MOTORS
engineered to excite

TESTED BY THE BEST IN THE BUSINESS

At Mitsubishi our cars face the ultimate test - rally driving. The lessons learnt from driving on bone-shaking, suspension-shattering terrain gives all of our cars uncompromising durability and reliability. The Triton is no exception.

Over forty years of rally championships around the world have become the testing grounds for production of Mitsubishi vehicles. Like the punishing desert terrain of the Dakar - the world's toughest off-road rally plus the Australian and World Rally Championships, where Mitsubishi vehicles have been consistent winners.

It's Mitsubishi's commitment to constantly evolving technology that has seen our cars win some of the world's toughest rally races time and time again. The Triton is yet another chapter in a long-running history of performance vehicles that transcend the world of rally driving to excel at everyday motoring.

TOUGH TRITON

With performance, handling and safety systems all thoroughly proven in the Dakar Rally, Mitsubishi Triton 4WD's unlimited potential is certain to win your admiration and respect.

Tested in the world's most gruelling off-road rally and used as a support vehicle for the rally champion, Mitsubishi Pajero, the Triton 4WD is built tough to work hard and play hard. It has become part of the Australian landscape - on the farm, in the outback, around town, even at the beach and on the ski slopes. The Triton 4WD's dependable, durable toughness allows you to get the job done any time, every time.

TRITON GLS

Work to live. Live to play. The comprehensive Triton 4WD range is available in Cab Chassis, Club Cab and Double Cab body types, all with dynamic styling, one of which is bound to suit your working needs or weekend adventures.

Engine power and performance are delivered in a grunty 2.8 litre Intercooled Turbo Diesel or a powerfully smooth 3.0 litre V6 petrol engine.

The Triton GLS Double Cab 4WD is not your standard ute. Behind the privacy glass, inside the roomy GLS Double Cab there is an advanced world of driver convenience and comfort at your fingertips. From the electrically controlled chrome door mirrors, central locking, remote keyless entry, power steering, power windows and floor carpets to the reclining premium sports bucket seats.

As well as an AM/FM radio with in-dash CD and four-speaker system and leather-trimmed steering wheel, gearshift and transfer lever. With practical styling, the internal storage options and plenty of safety and security features, the Triton GLS is the perfect all-round workhorse that will never let you down.

- 3 Sports Grille
- 4 Tonneau Cover

3

TRITON GLX-R

If you want a reliable workhorse during the week and a stylish 'weekend warrior' for a night out on the town, or to go off-road with a group of mates, then you can depend on the sporty Triton GLX-R Double Cab 4WD.

The Triton GLX-R is loaded with good looking features including chrome nudge bar, side steps, 16" alloy wheels, privacy glass and body-coloured fender flares. Inside, the stylish features continue with power windows, leather bound steering wheel, gearshift and transfer lever, remote keyless entry and full floor carpets and console.

Safety is critical for these workhorses, which is why the GLX-R 4WD comes with ABS brakes, and driver and front passenger SRS airbags as standard.

You can trust a Triton to look this good!

4

TRITON GLX

The Triton GLX 4WD range comes in a Double Cab, Club Cab and Cab Chassis body type, so there is sure to be one that suits your needs.

You can count on the GLX 4WD range for reliability, flexibility and toughness. The GLX Cab Chassis 4WD offers power steering, engine immobiliser (petrol only) and a split-bench reclining front seat to fit three people comfortably.

The GLX Club Cab 4WD offers fixed intermittent wipers, floor carpet and a large storage area behind the reclining bucket seats plus a second hidden storage compartment.

The GLX Double Cab 4WD offers space for the whole crew with front bucket seats and rear headrests, seating five. Childproof door locks, durable vinyl flooring and analogue instrumentation including tripometer, speedometer, tachometer, fuel and water temperature gauges.

- 3 AM/FM Radio with CD Player
- 4 GLX Club Cab
- 5 GLX Double Cab

3

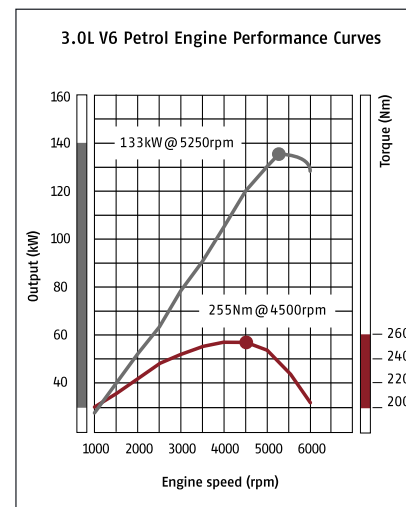

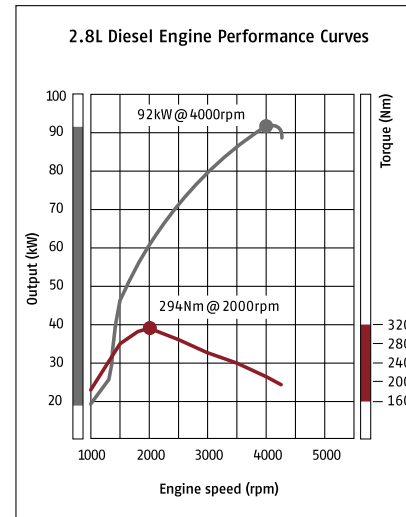

PERFORMANCE

A choice of two available engines makes it easy to select the power package that suits your needs.

