

C-Class Coupé

Mercedes-Benz

First impressions

On the outside, it's a dynamic coupé whose looks never fail to cause a stir. Inside, however, it's an oasis of calm, a place to relax and enjoy every bend and straight in total comfort. It's the C-Class Coupé, a winning combination of luxury, personality and driving pleasure.

With efficient powerful engines, ECO start/stop, Agility Control suspension and standard-setting safety technology.

Facts and finishes | from page 58

Two doors, no compromises: concentrated coupé flair

The stance is low-slung; the face unmistakable, a large three-pointed star dominating its two-bar grille. The rear? Compact, muscular and broad-shouldered. It's a coupé for those who don't stand still.

Care instructions:
apply regularly to tarmac

Having thoughts about the environment? We're with you.

The C-Class Coupé comes with engines that achieve significant reductions in fuel consumption. What's more, its ECO start/stop function and the optional 7G-Tronic Plus automatic transmission help to improve efficiency even further. Good for your conscience – and for your wallet. → pages 16–18

Welcome to the coupé lounge

Your first Mercedes?
We promise it won't be your last

A sixth sense also comes as standard

The C-Class Coupé always seems to know what's just ahead. Its safety systems are constantly evaluating the current situation and anticipating the next, helping you to stay out of danger whenever possible. The Adaptive Brake System, for instance, can prime the brakes even before you press the pedal, ensuring they react faster – and bring the car to a standstill more quickly.

Best of breed

At the heart of the new DTM AMG Mercedes-Benz Coupé is a unique safety concept featuring an innovative safety cell with a carbon-fibre monocoque and a pilot cage made from reinforced steel.

The C-Class family can look back on an unparalleled DTM (German Touring Car Championship) success story. In its first season in 1988, Mercedes-Benz – with the help of AMG – was runner-up with the 190 E 2.5-16 EVO, the racing version of the famous C-Class predecessor. With 85 victories in 159 races, the C-Class is the most successful car in the history of the DTM.

Fingers crossed for the DTM AMG Mercedes C-Coupé to be first past the post in the coming season.

Mercedes-Benz Intelligent Drive – a new era in mobility

Our engineers focus on the future every day in order to make innovative technology a reality. This aspiration has resulted in developments with a lasting impact on automotive engineering. In other words, our work ensures that a Mercedes-Benz will always be ahead of its time.

We have developed one groundbreaking solution after another to get closer to realising our vision of safe and accident-free driving. Innovative technologies such as the Pre-Safe® anticipatory safety system and DISTRONIC Plus radar-assisted cruise control first made it onto the road in a Mercedes-Benz, setting new standards in vehicle safety. It marked the first time active and passive systems were combined – for even better protection and ride comfort.

Mercedes-Benz Intelligent Drive takes things a step further by intelligently combining sensors with safety systems and electronic assistants. For us, it's a logical progression as the traffic situation has changed. There are more vehicles on the road, the driver's job is becoming more complex and distractions are increasing.

Once again, we have revolutionised the car to provide even more assistance and to help deal with road situations effectively: today, a Mercedes-Benz has an even greater spatial awareness. It has a better view of the road and other road users, and it can react to what it sees.

We have developed a stereo camera system that is capable of capturing three dimensions. Together with further sensors, this produces a 360° view – a precise image of the surroundings. If the safety systems and electronic assistants detect danger, they can respond within a fraction of a second to provide the driver with the right assistance for the situation in hand. For example, by performing an emergency braking manoeuvre in dangerous situations, or by dimming part of the main beam for the benefit of oncoming traffic.

Pioneer of innovation – Mercedes-Benz Intelligent Drive once again underlines our leading ambition and points the way ahead to accident-free and autonomous driving. The following pages include further information about our safety and comfort systems. They are available as standard equipment or optional extras for the E-Class, depending on the model specification. Further details can be found on pages 28–31 and 34–35.

BlueEFFICIENCY – fast forward to tomorrow

Mercedes-Benz is quicker at getting future technologies to where they matter most: on the road. With ever more efficient vehicles and a production process that wastes fewer and fewer resources. We call this comprehensive approach BlueEFFICIENCY. By way of example, BlueTEC technology for the diesel engine reduces nitrogen oxide

emissions by up to 90%. Our Hybrid models featuring an intelligent combination of internal combustion engine and electric drive can reduce fuel consumption significantly, while the SLS AMG Coupé Electric Drive takes electric mobility to a new level.

