FULLBACK CROSS

DO EVERYTHING

AND ITS OPPOSITE

Both stylish and functional, the Fullback Cross is a new version of the Fiat pick-up. Despite its size, it moves through the city with agility, thanks to its small steering circle (5.9 m) while still carrying over 4 tonnes of total loading capacity: up to 3.1 tonnes of towing and 1 tonne of payload, making it unique and very versatile in any situation.

FIAT FULLBACK

Get on board the Fullback Cross and you will understand its power. With one simple movement you can turn from the city mode into a 4x4 that can take you wherever you want.

PACK TECHNO
