

The Audi Range

Built with the mind. For driving with the heart.

Cars are built by manufacturers for sale on the automobile market. Those are the bare facts of the matter, but it's equally true that cars are, or ought to be, built by people for people. We attach great importance to building cars of impressive quality and attractive design because this aspect of our work can be interpreted in a constantly new variety of ways. Safety, for instance, is not a dreary duty for us but a constant challenge to our sense of responsibility. In every other area too, we want to give our customers every opportunity to satisfy their own personal lifestyles. This is why every Audi is something special and is usually a few vital steps ahead of its time. One need only look at Audi's epoch-making technological developments such as the quattro® permanent all-wheel driveline and the Audi Space Frame ASF® as well as TDI®, FSI®, S tronic – and you can be sure that Audi will once again take car design a step further along the road to tomorrow.

The following pages contain an overview of the various Audi models. Study and enjoy them at your leisure.

Technology meets design. The Audi A3 3-door.

The Audi A3 3-door is setting standards in the premium compact class. Offered with a choice of 1.6 75kW / 148Nm and 1.8 TFSI 118kW / 250Nm petrol engines, the Audi A3 3-door makes driving even more fun while reducing fuel consumption at the same time. In the 1.8 TFSI engine, Audi's latest technology FSI (petrol direct injection) principle precisely controls the amount of fuel being injected, resulting in low fuel consumption and faster, more responsive performance. These benefits have been clearly demonstrated with Audi claiming five historic victories at the famous Le Mans 24-hour race.

Dynamic performance of this kind needs to be controlled properly and the Audi A3 3-door is equipped with state-of-the-art safety concepts. The Electronic Stability Program (ESP), with Brake Assist, helps the driver control the Audi A3 3-door safely even in extreme situations, while side impact protection and a comprehensive airbag system protect those inside the Audi A3 3-door. Thanks to the dynamic chassis with advanced four-link rear suspension and sports suspension tuning, the Audi A3 3-door is also very agile to drive.

The thoroughly sporty concept is reflected harmoniously in the design of the Audi A3 3-door. Clear, precise lines define the body of the car and give it a dynamic look. The Audi A3 3-door makes a powerful and progressive statement with its bold single frame grille, low headlights and distinctive tail lights.

*"Winner in the premium compact class"
auto motor und sport magazine, 2006*

Keep a step ahead. The Audi A3 Sportback.

Opposites attract each other. Audi has succeeded in integrating them. The Audi A3 Sportback is the first 4-door car with the sporty attributes of a coupé. The revolutionary concept of the Audi A3 Sportback combines trendsetting design, breathtaking performance and impressive functionality.

The Audi A3 Sportback radiates sheer self-confidence at very first glance. The eye-catching profile with the slightly sloping roof line emphasises its dynamic look. The completely new rear design shows particular character. It is noticeably longer than its 2-door counterpart but is considerably shorter than a conventional Avant.

The car's powerful petrol and diesel engines demonstrate that it satisfies the sporty requirements of a coupé. It is a particularly impressive experience to drive the Audi A3 Sportback with the turbo FSI technology under the bonnet. This engine combines the advantages of the economical FSI injection system with the dynamic performance of a turbocharger. The FSI process has been tested successfully in competitive motor racing and squeezes the maximum energy from every single drop of petrol. Under road driving conditions this means outstanding driving performance with low fuel consumption. Or put more simply, staying a step ahead.

The optional quattro permanent all-wheel drive guarantees excellent traction at all times, irrespective of the road surface.

The optional open sky system® is impressive too. A large glass roof that extends almost completely from windscreen to rear window, it floods the cabin with natural light and gives the vehicle's roofline a stylish appearance of contrasts. The front section can be opened and moved back like a sunroof, while a special sun shield system gives you even greater control of your environment. So with the A3 Sportback, the sky is no longer the limit.

Life is full of opportunities. With the flexibility of the Audi A3 Sportback, you can take advantage of every one of them.

Audi Exclusive

Individuality starts with enjoyment. The new Audi A3 Cabriolet.

The new Audi A3 Cabriolet. From your first glance, it's clear it was created for maximum open-top driving pleasure. Whether the roof is up or down, the Audi A3 Cabriolet exudes sheer style with its classic soft-top look. The roof can be opened hydraulically in less than ten seconds, and when open, takes up very little space. The soft-top is available with a manual or fully automatic locking mechanism, and a wind deflector (standard on Ambition) behind the front seats reduces draughts inside the car.