- 1 Radiator shutter
- 2 Enhanced aerodynamics
- 3 Weight savings
- 4 Optimised engines
- 5 Intelligent energy management
- 6 ECO start/stop function¹
- 7 Driver information that encourages fuel-efficient driving style
- 8 Tyres designed for lower rolling resistance
- 9 Energy-saving fuel pump (diesel models) and power steering pump
- 10 Air-conditioning compressor only active on demand

¹ Not available on C 63 AMG or C 63 AMG Edition 507

Diesel engines

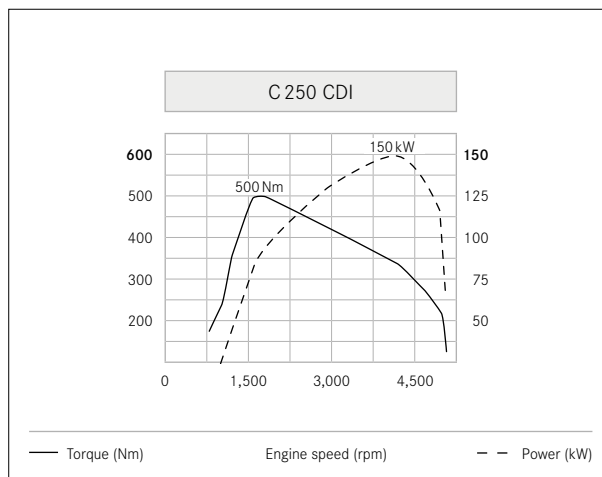

The diesel engines for the C-Class Coupé are efficient, refined and powerful, offering significantly higher outputs and lower fuel consumption than conventional diesel units.

4-cylinder diesel engines. Impressive performance is achieved courtesy of a range of technical innovations, resulting in figures of 170 hp (125 kW) for the C 220 CDI and 204 hp (150 kW) for the C 250 CDI. The high-pressure injection system injects fuel at up to 2,000 bar and sends only the required amount of fuel into the combustion chambers. The chambers themselves have been optimised to ensure fuel burns as cleanly and efficiently as possible, while the intelligent alternator management

system means the alternator is only active when needed, reducing the load on the engine. There are also efficient twin turbochargers and twin balancer shafts that keep the engine running smoothly at all times.

Both 4-cylinder diesel models come with the ECO start/stop function and meet the EU5 standard for exhaust emissions.

Additional efficiency measures. All our engines come with ECO start/stop,¹ almost imperceptibly cutting the engine when the car is stationary or coming to a complete standstill. The ECO display that is available on many models evaluates the efficiency of the driver's driving style, allowing the driver to actively reduce consumption.

With high levels of torque even at low engine speeds, the C 250 CDI delivers instant acceleration

¹ Not available on C 63 AMG or C 63 AMG Edition 507

The 4-cylinder engine for the C 220 CDI features advanced Mercedes-Benz diesel technology

Petrol engines

Enjoyment and efficiency can go hand in hand – as the C-Class Coupé's petrol engines prove. Both the 4-cylinder models and V6 variant deliver exceptionally refined performance and impressively low fuel consumption.

4-cylinder petrol engines. Our petrol engines offer both increased power and reduced fuel consumption. It's a feat they achieve thanks to advanced engine technology. Direct injection at up to 200 bar gives an optimum air/fuel mixture and increased engine efficiency. The engine management also optimises the valve timing by adjustment of the camshafts and uses multi-hole piezo injectors. A particular benefit is the saving in engine weight by using a cast hollow crankshaft and

aluminium for the cylinder block. Further optimisation brings additional savings in consumption – the electronic steering in the C180 and C 220 CDI manual, for example. It only draws energy when the steering wheel is moved – without any loss in comfort.

The C 180 accelerates from 0 to 62 mph in 8.5 seconds and goes on to reach a top speed of 140 mph, while the C 250 dispatches the same sprint in just 7.2 seconds and continues all the way up to a maximum 149 mph.

which ensures precisely the right amount of fuel is used for any given situation.

