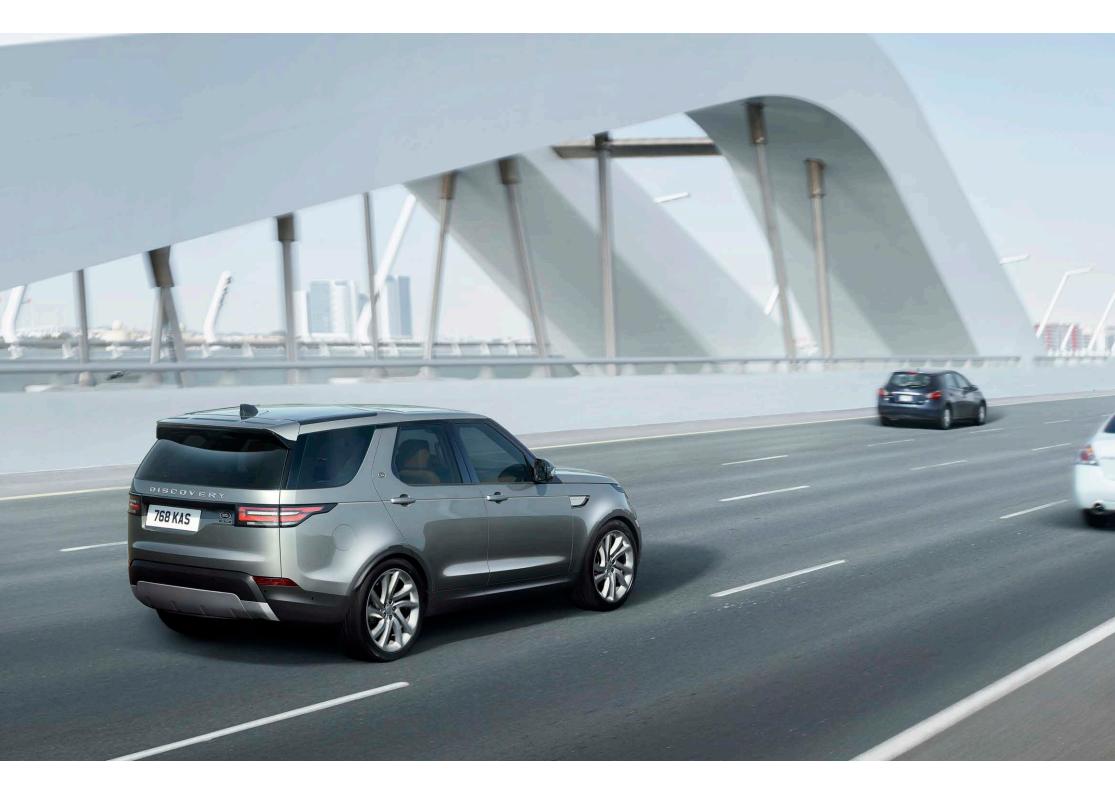

Dynamic Stability Control (DSC) monitors Discovery Commercial's dynamic behaviour, and intervenes if the system determines that the vehicle is not responding according to the driver's inputs.

The DSC system operates by reducing engine torque and/or applying the brakes on selected wheels, to correct the vehicle's cornering attitude. This, in addition, can counteract understeer or oversteer conditions effectively. This system is standard on all models.

Discovery Commercial's sublime ride quality is heightened further by such features as Electronic Power Assisted Steering (EPAS), a variable ratio system and speed-sensitive steering. Standard on all models, EPAS is integrated into driver and chassis systems, helping to reduce the engine load to aid efficiency and deliver a confident and intuitive drive.

