DRIVE THE CHANGE

The New Clio and the DeZir concept car.

THE NEW RENAULT CLIO INSPIRED BY DeZir

Cars are not just for getting us around; they can also inspire dreams and desires. From initial concept through to production, the sensual lines of the New Renault Clio have been focused on total seduction. Born from the DeZir concept car, unveiled in October 2010 at the Paris Motor Show, the New Renault Clio embodies all the style and passion of the original concept. The personality of New Clio is evident in every detail and its dynamic curves.

When I took the helm of the Renault Design Department, I was given just one task: to design beautiful cars. This simple objective marked the start of a change in design direction for Renault. I translated the design into a life story where every vehicle represents a milestone in our adult lives. Clio embodies that "love at first sight" experience that marks the beginning of any relationship. A youthful, sexy, sporty car built with everyday life in mind.

Considered as a sculpture, the New Renault Clio is an object of desire: sensuality personified. Its muscular presence and dynamic flowing lines are derived straight from the DeZir concept. There are no sharp or aggressive angles, simply a form that draws you closer and compels you to touch it.

New Renault Clio is equipped with cutting edge technology and a host of personalisation features for you to create your very own! The New Renault to fall in love with!

DRIVING PLEASURE: WITH RENAULT

ENERGY ENGINES

THE ALL NEW ENERGY ENGINES REVOLUTIONISE CURRENT STANDARDS. USING INNOVATIVE TECHNOLOGY AND OUR MOTOR RACING KNOW HOW, NEW RENAULT CLIO IS BOTH FUN TO DRIVE AND LEADS THE WAY IN LOWERING FUEL CONSUMPTION AND CO₂ EMISSIONS.

1 STOP & START

Automatically turns off the engine when the Renault Clio is stopped and in neutral, cutting down on emissions, fuel consumption and noise. Restarts instantly, smoothly and without vibrations. (Available on all manual engines)

2 ENERGY SMART MANAGEMENT (ESM)

By recovering kinetic energy when braking and decelerating, ESM optimises the consumption of electrical energy and helps recharge the battery.

3 ACTIVE AIR SHUTTERS

Automatically adjust the flow of air through the radiator to the engine's cooling requirements, improving the vehicle's aerodynamics and fuel consumption.

4 ECO MODE

To reduce fuel consumption even further, the driver can select ECO Mode, which modifies the vehicle's acceleration, torque / power management and heating / air-conditioning.

THE GUIDE TO

ECO-DRIVING

"IT IS POSSIBLE TO BE DYNAMIC YET CONSCIENTIOUS, SPORTY YET RELAXED, ACTIVE YET LEVEL-HEADED. YOU CAN BE BOTH A RACING DRIVER AND AN ECO DRIVER". THIS IS WHAT THE RENAULT CLIO HAS TAKEN INTO ACCOUNT. BUT WHAT IS ECO-DRIVING? PATRICK VINCENT, DRIVING ECO² PROJECT MANAGER AT RENAULT'S PLANNING AND ENVIRONMENT DIVISION, EXPLAINS.

Driving habits are changing – that is a fact. Encouraged by the media, manufacturers and authorities, the concept of eco-driving is gaining ground every day. More relaxed, cleaner driving, lower fuel consumption and less vehicle wear: the arguments in favour of eco-driving are plentiful. And the results speak for themselves: Eco-driving produces average fuel savings of 5 to 10%! With eco driving, fuel consumption and CO₂ emissions can be cut by 25% (depending on the driving conditions and driving style of motorist).

Eco-driving comes as second nature to the Renault Clio. Its innovative technology gives each driver even greater control over fuel consumption and CO₂ emissions. Various assistance tools on the instrument panel make things easier; an indicator shows the best moment to change gear, whilst another assesses your driving style (green, yellow, orange) as part of the R-Link system. By activating ECO Mode, you can benefit from engine settings optimised for more restrained, economical driving. Eco-driving: yet another discovery...

* Official Fuel consumption figures are produced for comparison purpose and are measured according to the European Directive 80/1268/EEC. These figures are specific for a vehicle type and not for a single car. Real world fuel (actual) consumption can vary as the fuel efficiency of a vehicle is influenced by driving behaviour, weather and road conditions. The use of technical equipment for example air conditioning, can also effect the fuel consumption. For further information, please visit the Vehicle Certification Agency web site www.vca.gov.uk. For more information on CO₂, banding and Company Car Tax Benefit In Kind go to www.renault.co.uk

The eco² symbol shows the vehicle emits less than 120g/km of CO₂, is manufactured in a plant that has been certified ISO14001. The vehicle can be 95% recoverable at the end of its life cycle. Find out more at www.renault.co.uk
