

JEEP® GRAND CHEROKEE

## INNOVATION THROUGH EVOLUTION.

---

**T**he Jeep® Grand Cherokee has taken innovation one step further; to deliver a vehicle with even more seductive lines, even more competitive and ecological performance, and innovative technology. Take a look, the Jeep® Grand Cherokee. Now evolved.

## INNOVATION IN EVERY LINE.

**D**iscover a design that has never been explored before. Elegant yet assertive, sinuous yet strong. nothing is as it was. Front and rear bumper design, Bi-Xenon front headlights with LED DRL (daytime running lights) and alloy wheels, so much to appreciate from every angle.

DOMINATE THE SCENE FROM EVERY ANGLE.

The rear design features taillamps with signature LED lighting, a larger spoiler and a tailgate to offer improved rear visibility vs previous Model Year 13 Grand Cherokee. The Grand Cherokee's premium styling treatments include a front grille and fascia design that adds attitude to the classic Jeep lines. HID headlamps with signature LED accent and daytime running lights enhance the strong appearance. Plus, it boasts an eye-catching array of wheel designs from 18" to 20". A design that speaks of innovation, without having to shout.

INNOVATION IS PRESTIGE TAKEN TO THE NEXT LEVEL.

The Jeep Grand Cherokee features a more sumptuous and inviting interior. Exemplified by the Summit version, featuring Natura Plus leather-trimmed ventilated seats, edge welting, premium Alcantara headliner and exotic open-pore wood trim. On all versions, the quality of comfort on the Jeep Grand Cherokee will exceed your every expectation.

THE VALUE OF EVOLUTION.

---

---

The Jeep commitment to excellence can be seen in every little detail. The Natura Plus seats and the quality of the stitching, the available CommandView<sup>®</sup> Sunroof, the steering wheel with leather and wood finishing and colour coordinated driver display, epitomise the Jeep Grand Cherokee's sense of style.

## INNOVATION IN MOTION.

**E**volving means becoming more efficient and responsible. The Jeep, Grand Cherokee, thanks to its 8-speed automatic transmission, offers a new driving experience: with smoother and quicker gear shifting, improved acceleration, while fuel consumption and CO<sub>2</sub> emissions are reduced vs previous Model Year 13 Grand Cherokee. Fully electronic, the 8-speed automatic transmission features shift-on-the-fly map changing, with manual shifting capability through its steering-wheel mounted paddle controls.

## IMPROVING EFFICIENCY THROUGH INNOVATION

Innovation means the Jeep® Grand Cherokee has a superior efficiency to give you a more sensible, better driving experience. All engines feature the 8-speed automatic transmission.

### 3.0 V6 MULTIJET II DIESEL

The Jeep® Grand Cherokee's 3.0 Multijet II diesel engine delivers the power you need to climb, tow and go anywhere with confidence. With full command of 247 Bhp and 570 Nm of torque, this strong performer provides a huge surge of towing strength. The advanced technology of Multijet II Common-Rail injection works to help deliver a smooth and quiet ride on or off road.

### 6.4L V8 HEMI®

The Jeep® Grand Cherokee SRT is powered by the powerful 6.4L HEMI® V8 engine, fitted with Fuel Saver Technology. This powerful engine delivers 461 Bhp and 624 Nm of torque and ensures Grand Cherokee SRT's benchmark performance of 0-62 mph in 5 seconds, top speed of 160 mph, and braking from 62-0 mph in 35m.

### ECO MODE

This feature constantly works to maximise your fuel economy by automatically modifying the shift schedule of the 8-speed transmission and torque converter to gain more efficiency than ever before. The Multi-View Display in your instrument panel can inform you of just how efficiently Eco Mode is performing every mile along the way.

## ACHIEVEMENT THROUGH INNOVATION.

There's no better way to drive safely through severe all-weather and terrain challenges, than with the Jeep Grand Cherokee's 4x4 capabilities. Traction is enhanced through the Quadra-Trac™ II or Quadra-drive® II 4WD systems, complemented by the Selec-Terrain® and Quadra-Lift® air suspension systems (where available), which are conceived for optimum ride performance. Innovation that takes you where you want to go.

## SELEC-TERRAIN® TRACTION SYSTEM.

Maintain a sure-footed grip on any driving surface. With five selectable settings, including a hassle-free Auto Mode, it gives you ultimate driving confidence by coordinating 12 different vehicle management systems,

including throttle control, transmission shifting, transfer case, traction control, and Electronic Stability Control. Refined for optimal performance: choose from Sand, Mud, Auto, Snow and Rock. In Auto, Selec-Terrain® does all the work, automatically adjusting the vehicle dynamics to best suit all terrains.