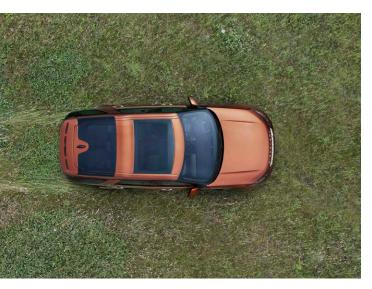

The variable ratio system has been tuned by Land Rover engineers to provide ease of control, on or off road, when driving in a straight line or when turning. Different gear ratios within the steering rack help to reduce steering sensitivity when driving straight, but compensate for less steering input when turning.

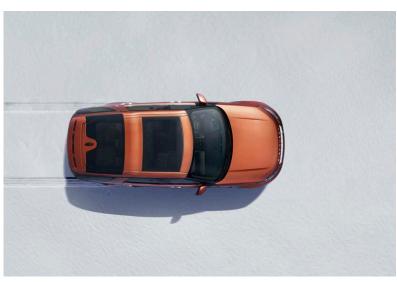

Speed-sensitive steering increases the weight and feel of the steering as your speed increases to give stability and a greater feel of confidence. It also assists you at lower speeds to aid manoeuvrability by lightening the feel of steering. This system is standard on all models.

DRIVING TECHNOLOGY

DRIVING AIDS

LOW TRACTION LAUNCH

Discovery Commercial features a dedicated launch function¹, which enables the vehicle to pull away smoothly and easily, even on tricky low-friction surfaces like ice, snow or wet grass. The software adapts the system's behaviour according to the current Terrain Response setting. When you pull away, you do so with certainty, composure and greater ease.

ALL TERRAIN INFO CENTRE

The All Terrain Info Centre² within your navigation system allows you to view and activate various features, and provides access to All Wheel Drive (AWD) information and guidance features for off-road driving.

The Touchscreen displays information about the vehicle's wheels, suspension, transmission and driveline, including suspension movements and articulation for vehicles with electronic air suspension.

The system can show the angle and pitch of the vehicle on slopes and inclines, advice on the vehicle's current and maximum wading depth, and includes a useful compass together with current latitude, longitude and altitude details. The Info Centre provides a host of other helpful guidance such as vehicle dimensions, useful for entering tighter spots and can be used to activate additional capability features, such as Low Traction Launch.

Using the optional 360° Surround Camera, the Info Centre can also show the area directly ahead of the vehicle that may not be visible to the driver, to help ensure the vehicle isn't damaged on unseen terrain.

DRIVING TECHNOLOGY

DRIVER ASSISTANCE

EASIER AND SAFER

From negotiating city traffic or the motorway, to providing additional safety for you and your passengers, you'll find a range of features designed and engineered to heighten your enjoyment of the vehicle.

Discovery Commercial offers the most advanced technologies to deliver intuitive and easy parking solutions. Whether reversing, parallel parking or getting into or out of tight spaces, these features make life easier.

Available as standard, optional or as part of an optional pack.

Search 'Discovery Driver Assistance' for more details.

STANDARD

Front and Rear Parking Aid

Front and Rear Parking Aid helps make manoeuvring even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles.

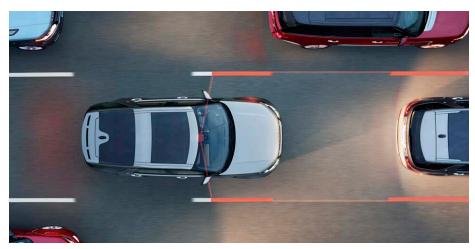

Rear Camera provides improved visibility when reversing. This valuable parking aid also helps when hitching a trailer. Static lines representing the vehicle's outer perimeter and predicted path are superimposed on the rearward image, to make parking in tight spots as easy as possible.

Cruise Control with Speed Limiter¹ allows the driver to maintain the current speed of the vehicle without the need for continued use of the accelerator pedal, helping to reduce driver fatigue. The Speed Limiter will also allow the driver to pre-set a maximum specified speed which the vehicle will not exceed. Both functions can be easily turned on or off by the driver as desired.

Driver Condition Monitor detects if you're starting to feel drowsy and gives you an early warning when you need to take a break.