Additional efficiency measures. All our engines come with ECO start/stop,¹ almost imperceptibly cutting the engine when the car is stationary or coming to a complete standstill. The ECO display that is available on many models evaluates the efficiency of the driver's driving style, allowing the driver to actively reduce consumption.

The power and torque curves are impressive, the fuel consumption figures even more so

V6 petrol engine. Powerful, economical and clean, the C 350 perfectly embodies the virtues of our petrol engines. Despite delivering 306 hp (225 kW) and accelerating from 0 to 62 mph in just 6.0 seconds, it achieves a remarkably frugal 40.4 mpg on the combined cycle. What's more, its peak torque of 370 Nm is available across a broad rev range, ensuring instant responses whatever the situation or speed. The key to this impressive blend of efficiency and performance is our latest-generation direct petrol injection system. It features spray-guided combustion and highly precise piezo injectors and works in conjunction with continuously variable camshaft control,

The C 350 combines excellent performance with efficient use of fuel

¹ Not available on C 63 AMG or C 63 AMG Edition 507

Transmissions

The transmissions for the C-Class Coupé ensure optimum performance whatever the situation or engine speed.

6-speed manual transmission. The 6-speed manual transmission combines impressive efficiency with a sporty feel. The ratios are ideally matched to the engine and the short, precise shift throws ensure every gear change is a pleasure. Manual C-Class Coupé models are equipped with a shift point indicator and current fuel consumption display that help you to optimise efficiency and reduce CO₂ emissions. The standard ECO start/stop function, meanwhile, helps to achieve further fuel-savings, cutting the engine automatically when stationary or coming to a standstill, and restarting it as soon as you touch the accelerator or depress the clutch.

7G-Tronic Plus. 7G-Tronic Plus is the latest version of our 7-speed automatic transmission. It helps to improve fuel consumption by ensuring the engine is always operating at the optimum speed, yet delivers faster, smoother shifts and better acceleration too, even skipping gears in kick-down for more rapid overtaking. In addition, 7G-Tronic Plus allows you to switch between comfort and sport modes as the mood takes you. 7G-Tronic Plus comes as standard on the C 250 and C 350 and is available as an option on all other models.

7G-Tronic Plus: the result of more than 50 years' experience in automatic transmission technology

AMG Handling Package

Style guide for the perfect bend: match the new AMG Handling Package with the AMG Sport Plus model.

The AMG Handling Package offers technical and styling enhancements, carefully 'engineered by AMG' for the true sports enthusiast (optional on AMG Sport Plus; only available on C 250 BlueEFFICIENCY and C 250 CDI BlueEFFICIENCY with automatic transmission). The larger brakes, sports exhaust and sports tuning of the engine and transmission lend even greater driving dynamics to the AMG Sport Plus. These additions are complemented with subtle exterior styling cues including black exterior mirrors, sport badging on the front wings and floor mats; and a black lamella grille with chrome highlights.

Integrated safety concept

The C-Class Coupé comes with a host of safety features that help to avoid danger and make for a more relaxing journey.

As the inventor of the motor car, we feel a particular responsibility towards road safety. That's why we were the first manufacturer to develop an integrated safety concept that seamlessly combines a car's active and passive safety features, thus ensuring optimum all-round protection. This concept covers four different areas – safer driving, anticipating danger, protecting occupants and post-crash safety – and incorporates measures designed to maximise safety in every situation, by helping you to stay safe, alerting you to danger, and assisting you wherever possible. In addition, our unique Pre-Safe® anticipatory safety system recognises likely accident scenarios and takes steps that help to further enhance occupant protection. If a collision can't be avoided, intelligent passive safety systems help to provide protection where it's needed, while solutions that can minimise the consequences of an accident and facilitate emergency assistance are also a key part of this safety concept.

A selection of these technologies for the phases 'safer driving', 'anticipating danger', 'protecting occupants' and 'post-crash safety' are presented on the following pages.

Safer driving: Attention Assist (standard). If it detects signs of tiredness, Attention Assist alerts the driver via visual and acoustic warnings and recommends taking a break. It monitors driver behaviour via an array of sensors and registers unexpected changes that may indicate drowsiness or concentration lapses.

