# THE VOLVO C70

The Volvo C70 was styled as a coupe but designed to be a convertible. Equally stunning whether the roof is up or down, the transition from sporty coupe to luxury convertible takes less than 30 seconds. With four distinctive trim levels to choose from and a Dynaudio sound system, the Volvo C70 is not for the shy and retiring.

## DYNAUDIO

Concert-hall sound experience courtesy of high performance loudspeakers, advanced sound processor and 910 watts of output power.

## RETRACTABLE HARD TOP

The contemporary three-piece retractable hard top delivers several benefits over a soft-top design; from providing comfortable and spacious seating for four adults, to a warm and cocooned environment in the depths of mid-winter; the elegant and distinctive configuration enables you to enjoy your Volvo C70 all year round, whatever the weather.

(i) For best performance and lowest fuel consumption, 98 RON is recommended. 95 RON can be used for normal driving.

(ii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally, driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.

(iii) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.

(iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 700 kg.

**Notes**

The weight of the vehicle will influence the level of CO<sub>2</sub> emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO<sub>2</sub>. Once a vehicle has been built it will be given its own specific CO<sub>2</sub> emission on which the Vehicle Excise Duty will be charged.

A weighbridge must be used to determine specific weights.

Data valid for manual transmission unless specified.

All measurements in mm.

The Max. output figures are quoted in PS (Pferdestärke), which is the metric equivalent of brake horsepower.