¹Standard on S and SE

STANDARD

Lane Keep Assist

Lane Keep Assist detects when your vehicle is unintentionally drifting out of your lane, and applies a corrective torque to the steering wheel, encouraging you to guide your vehicle back.

Adaptive Cruise Control² will keep your vehicle a safe distance from the one in front, should it slow or stop when you're cruising on the motorway or travelling in slow-moving traffic. Should the vehicle in front stop completely, your vehicle will come to a smooth halt. In stop-start traffic, Adaptive Cruise Control will automatically resume following the car in front. The system can be activated from 13mph and once activated will operate between 0-124mph where permissible.

Emergency Braking can help to prevent collisions with other vehicles or pedestrians. If a potential frontal collision is detected, a warning is displayed giving you time to take action. A camera at the front of the vehicle monitors at speeds from 3mph to 49mph for frontal collisions, and 3mph to 37mph for pedestrians. If a collision is still anticipated and you have taken no action, this system will apply the brakes to help reduce the severity of the possible impact.

OPTIONAL

360° Surround Camera

360° Surround Camera uses four digital cameras discretely placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various manoeuvres from parking by a kerb, to getting in and out of tight spaces and junctions.

²Standard on HSE. Optional on S and SE.

DRIVING TECHNOLOGY 33

OPTIONAL PACKS

Optional packs are available featuring a range of technologies to enhance the driving experience. Park Pack enables you to park and manoeuvre safely and more easily in and out of tight spaces, and into traffic that is obscured by buildings or other vehicles. While Drive Pack makes every journey safer and more relaxing. The Drive Assist Pack contains the most comprehensive suite of drive and park technologies.

PARK PACK1

Park Assist

Park Assist makes parallel and perpendicular parking easier than ever by steering your vehicle into a suitable space. You just have to select the appropriate gear and control the vehicle's speed with the brake and accelerator pedals. Graphics and notifications guide you through the manoeuvres. Park Assist will also steer you out of a space, taking all of the stress out of parking.

Rear Traffic Monitor is particularly useful when reversing out of a parking bay. The system warns you of vehicles, pedestrians or other hazards, approaching from either side of your vehicle and will alert you with both audio and visual warnings - so you know what's behind you, even when the view is obstructed.

360° Parking Aid

360° Parking Aid gives you complete confidence when manoeuvring in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicate how close you are to obstacles.

Clear Exit Monitor alerts passengers leaving the vehicle from the rear doors to any approaching cars, cyclists or other hazards. If an incoming obstacle is detected, a warning light will flash on the door.

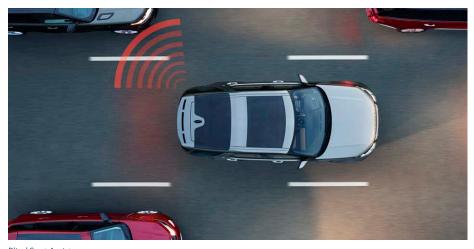

DRIVE PACK²

Adaptive Cruise Control

Adaptive Cruise Control See page 37 for description.

High-speed Emergency Braking detects when a potential frontal collision with another vehicle may occur and displays a forward alert to warn the driver to brake. If the driver doesn't react, the vehicle will deploy the brakes in order to reduce the severity of the possible impact. High-speed Emergency Braking is ready and active from 6mph to 99mph.

Blind Spot Assist

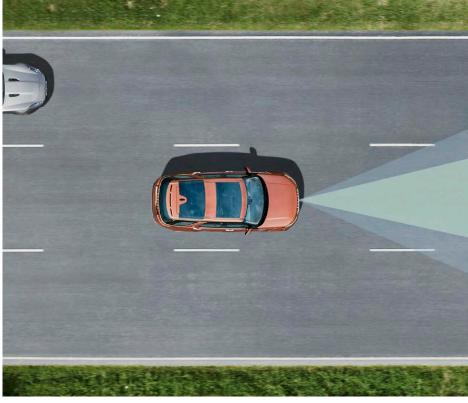

Blind Spot Assist can help prevent collisions. If your vehicle detects another car in your blind spot when you begin to change lanes, a small warning light illuminates in the corresponding door mirror and corrective steering torque encourages you to guide your vehicle away from the approaching vehicle.

