open your mind.

smart fortwo coupé & smart fortwo cabrio 2004.

>> open your mind.

## smart.

You'll only find unusual solutions by asking unusual questions. "open your mind" is all about questioning the status quo and seeing it as offering challenges, rather than imposing boundaries. The smart brand follows this philosophy, with each model embodying a departure from convention. The smart fortwo coupé and the smart fortwo cabrio follow a new direction from established small car concepts.

## The smart fortwo.

You're on the road in the rush hour and don't even realise it, you're 1.88 metres tall, you feel totally at home in your 2.5 metres of space. You watch the city and traffic jam calmly and comfortably, and you find a parking space in time for the movie. This is when you realise that the best things come in small packages. Welcome to the smart fortwo coupé and the smart fortwo cabrio.

### The second generation.

With high levels of **comfort, functionality and safety**, the smart fortwo coupé and smart fortwo cabrio are great fun to drive. Thanks to a host of unique features and finely developed technology, these cars offer a standard of refinement far superior than expected in a small car. You feel it as soon as you pull away: The smart fortwo range is brimming with zip. The high-tech turbocharged engines are lively and the transmission offers optimised gear-change sequences. When you're not in such a hurry on longer trips, you can set the optional **cruise control** to your desired speed. You can take hill starts in your stride too thanks to **hill start assist**, which prevents you from rolling backwards when you transfer your foot from the brake to the accelerator. Another useful feature is the **exterior temperature indicator with frost warning** to help you detect icy roads in good time (standard on passion and BRABUS versions). And it's good to know that you'll be safe in the smart fortwo whatever the weather, thanks to the standard **electronic stability programme (esp®)**. esp® will take action to stabilise your vehicle if it senses that it is about to lose control. The integrated **hydraulic brake assist** function is also

ready to intervene whenever necessary. If you step on the brake pedal quickly, but not firmly enough, it will boost your braking power accordingly, to make a decisive reduction in braking distance. Even a smart fortwo needs servicing occasionally and the **service interval indicator** is on hand to remind you when. The electronic system records speed and temperature profiles while the engine is running. On the basis of this data, the trip computer calculates when the next service is due. As you already know, parking is child's play in a car measuring 2.5 metres in length. But for added assistance, the optional **electric power steering** enables you to glide into even the smallest parking space even more elegantly and with minimum effort.

>> The choice is yours.

## The two best ways to get into town: smart fortwo coupé and smart fortwo cabrio.

Whichever model you choose, you'll soon wonder how you lived without it. With the **smart fortwo coupé** or the **smart fortwo cabrio** you can run around town all day without feeling exhausted by the end of it. Plus, if you're driving a smart fortwo cabrio, you can even make the most of the sun too. Despite their distinctive design, the smart fortwo coupé or the smart fortwo cabrio are as diverse in character as the people who drive them. So sit back, relax and take time to find the model which is best suited to you. First decide between the smart fortwo coupé or the smart fortwo cabrio, and choose from the range of economical suprex

petrol engines, available with 50 bhp, 61 bhp or 74 bhp. Then, it's a matter of your own personal taste and instinct. The **pure** model starts the range off with an exceptional level of standard equipment. You'll also love the **pulse** and **passion** models. The pulse is great for those of a sporty persuasion, whilst the passion offers an elegant, sophisticated look. The **smart fortwo BRABUS** has an impressive range of exclusive technical and design features. Have fun discovering the right fortwo for you.

### **The smart fortwo coupé.**

The wide-opening doors of the smart fortwo coupé invite you to climb in. The high, comfortable seats give you excellent all-round vision. You'll be surprised by the spacious interior –there's more than enough room for your weekly shopping in the luggage compartment – and this extends even further when the passenger seat is folded forward. By now you'll have realised that you're driving the perfect city car. With a turning circle of just 8.7 metres the smart fortwo coupé is manoeuvrable and agile. It is economical, has extremely low running costs and very low depreciation. It's no wonder the smart fortwo coupé and smart fortwo cabrio make their owners so happy. With the responsive suprex turbo engine and softip automated 6-speed transmission you can change gear without using the clutch. Not only are they great to drive, the smart fortwo coupé and smart fortwo cabrio offer outstanding design and safety too, with the tridion safety cell in black and silver. The coloured body parts – we call them bodypanels – are made of high-quality plastic. This means that they are flexible, resist minor knocks, don't rust and look good for a long time.

### **The smart fortwo cabrio.**

Maybe it's the way your hair blows in the wind, or simply because the world always looks better in the sunshine: smart fortwo cabrio drivers always turn heads. The touch of a button is all it takes to open the tritop convertible roof. Decide for yourself how much sun you'd like: From partly opened to total cabrio. Simply remove the roof bars and store them neatly inside the tailgate. Whether it's sunshine or showers, you'll always feel bright. That's because you're driving the least expensive cabrio in the world. You'll enjoy the highest level of comfort as well as extra safety. The smart fortwo cabrio combines all the safety features on the city-coupé, and with its high strength steel roll-over bar, its just as solid a proposition.

