Rediscover the thrill of driving with the new Volvo S60, the powerful, athletic and dramatic sedan designed to make every journey enjoyable – from the briefest of commutes to the most epic of road trips.

To Volvo Cars, building a car that's great to drive means balancing dynamism with comfort. It has to feel responsive, and yet it must maintain its poise at all times. And that's exactly what we have achieved with the S60.

What's more, it does so with a focus on refinement throughout. The cabin is fashioned to smooth away the miles. Scandinavian design and Swedish craftsmanship combine to create a cabin focused on putting you in control, made from beautiful materials. Technology that's so intuitive it makes every journey easier. And an exterior that will turn heads.

Confident and elegant, the S60 is built to inspire every journey. Feel the connection.

WE ARE REDEFINING PERSONAL MOBILITY.

Our aim is to provide freedom to move in a personal, sustainable and safe way. We do this by putting your needs first – using the best available technology to serve you, inventing new technology where none already exists and combining technologies to deliver new experiences.

At Volvo Cars, we have always put people first. We believe that technology should set us free – not restrain us. The car shall be an enabler of a richer, less complicated life. And as a progressive provider of personal mobility, we want to enable a future of fully connected, fully electrified and self-driving cars.

We are committed to pursuing our visions:

- No one should be seriously injured or killed in a new Volvo car by 2020.
- We want to give back one week of quality time per year through a new Volvo car by 2025.
- Around 50 per cent of the cars we produce and sell will be electric by 2025.

These visions reflect our commitment to protecting what's important to you and the world we share. This is summarized in the Swedish word "Omtanke" which stands for caring and consideration. It also means "to think again", so we collaborate with some of the world's top tech companies to nurture innovations that will take us into a better, more sustainable future.

Our goal is to make your life easier and more enjoyable – and to give back that sense of joy and freedom that the car represents.

T5 | R-Design
725 Fusion Red metallic

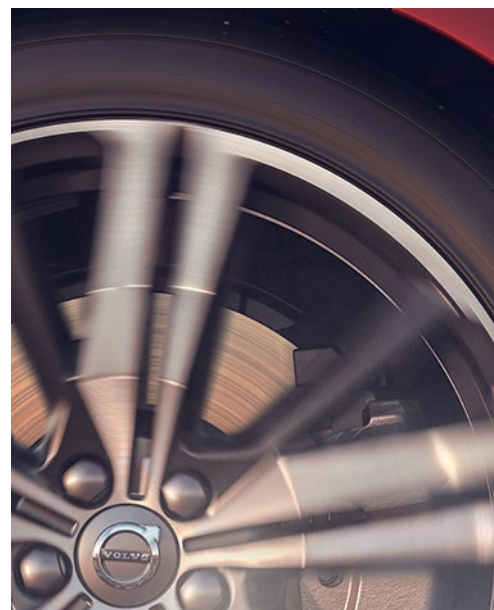

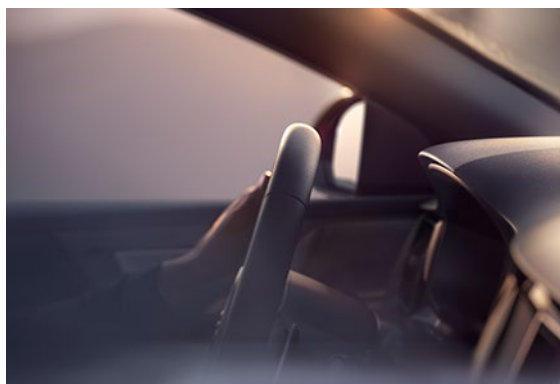

DESIGNED FOR DRIVING.

Confident, athletic and elegant, the S60 is the essence of good Scandinavian design. A dynamic sedan, one that projects confidence without shouting.

Crisp, sharp details enhance and complement the car's inherent strength and its sleek silhouette is an invitation to get in and drive. It's a drive that will inspire and excite you, one where effortless performance, an advanced chassis and intuitive technology combine to create a car that celebrates the joy of the road through the quality of its design.

From inside to out, the S60 is a sedan that will be a delight to the senses, whatever the driving situation.

20" 5-triple spoke Matt Black Diamond Cut alloy wheels help to make the S60 R-Design look even more dynamic and purposeful.

The deeply-sculpted flanks make the S60 instantly recognisable and define the car's athletic character. At night, the distinctive LED tail lights emphasise the strong shoulder line.

T5 | R-Design

Fine Nappa Leather in combination with open grid textile upholstery |
Charcoal in Charcoal interior RGOR | Metal Mesh Aluminium inlay |
Bowers & Wilkins audio system

Discover a cabin full of beautiful details and technology that lets the driver enjoy every journey by allowing total focus on driving. In R-Design trim, Contour seats provide exceptional side support while a sport steering wheel connects you to the car. Decor panels made from aluminium provide a sleek, modern finishing touch.

Fine Nappa Leather

Charcoal in Charcoal interior RGOR | Driftwood inlay |
Bowers & Wilkins audio system | Panoramic roof

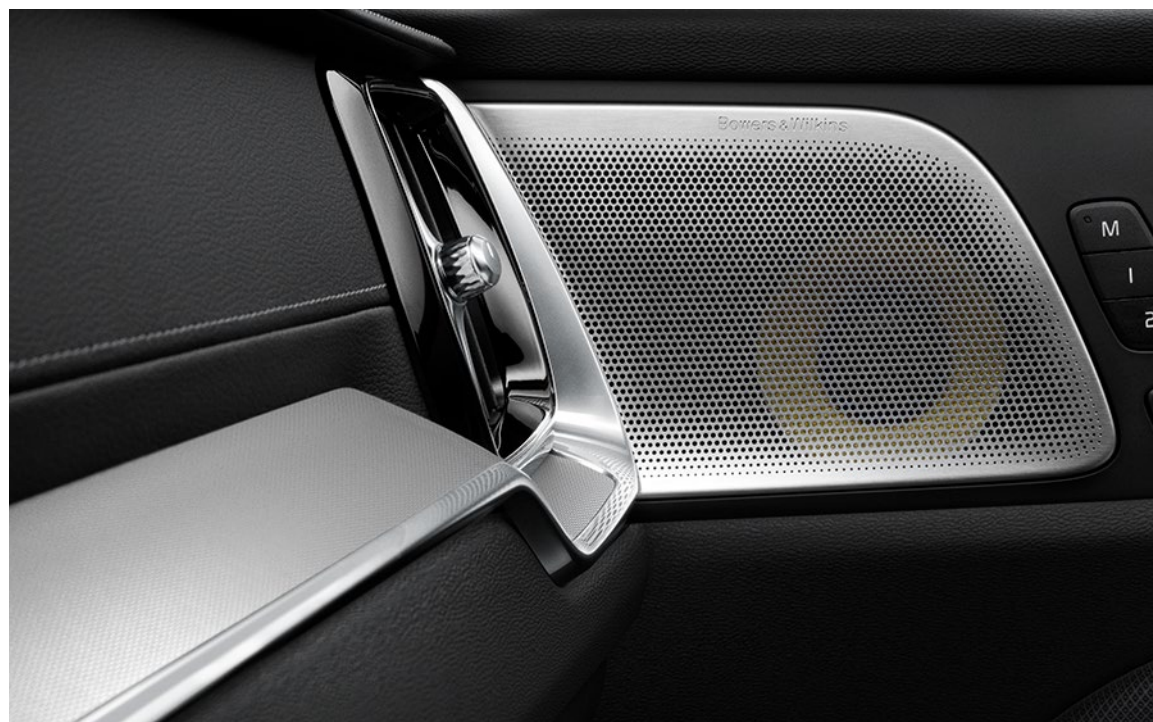

STYLED FOR YOU.