Traffic Sign Recognition and Adaptive Speed Limiter keeps you informed and aware on the road, by displaying speed limits and no overtaking signs in the instrument cluster, where they can easily be seen. When activated, Adaptive Speed Limiter uses Traffic Sign Recognition information to adjust your vehicle's speed accordingly.

²Optional on S and SE. Standard on HSE.

DRIVING TECHNOLOGY 35

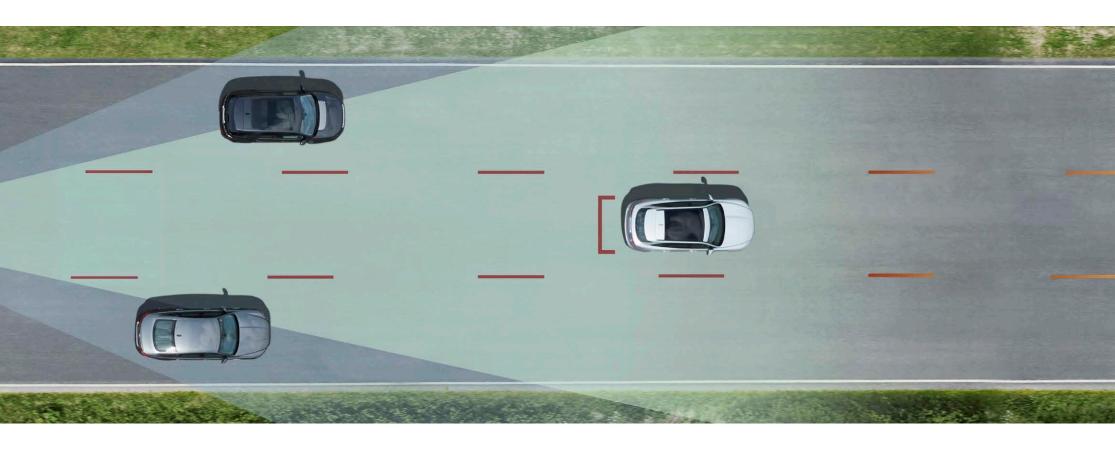

DRIVER ASSIST PACK

The optional Driver Assist Pack offers a wide range of driver aids, including the features found in the Drive Pack (see page 62) together with 360° Surround Camera. It also includes new Adaptive Cruise Control with Steering Assist which centres the vehicle in lane and maintains a set distance from vehicles ahead, making driving even easier and more comfortable.

FRONT CAMERA 120m

FRONT RADAR 160m

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times. Vehicle shown above right is Discovery HSE Luxury in Namib Orange.

ADAPTIVE CRUISE CONTROL WITH STEERING ASSIST

Adaptive Cruise Control with Steering Assist can be activated from 13mph, and once activated will operate from 0mph up to motorway speeds. It begins functioning when you depress the 'Set' cruise button. A camera and radar then work together to track vehicles and lanes ahead to maintain a central position for your vehicle, and moderate its speed according to the behaviour of the traffic ahead of you. If the vehicle ahead slows, even to a standstill the feature automatically slows your vehicle, bringing it to a stop where necessary to maintain a relaxed and composed drive in busy traffic situations.

Adaptive Cruise Control with Steering Assist works with you; as you keep your hands on the wheel anticipating the road ahead, the system assists with steering, braking and acceleration. Should you remove your hands from the wheel, the vehicle will provide a warning. If the warning is not heeded then the Steering Assist is deactivated but the Adaptive Cruise Control remains active.