### **The tritop convertible roof.**

**tritop L**

**tritop XL**

**tritop XXL**

## >> pure.

Whether you're just nipping into town or heading off for a long weekend, you'll always be on the right track with the agile pure. The complete range of **safety features** including **esp® with brake assist**, ensures a safe trip home every time. With its wide opening doors, high seating position and spacious interior, the pure also offers a high level of comfort. The **remote central locking** incorporates

a boot opening function and the **electric windows** add an extra touch of convenience. Also standard are the indicators with **lanechanger function**, which flash three times in response to a brief tap. The **high-tech Mercedes-Benz engines** in the pure keep you cruising comfortably at all times. They are exceptionally economical, leaving you more money to spend on the finer things in life – how about a holiday?

■ **1. Equipment variations:** The pure is available as a classic smart fortwo coupé or a sunny smart fortwo cabrio and comes with a black tridion safety cell. Choose from 50 bhp (smart fortwo coupé only) or 61 bhp engines. ■ **2. Wheels:** Ready to take you for a spin, the 15" steel wheels. ■ **3. Rear lights:** You'll find the unique smart design in every detail, just look at the rear lights. ■ **4. Interior:** In the pure the interior is finished in cool grey. You'll find the switches where they should be – comfortably within your reach.

■ **5. Upholstery colour:** Take a seat and feel at home. The pure's upholstered in tasteful scodic grey. ■ **6. Specials:** The 3-button key can remotely lock or unlock the car and opens the tailgate on the smart fortwo coupé (or the soft top if you're driving a smart fortwo cabrio). For added security, the central locking system also operates the electronic immobiliser.

## >> pulse.

The pulse is the right choice for those of a sportier disposition: with a dynamic appearance, **sporty "coreline" alloy wheels with wide tyres and 3-spoke leather sports steering wheel with steering wheel gearshift.** By choosing the pulse you can look forward to the responsive and torquey 61 bhp turbocharged engine, which is perfectly matched to the **softip 6-speed gearbox.** On the outside, the pulse is available with distinctive stream green bodypanels, whilst the interior offers a

choice of upholstery, vibrant twister green or stylish twister bluegrey, each with semi-transparent highlight elements. The standard **rev-counter and clock** keep you up to speed with your engine and the time. Whilst the **full-length glass roof** lets in plenty of light, but filters out harmful UV radiation. In murky weather, **the fog lights** provide optimum visibility.

■ **1. Equipment & engines:** Driving fun is guaranteed in this smart fortwo coupé or the smart fortwo cabrio, with a sporty 61 bhp engine. ■ **2. Wheels:** Striking and sporty with the dynamic "coreline" alloy wheels (wide tyres, front 175/55 R 15; rear 195/50 R 15). ■ **3. Dashboard instruments:** Clock and rev counter with white backgrounds to match the other instruments. ■ **4. Interior:** This is the reason hands belong on the steering wheel. A 3-spoke leather sports steering wheel with gear shift enables you to

change gear and steer at the same time. ■ **5. Upholstery:** The pulse is available with seats and door trim in a choice of cool twister bluegrey or vibrant twister green. For added opulence, you can always specify leather heated seats. ■ **6. Specials:** Guiding you through the poorest visibility are the fog lights.

## >> passion.

If you're looking for exclusive features, the passion offers you everything you could possibly want. The stylish interior perfectly complement the fine **leather steering wheel** and **gear lever knob**, you can also specify full **heated leather seats**. The **Air conditioning system** means the interior temperature stays just as you want it. The powerful 61 bhp engine is coupled with the automatic **softouch** gear change function with a **kickdown** facility for safer and quicker overtaking. Wherever you go in the passion, you're sure to stand out with stylish "**styleline**" wheels. Enhancing

your comfort and safety, the **comfort windscreen wipers** automatically varies the speed of the windscreen wipers in response to the speed of your vehicle. Whilst the **drive lock function** ensures the doors are locked automatically while you're on the move to keep out uninvited guests. The standard silver **tridion safety cell** perfectly complements the river silver bodypanels a colour exclusive to the passion. Of course you can let your personality roam free, with the choice of seven other exterior colours and the tridion safety cell finished in stylish black.

■ **1. Equipment:** Available as the classy smart fortwo coupé, or the chic smart fortwo cabrio: the passion is equipped with the 61 bhp turbocharged engine. ■ **2. Wheels:** The ultimate in style, elegant "styleline" alloy wheels (wide tyres, front 145/65 R 15; rear 175/55 R 15). ■ **3. softouch:** Change gear with zero effort. The fully automatic gear programme with kickdown function for even greater driving comfort. ■ **4. Interior:** The ultimate

in style at the wheel. Steering wheel and gear lever knob are covered in finest leather, the instrument cluster is set off by a black background. ■ **5. Upholstery:** Choose from elegant bungee grey or distinctive bungee red. If you prefer a little more luxury, you can specify leather heated seats. ■ **6. Specials:** Air conditioning with exterior temperature indicator and frost warning. Your ideal climate 365 days a year.

## >> BRABUS.

BRABUS will thrill all individualists. Sporty, dynamic design elements, high-quality **premium materials** and **wide tyres** give the smart fortwo BRABUS an exclusive touch. The perfected **technical tuning** is sure to make everyone's pulse race with the

**updated 74 bhp turbocharged engine** providing lively acceleration and propelling the cars on to an electronically limited top speed of **94 mph (150 km/h)** (where permitted).