Safer Driving: Intelligent Light System (optional). This system comprises five modes: high-performance headlamps with country mode shining more light towards road edges, motorway mode to illuminate the entire width of the lane, fog mode for improved visibility in bad weather conditions, Active Cornering light as well as Active Light System for better visibility in bends.

Safer Driving: Adaptive High Beam Assist (optional). Adaptive High Beam Assist consistently offers the maximum lighting range and adapts to the current road situation. The system activates the high beam, if no oncoming vehicles are detected and lowers it again as soon as the lights of oncoming traffic are identified.

The Intelligent Light System automatically optimises visibility in a range of different situations

Safer driving: Lane-Tracking Package (optional). Using the lane markings on the tarmac, Lane-Keeping Assist can detect when the car veers off course unintentionally and warn the driver accordingly with gentle vibrations of the steering wheel. The Blind Spot Assist helps avoid dangerous lane changing manoeuvres using twin radar sensors in the rear bumpers.

Blind Spot Assist alerts the driver with an acoustic warning and a flashing red triangle in the side mirror

Safer driving: Driving Assistance Package (optional on all models except Executive SE). This package comprises a range of intelligent safety technologies. Active Lane-Keeping Assist draws the driver's attention to unintended lane changes, gently vibrating the steering wheel if the car wanders across lane markings. If the driver doesn't react to the warning, the system is able to intervene in order to correct the car's course. Active Blind Spot Assist makes intentional lane changes safer too, using twin radar sensors to watch over the areas not visible in your exterior mirrors. If the sensors spot a vehicle in

DISTRONIC PLUS can bring the car to a standstill and get you moving again automatically – an advantage in stop/start driving

one of these blind spots, a flashing red triangle appears in the corresponding mirror, accompanied by an acoustic warning from the instrument panel. Should the driver nevertheless proceed to change lanes, the system can intervene and help prevent a collision by automatically applying the brakes on the appropriate side. DISTRONIC PLUS radar-assisted cruise control, meanwhile, enables the car to automatically maintain a preset distance from the vehicle in front, both in high-speed driving and in stop/start traffic. Also included in the package are our Brake Assist (BAS Plus) and Pre-Safe® Brake system – to give that feeling of safety on every trip.

Anticipating danger: Pre-Safe® Brake and BAS Plus

(part of optional Driving Assistance Package). If it detects the risk of a collision, Pre-Safe® Brake alerts the driver via visual and audible warnings. At the same time, BAS Plus assesses the brake force required in order to avoid an impact. If the driver applies the brakes but uses insufficient force, BAS Plus automatically raises the braking pressure to a level that exploits the remaining stopping distance to the full, thereby also lessening the likelihood of a shunt from behind.

Should the driver fail to react to Pre-Safe® Brake's warning signals, it slows the car automatically, providing a further warning, and triggers a range of Pre-Safe® measures. If the driver still doesn't respond, the system then initiates autonomous emergency braking, enabling the speed and severity of any impact to be significantly reduced.

Anticipating danger: Pre-Safe® system (standard). If it detects a probable accident scenario, Pre-Safe® anticipatory safety system can take a range of anticipatory measures to reduce the risk of injury to the occupants. These include activating the front seat belt tensioners, automatically closing the windows and, if the optional Memory Package is fitted, moving the front passenger seat to a more favourable position.

The Pre-Safe® system can detect critical situations and take anticipatory measures to enhance occupant protection

Anticipating danger: Neck-Pro active head restraints

(standard). The Neck-Pro front head restraints help to reduce the risk of whiplash injuries. Within milliseconds of a rear-end impact, they automatically move forwards and upwards, enabling them to support the head sooner.

The Neck-Pro active head restraints can help to avoid whiplash injuries in rear-end collisions

Protecting occupants: restraint systems (standard).

The 3-point seat belts, seat belt tensioners, belt force limiters and airbags are all carefully coordinated so as to keep injuries to a minimum. The C-Class Coupé is fitted with numerous airbags to ensure optimum occupant protection, with front, side, pelvisbags for the driver and front passenger, a kneebag for the driver and windowbags as standard. Sidebags are optional for the rear. If the crash sensors detect an impact, the seat belts are instantly tensed, helping to ensure the occupants remain firmly in

The rigid passenger cell, front and rear crumple zones and intelligent restraint systems provide optimum protection in the event of an impact

their seats, while the belt force limiter relaxes the belt as the situation allows, in order to prevent undue force being applied to the rib cage.