Sit in the driver's seat of the S60 and you are in a place that has been designed for driving pleasure. The clean and uncluttered layout combines form and function. Details, such as the diamond pattern on the control knobs and the tailored dashboard, create a sense of purpose and of refinement.

The front seats are shaped to complement the human form, so they are exceptionally supportive and have a wide range of adjustment. In the rear, generous legroom and the same levels of seat support mean everyone will be comfortable.

The optional panoramic glass roof floods the cabin with light. It's tinted to reduce glare and has a powered sunshade and our CleanZone technology filters incoming air to help remove dust, pollen, particulates and odours.

The distinctive air vents have controls with a metal finish and a diamond-pattern on the knob. Metal Mesh Aluminium inlays on the dashboard create a technical, contemporary look that complements the driver-focused cabin.

The Metal Mesh Aluminium decor is a modern and luxurious design touch, perfectly complementing the stainless steel speaker panels of the Bowers & Wilkins audio system.

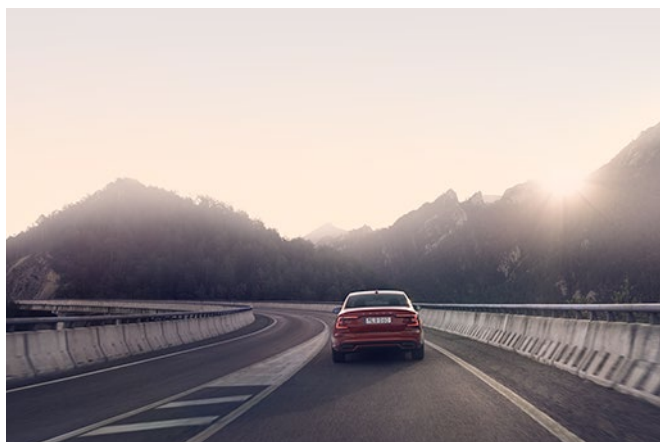

MADE FOR DRIVING.

The S60 is a car that will inspire you to drive. A car with a dynamic character. One that will heighten your senses and bring enjoyment to your driving. Fluent and perfectly balanced, it's capable of delivering both refined, long-distance comfort and an exciting drive.

The chassis in the S60 combines double wishbone front suspension and a unique integrally-linked rear axle. It means that every input you make is matched with a precise and sharp reaction, while still ensuring a comfortable ride. An optional Sport chassis (standard with R-Design trim) increases stability and quickens responses even further by lowering the ride height and adding stiffer springs and dampers.

Active chassis technology allows you to customise the way the S60 rides and handles, and the three Adaptive Drive Modes let you tailor your driving experience further by altering the engine, gearbox, accelerator and steering responses. Or you can create your own bespoke set-up with Individual mode. However you configure it, the S60 is the perfect partner, whatever the journey.

The advanced engineering in the S60 delivers pure, dynamic driving pleasure. With double-wishbone front suspension similar to that found in sports cars, the S60 provides you with more precision and control more of the time.

THE THRILL OF ELECTRIC PERFORMANCE.

Our range-topping plug-in hybrid, the T8 Twin Engine, is the epitome of real driving satisfaction. Powering the front wheels is a 303hp, turbocharged and supercharged petrol engine. Power to the rear wheels comes from an 87hp electric motor. This means you get all the benefits of electrification – including zero emissions travel for the average daily commute of many people – with the performance of a powerful internal combustion engine.

And for those who enjoy taking the long way home, the S60 T8 Polestar Engineered adds lightweight forged wheels, high-performance Brembo brakes and a stiffer, lowered chassis with

Öhlins dampers. All fine-tuned by the performance experts at Polestar, they create an inspired, dynamic and intuitive driving experience.

Because it was designed to use a hybrid powertrain, the T8 Twin Engine has the same space and capacity as other S60 models, so it's just as practical. Charging is quick and easy – you simply plug it into the mains supply or at a charging station.

Four drive modes allow you to change the car's character to suit the road ahead and even your mood. Pure mode is optimised to allow zero-emission commuting with electric power up to a range of 31 mph. Switch to Power mode and the turbocharged,

supercharged petrol engine and powerful electric motor work together to give you an instant response when you accelerate. An AWD mode sends power to all four wheels to help create extra traction in slippery conditions. And in default Hybrid mode, the T8 Twin Engine chooses between the petrol engine, electric motor or a combination of the two, to keep you moving as smoothly and efficiently as possible.

The S60 has been designed from the ground up with plug-in hybrid power in mind, so the batteries and electric motor are set lower in the chassis. This means more responsive, intuitive handling due to a lower centre of gravity and more even weight distribution.

VOLVO S60

T5 | Inscription

727 Pebble Grey metallic | 19" 5-multi spoke
Black Diamond Cut alloy wheels

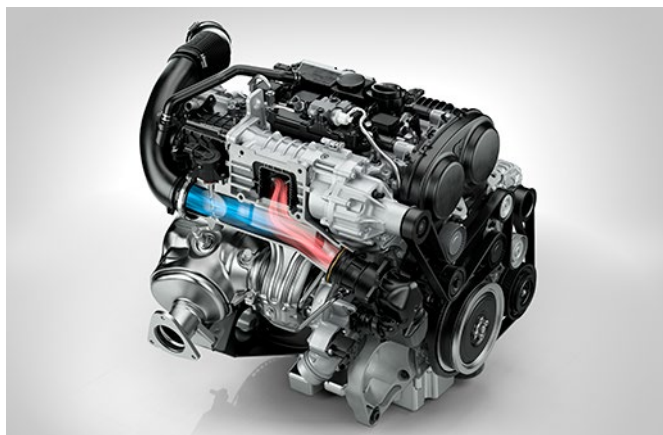

THE POWER OF EFFORTLESS RESPONSE.

Wherever you're headed, our powerful and refined petrol powertrains make the driving experience a real pleasure with the T5 engine balancing responsiveness with efficiency. Compact and light, these four-cylinder powertrains reduce weight over the front wheels, helping to improve agility and the way the car responds to your driving inputs. And because smaller engines lose less energy through friction, you'll find them more efficient – every drop of fuel works harder and helps minimise emissions and consumption.