TECHNOLOGY

INFOTAINMENT

Touch Pro not only looks like no other, it performs like no other. Delivering a wealth of information and entertainment, it features the most intuitive and advanced integrated technologies to ensure everyone can make the most of their journey.

Search 'Discovery Infotainment System' for more details.

TOUCH PRO

Touch Pro is our state-of-the-art infotainment system that connects you to your world, delivers a raft of entertainment options and puts all the information in one place. The optional Touch Pro Dual View System¹ is also powered by the 10" high-resolution Touchscreen, and allows the driver and passenger to view completely independent display content. For example, the driver can use the Satellite Navigation system, while the front seat passenger is able to watch a DVD or Digital TV12, where fitted. One set of WhiteFire® digital wireless headphones is also included.

INTERACTIVE DRIVER DISPLAY

Discovery ensures you're always entertained, informed and connected. It features a 12.3" high-definition Interactive Driver Display³ that can receive and project a vast amount of driving information, entertainment and active safety data, including navigation, phone and media. Its high resolution ensures the utmost clarity and its refined processing engine delivers smooth-moving, pin-sharp graphics.

HEAD-UP DISPLAY

Without distraction or the need for you to take your eyes off the road, our enhanced next generation Head-up Display⁴ is an option that presents key vehicle data such as your speed, gear position and navigation directions on the windscreen in the most innovative way. It features crystal-clear, full-colour graphics in high resolution, enabling you to see all driver inputs and information with ease. It can display important information from the Touch Pro Touchscreen, including phone as well as information and guidance for off-road driving via the All Terrain Info Centre. The feature can be turned on and off dependent on driver preference.

Optional on HSE only. 2Digital TV can only be viewed on the 10" Touchscreen when the vehicle is stationary, unless it is fitted with Dual View. ³Standard on HSE. Optional on S and SE with Navigation Pro. ⁴Optional on SE and HSE only.

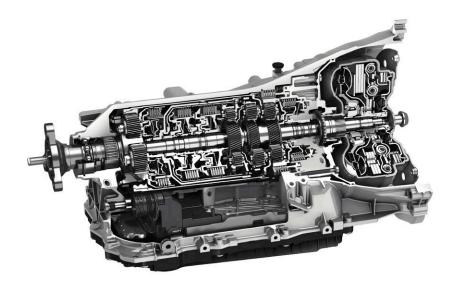

SECURE ACCESS

ACTIVITY KEY

Activity Key makes living life to the full even easier. For extra convenience, you can wear the Activity Key if you prefer not to carry a key fob. The wristband is robust and fully waterproof, allowing you to enjoy a range of activities - from sailing to skydiving - and keep your car key with you. Activity Key has been tested in a number of extreme environments and is therefore capable in depths of up to 30m of water and in temperatures ranging from -40°C to +85°C. You can use the Activity Key to lock and unlock your vehicle. When exiting, you can leave the conventional key fob inside and present the Activity Key to the tailgate to lock it. The conventional key fob is then automatically deactivated for security. Enjoy the Activity Key as an optional feature with SE and HSE, or as a Land Rover Retailer fit accessory.

ENGINES

8-SPEED AUTOMATIC TRANSMISSION

Diesel engines in Discovery Commercial are paired with the advanced, electronically controlled 8-speed Automatic Transmission, which has been tuned by Land Rover engineers to combine silky-smooth shifting with exceptionally rapid response. With eight closely spaced ratios, gear changes are almost imperceptible, with each shift completed in just 200 milliseconds.

Controls include steering wheel-mounted paddle shift as standard, enabling the driver to take control of gear shifting manually. The optimised lightweight 8-speed Automatic Transmission is the perfect partner to the torque-rich diesel engines, and contributes to their notable fuel efficiency.

The transmission is tuned to select torque converter lock-up as early as possible to reduce slip and energy loss. Transmission Idle Control disengages 70 percent of the drive when the vehicle is stationary and the engine is idling in Drive, significantly reducing fuel consumption in urban conditions.

