CHOOSE FREEDOM

THE NEW KANGOO OFFERS A VARIETY OF CONFIGURATIONS:
FROM FIVE FULL SEATS TO A COMPLETELY FLAT FLOOR. IT'S UP TO YOU.

With the New Kangoo, adapting the layout is child's play. In two simple movements, the rear seat and the passenger seat fold away to create a flat floor that is 2.5 m long on the passenger side*. Combined with masses of storage, the innovative roof rails and a large boot, the New Kangoo's flat floor makes it the ideal companion for sports trips and family holidays.

If you are transporting tall objects, it can be moved onto the back of the rear seat. And for even more options, when the roof rails are positioned lengthwise they can be transformed into a mini roof rack in a single movement without the use of tools.

REDISCOVER FREEDOM

DRIVING THE NEW KANGOO; A NEW EXPERIENCE TO ENJOY.

With the New Kangoo, taking to the road is always enjoyable, due to the comfort of your driver's seat and the improved road-handling provided by the new chassis. With its stability when cornering and high-performance brakes, driving the New Kangoo gives you complete peace of mind... and acoustic comfort you will definitely appreciate. The diesel engines have been selected for their excellent ratio of performance/fuel economy and low CO₂ emissions. Last but not least, for extra safety, the New Kangoo is equipped with the latest technological innovations: a 4-disc braking system and ABS combined with Brake Assist, ESP (Electronic Stability Programme)* and ASR Traction Control* are also available as options for your peace of mind.

1.6 16V 105

This engine provides a comfortable level of power and linear torque.

DIESEL

dCi 68 eco3

It combines high torque and power levels with low fuel consumption.

dCi 86 eco3

It provides high torque and power levels as well as extremely reasonable fuel consumption.

dCi 106

It provides a top performance/fuel consumption ratio and is outstandingly quiet running.

5 OR 6-SPEED MANUAL GEARBOX

The sixth gear offers an excellent gear range for even greater control over fuel consumption and optimum acoustic comfort.

New Kangoo vehicles with **eco3** engines meet three criteria:

- the vehicles produce CO₂ emissions lower than 140 g/km or operate on biofuels,
- they are manufactured in an ISO 14001 certified factory, minimising their environmental impact,
- they include at least 5% recycled plastic in their plastic mass.

With **eco3**, Renault displays its environmental commitment at every stage of the life cycle of the vehicle. The vehicle has been designed in such a way that 85% of the materials used could have a second life (recyclable for other use or as a source of energy), and that pollution control at the end of the vehicle's life (in particular extraction of fluids) is made easier. Furthermore, this vehicle has parts made of recycled plastic and renewable materials.