All of our powertrains can be complemented by adaptive drive modes, allowing you to alter the way the S60 drives to suit the road ahead. Eco mode, for example, recalibrates the powertrain for the lowest possible fuel consumption and emissions, while Dynamic sharpens response times, reacting faster to your commands. And as the S60 is available with our eight-speed automatic transmission, you will experience smooth, responsive gear changes. Opt for the R-Design trim and you can add unique paddle shifters, for easy and exact gear shifting.

SAFETY *Protecting what's important*

727 Pebble Grey metallic

PILOT ASSIST. YOUR JOURNEY MADE EASIER.

Our advanced driver assistance technology helps make your life easier, allowing you to relax and enjoy the drive while still being in control. Pilot Assist helps to reduce some of the effort required at higher speeds (up to 80 mph) or in stop-start traffic, so journeys are more enjoyable. It keeps the S60 at a set speed and distance from the vehicle in front, and uses steering inputs to help keep you in the centre of your lane. This means that even in the most monotonous driving situations, such as on long highway journeys, your car helps take some of the strain and keeps you focused on the drive.

It does this using a combination of information from both a camera and a radar integrated into the S60's windscreen, which the car uses to monitor its position relative to visible lane markings and the vehicle in front of you (if there is one).

It's intelligent too: using map data from the car's navigation system, the car identifies hills and curves ahead and adapts the speed to help optimise your comfort and safety. And when the system deactivates, you are notified by a discreet vibration in the steering wheel.

Pilot Assist is connected to the Drive Modes of the S60, so in ECO mode there is the possibility of improved fuel efficiency, while if you opt for Dynamic, it will quicken the response to the speed of the vehicle in front.

This is our approach to technology – designed to make every journey you take safer and more relaxing.

Please note: The driver is always responsible for how the car is controlled, these are only supportive functions.

CITY SAFETY TECHNOLOGY. YOUR PRO-ACTIVE PARTNER ON THE ROAD.

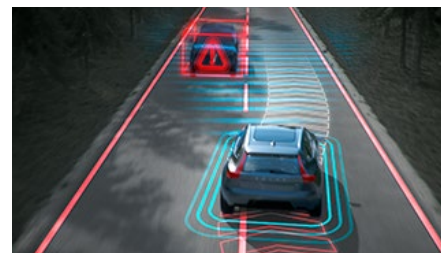

Connected Safety

This safety innovation can help you to foresee potentially hazardous traffic situations, for example if there's another connected car ahead with activated hazard lights. And using actual weather and infrastructure information, Connected Safety can also alert you if there is a risk for slippery road. This information can also be shared with other connected cars.

Oncoming Mitigation by Braking

A Volvo Cars safety world first, this innovation can detect vehicles heading towards you on the wrong side of the road. If a collision can't be avoided, it can brake your car automatically and tighten the optional prepared front safety belts in order to help reduce the effect of a collision.

Oncoming Lane Mitigation

If you drift across the lane markings and into the path of an oncoming vehicle, your car can alert you and gently steer you back onto the correct path. This system does this using automatic steering assistance, helping you to avoid collisions with oncoming vehicles.

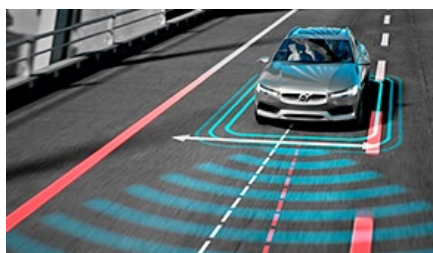

Our advanced pro-active safety technology helps you feel confident and in control. At the heart of this technology is City Safety. By helping you to keep a lookout and brake or steer away for you if necessary, it makes driving more enjoyable while helping to prevent accidents.

City Safety can identify other vehicles, pedestrians, cyclists and large animals ahead of you, even at night. It warns you if needed and can brake automatically to help avoid a collision or reduce impact. Our advanced Oncoming Mitigation by Braking technology – a Volvo Cars safety world first – can detect if

there's another vehicle driving towards you and brakes automatically to mitigate the impact.

Your Volvo can also support if you're forced into a rapid evasive action at speeds between 31 and 62 mph. As you begin to steer away, City Safety can help you do it as effectively and safely as possible by braking the inner wheels individually and reinforcing your steering input.

City Safety is simply your perfect partner: pro-active when it's needed, and staying discreet in the background the rest of the time.

Lane Keeping Aid

The Lane Keeping Aid can gently help steer your car back into its lane if it senses you are about to inadvertently cross into a different lane. If this is not enough or if you keep steering across the lane markings, you'll be alerted with vibrations in the steering wheel.

Run-off road Mitigation

Stay safely on the road with this Volvo Cars safety innovation. If Run-off road Mitigation detects you're about to leave the road unintentionally, it can provide steering input and, if necessary, brake support to help guide you back on track.

BLIS™ with Steer Assist

BLIS™ can alert you when a vehicle enters your blind spot or approaches fast from behind. If you nonetheless drift into the path of another vehicle, BLIS™ can gently help steer you back into your lane.

Please note: The driver is always responsible for how the car is controlled, these are only supportive functions.

PARKING PEACE OF MIND.

Every journey you will ever make begins and ends with the parking experience, which is why Volvo Cars has invested a lot of thought into developing solutions that make parking easier and help save you time. Your S60 can help find you a parking space, park itself and also pay for it.

If you want to take control of parking yourself, then the 360° camera and Park Assist sensors help you to park safely and easily. The 360° camera is there to help you with its bird's-eye view of your surroundings, shown on the centre display. In order to pay for your parking, just use the Park & Pay app that comes with Sensus Navigation.

And for even simpler, safer parking, Park Assist Pilot is like having someone park your car for you. It will tell you if a space is big enough and then takes over the steering for the parking manoeuvre. It can park in a space just 1.2 times the length of your Volvo – all you need to do is accelerate and brake according to the prompts on the driver display.

Then, when you leave a parking space, Cross Traffic Alert with Autobrake helps you to avoid a collision when you reverse out. It warns you of vehicles, pedestrians and cyclists approaching from either side and can even brake for you if it detects an imminent collision.

360° camera

Our 360° camera provides you with a helpful bird's-eye view of your car and its surroundings on the 9-inch centre screen display in the cabin, so you'll be able to park simply and safely, with excellent visibility 100 per cent visibility of what's around you.

Crash-absorbing front seats

The sculpted front seats in your Volvo are more than just beautiful to look at. Their unique structure helps to absorb vertical impacts, helping to protect your spine if the car lands heavily after leaving the road. It's another example of how we make every part of a Volvo work harder for your safety.

DESIGNED TO PROTECT.

Protecting you and your passengers has always been at the heart of every car we make, and the advanced safety features in your Volvo are the result of decades of passionate innovation.