In cold conditions, the transmission selects a lower gear to promote fast warm up and get the engine up to its efficient operating temperature as soon as possible.

INGENIUM DIESEL ENGINES

Sd4 240HP

This is the 240HP high-output version of the Ingenium diesel engine. The series sequential twin turbocharged engine delivers an ideal combination of class-leading performance and superior low-speed driveability.

The engine features a unique piston design and optimised combustion bowls to support the increase in power and torque output. Solenoid injectors, operating at high pressures up to 2,200 bar with an increased injector flow rate of 32.5 percent, are utilised. These open and close at extremely high speeds with ultimate precision to inject fuel for an effortless and more economical drive.

		\bigcirc	CC
	ACCELERATION 0-60 MPH (SECONDS)	TOP SPEED (MPH)	CAPACITY (CC)
2.0L Sd4 Ingenium Diesel 240HP	8.3	121	1,999

DIESEL ENGINE

Sd6 306HP

The 3.0 litre V6 Twin Turbocharged Diesel engine produces 306HP and 700Nm of torque, and is ideal for higher power and torque demand usage with exceptional driveability.

The innovative parallel sequential twin turbochargers - a concept pioneered by Jaguar Land Rover - features a ceramic ball bearing on the primary turbo, to reduce friction for maximum throttle response.

A switchable coolant pump and two-stage oil pump are used for optimal thermal energy management, improving operating efficiency.

The piezo common rail fuel injection system enables precise control of the amount of fuel injected creating a uniform mixture for more efficient combustion and less emissions.

The engine utilises these technologies to offer premium refinement and performance.

	•	\bigcirc	CC
	ACCELERATION 0-60 MPH (SECONDS)	TOP SPEED (MPH)	CAPACITY (CC)
3.0L Sd6 Diesel 306HP	7.0	130	2,993

SAFETY

OCCUPANT SAFETY PROTECTION

Discovery Commercial's optimised aluminium body structure protects occupants using an incredibly strong and stable safety cell. The crash structure is extensively optimised using computer simulation tools, which allows engineers to conduct a significant number of 'virtual' crash tests long before physical prototypes are available.

The occupant safety package includes a comprehensive system of airbags and restraint systems including driver and passenger airbags and head thorax airbags and seat belt pretensioners. Discovery Commercial features four airbags as standard.

SEAT BELT PRETENSIONERS

Acting in conjunction with the airbags, they provide additional protection in the event of a front impact by reducing the forward movement of the occupant.

DRIVING AND PARKING SAFETY AIDS

Discovery Commercial has been designed with safety in mind. There are extensive driving and parking safety aids available, including Emergency Braking, Blind Spot Assist and Reverse Traffic Monitor, Park Assist and 360° Surround Camera. In addition, LED lights have been cleverly developed to wrap around the side of the vehicle, enabling the indicators to be more visible to improve safety. Adaptive LED headlights, available as an option on SE and HSE, combine practicality with distinctive design. For more relaxed night-time driving, adaptive lighting varies the light cast ahead of the vehicle so that the beams follow the curve of the road.

To see the range of driving safety aids available please see pages 32-33. To see the range of parking safety aids available please see pages 34-37.

SAFETY SYSTEMS

- 1 DRIVER AIRBAG
- 2 PASSENGER AIRBAG
- 3 HEAD THORAX AIRBAGS
- 4 AIRBAG DEACTIVATED SWITCH FOR FRONT PASSENGER

- 5 SEAT BELT PRETENSIONERS
- 6 SEAT BELT REMINDER
- 7 ISOFIX/i-size POINT

PERSONALISING YOUR DISCOVERY COMMERCIAL

BLACK DESIGN PACK

For a striking effect Discovery Commercial can be personalised with the optional Black Design Pack on SE and HSE models. The Black Design Pack is available with all exterior colour options and includes a Narvik Black grille, fender vents and mirror caps, with Black Discovery bonnet and tailgate script.