Of course there's far more to this superb compact than just a drop-top. Featuring the driving dynamics typical of Audi, the Audi A3 Cabriolet is perfectly suited to everyday driving and is the premium vehicle in its class.

Under the newly sculpted bonnet, the Audi A3 Cabriolet comes with a range of engines that combine power with efficiency, launching with a choice of two power plants: a 1.8 TFSI or 2.0 TFSI petrol engine.

The car is also offered with diverse range of standard and optional equipment, including the latest Audi navigation system, iPod and USB interface for an MP3 player and BOSE® sound system.

One thing that's not optional is maximum safety – the Audi A3 Cabriolet comes with all of the safety features found on the hard top Audi A3, plus roll bars behind the rear bench seat and an extremely rigid body to ensure that your open-top driving experience is enjoyable and safe.

S3

Evolution of power and performance. The Audi S3.

Power, performance and exclusivity are major factors when stimulating the emotions and arousing fascination. The Audi S3 has been created with a clear focus on these success factors – for people who are looking for a striking symbol of their personality and performance potential. Like all Audi S models, the Audi S3 combines progressive technology and a sporty driving experience with distinctive features that set an S model apart from the rest. The Audi S3 offers its driver pure driving pleasure in a car with high everyday suitability.

As the sportiest representative of the successful Audi A3 model line, the Audi S3 not only continues the success story begun by its direct predecessor, which was built from 1999 to 2003, but does even more – it raises that car's image of sportiness to a new level that can be seen, felt and measured. The appeal of the Audi S3 lies in its outstanding performance, its supreme road dynamics and the sheer fun it is to drive.

There is a sound basis for these claims: a sporty overall concept made up of high power output from the engine, S sports suspension, design elements typical of the S model range and exclusive equipment and trim. The Audi S3 completes the range of Audi S model lines. As the fifth Audi S model, it is an important strategic element in a full range of sporty models and a further major step along the path that is taking the Audi brand to leadership in the premium car segment worldwide.

A Glimpse of the future. The all new Audi A4.

With its innovative technologies and pioneering design, the all new Audi A4 will completely redefine your driving experience.

Beginning with the exterior, its ultra-modern lights, sporting profile and sweeping lines give the car a distinctive silhouette. The longer wheelbase increases stability, while air flows more dynamically around the lower, wider body.

Under the bonnet, a choice of two petrol engines feature FSI direct-injection – a unique Audi technology originally developed for the Le Mans 24-hour endurance race. And like their FSI petrol counterparts, two TDI diesel engines are designed for power and performance, with low fuel consumption and CO₂ emissions.

For the driver, the optional Audi Drive Select system adapts the vehicle's character at the touch of a button, effortlessly transforming your Audi A4 from a sports car to an executive saloon. It can even be individually tuned, ensuring a ride that's perfectly customised to your needs.

Optional climate controlled seats add greater comfort, while quattro permanent all-wheel drive, Audi Side Assist and Audi Lane Assist are also available, ensuring a safer, more satisfying journey.

In short, the all new Audi A4 incorporates the ideal combination of cutting-edge design and advanced technologies, delivering one of the most balanced, rewarding driving experiences ever.

With a choice of three powerful engines, the sky's the limit.

Behold the Audi A4 Cabriolet. With the single frame grille, high shoulder line and powerful wedge-shaped rear, it displays the prowess of a fine sporting thoroughbred.

The interior concept, in perfect harmony with the exterior design, represents sporting elegance and superior ergonomics. A luxurious, high quality interior will ensure your driving experience is involving and genuinely enjoyable. And at the touch of a button, allow you to experience instant freedom with its fully automatic roof.

The 3.2 FSI V6 direct fuel injection engine and quattro all-wheel system creates a new benchmark in refinement and performance, developing 188kW for breathtaking responsiveness and driving enjoyment. Or choose either the proven and powerful 1.8-litre Turbo or 2.0 TFSI engines.

Safety is another high priority with this exceptional vehicle. In addition to a raft of state-of-the-art active measures, passive safety features include frontal and side airbags for front occupants, and Audi roll-over protection. This impressive system deploys two protective hoops, which extend within milliseconds from behind the rear seats to protect all occupants in the unlikely event of a roll-over.

See the world through different eyes with the Audi A4 Cabriolet.

A5

The Audi A5. A new form of exhilaration.

There is almost nothing more exciting than a new car: the first sight of it; the first time you accelerate; the first corner; the first long journey. For this special feeling there is a very special car: the new Audi A5.