The exclusive styling features ensure that the smart fortwo BRABUS delivers great looks and performance. Combining the innovation customers expect from smart with BRABUS' experience of tuning both cars and engines built over the last 25 years, is sure to deliver nothing but the finest results. Whether you choose the coupé or the cabrio - both models underline your sporty driving style. You're in good hands in the **leather sports seats**, and the **3-spoke sports steering wheel with integrated gearshift** keep you in harmony with the road at all times. The

sports-tuned engine offers maximum driving pleasure with vigorous acceleration, and the 16" BRABUS alloy wheels ride on wider tyres for excellent grip. **Comfort windscreen wipers** and the **Light package featuring daytime running lights and driveway illumination** make the stylish BRABUS models more than a match for any weather and light conditions. Meanwhile, the **drive lock function** keeps uninvited intruders at bay.

■ **1. BRABUS front spoiler and radiator grille:** The front spoiler ensures the smart fortwo BRABUS hugs the road. The radiator grille has a wider opening for maximum cooling performance. ■ **2. BRABUS alloy wheels:** Get ahead of the rest with the sporty 16" BRABUS Monoblock VI alloy wheels (wide tyres, front 175/50 R 16; rear 205/45 R 16). The polished aluminium double-six-spoke design will let others know that you're driving no ordinary small car. ■ **3. BRABUS exhaust with heat shield:** From the track to the road – with its dual pipe central exit and distinctive heat shield, the BRABUS sports exhaust is sure to take your breath away.

■ **4. BRABUS side skirts:** Great for a dashing appearance. The design of the side skirts complements the sporty look of the smart fortwo BRABUS to perfection. ■ **5. BRABUS sports seats:** Ready, steady, go! The leather upholstered sports seats will hold you in place through the most twisty roads. With seat heating and integrated side airbags, they'll also keep you warm and safe when the going gets tough. ■ **6. The BRABUS interior** with 3-spoke leather sports steering wheel and steering wheel gearshift. An absolute VIP lounge of a cockpit.

>> If you want to overtake a smart, your best bet is to drive one.

## Engines and transmissions.

The unique design of the smart fortwo coupé and cabrio are a source of real amazement in traffic. The 698 cc turbocharged engine offers 50 bhp or 61 bhp in the pure, 61 bhp in the pulse or passion and 74 bhp in the BRABUS. The engines also have healthy torque outputs to enable better mid-range acceleration. Clutchless gear changes using paddles on the steering wheel, drivers of the smart

fortwo coupé and cabrio can now enjoy that start-line feeling on the open road with the optional steering wheel gearshift and sports steering wheel. To ensure you don't get carried away, we have electronically limited the top speed to 84 mph (135 km/h), or 94 mph (150 km/h) on the BRABUS models (where permitted).

### **Giving the all-clear before you even start the engine: The control centre.**

Before you turn the ignition key and start the engine, your smart fortwo has already been busy. To put it more precisely, it's controllers are the electronic brain. They are connected to all of the smart fortwo's important functional elements and perform on-board diagnosis in a fraction of a second. The smart fortwo will start only when everything is functioning smoothly. If any minor irregularities are detected, they will be saved in the memory. The next time the smart fortwo is serviced at the smart Centre, they are analysed by the off-board diagnosis system and corrected, if necessary.

#### **softip – changing gear without using the clutch.**

The pure and the pulse both feature the softip gear-change function. The sequential 6-speed transmission changes up and down automatically in response to a gentle tap on the shift lever. When the vehicle is stationary, it changes automatically into first gear.

#### **softouch – the automatic gear programme.**

The softouch automatic gear programme with kickdown function comes as standard in the passion and BRABUS models. It is designed to respond perfectly to varying driving characteristics. For a sportier driving style you can switch to softip at the touch of a button for manual gear changing without any clutch work.

#### **Steering wheel gearshift.**

The steering wheel gearshift function on the 3-spoke leather sports steering wheel allows you to change gear by means of shift paddles, without taking your hands off the wheel. Standard for pulse and BRABUS.

## >> The engines.

A look under the carpet of the rear luggage shows what sterling work the smart and Mercedes-Benz engineers have done in developing the suprex turbocharged powerplant. The compact and lightweight 59 kg aluminium engine offers more

power and torque than expected from such a small engine, resulting in lively performance.

1. 50 bhp, 61 bhp or 74 bhp (BRABUS)
2. Electronic accelerator
3. Dual ignition
4. 3 cylinders
5. Engine capacity 698 cc
6. Exhaust gas turbocharger and charge air cooler
7. Automated sequential six-speed transmission

### The suprex turbo engine.

The suprex turbo petrol engine powers the smart fortwo coupé and smart fortwo cabrio with 698 cc of cubic capacity, 3 cylinders and turbocharger with charge air cooling. Available with a power output of 50 bhp or 61 bhp in the pure, 61 bhp in the pulse or passion and 74 bhp in the BRABUS. The torque outputs of 80 Nm, 95 Nm and 110 Nm respectively ensure great flexibility. What's

more, the new engines already comply with exhaust gas standard EU 4 which will not become law until 2006. This means a more than 50% reduction in the pollutants HC, CO and NO<sub>x</sub> compared with the currently applicable exhaust gas standard EU 3. The maintenance-friendliness and reliability of the engine are exemplary.