Protecting occupants: Active Bonnet (standard).

The Active Bonnet helps reduce the risk of injury to more vulnerable road users, such as pedestrians and cyclists. On impact, the bonnet springs up by 5 cm to better absorb the collision.

Post-crash safety: Mercedes-Benz Emergency Call System (part of COMAND Online systems).

The system can automatically send an emergency call via an operational telephone connected to the vehicle, as soon as the restraint system detects a collision. The GPS coordinates are sent to the Mercedes-Benz emergency call centre and a speech connection is then set up. The emergency call can also be triggered manually.

Post-crash safety: rescue assistance. Mercedes-Benz has developed a range of measures that help to minimise the secondary consequences of an accident and facilitate occupant rescue. These include automatic engine cut-off, self-activating hazard lights and emergency cabin lighting. In addition, the central locking system is automatically released in the event of an accident, and there are special crash joints between the front doors and wings that make it easier to open the doors after frontal collisions. In addition, Mercedes-Benz provides a rescue guide for emergency services that can be downloaded from the Internet at www.mercedes-benz.co.uk/rescueguide

Multimedia systems

With its high-quality multimedia and navigation systems, the C-Class Coupé helps you to reach your destination as swiftly as possible – and keeps you entertained all the way.

The large TFT display presents maps, videos or online content in high resolution

COMAND Online system (optional). COMAND Online combines hard disk drive navigation with in-car Internet access and a wide range of entertainment features. These include speed-sensitive volume adjustment, a music library with 10 GB of storage space for audio files and a DVD drive that plays CDs, MP3s, and video or audio DVDs. It also enables you to connect a variety of external devices and storage media – via USB port, Media Interface, SD memory card slot or Bluetooth® interface – and lets you access not only Mercedes-Benz services online, but connects to the Internet for weather updates, Google Street View or Facebook, or helps to find parking facilities while on the move (Internet-enabled mobile phone required). Live Traffic receives precise and up-to-date traffic information, which is fed into the navigation system. Maps and menus are presented on a high-resolution 7-inch colour display. Three years of map updates are offered free of charge. All key functions can be operated either via the central controller, from the multi-function steering wheel or using Linguatronic voice control.

Harman Kardon® Logic 7® surround sound system (optional). With its 12 high-performance speakers and Logic 7® multi-channel spatial sound technology, this 450-watt surround sound system makes every journey a listening experience to remember. In addition, it comes with speed-sensitive volume adjustment that levels the audio output as you drive.

The Harman Kardon® Logic 7® surround sound system offers a truly first-class listening experience

Audio 20 radio with Bluetooth® interface and USB port (standard). The Audio 20 system features a radio, a 6-disc CD changer with MP3 playback, a USB port, and a Bluetooth® interface for hands-free mobile telephony. It also comes with a 5.8-inch TFT display and can be operated remotely via the multi-function steering wheel. A DAB digital radio tuner is included as standard on the C-Class Coupé.

The Audio 20 system features eight carefully combined speakers that deliver excellent sound

Becker® Map Pilot navigation system (optional). With the Becker® Map Pilot navigation system, you'll always reach your destination as safely and quickly as possible. Installed in the glove compartment, the Map Pilot can be integrated with Audio 20 CD system's central controller and display and tailored to your needs by downloading additional functions and map data.

Electronic assistants

The C-Class Coupé is available with electronic assistants that enhance safety and convenience in a range of situations. They can help you to avoid danger during lane changes, lend a hand in low-speed manoeuvres – and even keep an eye on the speed limit for you.

Speed Limit Assist even recognises and displays temporary speed restrictions

Speed Limit Assist (fitted with the optional COMAND Online system). Speed Limit Assist reads speed limit signs and displays the permitted maximum speed in the instrument panel and on the COMAND Online navigation screen until the limit changes. Its front-mounted camera detects round speed limit warnings, both on roadside signs and on overhead gantries, and is particularly useful in areas where the speed limit varies or when passing through roadworks. To help identify the limit correctly, it compares speed limit signs with map data from the navigation system, enabling it to recognise when you are entering or leaving built-up areas for instance.