With the proportions of a classic coupé, the sports-styled Audi A5 is one of our most expressive designs to date. Sculptured bodywork and aerodynamic lines create a powerful impression of agility, reinforced as your eyes follow the trim around muscular wheel arches and along the innovative stretched bonnet design.

The dynamic exterior is more than matched by a host of prestigious interior features. The harmonious lines and understated leather upholstery emphasise the driver's area while retaining its athletic profile. The precise instrument cluster is fully integrated into the dashboard, while the door controls, trim, armrest and storage compartments combine to form an immaculately finished unit.

New ways, new thoughts, new ideas. Get in and experience every journey like it was your very first.

S5

The new Audi S5. Driving redesigned.

A car in which a sporting spirit has been applied to a classic coupé form: introducing the stunning new Audi S5. More than metal and engineering, it's pure dynamism within reach.

Just one look and the Audi S5 wins you over. With its long lines and flat roof, it appears to crouch, ready to pounce as soon as you accelerate away. With rear styling that's as much a statement of power as the two sets of twin exhaust pipes and clearly defined trailing edge, the Audi S5 is up and away in the blink of an eye.

Admire it from the outside, then step inside where every detail speaks of its pedigree. From the distinctive inlays to the S sports seats with S5 embossing and leather-covered multifunction steering wheel with its S5 emblem.

Rarely have there been so many reasons to talk of new standards being set as there are when you look under the bonnet of the Audi S5. Expect spectacular road performance from the V8 FSI engine. Delivering 260kW, it gives the new Audi S5 a high degree of spontaneity, responsiveness & when coupled with its six-speed manual gearbox, quattro permanent all-wheel drive and S sports suspension, you'll enjoy unrivalled traction and directional stability.

The new Audi S5 will make you feel as though you've never driven another car.

Follow your own rules. The Audi A6.

Created for the executive driver, the Audi A6 offers unrivalled beauty, power and cutting edge technology. In all areas, including styling, performance, safety and business-class comfort, it simply excels.

Yet such spacious luxury saloons are not usually celebrated for their responsiveness or sense of driver involvement. The new Audi A6 changes all of that. Advanced suspension design achieves handling precision without harshness. The Audi A6's servotronic or optional quattro permanent all-wheel driveline and range of engines combine to offer instant acceleration, high-speed cruising ability and remarkable fuel efficiency.

Choose from potent petrol engines with FSI technology, used successfully by Audi in motor racing. Or select a TDI diesel power plant, offering outstanding flexibility and efficiency over the entire engine speed range.

Inside the well-appointed cabin, which features high-quality wood and leather materials, the driver is the focus of attention. Every instrument is at your fingertips, including Audi's Multi Media Interface (MMI) as standard, offering intuitive control of entertainment, communication, information and vehicle systems.

Supple ride comfort, with precise and clear feedback. Power with fuel efficiency. An exhilarating driving experience with luxurious accommodation. The new A6 triumphantly reconciles these apparent opposites through advanced technology and design.

A blend of opposing qualities, but a compromise in none.

S6

The Audi S6: a supremely confident sports saloon.

Offering an outstanding driving experience, the Audi S6 is undoubtedly an extraordinary vehicle.

Beneath its bonnet breathes a potent 5.2-litre V10 FSI direct fuel injection engine. This is the first time in Audi's history that a V10 engine has been used in a production saloon and its massive 320kW of power and 540Nm of torque are available all the way from 3,000 – 4,000rpm. The Audi S6 offers a superb blend of unparalleled power and refinement in abundance, accelerating from 0 – 100km/h in just 5.2 seconds, reaching a governed top speed of 250km/h.

A supremely sporty driving experience doesn't mean compromising on safety. The Audi S6 offers the wealth of advanced safety features that you would expect in an Audi, from the Electronic Stability Program (ESP) to stylish Xenon Plus headlights and the optional Audi Parking System Advanced.

The refined sports appeal of the Audi S6 is elegant yet retains a touch of aggression. The eye-catching Audi single frame grille with aluminium-look double vertical struts and S6 badge give the face of the Audi S6 a very dynamic expression.

Supremely sporty: the Audi S6 is willing to accept any challenge.

RS 6

RS 6 Avant: unmatched performance and refinement.

Quite simply, the new Audi RS 6 Avant is the most powerful car we've ever built for the road. The letters RS, or 'Renn Sport' are synonymous with the very highest levels of performance. The new Audi RS 6 is the latest model from AUDI AG's renowned technical department and its highly-specialised sports subsidiary, quattro GmbH, who only ever release one RS model across the Audi range at a time.