>> Safe and sound.

## Safety.

The **tridion safety cell** helps to keep you unscathed, should the worst come to the worst. In combination with the **crash management system**, it offers all-round passive protection. But before these safety features need to prove what they can do, the **active damage prevention system** intervenes. This system includes the **anti-lock braking system (abs)** with **electronic brake-force distribution** and the

**electronic stability programme (esp®)** with **brake assist**. Not forgetting numerous effective **safety elements** such as the **smart safety seats** with **integral seat belts**, **belt tensioners**, **belt force limiters** and the **full-size airbags**. The smart fortwo coupé and the smart fortwo cabrio are tough customers who know how to look after themselves and you.

### 1. The tridion safety cell.

The tridion safety cell protects its sensitive contents like the hard shell of a nut. The steel structure is additionally reinforced with high-strength steel at the strategically important points. The tridion's longitudinal and transverse members activate the crumple zone of the other vehicle involved in the accident and distribute the impact energy evenly over the safety cell.

### 2. The wheel as a buffer.

smart has reinvented the wheel... as a safety element. If another car hits your smart fortwo from the side, the compactness of the smart fortwo is a great advantage. Thanks to the ultra-short wheelbase, the other car will almost always hit a wheel, allowing the suspension components to deform and absorb some of the crash energy. In the event of a head-on collision, the front wheel performs as a crumple zone to help absorb the impact energy. In the Euro NCAP crash tests, the tridion safety cell remained rigid even at an impact speed of 40 mph against a deformable barrier, allowing both doors to be opened easily.

### 3. The crash boxes.

The smart fortwo coupé and cabrio each have 2 crash boxes: The front box is reinforced with transverse members and slip tubes, while the rear box has an aluminium support. These parts and the bodypanels shrug off knocks at up to 2 mph with virtually no sign of damage. In a collision at up to around 9 mph, they serve as a crumple zone and prevent the tridion safety cell from being damaged. The damaged crashboxes are modular and can be replaced quickly. The plastic materials used on both the exterior and interior are shatterproof for added safety. The fuel supply will be stopped in the event of a crash, and the central locking system will unlock automatically.

### 4. The sandwich-type construction.

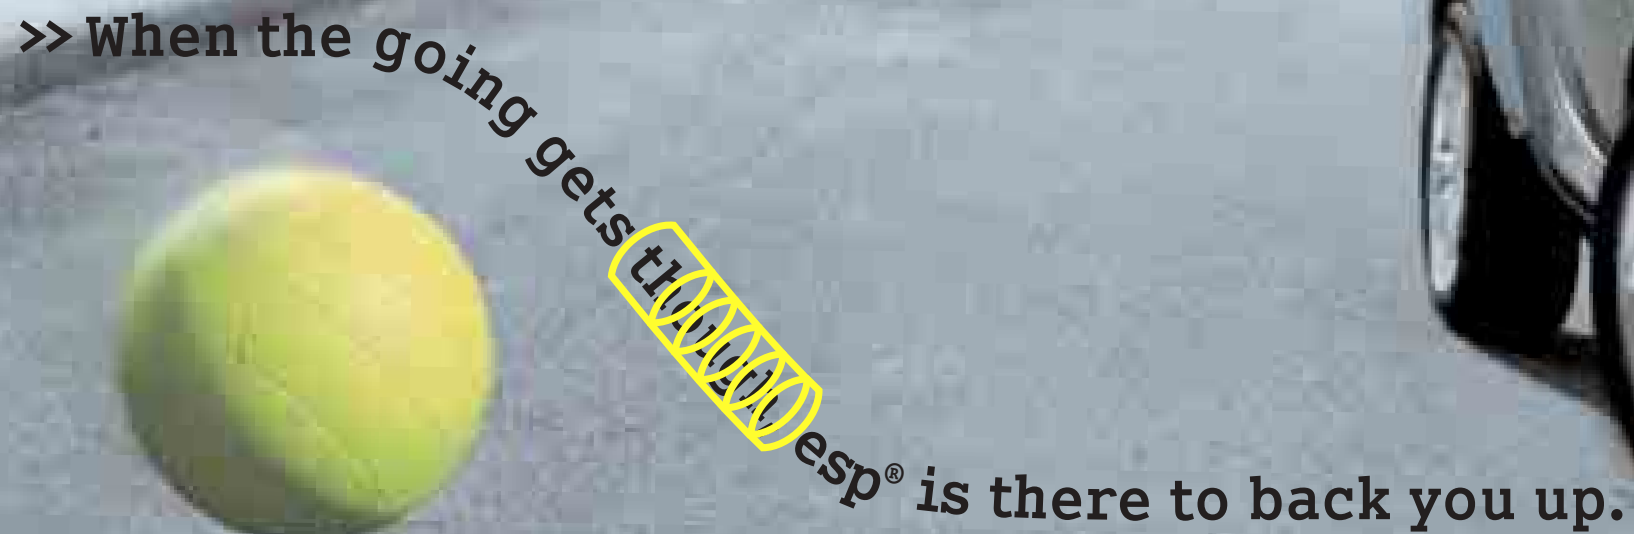

Sitting higher means staying on top in tricky situations. Thanks to the sandwich-type construction and raised seating position, the passengers are usually outside the direct danger zone in the event of side impact, and the driver enjoys a significantly better view.

