Please note, choosing optional alloy wheels does not affect CO<sub>2</sub> emissions on Scirocco models. Choosing larger alloy wheels than standard, as an option, may result in increased fuel consumption. This is due to the fact that larger wheels have both more aerodynamic drag and more mechanical drag, resulting in increased rolling resistance and increased wind resistance.

For full details, please contact your authorised Volkswagen retailer.**

Choosing larger alloy wheels than standard, may result in increased fuel consumption as well as higher CO<sub>2</sub> emissions and subsequently increased Vehicle Excise Duty (VED) band, and BIK rates paid for company car drivers may increase. As a result, the VED band that the vehicle falls into may increase from its original VED band when fitted with standard size wheels. In some instances, the recommended 'On the road' retail price paid for the vehicle may increase as a result of the increased VED rate. In addition, larger alloy wheels than standard size will require the purchase of tyres. Prices shown do not include the transfer of tyres.

1 Price excludes painting. 2 Price per wheel excludes tyre.

\* Fuel consumption and CO<sub>2</sub> figures are obtained under standardised EU test conditions (Directive 93/116/EEC). This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. More information is available on the Volkswagen website at [www.volkswagen.co.uk](http://www.volkswagen.co.uk) and at [www.dft.gov.uk/vca](http://www.dft.gov.uk/vca). CO<sub>2</sub> is the main greenhouse gas responsible for global warming. This information should be used for illustration purposes only. Choosing larger alloy wheels than standard may result in increased fuel consumption as well as higher CO<sub>2</sub> emissions and subsequently increased Vehicle Excise Duty (VED) band, and BIK rates paid for company car drivers will increase. In some instances, the 'On The Road' cost paid for the vehicle may increase as a result of the increased VED rate. The specifications contained in this price list are for information purposes only and are subject to change.

† Please note these models are only available from stock and are not available to factory order.

The way VED (Vehicle Excise Duty) vehicle tax is calculated will change for vehicles that are first registered with DVLA on, or after, 1 April 2017.

If a new vehicle is registered on or after 1 April 2017, after the 'First year rate' VED the majority of vehicles move to the 'Standard rate' of vehicle tax which is £140 a year.

The 'First year rate' will be based on the CO<sub>2</sub> emissions and the list price of the vehicle supplied by the Manufacturer or Retailer as applicable on the day before the vehicle is first registered and taxed.

After the 'First year rate', all vehicles with zero emissions will be exempt from the 'Standard rate' of vehicle tax. All petrol and diesel vehicles will pay a standard rate of £140 a year, and alternative fuel vehicles will pay a standard rate of £130 a year.

Petrol or diesel vehicles with a list price over £40,000 at first registration will pay £450 a year, after the first 'First year rate' vehicle tax, for a period of five years. This comprises the £140 'Standard rate' and £310 additional rate. After five years the vehicle tax will revert to the 'Standard rate' of £140 per year.

Alternative fuel vehicles – hybrids, bi-ethanol or LPG, with a list price over £40,000 at first registration will pay £440 a year after the 'First year rate' vehicle tax for a period of five years. This comprises the £130 'Standard rate' and £310 additional rate which reverts to £130 'Standard rate' after five years.

Vehicles with a list price exceeding £40,000 with zero emissions (including electric) will pay the additional rate of £310 a year for a further five year period, after the 'First year rate' tax. After the five year period these vehicles will pay zero VED tax.

There is no provision for 6 month's 'First year rate' VED.

# VEHICLE EXCISE DUTY (VED) AND ADDITIONAL 'ON THE ROAD' COSTS

For vehicles first registered on or after 1 April 2017, the amount you pay for the 'First year rate' of VED is based on CO<sub>2</sub> emissions. For subsequent year's VED, you then pay the 'Standard rate' of VED, depending on the type of fuel the vehicle uses, as shown in the tables below. VED rates for vehicles registered before 1 April 2017 will not be affected by the new VED rate changes.

### SERVICE INTERVALS

Volkswagen is pleased to offer you a choice on how your Volkswagen is serviced. The appropriate selection is entirely dependent on how the car is likely to be driven and its general use. To help you identify which type of service would be most suitable, please refer to the following guide.

The Fixed Service is recommended for vehicles that will cover less than 10,000 miles in 12 months and if the vehicle is likely to be used in the following way:

- Predominantly urban driving, short journeys with frequent cold starts.
- Activities regularly producing high engine loading, e.g. frequent hill climbs, driving with vehicle fully loaded and towing.
- Uneconomical driving style using high rpms with heavy acceleration and heavy braking.

The service intervals for the Fixed Service are as follows:

- Oil change service – After 1 year or 10,000 miles (15,000km), whichever is soonest.
- Inspection service<sup>2</sup> – First after 2 years or 20,000 miles (30,000km), then every one year or 20,000 miles (30,000km), whichever is soonest.

### SERVICE INTERVALS (CONTINUED)

The Flexible Service is recommended for vehicles with daily mileage of more than 25 miles where the vehicle is driven regularly mainly on longer distance journeys. The vehicle is driven mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner. With the Flexible Service the vehicle can cover anywhere between 10,000<sup>3</sup> and a maximum of 20,000<sup>3</sup> miles or 24 months (whichever is soonest) between oil changes.

The service intervals for the Flexible Service are as follows:

- Oil change service – According to flexible service interval display (after 2 years at the latest).
- Inspection service<sup>2</sup> – First after 2 years or 20,000 miles (30,000km), then every one year or 20,000 miles (30,000km), whichever is soonest.
