POLESTAR

# YOUR OWN V60 POLESTAR IS IN REACH

Volvo has always led the way in innovation, with products that continue to influence and shape the entire car industry. But that's never been our motivation. You are. Every car, and every world first we introduce, is designed around you... to keep you safer on the road and more at ease behind the wheel. To bring extra excitement to every journey and improve your whole driving experience.

Polestar was founded as a motorsport team in 1996 and with its latest model, brings what it has learnt on the race track to the road. The V60 Polestar has been developed for those who share a passion for driving - that driving really matters and that a true driver's car should enable you to enjoy driving all year, on all roads and in all weather conditions. It continues the proud heritage of fast Volvo estates like the racing 850 BTCC, a tradition deeply rooted amongst Volvo enthusiasts.

# VOLVO V60 POLESTAR FEATURE EXPLANATION

---

## **CITY SAFETY**

Included as standard on your Volvo V60 Polestar is City Safety, which senses potential collisions (active from 2 to 31mph) and can activate the brakes automatically should you not react in time.

---

## **LANE KEEPING AID**

A forward-facing camera constantly monitors the V60 Polestar's position on the road, gently steering the car back on course or alerting the driver through the steering wheel if roadside markings are crossed without obvious reason such as use of the turn indicator.

---

## **ADAPTIVE CRUISE CONTROL**

When engaged, adaptive cruise control makes driving the V60 Polestar even more relaxing, using radar to maintain a set distance to the car in front. As soon as a slower vehicle is detected, the car's speed will automatically adapt to match it, keeping you at a safe distance. The useful Queue Assist function can keep the gap even in queues with repeated starting and stopping.

---

## **ROAD SIGN INFORMATION**

The V60 Polestar can also help you stay informed by displaying road sign information within your instrument display, including speed limit signs and "no overtaking" warnings.

---

## **ACTIVE HIGH BEAM**

In addition to Active Bending Xenon Lights, which swivel the headlamps to follow the road, the Active High Beam as fitted to the V60 Polestar allows the driver to see as much of the area in front of the car as possible when high beam is selected. Using the camera, it identifies other vehicles in front and uses deflectors to cover the light beam so as not to blind other drivers, while still highlighting all surrounding areas.

---

## **VOLVO ON CALL**

This GPS communication system helps you stay connected to your car, helping you locate your vehicle, lock and unlock it, and even see all your dashboard readings (fuel levels, trip meter, etc.) - all from your smartphone or mobile device. Plus, it means emergency assistance is available at the touch of a button.

---

## **PEDESTRIAN AND CYCLIST DETECTION**

The groundbreaking Pedestrian and Cyclist Detection technology with full auto brake, detects and automatically brakes for cyclists swerving out in front of the car. The advanced sensor system scans the area ahead. If a cyclist heading in the same direction as the car suddenly swerves out in front of the car, as it approaches from behind, it will prompt you to act with a flashing warning light on the windscreen, along with an audible alarm. If you do not react to the warning, and a collision is imminent, the car immediately brakes with full braking force.

---

## **BLIND SPOT INFORMATION SYSTEM WITH CROSS TRAFFIC ALERT**

The radar based BLIS technology informs the driver about other vehicles in the blind spots on both sides of the car and also monitors and alerts drivers to rapidly approaching vehicles up to 70 metres behind the car. Cross Traffic Alert uses the radar sensors at the rear end of the vehicle to alert the driver to crossing traffic from the sides when reversing out of a parking space.
