BMW EfficientDynamics delivers impressive emissions reductions and better fuel consumption without sacrificing driving pleasure. This is achieved through a combination of intelligent engine management systems, innovative new technologies and the use of lightweight materials.

Electric Power Steering.

By using an electric motor to assist the steering, not only is the system lighter in weight than conventional hydraulic power steering, thereby reducing fuel consumption and emissions – but assistance can also be varied to aid the driver at lower speeds.

Lightweight Engineering.

The overall weight of the vehicle is reduced through the use of lightweight materials such as thermoplastic, aluminium and magnesium alloy. The results are enhanced driving dynamics and improvements in both fuel economy and weight distribution.

Junior Seat I-II

The BMW Junior Seat I-II with height and tilt adjustable backrest and restraint cushion is an ideal solution for children between 9 months and 7 years (9 to 25 kg body weight). The restraint cushion offers ideal protection to children from 9 months up to approx. 4 years: It reduces the impact of the forces acting on the cervical spine in the event of an accident. For children with a body weight in excess of 18 kg or approx. 3.5 years, the restraint cushion is no longer used. Your child is then secured in using the vehicle seat belt.

Junior Seat II-III

The BMW Junior Seat II - III has a size scale for up to 150 cm which allows optimum setting of the headrest and upper belt guide. With side, height and seat back adjustments the Junior seat II-III has been designed with optimum safety and comfort in mind.

ISOFIX preparation may only legally be used for children up to 18 kg. Accordingly, the BMW Junior Seat II-III is not available with the ISOFIX option. The seat is secured by the vehicle's own three-point seat belt with belt guides for simple mounting.

Powder-type fire extinguisher

Located under the driver's seat for easy access.

Baby Seat 0+

The ideal seat for the smallest of children weighing up to 13-kg (approx. 18 months). The system consists of a frame installed in the vehicle and a portable baby shell.

The BMW Baby Seat 0+ is fitted in the opposite direction of travel. This significantly reduces the pressure exerted on the child's cervical spine in the event of a frontal collision. With the optionally available seat size reducer, the BMW Baby Seat 0+ can be ergonomically adapted to fit newborns.

Junior Seat II

The BMW Junior Seat II is offered without restraint cushion for children over 15 kg and approx. 3.5 years.

The ISOFIX preparation may only legally be used for children up to 18 kg. Accordingly, the BMW Junior Seat II is not available with the ISOFIX option.

BMW Seal & Protect

BMW Seal & Protect is the only fully approved BMW paint, interior carpet /cloth upholstery protection system. It provides an outstanding long-lasting shield against the environment and safeguards your investment by preserving the high quality finish of your car's surfaces.

Utilising high-performance sealants, your purchase involves a Dealership-applied BMW Hard Wax to the exterior paintwork. As a result, exterior surface resilience and water repellence is increased by over 300%. And the long-standing protection that BMW Seal & Protect provides simultaneously has a regenerating effect on the paintwork, for a lasting shine.

The same scientific detail is also applied inside your car, with an impregnating agent for carpets and cloth upholstery to ensure that treated materials do not soak through when exposed to moisture.
