# THE VOLVO C70

The rare combination of performance, precision and stability makes it easy to enjoy life behind the wheel of a Volvo C70 Convertible. The sense of freedom and exhilaration is never further away than the touch of a button combining the performance of three engines ranging between 163 bhp and 245 bhp and three generous specification levels. Unique safety solutions like our protection systems for side collisions, rear collisions and roll-over accidents make the Volvo C70 Convertible one of the world's safest open cars.

## T5

The T5 2.3 litre, turbocharged, in-line, 5 cylinder engine delivers outstanding performance – producing 245 bhp and 330 Nm torque. This extremely smooth engine features variable valve timing on the exhaust side and a responsive turbocharger designed to deliver maximum torque from low and medium engine speeds. Effortless performance and refinement are balanced with excellent fuel consumption.

## DOLBY SURROUND PRO LOGIC

The Volvo C70 was the first car in the world to be available with the Dolby Pro Logic Surround System™<sup>(ii)</sup>. The Pro Logic option adds an audio processor and a centre loudspeaker to the existing high performance sound system and delivers a 'wrap around' sound that transforms the car into a concert hall.

- (i) For best performance and lowest fuel consumption 98 RON is recommended. 95 RON can be used for normal driving.
- (ii) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.
- (iii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.
- (iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 750 kg.

**Notes**  
The weight of the vehicle will influence the level of CO<sub>2</sub> emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO<sub>2</sub>. Once a vehicle has been built it will be given its own specific CO<sub>2</sub> emission on which the Vehicle Excise Duty will be charged. A weighbridge must be used to determine specific weights. Data valid for manual transmission unless specified. All measurements in mm.
