NOTES

- 1. Peugeot Space Measurement System uses sensors at the ends of the front bumper to measure the size of a parking space. The system will then indicate the degree of parking difficulty.
- 2. Motorised tailgate on SW allows opening/closing of the tailgate from key, drivers seat or from control on tailgate
- **3.** Peugeot Open and Go system replaces a mechanical key with a vehicle identifier. Electronic recognition of the identifier gives hands free access to 508 and starting and stopping is simply activated by pressing the Start/Stop button.
- **4.** Peugeot Connect SOS and Assistance pinpoints the location of the vehicle in the event of accident or breakdown and enables the dispatch of emergency or assistant services.
- **5.** Independent Programmable Heating System permits a faster increase in temperature of the passenger compartment decreasing the time needed to reach desired comfort level.
- **6.** Peugeot Smartbeam Assistance monitors driving conditions and surroundings of 508 and automatically switches headlamps to full beam when conditions allow.