For comfortable cruising on the open road, the 3.0 litre V6 24-valve SOHC petrol engine is an excellent choice. It delivers great low to mid-range torque with 255Nm @ 4500rpm, and maximum power output of 133kW @ 5250rpm, for urban traffic and all your payload needs.

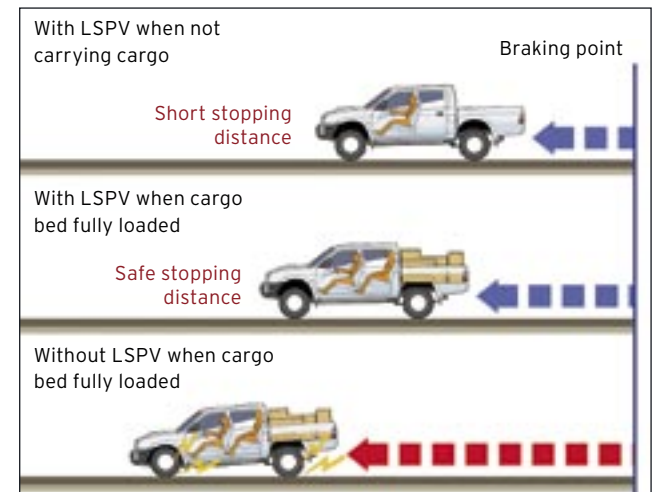

For powerful performance that's as well suited to leisure as it is to your workload, the 2.8 litre Intercooled Turbo Diesel offers a balance of power and comfort through maximised torque (294Nm) at low rpm. Whichever engine you select and whatever your needs, Triton has the power to satisfy and always get the job done.

SAFETY

LSPV (LOAD SENSING PROPORTIONING VALVE).

The LSPV modulates rear brake pressure depending on vehicle load. Under light or no-load conditions, it applies reduced braking pressure to the rear to prevent rear wheel lock-up. Under heavier loads, it provides an optimal amount of braking pressure to the rear, achieving safer stopping distances and enhancing overall control.

TRANSMISSION

EASY SELECT 4WD.

The hard-working Triton inherits all the handling brilliance of Mitsubishi's long line of rallying champions. So it's more than ready to take on the toughest jobs you can throw at it. And when the work's done, rally-proven Easy Select 4WD will gladly take you and your off-road friends wherever your adventurous spirit leads you.

Enabling smooth control from the comfort of the driver's seat, this 4WD system uses three transfer modes to deliver high-speed driving comfort and ensure superior traction on a variety of challenging surfaces. When conquering the roughest terrain, shift between 4H and 4L only with the Triton 4WD fully stopped. You can shift on the fly between 2H and 4H at speeds of up to 100km/h, thanks to the free-wheel front differential.

1

TRACTION

REAR LSD (LIMITED SLIP DIFFERENTIAL).

Provides superior traction in slippery conditions through transferral of driving torque from a slipping wheel to one which has traction.

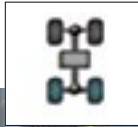

With rear LSD

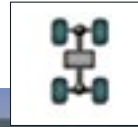

Without rear LSD

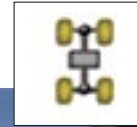

High Traction Low Traction Slipping Wheel

2H (2WD HIGH RANGE).
Delivers a smooth, quiet ride for highway cruising, rear wheel drive for everyday driving, plus optimum fuel economy.

4H (4WD HIGH RANGE).
Increased traction offers the stability needed in tough weather conditions like rain and light snow, as well as untamed surfaces like loose dirt and gravel.

4L (4WD LOW RANGE).
Extreme off-road mode ensures maximum traction for serious conditions like deep snow or sand, as well as steep inclines or descents.

CARGO BED TOUGHNESS

You'll be hard pressed to fill the easy-access cargo bed to capacity - but that doesn't stop most Triton drivers from trying. Roomy enough for recreational gear and tough enough for working materials, the cargo bed of the Triton also has a double-walled structure supporting long-term performance.

Whether for work or play the Triton's cargo bed will haul your loads with ease. Inner and outer hooks let you tie your gear down securely for added utility, while a single handle in the rear gate gives you easier access when your hands are full.

2

3

- 1 Easy Select 4WD
- 2 Cargo Bed Double-wall Construction
- 3 Cargo Bed Inner Hooks

Bonnet Protector

Fender Flare Package