# QUADRA-LIFT™ AIR SUSPENSION SYSTEM.

It allows the driver to raise the Jeep, Grand Cherokee body to an impressive ground clearance of 280mm above rocks and snow banks, or to lower it 40mm for easier entry, exit and loading. Ground clearance can be adjusted to five levels: Normal ride height (NRH), Off Road 1, Off Road 2, Park Mode and Aero Mode.

INNOVATION MEETING EVERY EXPECTATION.

The Jeep Grand Cherokee has developed a far better way to enhance two essential senses of the driver: sight and hearing. Evolution that allows you to discover more and improve your driving experience.

## PERSONALISED INSTRUMENT CLUSTER.

The customer-configurable 7" multiview driver display with leading-edge TFT technology, standard on all trims, lets you tailor your personal settings and graphics. Detailed vehicle information, ranging from a speed gauge, navigation system, Selec-Terrain® system, Quadra-Lift® system and more, are integrated into the advanced, colour-coordinated cluster.

## INNOVATION MEETS INTERACTION.

Technology on board the Jeep, Grand Cherokee has evolved: everything is under control, thanks to the 8.4" display.

### THE UCONNECT™ SYSTEM, NOW EVOLVED <sup>(4)</sup>

The Uconnect™ system features a massive 8.4" touchscreen as well as dial controls for complete access to all functions, including climate and radio settings. Bluetooth® connectivity allows for streaming audio and voice commands. Also includes: USB port, SD card reader, DAB Radio and premium Navigation with 3D graphics.

### CLIMATE CONTROL VIA UCONNECT™

Create a comfortable cabin using the heating and ventilation controls on the 8.4" touchscreen or with voice operation without ever taking your hands off the wheel.

### ALPINE® PREMIUM AUDIO

This premium audio system utilises a high-powered 12-channel, 506 watt amplifier, powering nine speakers and a subwoofer, optimally placed throughout the cabin.

### ACTIVE NOISE CANCELLATION SYSTEM (ANC)

To enhance the driving experience the innovative ANC system contrasts and eliminates all engine noise from the inside of the vehicle. Engine noise is detected in real time by microphones. Opposing sound waves are then emitted so as to cancel low frequency engine noise, offering a totally quiet ride. Available on Summit & SRT models only.

### BLU-RAY™ SEATBACK VIDEO SYSTEM

Two 9" VGA high-resolution screens are integrated into the seatbacks, ready to entertain rear-seat passengers. The system can play standard DVDs and Blu-Ray discs, and includes independent HDMI and RCA inputs for each screen. It includes two sets of wireless headphones. Available on Overland, Summit and SRT models only.

### HARMAN KARDON® PREMIUM AUDIO

Prestige in audio craftsmanship is reflected in the premium system that comes as standard with the Jeep, Grand Cherokee Summit and SRT. This massively powerful system employs 19 GreenEdge speakers with subwoofers and an 825 watt amplifier, delivering everything an audiophile requires for the replication of sound to the highest of standards.

- Nine 25mm GreenEdge High Efficiency Tweeters
- Two 6x9 inch High Efficiency Subwoofers
- ⊕ Five 90mm GreenEdge High Efficiency Unit Mid-range Speakers
- One 10 inch High Efficiency Subwoofer
- Two 160mm GreenEdge High Efficiency Unit Mid-Woofers

WITH INNOVATION COMES CONFIDENCE.

Innovation brings with it, peace of mind. The strength of its reinforced structure means the Jeep, Grand Cherokee is engineered to perform confidently in every condition.

## ELECTRONIC STABILITY CONTROL ESC <sup>(1)</sup>

A vehicle-wide network of safety sensors helps maintain control, providing instant aid should they detect you're veering off your intended path. ESC coordinates Electronic Roll Mitigation (ERM), antilock brake system (ABS) and Brake Assist, all-speed traction control, and Trailer Sway Control (TSC), bringing them into action when needed.

## A SECURE AIR BAG SYSTEM <sup>(6)</sup>

Your sense of security is complete with the Jeep, Grand Cherokee's all-around air bag system. Full-length side curtain, seat-mounted side thorax, driver kneebag and advanced multistage front air bags all work together to help provide protection.

## ADAPTIVE CRUISE CONTROL (ACC) <sup>(2)</sup>

Take the guesswork out of keeping a safe distance from the car ahead when motorway driving. The available ACC automatically adjusts cruising speed to maintain a preset distance between your Grand Cherokee and the vehicle in front of you.

## ADAPTIVE HEADLAMPS

They follow your lead as you turn the wheel, illuminating curves in the road ahead. Adaptive Headlamps can reveal what was once hidden. Headlamp washers keep your lenses free of debris. Standard Signature LED lights offer exceptional daytime visibility.

## TRAILER SWAY CONTROL (TSC)

Crosswinds and traffic hold no sway over you and your payload. As part of ESC, TSC helps keep you and whatever you are towing safely on course.