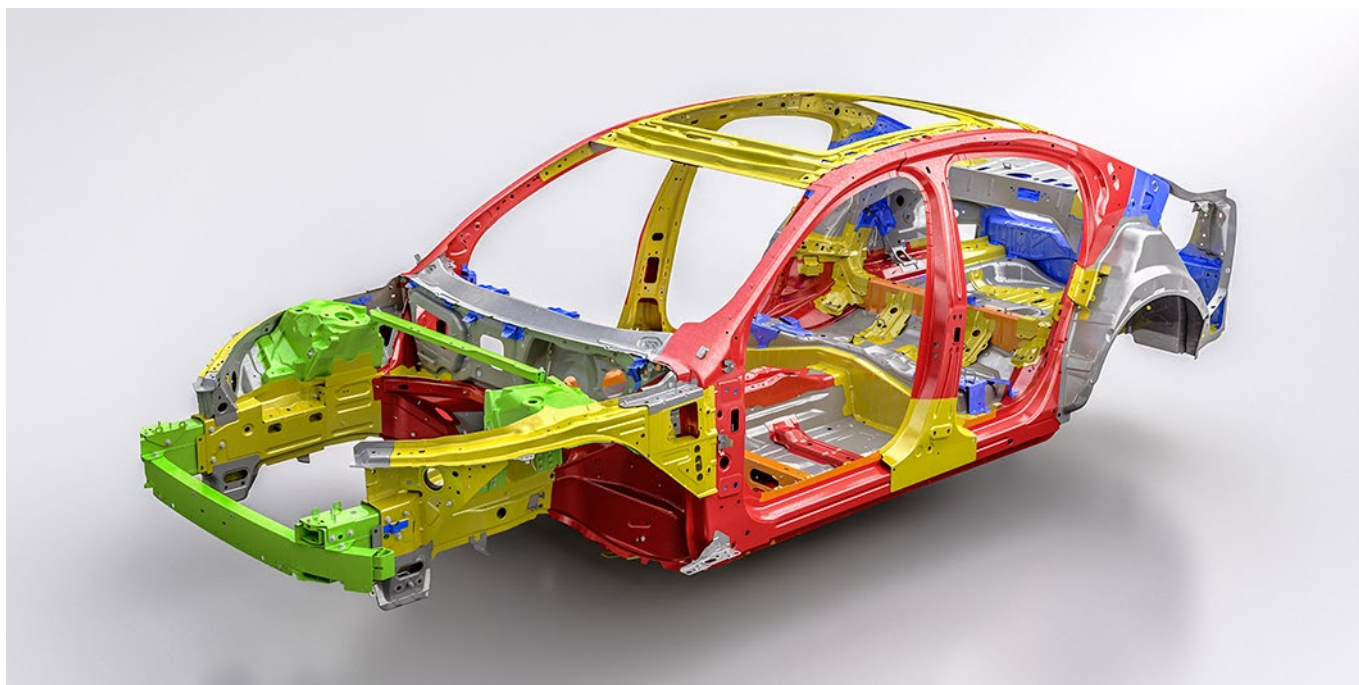

In a Volvo, it's the interaction between all the safety features that determines how efficiently the car will protect you in a collision. Everything, from the design of the seats to the surrounding safety cage and the safety belts and airbags, works together to help minimise the strain on all occupants and maximise protection.

The front seats not only provide world-class comfort, they are also designed to protect you in the event of an impact. Our unique whiplash injury protection helps protect your back and neck if your car is hit from behind. And in a run-off road

scenario, the energy-absorbing front seat structure will help protect your spine in a hard landing, should the car become airborne.

Your Volvo can even sense and prepare for impact. The optional prepared front safety belts tighten automatically if the car detects that a collision is likely, to ensure you're in the safest position should one occur. And in the event of an accident, your Volvo can automatically contact emergency services and communicate the car's location so that you can get help as quickly as possible.

It's this range of safety technologies and attention to detail that makes your Volvo a safe place to be.

Volvo safety cage. The passenger compartment uses a high percentage of ultra high-strength boron steel to create a protective cage around everyone inside the car, while

front and rear deformation zones help dissipate the crash energy. The safety belts and airbags work together to cushion you and your passengers in a controlled fashion.

THE HUMAN TOUCH.

We set out to make living with your Volvo easier and more enjoyable. To do that, we understood that the advanced technology that connects you to your car and the world around you should have a natural, human feel.

Our 9-inch centre display with touch screen allows you to intuitively control the functions of your Volvo and stay connected. The touch screen surface is so responsive that you can operate it wearing gloves. It also has an anti-reflective coating to help reduce glare, so it's always easy to see what's on the screen.

One of Volvo Cars' guiding principles is to make it easy for you to interact with your Volvo without being distracted. As a result, we put essential information right in front of the driver by using a digital driver display in the instrument panel. This high-resolution screen showcases key information for the driver and can vary the size and shape of the readouts it shows, depending on how you are using your car. For example, if you are using the navigation system, the display for that becomes enlarged, so you can focus on your directions more easily. The driver display also adapts its brightness according to exterior light sources such as bright sunshine or the lower light conditions of tunnels.

An optional head-up display also projects information onto the windscreen so it's closer to your eyeline – another way of reducing any potential for distraction.

And with Voice Control, you can access many functions of the S60, while keeping your hands on the steering wheel and your eyes on the road at all times. As it uses natural speech patterns, you don't need to learn specific commands – you can just talk to your Volvo as if you were talking to another person.

The 9-inch centre display with touch screen allows intuitive control of the car's functions. You can use it to operate the navigation, entertainment, climate control and your smartphone. Sleek and responsive, it looks beautiful and works beautifully – just how all technology should be.

YOUR WELL-CONNECTED GUIDE.

Intuitive technology in the S60 helps get you where you need to go quickly and easily. The clear graphics of Sensus Navigation are easy to read, while the portrait format of the centre display means maps scroll less and are able to show more of the road that you are travelling on.

Our innovations also save you time by helping you to find what you're looking for, with built-in apps such as Google Search and

Yelp. Find a petrol station, a restaurant or a hotel and then use Sensus Navigation to take you there.

The S60 keeps you connected with your digital world with an onboard wifi hotspot and 4G connectivity. And connecting your phone to the car is as easy as plugging it in – Apple CarPlay™ or Android Auto™ will do the rest, turning the centre display into an extension of your phone's screen.

Voice control
Volvo Cars' latest voice recognition technology understands natural speech, so you can simply talk naturally to your car – there's no need to memorise specific phrases to operate climate control, navigation, media or telephone features.

Sensus Navigation
With its clear mapping, seamless connectivity and ease of use, Sensus Navigation is your companion on every drive, taking care of the journey and leaving you to enjoy every moment.

Smartphone integration
Apple CarPlay™ or Android Auto™ allows you to simply and easily connect your smartphone to your car. All you need to do is plug it in and the centre display will show you the same type of interface that you'll recognise from your phone's home screen.

HEAR THE DIFFERENCE.

