Notes: S = summer tyres, S+M = all year tyres, W = winter tyres, MO1 = original tyres MB-Van • Available

¹ 16" wheels are not available for 119CDI and 3.2t models. ² For vehicles up to max. 114CDI models. ³ For vehicles up to max. 116CDI models.

⁴ For all 3.2t-Crew van/van vehicles with N1 registration the maximum speed is limited to 160km/h.

Please note that further build restrictions may apply depending on model. Please speak to your local Dealer for more information. The listed tyres are recommended on behalf of Mercedes-Benz for Vito models. Other tyre brands may be fitted however the load capacity and speed symbols must be as per the manufacturer's original specification.

As driving safety and fuel savings can be affected directly by your own, individual driving style, please take note of the following: an economical, anticipatory driving style can reduce your fuel consumption noticeably. The tyre pressure should be checked regularly in order to improve wet grip and fuel efficiency. A safe following distance appropriate to the stopping distance should be maintained at all times.

Fuel efficiency

A rolling tyre deforms and consumes energy as it does so. This is one of the 5 resistive forces which act on a vehicle.

Wet grip

The wet grip indication provides information about an important safety aspect of a tyre: the level of grip it provides on a wet road.

External noise

The level of external rolling noise produced by a tyre is shown on the European Commission label in decibels in combination with one, two or three sound waves.

Terms and Conditions Vehicle and option availability and combinations may be subject to change since this price list was issued. Model and option List Price are quoted ex-factory and exclude VAT unless otherwise stated. A standard delivery charge of £600 excluding VAT will be added to model prices quoted in this price list.