To complement the Black Design Pack, choose from our optional Designer's Choice 20", 21" and 22"* Gloss Black alloy wheels. Other optional wheels are also available. See pages 70-71 for details.

Optional Gloss Black alloy wheels

Narvik Black mirror caps

Narvik Black fender vents

*22" wheels only available on HSE models.

3

CHOOSE YOUR COLOUR

Now you have chosen your Discovery Commercial model, you can select your exterior paint colour. From rich, deep lustres to incandescent metallic patinas, our paints incorporate the latest in pigment technologies. Our solid paints produce a deep flat colour. Our metallics deliver a sparkle finish that is sure to catch the eye; and our premium metallic paints enhance both the colour and the intensity of the sparkle, or sleek metallic finish to give your vehicle even more presence.

LAND ROVER GEAR - ACCESSORIES

Discovery Commercial is so capable and adaptable, it can get straight to work across a huge variety of vastly differing conditions and roles. Even so, some owners want to add their own stamp of individuality by tailoring their Discovery Commercial to their specific needs with a range of stylish, practical accessories that are tough, versatile and bring an opportunity for personalisation.

Importantly, these accessories can be added by your Land Rover Retailer at any stage during the vehicle's life - not just when it's new. Naturally, Land Rover Approved Accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle.

Towing System - Detachable Tow Bar Towing System - Multi-height VPLRT0171 Tow Rar

The detachable tow bar system is easily removed to give the vehicle a clean look and can tow a trailer with a 3,500kg load capacity. Lockable for security. Requires tow eye cover.

Tow Bar VPLRT0175

Multi-height tow hitch allows for three different tow-ball height positions. Simple to fit, once armature installed, and can be swapped between positions in seconds. 50mm tow ball is included and will take up to 3,500kg trailer load and 350kg nose weight. Requires tow eye cover.

 $VPLRT0172-Towing\ System-Electrically\ Deployable\ Tow\ Bar\ VPLRT0192-Electrically\ Deployable\ Tow\ Bar\ Module,$ Switch and Harness Kit

The electrically deployable tow bar is stowed discreetly behind the rear bumper when not in use, providing a clean, attractive finish. It is designed to deploy/stow in 12 seconds and is operated by a switch in the rear loadspace. Returns to original position if any obstructions encountered during deploying/stowing. Towing electrics available separately (also hidden until deployed). Approved for up to 3,500kg trailer load and 350kg nose weight. Requires tow eye cover, tow bar module and switch and

Mudflaps VPLRP0283 - Front VPLRP0357 - Rear

Mudflaps are a popular upgrade for reducing spray and ensuring paintwork is protected from debris and dirt. Engineered to complement the vehicle's exterior design.

Roof Rails1 VPLRR0156 - Silver VPLRR0155 - Black (not shown)

Roof rails facilitate easy fitment of cross bars for roof carrying. Pre-set positioning points ensure cross bars are fixed in optimum position for weight distribution and dynamics. Maximum payload 80kg³.

Cross Bars¹ VPLRR0154

Elegant, durable Bright finish aluminium cross bars, with compact design which utilises the full length of the bars, providing space to mount multiple accessories. Aerodynamic profile minimises drag and wind noise. Maximum payload 74kg³.

Fixed Side Steps² VPLRP0347

The side step aids entry and exit to the vehicle and improves access to the roof. Design features include Bright stainless steel edge trim and a rubber tread mat.

Roof Box1 VPLWR0100 - Large Sports Roof Box VPLVR0062 - Luggage Box (not shown) VPLVR0061 - Sports Roof Box (not shown)

Available in a range of sizes, all versions can be mounted either side for kerbside opening in any country, and include integral locks for security and peace of mind. Carrying capacity ranges from 320 litres for the Sports Box to the 410 litre Luggage Box or the capacious 430 litre Large Sports Box. Large Sports Roof Box maximum payload 52kg³. Sports Roof Box maximum payload 56kg³. Luggage Box maximum payload 57kg³.