Immerse yourself in the clarity and detail of your favourite music in the S60. By working with some of the world's finest audio makers, we've created an in-car experience that takes you closer to the music you love.

Harman Kardon® Premium Sound delivers a beautifully balanced, powerful sound. This immersive experience is enabled by 14 hi-fi speakers including an air-ventilated subwoofer that produces a bass sound you'll feel in your body.

If you're truly passionate about music, the Bowers & Wilkins audio system with a full 1100W output will take the experience to an even higher level. The 15 separate high-end speakers

– including a tweeter-on-top centre speaker that minimises acoustic reflection from the windscreen and our unique air-ventilated subwoofer – will surround you with a powerful, pristine sound that feels more spacious and true to life than ever. It's all about music and making it possible for you to experience it just as it was intended when it was created.

And with seamless smartphone integration, enjoying music on your device is as easy as making a call, thanks to Apple CarPlay™ and Android Auto™, while the Spotify app grants you immediate in-car access to all the music you'll ever want.

Our Bowers & Wilkins audio system integrates seamlessly with the cabin architecture of your Volvo to deliver the most realistic immersive sound possible. Innovative audio processing technology with three room modes allows you to recreate the acoustics of a specific room inside your Volvo, bringing you even closer to the music. And to enable extremely low and undistorted bass tones, the air-ventilated subwoofer uses innovative technology that allows it to pulse large amounts of air, actually turning the cabin into one big woofer.

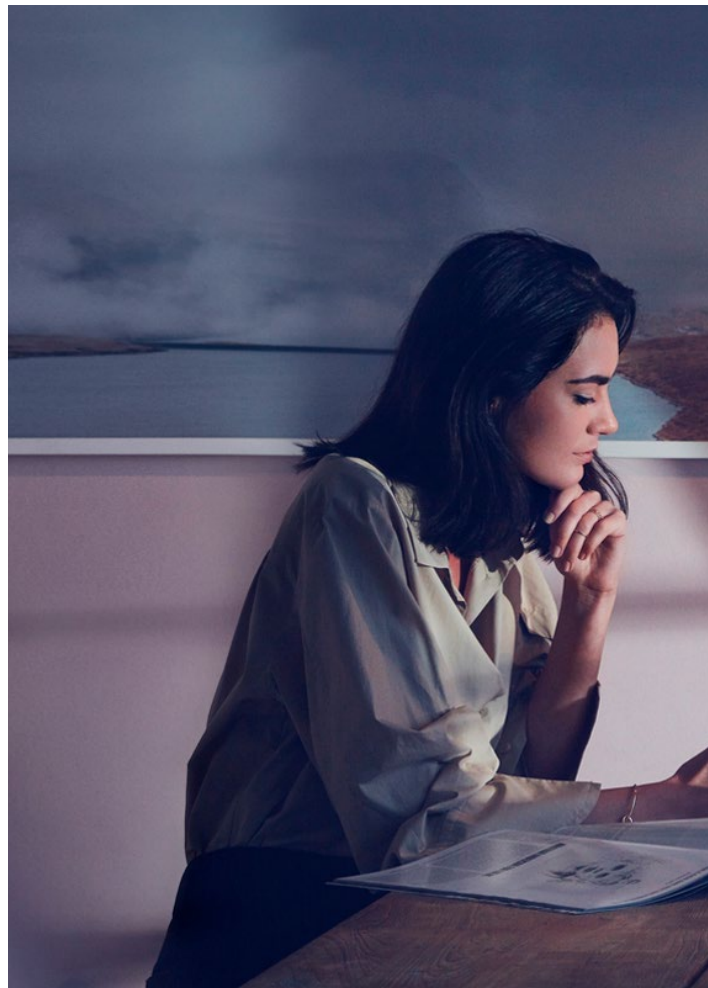

We developed Harman Kardon® Premium Sound together with the hi-fi specialists at Harman Kardon®. Powered by a 600W digital amplifier, the 14 speakers are tailored to the acoustics inside your Volvo and deliver a powerful, high fidelity surround sound. A unique sound processing software by audio specialists Dirac Research optimises the response of each individual speaker as well as the speakers all together to ensure they perform in perfect harmony. So wherever you're seated in the front or rear seats, you can enjoy a seamless first-class listening experience in all conditions and – not least – an extremely unified and tight bass sound.

Apple CarPlay is a trademark of Apple Inc.
 Android is a trademark of Google Inc.
 Bowers & Wilkins is a trademark of B&W Group, Ltd.

VOLVO ON CALL. YOUR PERSONAL ASSISTANT.

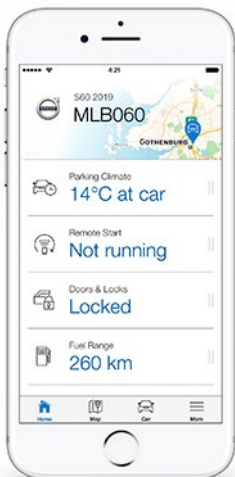

The **Volvo On Call app** connects your car with the rest of your world, helping make life less complicated. It's there when you need it, so your car becomes more than just a means of travel – it's your personal assistant.

You can use it to make your car ready for the drive to the office, or the drive home, by remotely cooling or heating the cabin. It can help you find a parking space, then take you straight to it. You can sync your Volvo On Call app with your calendar, so if you've got appointments it will tell your car where they are and how to get there. And it keeps you safe, automatically contacting emergency services if you're involved in an accident and telling them where you are.

YOUR DAY MADE EASIER WITH VOLVO ON CALL

From saving you time in the morning to helping you relax on the way home, Volvo On Call can be an indispensable part of your daily routine.

THE PERFECT START

When you get into the car in the morning it's warm and defrosted, thanks to the Volvo On Call app's ability to run the engine. En route, you press the On Call button in the car and ask the operator to send your destination to the car's navigation system, so you don't have to manually enter it.

07.30

11.00

WHERE NEXT?

A calendar card shows your next meeting. You push a button in the app, sending the address to the car's navigation system.

REMOTE CONTROL COMFORT

You set the engine to pre-heat or pre-cool the car interior so it's ready for when you leave the office.

READY FOR A NEW DAY

A notification reminds you that you've got a meeting in the morning. You send the location to the Sensus Navigation system.

12.00

17.15

17.45

22.20

FIND YOUR CAR

You've forgotten where you parked, so you use the car locator map to find the street and then use the flash lights function to pinpoint the car.

WIFI ON THE GO

You head for home. Using the wifi hotspot you can stream music via your phone to the car's audio system.

CARE BY VOLVO – YOUR COMPLETE MOBILITY SOLUTION

Today, our concept of ownership is changing. Leases and subscription services have never been more popular. Well, why should you have to own something to enjoy it? This is the thinking behind Care by Volvo: a new service, designed to let you enjoy all the benefits that come with having a new Volvo without actually owning one. For a fixed monthly amount Care by Volvo not only gives you a brand-new Volvo for a fixed time period of two or three years, it also covers all regular service and maintenance costs and provides you with comprehensive insurance and breakdown cover. All you have to do is select which vehicle you would like and Care by Volvo will take care of the rest, leaving you free to enjoy life on the road.

