

The Audi A4

Pushing the limits. The Audi A4

Independent. Elegant. Dynamic. The Audi A4 pushes the limits in every sense. Flowing surfaces, Audi's single frame grille, high side-line and a sporting stance capture the unmistakable essence of the A4. Audi's carefully-planned ergonomics ensure your driving experience is involving and intriguing, and with the beautifully-sculpted interior combined with supple leather upholstery, guarantees that you will arrive at your destination in comfort and style.

Audi's engineers ensure they are always at the head of the field with the latest technology. The art is to lead, never follow. Powerful FSI® direct fuel injection petrol engines and TDI Turbocharged Direct Injection diesel engines have been developed for the Audi A4.

With two mighty FSI® engines—the 147 kW 2.0 T FSI® and the 188 kW 3.2 FSI® V6—Audi has achieved optimum vehicle dynamics and performance. Developed for Audi's Le Mans motorsport program, FSI direct injection technology creates more power from every drop of fuel. Responsive 1.8-litre Turbo and all-alloy 2.0-litre petrol engines similarly offer handy performance and unmatched refinement.

Working hand-in-hand with these diverse engines, Audi's ingenious multitronic continuously variable transmission ensures seamless power and greater responsiveness.

Audi's continuous advancements in the field of diesel technology mean that our TDI variants offer exceptional endurance and fuel economy. The A4 2.0 TDI develops an amazing 320Nm of torque and guarantees a high level of responsiveness with exceptional refinement.

The introduction of our high-performance V6 TDI engine offers a level of sportiness to satisfy even the most demanding of drivers. The A4 3.0 TDI quattro with 6-speed tiptronic transmission boasts an unmatched 171 kW of power and 450 Nm of torque.

The Audi dynamic suspension, incorporating four-link front and self-tracking trapezoidal link rear suspension, represents pioneering engineering. The dynamics of the Audi A4 have been optimised even further with a new servotronic speed-sensitive steering system. All A4 variants offer a dynamic yet comfortable ride, precise steering, and thanks to Audi's famous quattro all-wheel drive technology, exceptional stability on the road.

A truly safe car doesn't just minimise the effects of an accident, it minimises the risk of an accident happening. Standard active safety features include Audi's Electronic Stabilisation Program (ESP), incorporating Anti-lock Braking System (ABS), Electronic Differential Lock (EDL), Anti-Slip Regulation (ASR), brake disc wiping system and Brake Assist. In the case of an accident, standard passive safety features in the Audi A4 incorporate active front head restraints, intelligent two-stage frontal airbags for front and rear passengers and SIDEGUARD head airbag curtain for front and rear passengers.

The Audi A4 pushes the limits. Experience it.
The Audi A4
