Even more of a good thing

Take a close look. The Toyota Corolla has evolved. Externally, internally as well as under the bonnet, it has developed into an even more exciting experience with refinements and enhancements that make Corolla more desirable, more satisfying - in fact, a car to be even more proud of.

Take delight in the styling refinements that give Corolla a more dynamic appeal and stronger presence on the road, while appreciating the re-designed interior with its fresh, contemporary trim and quality feel. Notice, too, the safety enhancements, such as a curtain airbag on all models, and sense the overall aura of superior quality.

Above all, take pleasure in the choice of an extra engine, a new, highly efficient diesel power unit that comes with the innovative option of Toyota's revolutionary Multi-mode Manual Transmission - a Toyota first. And, thanks to new sound-insulation and damping enhancements, enjoy an even smoother, quieter ride.

Corolla - an altogether new driving experience.

Sports Dials with Red Illumination

Unique to Corolla T Sport, white dials with red illumination match the red accented trim and add a sporty and stylish touch.

Blue accented trim

Show your individuality with eye-catching blue-keyed interior trim, standard on the T₃ model.

Airbags

All Corollas feature driver, front passenger, side and curtain airbags as well as an airbag cut-off switch as standard.

Superior quality makes the difference

Corolla embodies all the values and attributes that Toyota customers expect - innovation, quality, outstanding design and sheer driving pleasure.

All these qualities are evident across the entire Corolla range - three-, four-, five-door and estate models with a choice of seven responsive petrol and diesel engines. And within four grade specifications - the well-equipped T₂ model, the enhanced T₃, the luxury T Spirit, and the exciting T Sport.

Corolla's dynamic new looks are matched by the attention to detail in the new superior quality interior - the carbon look of the T₃, the

ultra-modern trim of the T Spirit and the exciting red accent and carbon finish of the T Sport.

As always with Toyota, safety is paramount. Which is why, in addition to new curtain airbags across the range, complementing the front and side airbags for front-seat occupants, there's a seatbelt warning buzzer and light indicator. What's more, there's a standard airbag cut-off switch for parents who use a front-seat, rear-facing child safety seat.

At Toyota, we try to think of everything.

More driving pleasure

Corolla makes driving even more enjoyable thanks to a range of refinements that deliver more comfort, more flexibility and more satisfaction.

Every model is fitted with a tilt and telescopic steering column for maximum comfort, while thicker sound-insulation material in the roof, plus new lining elsewhere, makes every journey a quiet, enjoyable experience. Diesel engine models also benefit from special damping materials, acoustic windscreen glass and extra thick floor carpet lining.

The new engine - a 1.4 litre D-4D powertrain - delivers 90ps for a lively performance, combined with excellent fuel economy and low emissions

(it conforms to the latest Euro Step IV emissions regulations). What's more, it's offered with the option of Toyota's innovative Multi-mode Manual Transmission (MMT), a five-speed gearbox that allows the driver to choose between sequential manual and automatic modes, thereby combining the direct feel of a manual with the convenience of an automatic.

Together with improved handling and gearshifting, plus enhanced steering on the T Sport, Corolla takes driver satisfaction to new levels.