Care by Volvo Includes:

Insurance

Care by Volvo comes with the option of a comprehensive insurance policy for you and up to two additional drivers

Service and Repair

Care by Volvo covers all regular service and maintenance costs plus the costs of any unexpected repairs

Pick-up and Delivery

When it's time to service your car, we will pick it up, drive it to your Volvo retailer and deliver it back to you fully serviced

Tyre Replacement

If the tyres on your Volvo begin to wear out we will replace them for you - quickly and conveniently

Connected Services

Care by Volvo includes connected services like Volvo On Call

Breakdown Cover

Care by Volvo includes Roadside Assistance, 24 hours a day, 7 days a week, 365 days a year

Insurance is underwritten by ABC Insurance, a trading style of Liverpool Victoria Insurance Company Limited. Subject to eligibility and underwriting criteria.

VOLVO S60

T6 AWD | R-Design

725 Fusion Red metallic | 20" 5-triple spoke
Matt Black Diamond Cut alloy wheels

Volvo S60 T8 Polestar Engineered
Optimised for pure performance with advanced driving dynamics.

Volvo S60 R-Design
Sporty styling and precise control, for a sedan designed to perform.

Volvo S60 Inscription
Contemporary luxury, with beautiful materials and expert craftsmanship.

CREATE THE SWEDISH DYNAMIC SEDAN OF YOUR CHOICE.

Our approach in everything we do is to always put people first. This also includes allowing you the freedom to create a Volvo that matches your style and fits perfectly into your life.

To ensure you get your new Volvo S60 exactly as personal as you want it, you have several different design expressions to choose from – each with a distinctive style and character:

the sporty S60 R-Design, the luxurious S60 inscription or for truly advanced performance: the astonishing S60 T8 Polestar Engineered.

Whatever you prefer, you can rest assure there's a Volvo S60 for you. Read on, and see what your new S60 will look like.

Polestar Engineered

PURE PERFORMANCE.

We created the Volvo S60 T8 Polestar Engineered with one single-minded ambition – to give you the most precise and involving driving experience, period.

To achieve this, we joined forces with the engineers at Polestar – our electric performance car brand. Refinement, human centric innovation and world class safety combined with Polestar's applied performance expertise enable what we call advanced driving dynamics.

This means we've fine-tuned and engineered each component to act as one for your driving enjoyment. Everything, from the powerful T8 Twin Engine AWD plug-in hybrid powertrain to the exclusive Polestar Engineered Öhlins chassis and the high-performance Polestar Engineered Brembo brakes, work together to optimise performance, handling and control. Combined with lightweight, Polestar Engineered Forged Wheels and distinctive styling, this will provide you with a high-precision driving experience that's simply electrifying.

The Volvo S60 T8 Polestar Engineered takes the driving precision and performance of the S60 to a higher level. The 318hp+87hp T8 Twin Engine AWD powertrain with plug-in hybrid technology and all-wheel drive gives you uncompromised power and efficiency. Together with the engineers at Polestar, we have upgraded the highly capable S60 chassis with stiffer springs by Polestar and high-end suspension technology by Öhlins – the renowned Swedish manufacturer of shock absorbers for performance and racing cars and motorcycles. This gives you precise and consistent handling characteristics together with maximum road contact in all road conditions, while still providing supple ride comfort. And the Polestar Engineered Brembo brakes maximises braking performance in all conditions.

The Polestar Engineered Brembo brakes feature 6-piston brake calipers and 371mm ventilated and slotted floating discs at the front. They're designed to maximise your control and braking performance with a minimum of fading even during hard driving.

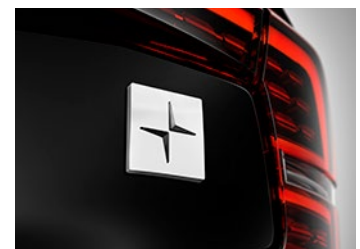

We created the Polestar Engineered Öhlins Chassis to give you the perfect balance of agility, control and comfort. The advanced Öhlins shock absorbers work together with the Polestar Engineered front and rear springs that stiffen up the chassis and lower the ride height. This gives a somewhat firmer and more composed ride with less roll and more grip when cornering. And for stable and predictable handling, the technical layout of the T8 Twin Engine AWD powertrain adds to even weight distribution and a low centre of gravity.

The advanced, hand-made Öhlins shock absorbers deliver the perfect mix of agility and comfort. The unique Dual Flow Valve technology means the shock absorber can react more quickly, allowing the wheel and tyre to regain road contact instantly after passing a bump or a pot hole without losing traction. You can enjoy sporty handling and great control without compromising comfort.

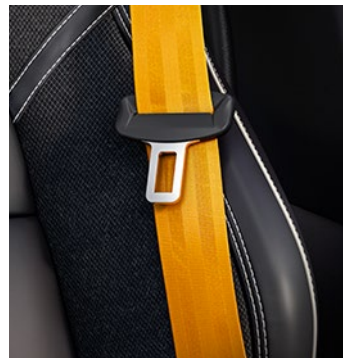

The front suspension is further stabilised by a Polestar Engineered strut bar. This contributes to even more precise, responsive steering characteristics at all speeds and more controlled handling through the curves.

The Volvo S60 T8 Polestar Engineered in Black Stone with Polestar Engineered 20-inch 5-Y spoke Black forged wheels and Polestar Engineered Exhaust pipes in stainless steel with black chrome finish.

The dynamic Charcoal interior of the S60 T8 Polestar Engineered with Contour seats in Fine Nappa Leather/Open Grid textile with adjustable seat cushion extensions and our optional Tailored dashboard with contrasting stitching.

Safety belts coloured in gold, a subtle nudge to the unique chassis details of your S60 T8 Polestar Engineered.

Adding to the car's excellent handling as well as its distinctive look, the Polestar Engineered 20-inch 5-Y spoke Black forged wheels are in a unique light-weight design.

T5 | R-Design

725 Fusion Red Metallic | 20" 5-triple Spoke,
Matt Black Diamond Cut alloy wheel

**R**DESIGN

INSPIRED BY SPORT.

If you love to drive, the Volvo S60 R-Design is for you. With athletic styling and precise control, R-Design captures the thrill of a sporty driving experience. A wealth of distinctive design details raises the sporty soul of your Volvo and gives it an even more powerful road presence. It's an expression that catches the eye from every angle and hints at the promise of an amazing drive, every time. And you can rest assured that the S60 R-Design will deliver. Surrounded by meticulously crafted and expressive interior design details, you can feel it right from the moment you take your position in the sculpted R-Design driver seat. Everything – from the R-Design steering wheel with optional gearshift paddles to the Charcoal headliner – is there to inspire and support your driving. And for an even more energetic, road-hugging drive, the S60 R-Design benefits from a lowered sport chassis.