## SELEC-SPEED™ CONTROL

A sense of adventure comes naturally to those living in the world of Jeep. Here, capping the top of a tough hill is a birthright. However, smoothly navigating steep inclines can be a daunting endeavor. Engage Selec-Speed™ Control on the Selec-Terrain® dial of your 4WD Grand Cherokee, and you'll climb and descend in greater safety. Combines Hill Ascent Control and Hill Descent Control into one incredibly capable feature.

## RAIN-SENSING WIPERS AND RAIN BRAKE SUPPORT

Storm clouds hold little influence over your daily drive. Front wipers activate when raindrops are detected, and a smart brake system helps dry the brake discs when it's wet.

## ELECTRONIC ROLL MITIGATION (ERM)

As an extension of Electronic Stability Control (ESC), ERM employs ESC sensors to anticipate potential risk situations. If things get rough, ERM takes immediate action to help you maintain stability and remain under control.

## BLIND SPOT MONITORING <sup>(7)</sup> AND REAR CROSS-PATH DETECTION SYSTEM

These available systems constantly monitor the space between you and other vehicles. When a side or rear blind spot is encroached, you're notified via illuminated icons on your wing mirrors or by an audible warning.

## SENTRY KEY® ENGINE IMMOBILISER

A unique, embedded key code matched only to your vehicle helps to keep your Jeep, Grand Cherokee safely where it belongs.

## PARKVIEW® REAR BACK-UP CAMERA <sup>(5)</sup>

Back out safely with grace. These systems help bring previously hidden rear objects to your attention, either on-screen or with an audible warning, in good time to react.

## FORWARD COLLISION WARNING WITH CRASH MITIGATION: <sup>(8)</sup>

This device uses radar sensors to check whether you're approaching the car in front too rapidly and, if necessary, sends a signal to you so that you can intervene to avoid a collision. FCW is now updated to brake automatically. What's more, the Advanced Brake Assist (ABA) cooperates with the system, to increase the braking and avoid or mitigate the impact.

## PARKSENSE FRONT AND REAR PARK ASSIST SYSTEMS <sup>(5)</sup>

Jeep, Grand Cherokee's available Front Park Assist system helps you manoeuvre into parking spots by detecting objects in front of the vehicle and providing an audible warning when your proximity is too close for comfort for you and other drivers. When a side or rear blind spot is encroached, you're notified via illuminated icons on your wing mirrors or by an audible warning.

INNOVATION LEADS TO ADVENTURE.

**F**reedom means choosing an uncompromising way to reach your dream.

That's why today's Jeep, Grand Cherokee's range is even more complete, born ready to fulfill any desire and expectation of an evolved driver.

Jeep

## GRAND CHEROKEE LIMITED+.

### AN ADDED DIMENSION.

The UK exclusive Limited Plus version brings the benefit of the class defining 8.4" colour screen to life with the next generation Smartouch 3D Satellite Navigation system. The system offers Uconnect™ technology including voice recognition and 3D landmarks. 20" alloy wheels, sports suspension, performance brakes and premium styling. Brings Limited Plus into a different dimension.

## GRAND CHEROKEE SRT.

### THE BEAST HAS EVOLVED.

The Grand Cherokee SRT delivers more of everything you expect from the king of SUVs. It delivers in a big way. Power, luxury, function and style. For the Grand Cherokee SRT it is the 8-speed automatic transmission that delivers power from the 6.4L HEMI® engine to the ground through a fully electronic automatic mode or through redesigned steering-wheel paddle controls for manual shifting. The package delivers quicker shift speeds thanks to closer gear ratios and the ability to keep the HEMI V8 in the sweet spot of its power band longer. When starting the Grand Cherokee SRT, you start with the best-handling Jeep, vehicle ever, capable of .90 g skid pan results and braking from 62-0 MPH in 35m. That's just the beginning. Selec-Trac® allows five dynamic settings from Auto to Sport and Track Mode, where 70% of the HEMI® engine's torque is transferred to the rear wheels for a more rewarding on-track experience.

(1)No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice, and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. (2)ACC is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions. (3) Do not attempt water fording unless depth is known to be less than 508 mm. Traversing water can cause damage that may not be covered by the new vehicle warranty. Always off-road responsibly in approved areas. (4)Phone must support Bluetooth Phone Book Access Profile (PBAP). (5)Always look before proceeding, electronic drive aid is not a substitute for conscientious driving. Always be aware of your surroundings. (6) Advanced Front Air Bags: Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. (7)Always check visually for vehicles prior to changing lanes. (8) FCW system is solely an alert system for the front of the vehicle that does not take any actions to change vehicle dynamics to avoid a collision, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions.

Technical specifications and equipment are correct at time of going to print (12/15). Please refer to [jeep.co.uk](http://jeep.co.uk) for latest versions.