## >> Your smart fortwo is well prepared for the unexpected.

Even the best driver may end up in a skid at some time. Thanks to esp<sup>®</sup>, when things get critical you can rely on the smart fortwo coupé and smart fortwo cabrio to keep you on course within the given physical limits and help you to avoid accidents. The

seating position is higher than in many cars, you enjoy free visibility to either side and a reassuring feeling of firm support. You know you're in good hands. The seats in this car don't just carry your weight, they actually seem to hug you.

>> When the going gets tough, esp<sup>®</sup> is there to back you up.

### esp<sup>®</sup> and brake assist.

The fortwo range comes with the **electronic stability programme (esp<sup>®</sup>)** as standard the sort of advanced safety equipment you'll only normally find on large saloons. The on-board sensors recognise certain dangerous situations in good time. For example when the rear end threatens to break away, the car understeers, a wheel spins or loses road contact. esp<sup>®</sup> is able to moderate the engine power and selectively brake individual wheels to

stabilise the car and bring it back on track. The **hydraulic brake assist** system also makes a decisive contribution to driving safety too. The esp<sup>®</sup> sensors can detect when you are attempting to perform an emergency stop, and apply maximum braking effort to bring the vehicle to a halt quickly, even if you haven't pressed the pedal hard enough. Hydraulic brake assist can save you those vital few yards in a tricky situation.

### The seat belt tensioners and belt force limiters.

In a serious impact the seat belt tensioner will reduce any slack in a matter of a few milliseconds to hold you firmly in position. The belt force limiter can release a controlled amount of belt carefully before too much pressure is exerted on the chest. In addition, the airbags and knee protectors ensure that the impact of the passengers is cushioned as effectively as possible.

### The seating position.

The passenger seat is positioned 15.5 cm further back than the driver's seat. Not only does this give you more shoulder room but if the smart fortwo is hit from the side, this prevents the driver and passenger colliding with one another. It also provides the driver with a good side view. The seat belt guides are integrated into the seat backrests, to ensure that the seat belt is always in the optimum position to protect you.

### The integral safety seats.

The seats in the smart fortwo are called integral safety seats and for a very good reason. You don't just sit comfortably, you are also well protected. They comprise a modular metal structure and the seatbacks are reinforced with strong steel shells. The headrests are integral elements of the safety seats and are always in place to offer maximum protection. If the smart fortwo is hit from behind, the rear crash box, the tridion safety cell and the rear-mounted engine will absorb much of the crash energy. Whilst the integral safety seat design gives enhanced protection and leaves you in no doubt that you're in safe hands.

### abs with electronic brake-force distribution.

The anti-lock braking system (abs) and electronic brake force distribution come as standard on all smart models. abs enables you to brake heavily whilst maintaining the control to steer around objects in your path. Whilst electronic brake-force distribution can direct maximum braking effort to the wheels with most traction.

■ 1. You sit well back in the car, distanced from the perils ahead. ■ 2. In the event of a serious front-end collision, the steering column retracts telescopically out of harm's way. ■ 3. All smart models are equipped

with full-size driver and passenger airbags as standard. For added safety, side airbags are also available as an option.

>> If you've got it, flaunt it!

## bodypanels.

The smart fortwo's body components (bodypanels) come in 9 different colours. The four basic colours lite white, jack black, phat red and stream green are produced in self-coloured plastic to hide minor scratches. Like the metallic colours and the cubic prints, they are completely exchangeable and recyclable, do not rust and withstand minor bumps without denting. Should any panel be badly damaged, you can replace it in next to no time. A complete bodypanel freshen-up costs no more than having a wing replaced on many cars. The smart bodypanels are the first body components of their type to go into serial production, making them a truly unique feature.

### The tridion colours.

The tridion colours allow for further individualisation of your smart fortwo. The pure and pulse models are supplied with a black tridion as standard, with the option on the pulse to upgrade to a tridion in silver. The passion comes equipped with a silver tridion. Although if you prefer, a tridion finished in black is a no-cost option. BRABUS models are available in a choice of two co-ordinated colours: black bodypanels with a black tridion or silver bodypanels with a silver tridion.

### The cubic prints.

Whether you opt for scratch black or numeric blue, your smart fortwo will be the only one like it on the road - no two sets of cubic panels are the same. In a special process, a unique pattern is printed onto the bodypanels and then preserved under a coat of hardwearing clear enamel.

### Exchanging the bodypanels.

If you feel like a change, just drive to your nearest smart Centre. In next to no time we'll exchange the bodypanels for different coloured ones.

>> The best seats are reserved for you.

## The interior.

Whether you go for an elegant appearance or a more fresh and upbeat look for your smart fortwo, you can't go wrong. The bodypanels, the tridion safety cell and the interior colours are perfectly co-ordinated and the seats are optionally available in black leather for the pulse and passion. The smart fortwo BRABUS even features heated leather sports seats as standard. Check it out for yourself and discover your own special style.

