The Transporter Trendline

The limited edition Transporter Trendline.

The Transporter Trendline is the latest version of the world's best-selling van. The Transporter panel van has few rivals, along with a legendary reputation for image and reliability. Its versatility means that it will handle a wide variety of tasks for all sorts of businesses. Thousands of customers have already enjoyed the benefits of ownership such as low running costs, high residual values and generous warranties.

Designed to give you that little extra, the Transporter Trendline can make owning and driving a van a real pleasure. Take air conditioning for example; having become increasingly popular in many passenger cars, it is now sought after by van owners too. So the Transporter Trendline has air conditioning as standard along with electric windows and door mirrors, central locking with internal locking control, driver's seat armrests, dual passenger seat, full bulkhead, Reflex Silver metallic paint and stylish full diameter wheel trims. This additional specification comes at a very special price – less than the cost of specifying all this equipment separately. And because the Transporter Trendline is so special we've limited its availability to just 500 vehicles, to make you feel even more special when you buy one.

The Transporter Trendline is based on a short wheelbase Transporter panel van with a 1.9 litre TDI PD diesel engine with an impressive power output of 104PS. This engine features Volkswagen's 'Pumpe Duese' (PD) unit injector technology that delivers smooth power and economic fuel consumption. Independent suspension on all four wheels, agile handling, a slick dashboard mounted gear change, combined with a well thought-out ergonomic cab make the Transporter a great workplace and a real pleasure to drive. Safety is highly important too with ABS braking and ASR traction control as standard, along with a driver's airbag. Security is assured with deadlocks, remote control central locking and rear doors without windows. In addition the Transporter Trendline comes with an engine immobiliser and visible VIN for added security.

Like every Volkswagen Transporter, the Trendline comes with a 3 year whole vehicle warranty, which consists of a 2 year manufacturer warranty and 1 year Van Centre warranty or 100,000 miles, whichever comes first. Its galvanised steel body comes with a 12 year anti-perforation warranty and 3 year paint warranty.

So, on top of the usual high specification found across the whole Transporter range, the new Transporter Trendline offers so much more. With the added bonus of immediate delivery, we wouldn't want you to miss out on securing this special limited edition Transporter, so hurry while stocks last.

Standard features.