Reversing camera (optional; only in conjunction with COMAND Online system). This rear-mounted camera makes for safer and easier parking manoeuvres. Activated automatically as soon as the driver engages reverse, it captures the area immediately behind the car and enables you to see the image on the COMAND Online display.

The reversing camera makes for easier manoeuvring in tight spaces

Parktronic with Parking Guidance (standard). Parktronic uses the sonar principle to help you avoid low-speed knocks during parking manoeuvres. It sends out ultra-sound signals that reflect off other objects and are picked up by sensors in the front and rear bumpers. The system then processes this information and calculates the size of the gap to the front and rear, enabling it to alert you via acoustic and visual warnings as you approach the vehicle or object.

At speeds of up to 20 mph, Parking Guidance can automatically measure the length of parallel parking spaces

Parking Guidance can help you to find and manoeuvre into parking spaces. At speeds of around 20 mph, it measures gaps in lines of parallel-parked cars and alerts you as soon as it finds a suitably sized space. Once reverse is engaged, it then guides you in via a combination of acoustic signals and graphics in the instrument panel, showing the required steering angle and telling you when to turn the wheel.

Seats

The C-Class Coupé features coupé-specific front seats, individual rear seats and integral head restraints all round. Its eye-catching seats not only look the part, they also offer excellent ergonomics and high levels of support even in sporty driving.

Coupé-specific front seats lend the C-Class Coupé cabin a sporty look and feel

Coupé-specific front seats. For the driver and front seat passenger, the C-Class Coupé offers ergonomically designed coupé-specific seats. They come with supportive side bolsters and have electric seat height and backrest angle adjustment as standard. Heated or comfort-ventilated seats are also available as an option.

Individual rear seats with integral head restraints. Those in the rear benefit from ergonomic, individually sculpted seats with integral head restraints. They echo the sporty style of the coupé-specific front seats and come with an asymmetric split/fold mechanism. Also fitted as standard is the Easy-Entry system, which provides more convenient access to the rear seat accommodation.

The standard Easy-Entry system facilitates access to the rear, sliding the front seats all the way forward when released

Memory Package (optional). The optional Memory Package ensures you can always find your preferred driving position quickly and easily, even if your C-Class Coupé is regularly driven by someone else. It allows up to three different driver's seat, steering column and exterior mirrors positions to be stored and recalled at any time.

With the optional Memory Package, your preferred driving position can be restored at the touch of a button

Image shows optional 19" AMG multi-spoke alloy wheels in matt black (code 797)

C 63 AMG

The C 63 AMG Coupé combines the race-honed technology of its four-door cousins with a dramatic and highly individual style. Its sporty coupé lines are made even more eye-catching by the AMG grille with single chrome louvre, an AMG-specific bonnet with powerdomes, and AMG bodystyling comprising front and rear aprons plus side skirts. The AMG sports exhaust system's two sets of twin chromed tailpipes provide a further clue to the power of this exhilarating coupé, while AMG-specific daytime running lights and 18" 5-twin-spoke AMG alloy wheels in burnished Titanium Grey finish also come as standard (19" AMG multi-spoke wheels in Titanium Grey or black are available as an option).

C 63 AMG technology

The AMG 6.3-litre V8 delivers exceptional power, the sports transmission and suspension help you exploit it to the full – and let you switch between performance- and comfort-biased set-ups. → www.mercedes-benz.co.uk/amg

AMG 6.3-litre V8. Under the bonnet of the C 63 AMG is a naturally aspirated V8 equipped with track-honed racing technologies. These include variable camshaft timing, four valves per cylinder, an exceptionally rigid aluminium crankcase and a special low-friction coating for the cylinder contact surfaces. For optimum cylinder charging, this high-tech engine also features vertically arranged intake and exhaust ports plus a magnesium variable intake manifold with twin throttle flaps. The result is free-revving performance, exceptional pulling power and instant acceleration at all speeds. The C 63 AMG delivers 457 hp (336 kW) at 6,800 rpm, plus 600 Nm of torque at 5,000 rpm, with in excess of 500 Nm available all the way from 2,000 to 6,250 rpm. The C 63 AMG Edition 507 delivers even more power: it increases output to 507 hp (373 kW), enabling it to accelerate from 0 to 62 mph in a breathtaking 4.2 seconds (4.5 seconds for the C 63 AMG).