### pure

In the pure the seats are upholstered in tasteful scodic grey fabric. The interior is discreet in character, featuring matt grey contrast components (1).

### passion

The passion focuses on a stylish appearance: Seats in bungee red, with red contrast components (5) or bungee grey with grey contrast components in gloss finish (6). Or for a more luxurious finish you can choose black leather (7, option).

### pulse

In the sporty pulse the seats and door trim are in twister green (2) or twister bluegrey (3). The corresponding contrast components are semi-transparent and coloured green or blue. The seats are optionally available in black leather with seat heating (with twister bluegrey door trim and contrast components) (4, option).

### BRABUS

The exclusive BRABUS interior treats the driver and passenger to heated leather sports seats. The door trim and dashboard are also covered with black leather. The sporty and luxurious character of the interior is rounded off by the BRABUS gear knob and handbrake handle in a stylish combination of leather and aluminium, the BRABUS highlight components and the BRABUS aluminium pedals (8).

>> Not exactly essential. But nice all the same.

## Options and packages.

The smart fortwo coupé and smart fortwo cabrio already include a high level of equipment as standard, but there is still scope to tailor your smart fortwo by adding special features and accessories from our range of factory fitted optional equipment. The option packages offer greater value for money by combining a selection of complementary options together.

### >> The option packages.

The option packages offer greater value-for money by combining a selection of complementary options together.

#### The Safety Plus package.

The **front fog lights** improve visibility and look good into the bargain. They are particularly powerful, but will not dazzle you or other motorists. The **side airbags** are integrated into the driver and passenger seat backrests and open only on the side on which impact occurs. The **electrically adjustable and heated door mirrors** ensure good visibility to the rear, even in the winter.

### The Comfort package.

The **softouch automatic gear programme** controls your gear changes and offers a kickdown function for safer overtaking. **Electric power steering** makes parking even simpler and more convenient. **The drive lock function** keeps you safe and sound while you are on the move. Above 9 mph (15km/h), the doors lock automatically to protect you from

unwanted intruders. **The comfort windscreen wiper** adapts its wiping frequency to the speed of the smart fortwo, enabling you to devote your full attention to the traffic.

### The Light package.

The **daytime running lights** further enhance active safety. The dipped beam goes on automatically while you are driving. **The driveway illumination** guides you to your door: The interior lighting and the headlights remain on for 12 seconds after locking and unlocking the smart fortwo.

## >> Optional equipment.

■ **1. Electric glass sunroof:** With a large opening to let those rays pour in. When closed, the strongly tinted heat-reflecting glass keeps you cool. The sunroof opens and closes conveniently at the touch of a button. ■ **2. Leather upholstery:** A touch of luxury – with two-stage heating to keep you comfortable in the depths of winter. ■ **3. 3-spoke leather sports steering wheel with steering wheel gearshift:** Change up and down without

using the clutch at all. The 2 shift paddles on the steering wheel enable swift, sporty gear changing and in bends, your hands remain where they belong – on the steering wheel. Alternatively, the softip gear change function can be activated at any time. ■ **4. Power steering:** The smart fortwo coupé and smart fortwo cabrio are already a doddle to park. Make your job even easier by specifying the electrically assisted

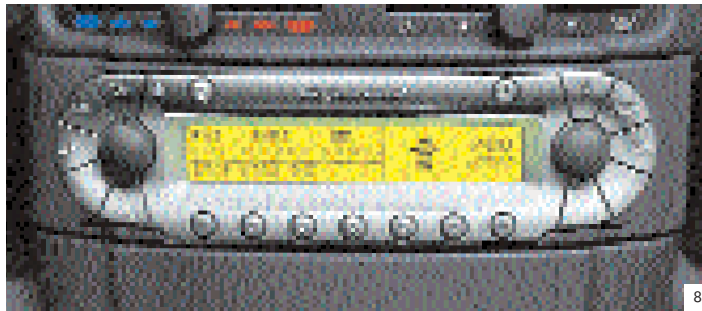

power steering. ■ **5. Air conditioning:** CFC-free, with programmed Light and Max functions and exterior temperature indicator with frost warning. ■ **6. Cruise control with speed limiter:** Treat your right foot to a rest on long journeys with cruise control. The speed limiter function helps you to stay on the right side of the law. ■ **7. Radio CD:** FM radio with RDS and CD player. High power output, clear sound quality and attractive

design complement your car to a T. Fully compatible with the smart sound package and 6-disc CD changer and equipped with an anti-theft security number code. Sounds good, doesn't it? ■ **8. Navigation system:** Including RDS tuner, CD player and Europe-wide GPS routing. You know where you want to go and the navigation system knows how to get you there, in 17 countries throughout Europe. It will also direct you

7

8

9

10

11

12

13

14

to railway stations and petrol stations. Simply insert the navigation CD, enter the town and address you are headed for and then follow the instructions on the screen and the voice which tells you how to get there. ■ **9. 6-disc CD changer:** After all, you've more than just one favourite CD. The CD changer is stowed away under the passenger seat to make optimum use of the available space. Fully compatible with the smart radio/cassette

and radio/CD (not compatible with the Navigation system). Including shuffle and scan search functions. ■ **10. "jetline" alloy wheels:** Cut a dash with these stylish wheels (front: 4 J x 15 fitted with tyre size 145/65 R 15 and rear 5.5 J x 15 fitted with tyre size 175/55 R 15). ■ **11. "sportline" alloy wheels:** The sporty alternative for your smart (front: 4 J x 15 fitted with tyre size 145/65 R 15 and rear: 5.5 J x 15 fitted with tyre size