The Volvo S60 R-Design is characterised by distinctive styling and a powerful road presence. Sporty exterior R-Design details leave no doubts about the intention of your S60 R-Design. On the inside, sculpted R-Design seats, Metal Mesh decor, and Charcoal headlining give the cabin a sporty, cockpit-like feel. A finely-tuned sport chassis helps ensure you're in control without compromising ride comfort.

Our headlights with LED illumination, the glossy black R-Design grill with frame in Silk Metal finish and unique glossy black lower outer grilles add to the dynamic character of your S60 R-Design.

R-Design door mirror caps in dynamic glossy black.

Enjoy the ultimate R-Design experience with our 20-inch Matt Black Diamond Cut aluminium wheels and the lowered sport chassis with stiffer springs and shock absorbers for sportier handling and less roll when cornering.

Dual integrated end pipes for a distinctive road presence.

The Volvo S60 R-Design in sporty Fusion Red metallic with 20-inch 5-triple spoke Matt Black Diamond Cut alloy wheels.

The R-Design interior featuring the R-Design sport steering wheel, R-Design gear shifter and gaiter in Fine Nappa Leather with contrasting stitching, Contour seats with exclusive Charcoal Fine Nappa Leather/Open Grid Textile upholstery, Metal Mesh aluminium decor inlays and our optional Tailored dashboard with contrasting stitching

The Metal Mesh aluminium decor add to the dynamic, hi-tech ambience inside your S60 R-Design.

The R-Design sport steering wheel in Leather with gearshift paddles, the optional Tailored dashboard and our 12-inch driver display with four graphic modes.

The sculpted R-Design Contour seats with adjustable seat cushion extensions provide relaxed support, while the exclusive Fine Nappa Leather/Open Grid Textile upholstery with contrasting stitching provides a sporty yet sophisticated feel.

Inscription

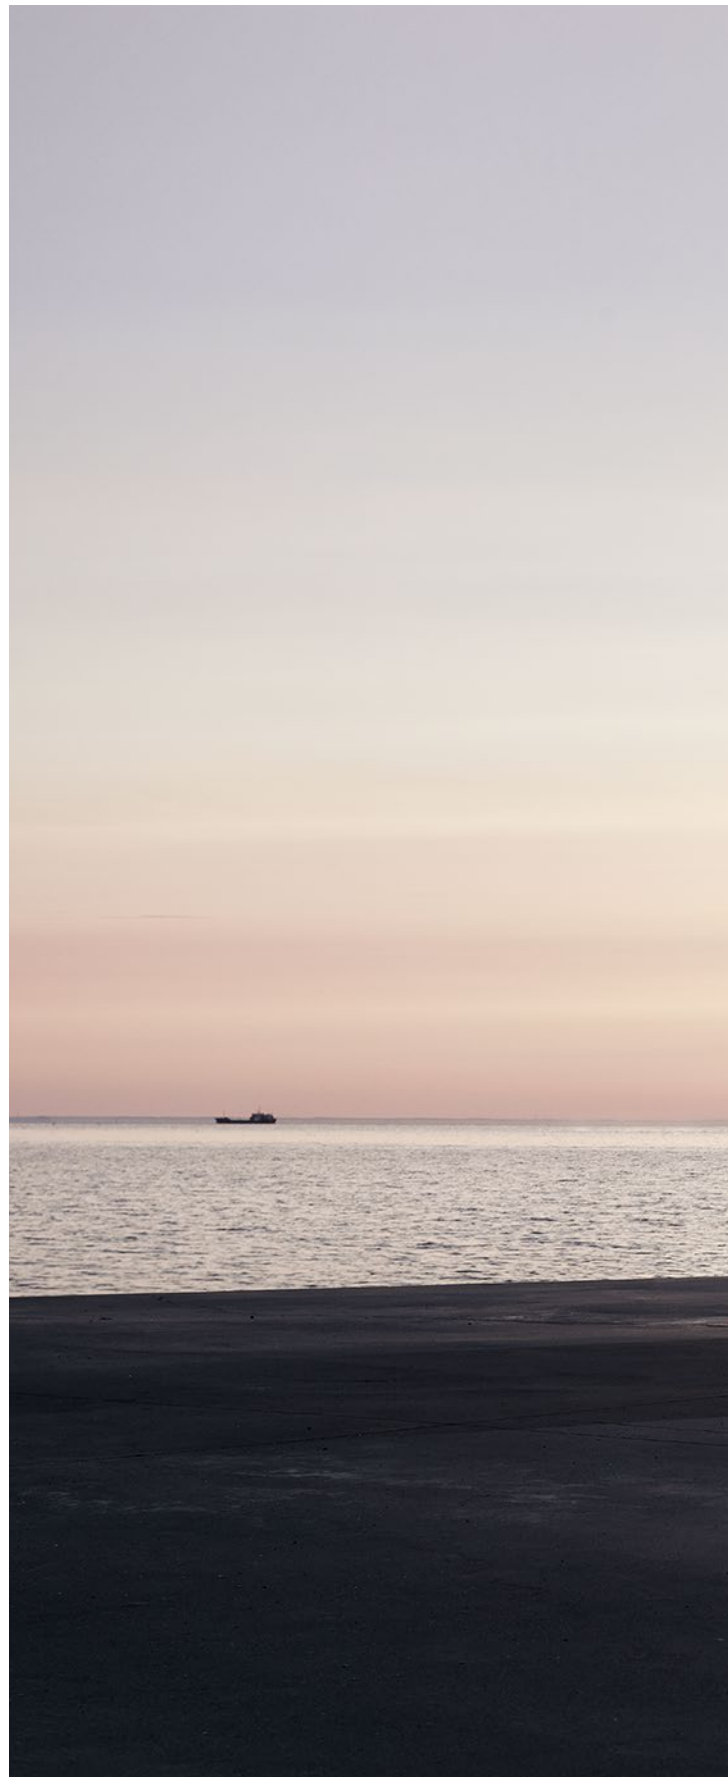

CONTEMPORARY LUXURY.

We created the luxurious Volvo S60 Inscription to meet your expectations on contemporary Swedish luxury. It's a highly personal expression that evokes a strong sense of dynamic refinement. Each detail is carefully selected to give you and your passengers a stylish and invigorating experience.

Sophisticated exterior design cues enhance the luxurious look and feel of the S60 Inscription. Its distinctive chrome-finish grille, bright decor side window trim and 18-inch 10-multispoke Black Diamond Cut alloy wheels correspond with the car's dynamic and elegant Scandinavian design.

The Inscription experience continues on the inside, where a meticulously crafted interior with Leather seats, genuine Driftwood decor and an optional tailored dashboard gives you ample room for a relaxed driving experience.

The Volvo S60 Inscription epitomises our proud heritage of human-centric design. And when it comes to intelligent luxury imbued with distinctive style and fresh thinking, the S60 Inscription is in a class of its own – just like you.

