

A close-up, black and white photograph of the Jeep logo. The logo is embossed on a metallic surface, which is covered in numerous small, glistening water droplets. The lighting creates highlights on the droplets and the raised letters of the logo. The background is a blurred, dark grey.

# Environmental information

The guide on fuel economy and CO<sub>2</sub> emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO<sub>2</sub> emissions. CO<sub>2</sub> is the main greenhouse gas responsible for global warming.

Fuel consumption figures are strictly generated in accordance with Testing Directive 93/116/EC. They are designed to maintain strict comparability and may not be fully representative of real life driving. For further information, please visit [www.vca.gov.uk](http://www.vca.gov.uk)
