On the road includes Delivery, Number Plates, 12 months Vehicle Excise Duty and First Registration Fee

### Peugeot HYbrid4 Technology

In Auto mode the entire system is automatically controlled, including operation of the HDi diesel engine and the electric motor.

Perfect for low speeds around town, the car can travel for about two miles in this 100% Electric mode before the engine takes over and recharges the battery, allowing continual use of the 100% Electric (ZEV) mode.

Sport mode favours quicker gear changes at higher engine speeds, coupling the diesel engine with the electric motor for dynamic performance.

In the Four-wheel drive setting the rear wheels are driven by the electric motor and the front wheels by the HDi diesel engine.