AMG sports suspension. The AMG sports suspension offers outstanding agility and exceptional lateral acceleration potential. Together with the low-profile tyres, wide front track, AMG sports parameter steering and three-stage ESP®, it ensures exceptional vehicle dynamics and an exhilarating driving experience. The triple-link front suspension, firm springing and gas pressure dampers guarantee optimum roadholding and excellent body control even at the limit, yet the ride remains as comfortable as you'd expect from a Mercedes, even on longer journeys. The AMG sports parameter steering features a more direct ratio that gives greater steering precision and allows for even higher cornering speeds, while the Electronic Stability Programme (ESP®) is also tailored to the C 63 AMG's high-performance needs. It lets you determine the level of ESP® support yourself, allowing you to switch between 'on', 'off' and 'sports handling' modes, and displaying the current setting in the instrument panel. As an option, the C 63 AMG Coupé can be fitted with AMG Performance suspension. Its tauter spring and damper settings make for even faster handling responses and a thoroughly focused feel.

AMG Speedshift MCT 7-speed sports transmission. Equipped with AMG aluminium steering wheel shift paddles, four driving modes and a Race Start function, the C 63 AMG's 7-speed sports transmission maximises performance yet delivers high levels of efficiency. The 'S' (Sport), 'S+' (Sport Plus), 'C' (Comfort) and 'M' (Manual) modes each offer different shift characteristics and speeds: gear changes in Sport and Sport Plus modes are around 20% and 40% faster respectively than in Comfort mode, while Manual mode is approximately 50% faster, with shift times of just 100 milliseconds. The transmission also offers automatic throttle-blipping on downshifts. This not only produces a satisfyingly sporty sound, it also helps to reduce load transfer, especially when braking into bends.

AMG Performance Studio

For an even sportier C 63 AMG, simply add options from the AMG Performance Studio. Allowing you to further customise your unique model, options range from visual enhancements such as illuminated AMG door sills or AMG Carbon-Fibre Trim Packages, to performance-oriented options such as AMG rear axle limited-slip differential lock or an AMG Performance suspension. Also available is the AMG Driver's Package (standard on C 63 AMG Edition 507), which raises the electronically limited top speed and includes participation at an AMG 'Power & Passion' driving event.

C-Class Coupé AMG Sport

The AMG Sport makes for a striking and involving C-Class Coupé. Its standard sports suspension and sports parameter steering (not available for C 180) increase your driving enjoyment, while the AMG styling enhancements add extra muscularity to the exterior. They include an AMG front apron, side skirts, a diffuser-style rear apron and 18" AMG 7-spoke alloy wheels.

Exterior

18" AMG alloy wheels – 7-spoke design

AMG bodystyling comprising front and rear aprons and side skirts

Cross-drilled front brake discs plus calipers with 'Mercedes-Benz' lettering

Electric power steering (C 180)

Lowered sports suspension

Parktronic with Advanced Parking Guidance

Sports parameter (speed-sensitive) steering (excluding C 180)

Image shows optional leather interior, comfort-ventilated seats, COMAND Online and Harman Kardon® Logic 7® surround sound system

The AMG Sport interior not only looks more dynamic, it feels it too. The flat-bottomed 3-spoke multi-function sports steering wheel is tactile and grippy, the black steering wheel gear shift paddles (automatic models only) offer racing-style gear changes. Other interior highlights include dark brushed aluminium trim, stainless steel sports pedals, a black roof lining and AMG floor mats, and there's also a large 4.5-inch colour display for the instrument panel.

Retailer-fit accessories

A Mercedes-Benz is not just a car, it's a travel companion that can be tailored to your needs – with our wide range of Retailer-fit accessories.

→ www.mercedes-benz.co.uk/accessories

Our Retailer-fit accessories enable you to create the perfect C-Class Coupé for your lifestyle. If you often need to transport lots of luggage or sports gear, you'll find the ideal solution in our range of roof racks and boxes. The boxes come in two different sizes: the family version holds 450 litres while the sports box swallows 330 litres. Both open and close on either side and can be mounted on our Retailer-fit roof bars for safe and secure transportation.

