Therefore, either when you report a theft, or the TRACKER Network Control Room contact you to advise you of a possible illegal movement, the unit is activated via a network of radio transmitters. Once activated, the unit emits a silent signal which allows computers fitted in police cars and helicopters to track your vehicle - and anyone driving it - down to their exact location.

TRACKER Echo

The BMW junior seat I-II with height and tilt adjustable backrest and restraint cushion is an ideal solution for children between 9 months and 7 years ((to 25 kg body weight). The restraint cushion offers ideal protection to children from 9 months up to approx. 4 years: It reduces the impact of the forces acting on the cervical spine in the event of an accident. For children with a body weight in excess of 18kg or approx. 3.5 years, the restraint cushion is no longer used. Your child is then secured in using the vehicle seat belt.
