# SmartWater Instant, TRACKER and Quickparc

## SmartWater Instant

SmartWater Instant is a unique liquid developed by the Forensic Science Service that contains millions of microscopic particles encoded with a unique SmartWater identification number.

It essentially fingerprints your Mercedes' components, for example its alloy wheels, making it far less likely your car will be targeted by the opportunist spare parts thief.

## Quickparc

In many cases stolen vehicles are retrieved before the thief has a chance to inflict any substantial damage. TRACKER Retrieve and TRACKER Monitor both use radio wave technology, while TRACKER Horizon uses both radio wave and satellite Global Positioning System (GPS) technology.
