

The Audi A8

The Audi A8

What if

conventions

were to be challenged?

What if a luxury limousine offered absolute elegance yet remained true to its sporting heritage? What if a luxury limousine was made lighter for enhanced performance and fuel economy, yet stronger for safety? What if a luxury limousine could offer dynamism without compromise? What if the world's most intelligent mobility system was available today?

It's all here, in the Audi A8. Built to inspire enthusiasm. It demonstrates that sporty performance can be combined with elegance and comfort.

Outstanding driving dynamics are facilitated by the latest generation aluminium Audi Space Frame ASF. Thanks to its greater rigidity ASF not only provides more safety but also makes handling more agile because of its lower weight.

The Audi A8 impressively emphasises the philosophy of "Vorsprung durch Technik" with its optimised state of the art engines. The Audi A8 3.2 quattro with 191kW combined with FSI petrol injection technology. The 4.2 FSI quattro with 257kW underlines the car's sporty credentials and implements Audi's concept of technical process by delivering precision power to the road.

The entirely new A8 4.2-litre TDI engine with 240 kW and 650 Nm of power offers a dynamic drive. The 4.2 V8 bi-turbo diesel engine combined with quattro permanent all-wheel drive is exemplary in terms of fuel economy and driving refinement.

For those who require a little extra comfort the long-wheelbase Audi A8 is available offering 130mm of additional legroom in the rear. Available in three petrol engines the 3.2 FSI, 4.2 FSI & the powerful 6.0 W12.

The Audi A8 L W12 continues the legend of 12-cylinder engines in Audi cars which started in 1931. The 6.0 W12 engine with 331kW and 580Nm is the most powerful engine ever fitted and bestows the Audi A8 with an entirely unique character. Available exclusively in long-wheel-base, it represents the highest level of luxury, comfort and performance.

Each Audi A8 is equipped with electronically controlled adaptive air suspension – incorporating an infinitely variable damping system – that adjusts the suspension to the road situation and guarantees a superb drive on any surface. The driver can in addition choose four settings manually. For the ultimate level of driving dynamism and active safety, the Audi A8 is fitted with quattro permanent all-wheel drive.

Working in conjunction with the powerful engines, light ASF chassis and adaptive air suspension offers a benchmark in performance and luxury within its class.

Challenge the conventions...