175/55 R 15). ■ **12. "strikeline" alloy wheels:** Combining a distinctive double-3-spoke design with increased grip from the wide tyres (front: 5 J x 15 fitted with tyre size 175/55 R 15 and rear: 6.5 J x 15 fitted with tyre size 195/50 R 15). ■ **13. BRABUS "Monoblock VI" alloy wheels:** You'll be streets ahead with the sporty "Monoblock VI" wheels in polished silver double-6-spoke design (front: 5.5 J x 16 fitted with tyre size 175/50 R 16

and rear: 6.5 J x 16 fitted with tyre size 205/45 R 16). ■ **14. BRABUS sports exhaust with heat shield:** The sports exhaust with centrally positioned double pipe looks so good, it will take your breath away. **Not shown: Heated seats:** Banish the winter blues with heated driver and passenger seats. Two temperature settings for added convenience **Sound package:** Enhances the sound quality of your stereo.

>> As you like it.

## smart accessories.

From the bicycle rack to the sound system, smart accessories represent the ultimate in fun and convenience. You never know what's around the corner, smart accessories cover all contingencies - from new additions to the family to fresh snow on the roads. It's up to you what you wish to take on board. Would you like

more comfort for your feet, more stowage space, a new colour for your smart - or everything at once? You'll find the complete smart accessories programme in the current accessories catalogue.

## Interior

1

**1. Velour floor mats:** A touch of quality underfoot. Extremely hard-wearing thanks to non-slip backing, water- and dirt-repellent. With coloured chain warp and smart logo.

## Exterior

2

**2. Basic rack:** The basic attachment for special racks. Load-bearing capacity of 30 kg, does not rust, easy to fit, protected against theft by multipoint head cap screws. Shown here in combination with the bicycle rack for two bicycles.

## Functions & telematics

3

**3. The universal hands-free system:** Makes it legal to use the telephone while you're driving. Your audio system will be interrupted when you receive a call and re-activated automatically at the end of your conversation.

## Driving dynamics

4

**4. Wheel trims:** Round off your wheels in a highly attractive finish.

## Safety

5

**5. Child airseat:** An even safer and more enjoyable journey for the little ones. For all children weighing from 9 to 36 kilograms.

tuning down to the last detail for rev counter, clock, grips, instrument panel, indicator end caps, and door handles. ■ **9. BRABUS gear knob range:** Gear knob in leather-aluminium combination or in solid aluminium. softip and softouch, gloss or matt. ■ **10. BRABUS handbrake grip:** Looks good, feels

good. The solid handbrake handle is available in polished or matt finish, leather sleeve. ■ **11. BRABUS central armrest:** Supports relaxed sporty driving for driver and passenger. Black leather, padded, incorporating additional storage space. ■ **12. BRABUS aluminium pedals:** Almost too classy to put your feet

on. Aluminium covers for accelerator and brake pedals, polished or matt, anti-slip rubber grips. **Not shown: BRABUS side flaps** for coupé/cabrio, front and rear. **BRABUS rear insert** in perforated stainless steel for standard and sports exhaust. **BRABUS velour floor mats.** **BRABUS mirror caps** in chrome

look. **BRABUS sports suspension 1** with 4 sports springs and 4 shock absorbers for more dynamic performance and increased driving pleasure. Springs and shock absorbers also available separately. Designed especially for 17" wheels: **BRABUS sports suspension 2.**

## >> smartware.

### bags

Choose the right bags to suit you and your smart. For quick trips and longer journeys. wheel bag, weekender bag, shoulder bag, rucksack, hip & cross bag, shower bag, pencil case, snap wallet and orgabook.

### model cars

Small as they are, these model cars are genuine smarts. Fun-packed remote control and push-along models. RC smart fortwo cabrio 1:12, RC smart fortwo coupé 1:50, smart fortwo coupé and cabrio on scales of 1:18, 1:43 or 1:87.

### kids

smartware kids just goes to show you don't need a driving licence to enjoy smart. Ride-on roadster, smart Jumbo cuddly toy, kids' watch, velour scarf, and painting and games book.

## >> smartcare.

### accessories

### fashion

smart down to the smallest detail: smartware accessories to cover all manner of occasions for every smart driver. clockware, base sunglasses, smartware key fob, smartware belt and smartBrella.

You always look stylish in a smart. In smart fashion you'll cut a dash outside of your car, too. "forever love", "light my fire", "pirate" and "evolution" T-shirts.

### care series

The smartcare range. All the best for your smart. Available as individual products or in practical care boxes. **Exterior care:** Rim care, insect remover and soft top hood cleaner, each 500 ml, shampoo concentrate, hardwax and polish, each 250 ml, impregnating spray, 300 ml. **Interior care:** Leather care, cockpit care and stain remover, each 250 ml,

500 ml glass cleanser and microfibre cloth. **Fluids:** Engine oil and window cleaner concentrate for winter, each 1000 ml, window cleaner concentrate for summer 250 ml. **Care boxes & paint sticks:** smartcare products in a practical box and paint sticks to touch up minor scratches

>> A smart doesn't only protect its driver.

