3.1 TECHNOLOGY PAGE

PureTech Petrol Engines

Designed for drivability and performance, PureTech Petrol engines combine efficiency with cutting-edge technology.

They take the best that the market has to offer and find the perfect balance between torque and power at low revs. This advance in technology generates savings in fuel consumption and reduces CO₂ emissions compared to a vehicle with equivalent power and torque.

Combined with the new automatic EAT6 gearbox, the 1.2 PureTech 110 EAT6 S&S turbo version emits CO₂ emissions of only 104 g/km, making it the benchmark for automatic petrol engines in the segment.

The 208's 1.2L PureTech 110 engine was awarded 'International Engine of the Year 2016' in the 1.0L to 1.4L category by a panel of 65 industry experts.

Reversing Camera / Rear Parking Aid / Park Assist

The reversing camera automatically activates when you select reverse gear and lets you view the area behind the car as you manoeuvre. It comes with rear parking aid as standard but can also be ordered with Park Assist for added safety and convenience.

The Park Assist system assesses the space available to ensure that your car will fit. Ultrasonic sensors and steering management take over to manoeuvre in and out of the parking space for you.

Acceleration, braking, gear changes and use of the clutch in a manual transmission are left in your control. As you manoeuvre, the system gives you visual and audio information to ensure your safety.

Peugeot Connect SOS & Assistance

Peugeot Connect SOS is now in use in most major European countries, including the UK, and is technology that could prove vital in an emergency.

Automatic emergency call: if the airbags inflate or the seat belt pretensioners are triggered, the vehicle automatically makes an emergency call on behalf of the driver. Peugeot Connect SOS then locates the vehicle, establishes telephone communication with its occupants and arranges for the appropriate emergency service to be dispatched.

Manual emergency call: whether the victim or the witness of an emergency situation, the driver can call Peugeot Connect SOS quickly by pressing the SOS button located on the dashboard (and holding for 3 seconds).

BlueHDi Diesel Engines

BlueHDi engines combine high performance, impressive fuel economy and low CO₂ emissions.

Every diesel version of the Peugeot 208 emits under 95 g/km of CO₂ and achieves up to 94.2 mpg on a combined drive cycle.

This market-leading range of 1.6 BlueHDi diesel engines is also available with Stop & Start technology.

Active City Brake

Active City Brake is a new technology which makes it possible to avoid an accident or reduce its severity if the driver fails to react.

It works in urban conditions at speeds of less than 20 mph. A short range sensor is fitted to the top of the windscreen and can detect other vehicles that are driving in the same direction or stationary.

This will automatically trigger an emergency brake to stop the vehicle and avoid a collision entirely or limit the consequences of an accident by reducing the speed of impact.

7" Touchscreen wth Connected Satellite Navigation

Linked to the 7.0" capacitive colour touch screen, the system includes European mapping, 3D city mapping and voice recognition (for radio, navigation and telephone functions). The system also includes a 3 year subscription to PEUGEOT Connect allowing an automatic, permanent connection to online navigation services (in partnership with TomTom®).

Key features of PEUGEOT 3D Connected Satellite Navigation include:

- **TomTom® Traffic:** Real-time updates on traffic conditions (traffic jams, roadworks) and suggested alternative routes.
- **Local Weather:** Displays forecasted weather conditions along the route.
- **Fuel Stations:** Displays nearby fuel stations and pricing.
- **Local search:** Access address and contact detail information for a point of interest.

*Standard, optional or unavailable according to version.

Mirror Screen® & Apple CarPlay™

Mirror Screen® is a technology which mirrors compatible apps from your smartphone and displays them on the touchscreen. It is accessed via MirrorLink® which works with compatible android phones and CarPlay™ which is compatible with iPhone5 and above.

Mirror Link® will display compatible apps on the touchscreen but it does not offer voice control functionality. Handsfree calls can be made on android phones using Bluetooth®.

Apple CarPlay™ does mirror compatible apps but it also features voice control through Siri which allows phone calls, text messages, music and maps to be used without the need to take eyes off the road.

Note: Mirror Screen® is standard on all 208s with a touchscreen.