Roof bars with 'Comfort' ski and snowboard rack

Also available are a luggage set and ski bags designed specifically to fit the roof boxes.

Add a sporty touch to your C-Class Coupé with an eye-catching Mercedes-Benz boot spoiler.

A very practical technical feature that puts your mind at rest is Tracker™. If your C-Class Coupé is ever stolen, VHF

Boot spoiler

(Very High Frequency) technology tracks your car's location – even if it's held in a garage or an underground car park.

For more details about these and other C-Class Coupé accessories, please see the relevant brochure or talk to your local Mercedes-Benz Retailer.

Tracker™

The Mercedes-Benz InCar Hotspot enables wi-fi Internet access

Services

Test drive. Words can only do so much. Some things have to be experienced to be truly appreciated. Which is why we'd like to invite you for a test drive. Feel the power of efficient engines that offer impressive fuel consumption. Feel exhilarated by precise steering, designed to connect the driver with the road and enjoy sumptuous levels of comfort. Your Mercedes-Benz Retailer will be happy to make arrangements for you to experience the things that set a Mercedes-Benz apart. Alternatively, to request a test drive online simply visit www.mercedes-benz.co.uk/testdrive
We look forward to seeing you.

Mercedes-Benz Finance. At Mercedes-Benz Finance, our single-minded aim is to provide optimum financial solutions for all those who share the Mercedes-Benz philosophy of absolute commitment to quality. Whether you are a private customer or a business user, our finance and leasing packages can be tailored to meet your individual needs. For further information on Mercedes-Benz Finance, please contact your local Mercedes-Benz Retailer.

Mercedes-Benz Insurance offers a fully comprehensive 5-star-rated¹ Motor Insurance policy specifically designed to provide the cover you would expect from Mercedes-Benz. For a quotation, please call 0845 600 2180?

Interactive Owner's Manual. The website also offers an interactive tour, enabling you to take a closer look at your desired model. This simulation is the ideal way to acquaint yourself with your dream car. You can view key functions in detail, gain an insight into the car's inner workings or look at the benefits of each model. For further details, visit www.mercedes-benz.co.uk/cclasscoupemannual

Roadside Assistance and Accident Management. Rest assured that should you ever need help, Mercedes-Benz Roadside Assistance is there for you. In the unlikely event of a technical breakdown³ you can rely on the Mercedes-Benz Roadside Assistance Team – anywhere in Europe. Mercedes-Benz will also assist you in the unfortunate event of an accident, from recovering your car and delivering it to your preferred Mercedes-Benz Retailer right through to managing your insurance claim in full, you will be looked after by the experts who built your Mercedes-Benz.⁴ Minor mishaps are also covered. Whether you lose your key, run out of fuel, or your vehicle is damaged due to vandalism, Mercedes-Benz ensures that you still reach your destination. Often the problem can be rectified on the spot, but if this is not possible, we will naturally ensure that your vehicle is taken to the nearest Mercedes-Benz Retailer to get you back on the road as quickly as possible.

Take-back of end-of-life vehicles. Coming full circle. At the end of its long life, you can return your C-Class to us for environment-friendly disposal in accordance with the EC End-of-Life Vehicle Directive!¹ But that day lies a long way off.

¹Applies in accordance with national regulations to vehicles up to 3.5 t permissible gross weight. The C-Class Coupé has met the statutory regulations governing the suitability of the vehicles' design for reuse and recycling for a number of years now. A network of vehicle take-back depots and dismantlers has been established which will process your vehicle in an environment-friendly manner. The ways in which both vehicles and parts can be recovered are subject to ongoing development and improvement. Consequently, the C-Class Coupé will be able to comply with any future increases in the recycling quota within the stipulated time limits. Further information is available at www.mercedes-benz.co.uk or call 0808 156 6606.

Please note: changes may have been made to the products since this brochure went to press (18.02.2013). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure has been compiled by Daimler AG of Germany and is distributed internationally. It provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours shown may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Retailer. www.mercedes-benz.co.uk