The exclusive Volvo S60 Inscription with its subtle jewellery touches and beautifully crafted wheels expresses the essence of contemporary Swedish luxury. On the inside, you are surrounded by genuine materials and fine craftsmanship. It's a sensory experience, further enhanced by the Comfort seats in smooth Leather, genuine Driftwood decor and our optional Tailored dashboard – all to make the Volvo S60 Inscription your own personal statement of dynamic luxury.

The chrome finish front grille and bright side window trim add up to the luxurious appearance of the Volvo S60 Inscription. Here shown with dynamic yet elegant 19-inch 5-multi spoke alloy wheels (optional) in distinctive Black Diamond Cut design.

Dual integrated end pipes and bright decor trim enhance the elegant and powerful impression from the rear.

The bright side window trim adds up to the luxurious appearance of the S60 Inscription.

Dual integrated end pipes and bright decor trim enhance the elegant and powerful impression from the rear.

The sculpted Comfort seats with Fine Nappa Leather upholstery and adjustable seat cushion extensions and the Driftwood decor provide a sensory experience of contemporary luxury. In the tunnel console, there's a scroll wheel in diamond patterned metal finish that allows you to select your preferred drive mode and steering characteristics.

The exclusive Driftwood decor in the dashboard and tunnel console resembles the look and feel of wood shaped by the natural force of water, wind and waves.

The rear seat passengers can enjoy the comfort and convenience from a centre armrest with integrated cup holders and storage.

The Perforated Fine Nappa Leather front seats feature perforated Nappa Leather on the seating panels and contrasting stitching for a sporty, luxurious look and feel and includes seat ventilation for optimised comfort.

The intuitive 12-inch driver display with four graphic modes and the 9-inch centre display with touch screen puts you in the centre of action.

EXTERIOR COLOURS.

INTERIORS.

The interior of the Volvo S60 is crafted with you at the centre of attention. Every detail, every line, every shape is testimony to our designers' pursuit to create a space in which you feel relaxed and in complete control. Choose between two seat variants: the lavish Comfort seats or the sportier Contour seats. The interior is available in many colour, upholstery and decor trim combinations – including Blond or Charcoal headlining – to suit your preferences.

MAKE IT YOURS.

The Volvo styling accessories are created by our own team of designers to perfectly complement the lines of the S60 and enhance its dynamic, contemporary character. And to make your car an even stronger and more personal statement, you can add our exterior styling package. Body coloured front and rear side deflectors and sculpted side sill accentuate the car's

low stance, while the integrated dual split end pipes create an even more powerful look. And for the S60 Momentum, a black rear diffuser adds an extra touch of dynamic luxury.

This is your opportunity to express yourself and come up with a look that is all yours.

20" 10-spoke Turbine Black Diamond Cut alloy wheels (require the optional sport chassis).

Integrated dual split end pipes in stainless steel.

Sculpted side mouldings.

Front side deflectors.

GET READY.

Your Volvo S60 also takes care of your more practical needs. And to make your S60 work even harder for you, just add our load accessories. Designed to look good and work flawlessly, they will make life less complicated and help you bring the stuff you need.

Bicycle holder, towbar mounted.

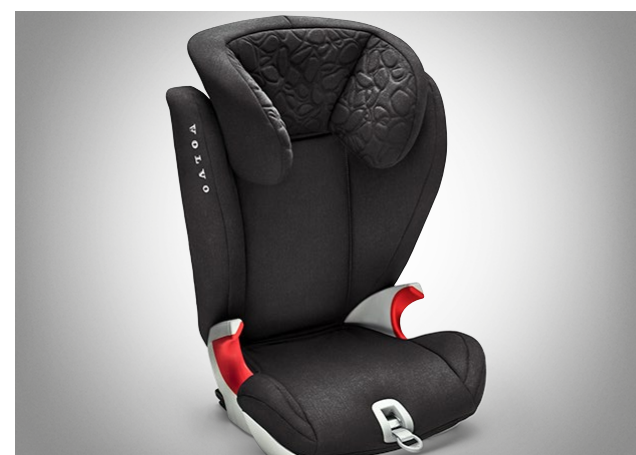

DESIGNED FOR YOUR LIFE.

The S60 is about making every drive as enjoyable as possible. To enhance the experience for anyone who shares your ride, we've created specially-designed accessories that cater for your passengers' comfort and safety. For children up to 10 years, our child seats combine comfort with state of the art safety and are designed to fit perfectly into your Volvo. We apply the same stringent standards to our child seats as we do to building our cars, so you know your children are well protected.

Colour-coordinated
shaped plastic passenger
compartment mats.

Child seat, rearward
facing (9–25 kg).

MAKE YOUR POWERFUL CHOICE.

We created the new Volvo S60 with one single purpose: to provide you with a car that perfectly fits you and your lifestyle. It's a dynamic sedan that meets your expectations of an engaging drive with refined comfort and distinctive design – built with care for people and the world we share. And designed to be intuitive to use and to make life easier, the S60 is a pleasure to live with every day.

At the heart of your Volvo S60 is a dynamic, efficient powertrain. Whichever you choose, you will enjoy our latest engine technology that gives you responsive power. Fuel consumption and CO₂ emissions are kept low, and our powertrains comply with strict exhaust emission requirements.

Our powertrain range includes advanced petrol engines mated to our smooth eight-speed automatic gearbox, available with responsive AWD all-wheel drive technology or front wheel drive.

And for the ultimate combination of performance and efficiency, there's the option of our smooth and powerful T8 or T6 Twin Engine AWD powertrain with plug-in hybrid technology.

Make your choice, and enjoy the journey wherever it takes you.

T8 Twin Engine AWD

Our T8 Twin Engine plug-in hybrid powertrain delivers an exhilarating drive with uncompromised efficiency. Combining a high-performance petrol engine and an electric motor, this 303hp+87hp/400Nm+240Nm powertrain allows outstanding highway performance and zero emission commuting – with all-wheel drive capability when needed. Available in 2019.

T5

The 250hp/350Nm T5 petrol powertrain is as responsive on the highway as in the city. This superb all-rounder delivers generous power just where you need it, ensuring excellent driveability in combination with our smooth 8-speed automatic gearbox and optional all-wheel drive.

WELCOME TO VOLVO CAR LIFESTYLE COLLECTION.

Our Lifestyle Collection includes a wide range of lifestyle accessories – from crafted leather bags and clothing, to watches and sunglasses. To view the complete collection, please visit [collection.volvocars](https://collection.volvocars.com).

V O L V O

Fuel consumption and CO₂* figures for the Volvo S60 range, in MPG (l/100km): WLTP Combined 35.3 (8.0) - 176.5 (1.6). NEDC CO₂ emissions 155 - 39g/km. Twin Engine WLTP electric energy consumption 3.3 - 3.5 miles/kWh. Twin Engine WLTP all electric range 30.4 - 36.0 miles.

Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. *There is a new test used for fuel consumption and CO₂ figures. The CO₂ figures shown however, are based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.
