# PARKING PACK

When space is tight, the guidance given by the Toyota parking aid system helps avoid accidental scrapes. Ultrasonic sensors in the rear bumper link to an in-car audible warning that automatically activates when reverse gear is engaged. The warning beeps become progressively more frequent the closer your vehicle gets to an

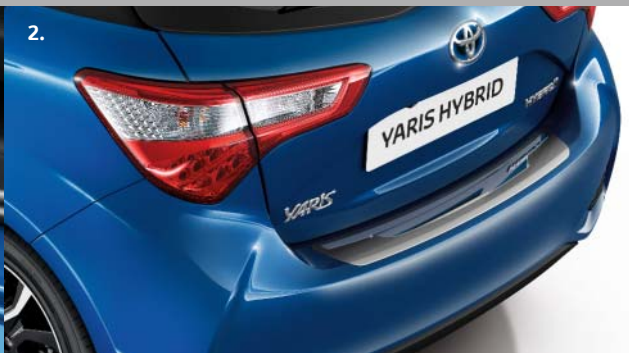

obstacle. The system can also be switched off when you don't need it, such as when towing a trailer.

The Parking Pack includes 4 front sensors and 2 rear sensors for all grades except Icon Tech. There is a 2 rear sensor only kit for Icon Tech grade to complement the standard front park assist.

# PROTECTION PACK

The Protection Pack helps keep your Yaris in showroom condition. The rear bumper protection plate helps prevent scrapes and scratches when loading items into the boot. In addition, your Yaris will also be equipped with front and rear mud flaps, which are designed to protect your car from mud, spray and stone chips, and aluminium scuff plates to protect your door sills.