THE WORLD OF LAND ROVER

Your Land Rover has been designed and engineered to help you make more of your world. It can take you to places other vehicles simply can't reach, in a style that cannot be matched. To celebrate the Land Rover lifestyle, we've put together a range of experiences, publications and the Land Rover Lifestyle Collection. There's a world to explore. Get out there and enjoy it.

EXPERIENCE DRIVES

ADVENTURE TRAVEL

Bring out your adventurous side and experience Land Rover's legendary capability for yourself. Under the expert guidance of a world-class instructor, head to the most exciting and challenging off-road terrains and take the vehicle to its limits.

landrover.co.uk/experience

From the sheer exhilaration of the Arctic ice to the awe-inspiring dunes of Namibia, Land Rover Adventure Travel offers you once-in-a-lifetime experiences that bring the spirit and emotion of our vehicles to life.

landrover.co.uk/experience

MANUFACTURING TOURS

This is a unique opportunity to step inside our state-of-the-art manufacturing facilities and see where the latest vehicles are born. Taking you behind the scenes, our expert tour guides will show you how Land Rover combines unrivalled craftsmanship with cutting-edge robotics.

landrover.co.uk/tours

SPECIAL VEHICLE OPERATIONS

Whether it's class-leading luxury, thrilling performance or extreme all-terrain capability, Land Rover excels. Special Vehicle Operations takes this even further. Delivering the absolute pinnacle of Land Rover engineering and design, each vehicle combines peerless refinement with power and cutting-edge technology, which is why the SV badge represents so much.

BRAND PARTNERSHIPS

HUMANITARIAN PARTNERSHIPS

Integrity. Courage. Pride. These are the values that Land Rover shares with its partners. Whether it's the Invictus Games, Virgin Galactic, Rugby World Cup 2019™ or the British and Irish Lions, each one is driven by exceptional people. Those who push their capabilities to the very limits and champion the determination to go above and beyond.

landrover.co.uk/sponsorship

Since 1954, Land Rover is proud to have supported the incredible humanitarian work of the International Federation of Red Cross and Red Crescent Societies (IFRC). Through vehicles, funding and combined expertise, this ambitious global partnership has helped to transform the lives of over one million people, across four continents.

YOUR PEACE OF MIND

CUSTOMER SERVICE

When you bring your Land Rover to us, we use cutting-edge diagnostic equipment to assess all your vehicle's mechanical and electronic systems. Our qualified Technicians use tools specifically designed for our vehicles and only fit genuine Land Rover parts and Gear accessories.

For further details contact your local Land Rover Retailer or search 'Land Rover Ownership'.

LAND ROVER ROADSIDE ASSISTANCE

Land Rover Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident, to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

For further details please consult your Warranty Benefits handbook, contact your nearest Land Rover Approved Service Centre or search 'Land Rover Roadside Assistance'.

LAND ROVER FINANCIAL SERVICES

Getting the keys to your very own Land Rover has never been so simple. And it's more affordable than you might think. New or used, for personal or business use, we have an option that puts you in complete control.

For further details contact your local Land Rover Retailer or search 'Land Rover Finance'.

FLEET & BUSINESS

Land Rover is dedicated to being the premium manufacturer of choice for fleets and businesses, by providing a highly attractive range of vehicles and exemplary customer service. Distinctive, capable and versatile, all Land Rover vehicles deliver low Total Cost of Ownership through strong residual values, competitive service, maintenance and repair costs, and impressive fuel economy and CO₂ emissions.

We are also committed to providing a totally customer-focused aftersales service, which will ensure every Land Rover vehicle is kept on the road and in top condition, in the easiest and most cost-efficient way for businesses.

Search 'Land Rover Fleet and Business' for full details.