## Ecology.

It may sound like a paradox, but sometimes you have to rock the boat to keep things on an even keel. That's why we at smart are continually questioning established practices and coming up with innovative solutions. smart environmental policy is geared to ensuring that DaimlerChrysler's guidelines on the **protection of the environment** and the **conservation of energy and natural resources** are applied in uncompromising manner. These guidelines play a crucial role in all our considerations. From vehicle development through production in **smartville**

to the recycling of many components. smart is more than a car. smart is about a **specific outlook on life**. Whether in scratch black or lite white – essentially, every smart is green. All outsourced parts and components are developed and built in accordance with uniform ecological criteria. Instead of waiting for the problem of taking back and dismantling vehicles for subsequent recycling to come to us, we tackle it during the development phase.

### **smartville production.**

To the left an orchard, to the right a corn field: This is the idyllic setting in which smartville nestles, and in smartville, even the buildings are ecologically compatible. All of our buildings at the industrial estate in the French town of Hambach are free of harmful substances such as formaldehyde, CFCs and asbestos. The facade panelling is made from a material called Trespa, 80% of which comes from fast-growing European timber. Naturally enough, the company operates its own biological waste treatment facility, and a heat recovery system in the area of plastics processing. After all, an ecological car can only be produced at an ecological factory.

### **Powder coating.**

This is regarded as the most environmentally-friendly painting method there is in the car industry. Powder coating uses 40% less energy than conventional painting methods, with zero solvent emissions. Paint slurry is a thing of the past too. Surplus powder paint is collected and 98 % is reused for painting. This is just one example of the environmentally friendly production processes we employ in smartville.

**Perfect smart. Perfect payment plan.** smartstart continues the smart philosophy of convenience, flexibility and simplicity. We offer a range of payment options so you can pick the one that is best for you.

If you wish to own your smart at the end of the contract, there are two options to choose from – **smartstart Hire Purchase** and **smartstart Contract Purchase**. The right choice for you will depend on your personal circumstances and requirements. If you would rather hire than buy, we also offer **smartstart Operating Lease** – which means at the end of the contract, you can simply hand your smart back.

We also offer **smartstart Repair & Maintenance** – a regular fixed monthly payment that can be added to any finance agreement. It covers your routine servicing and maintenance costs, allowing you to budget confidently and avoid any out of the blue repair bills.

**smartstart Insurance** is a fully comprehensive motor insurance policy especially designed for smart owners.

Cover includes:

- New car replacement – during first year of registration if repairs exceed 60% of market value, subject to your smart being owned by you or your spouse/domestic partner
  - 24 hour accident and claims service
  - 90 days automatic cover for most of mainland Europe for temporary visits (up to 3 months in any one trip)
- Be smart – call us now for a quote on: **0870 780 2280\*** quoting ref. scb04  
Lines open: 8.00am to 8.00pm weekdays, 9.00am to 5.00pm Saturday. \*Calls may be recorded.

**smartstart Insurance** is administered by DaimlerChrysler Services Insurance Solutions Limited, independent insurance intermediaries, member of the General Insurance Standards Council.

**smartstart Protection - finance gap.** If your smart is written off by your insurer and the claim payment doesn't cover your repayments, finance gap simply pays the difference up to £10,000.

**smartstart Protection Plus - invoice gap.** If your insurer declares your smart a total write-off and pays out less than the original invoice price, invoice gap will pay the difference up to £25,000.

**smartstart Assurance** will take care of your payments if you are made redundant, taken ill or suffer an accident that prevents you from working. There are 4 levels of cover to choose from.

This is only a brief summary of cover; please ask your retailer for full terms and conditions, including exclusions.

### smart service.

Should a problem arise with your smart, we'll make sure it's quickly back on the road. Swift repairs are made possible by the modular design of your smart and the modern diagnosis systems which we employ. smart workshops are manned by highly qualified personnel, and state-of-the-art technology and paperless workshop organisation ensure maximum efficiency and transparency. It's not only its low fuel consumption that makes your smart one of the most economical cars around. Short stays at the workshop, low maintenance and repair costs and a low insurance rating mean you can rest assured that your smart won't strain your wallet.

**smart warranty and smart warranty plus: Quality pays.** We're convinced that your smart will provide you with lasting pleasure, and back this up with a 2-year warranty with unlimited mileage, plus a 6-year warranty against rusting through from the inside to the outside. Smart warranty plus enables you to extend the manufacturer's warranty in many countries.

**assistance and optional smartmove assistance plus:** The international smartmove assistance service provides round-the-clock breakdown assistance free of charge. In some countries you can expand and extend this cover with smartmove assistance plus, which offers a broader scope of breakdown services and assistance in the event of accidents, theft and personal emergencies.

The information in this catalogue is to be regarded as approximate. The illustrations may contain non-standard accessories and extras. Any photographs of drivers who are not holding the steering wheel with both hands have been taken while the car was stationary. We reserve the right to change the design, technical features and scope of delivery. Any variations in colours result from the printing process.