Its truly unique character is revealed the moment you start the engine. For the Audi RS 6 Avant is the first vehicle in the world to feature a 5.0-litre V10 twin-turbo petrol engine with FSI direct injection. Delivering an almost incomprehensible 426kW of power via a six-speed tiptronic automatic transmission, it will blast you to 100km/h in just 4.6 seconds, only relenting when the electronic governor cuts in at 250km/h.

But this hand-crafted vehicle offers far more than just sports car-beating speed. Its impressive power is matched by its exceptional design, luxuriously comfortable fittings and unequalled technical refinement.

To reach the tarmac via the suitably imposing 20-inch alloy wheels, power passes through the latest generation quattro permanent all-wheel drive system, ensuring seamlessly smooth performance. The feeling of composure is further emphasised by a new, all-hydraulic version of the Dynamic Ride Control (DRC) system that won so much praise in the original RS 6 quattro and RS 4 quattro.

Also overseeing proceedings is a special version of the Electronic Stability Program (ESP). It has been reconfigured to intervene as late as possible, maximising driving pleasure without compromising ultimate safety. The incredibly assured handling of the RS 6 Avant is enjoyed from the comfort and support of the cabin's leather upholstered sports seats, while the driver is positioned perfectly in relation to the flat-bottomed RS sports steering wheel with multifunction controls and transmission shift paddles.

These are just some of the many technical developments that combine to deliver an utterly flawless drive.

Breathtaking power. Unrivalled craftsmanship. Serious exclusivity. The Audi RS 6 Avant is one of our proudest achievements ever.

A6 allroad

The Audi A6 allroad quattro. Powerful in expression.

The Audi A6 allroad quattro offers more versatility and flexibility in its genetic make-up than ever before. Thanks to quattro permanent all-wheel drive and the variable ground clearance made possible by adaptive air suspension, the Audi A6 allroad quattro is equally at home on the highway as it is on remote gravel tracks.

The Audi A6 allroad quattro moves people literally and figuratively, with its expressive and emotional appearance and all-terrain character, translating the brand's benchmark in design to a new level. The Audi A6 allroad quattro exudes personality and power even when stationary. Dynamic lines and a coupé-like silhouette convey the vehicle's sporty characteristics, and a prominent new feature is the unique interpretation of the single-frame grille. With vertical chrome trimmed bars the licence plate now appears suspended mid-grille.

The striking aluminium roof rails and off-road styling elements such as a prominent stainless steel undertray for engine protection and wide, flared wheel arches harmoniously integrate a sense of robust character with a nonetheless stylish appearance. The Audi A6 allroad quattro features a spacious and versatile luggage compartment, designed for functionality and offering up to 1,660 litres of load space with the rear seats folded down. A twin rail securing system and extensive storage packages provide ample storage space and tie-down facilities.

The Audi A6 allroad quattro offers the latest generation of TDI diesel engine technology. The 3.0 litre V6 TDI engine delivers a healthy 171kW of power and incredible 450Nm of torque and, combined with the latest technology common-rail injection system and piezo injectors, the Audi A6 allroad quattro has the power to deliver superior performance upon demand without compromising the efficient fuel consumption of modern diesel engines.

The Audi A6 allroad quattro defines all terrain performance, versatility and athletic good looks.

From the creator of quattro. The Audi Q7.

In the case of the Audi Q7, performance does not refer exclusively to sheer power. Performance stands for the uniting of innovative ideas and traditional values to produce a progressive overall concept. The Audi Q7, the first premium SUV in the third generation, thus defines an entirely new type of vehicle in a rapidly growing segment.

Elegant sportiness is visibly combined with functional elements to produce an exceptional vehicle that impresses from every perspective and on every terrain – on asphalt or gravel tracks, in corners or on the straight, on the motorway or in urban traffic, in snow, on ice or sand, on mountain passes or across flat countryside.

The design of the Audi Q7 combines dynamic elegance with a powerfully sporty charisma. Furthermore, the body is an impressive example of systematic and innovative lightweight design, without sacrificing characteristics such as sturdiness and solidity. Space, dimension and variability have been newly defined on the Audi Q7, with an optional 7 seats there is room for the whole family. The drive concept of the Audi Q7 is impressive at high speed, as is its distinctively dynamic performance on and off paved roads. quattro permanent all-wheel drive with asymmetric/dynamic torque distribution ensures maximum traction, agility and cornering stability – the basis for the ultimate in driving dynamics and safety. The suspension combines sporty handling with maximum ride comfort, while its ground clearance also enables it to drive over rugged surfaces.

Innovative electronic driver assistance systems provide additional convenience, and the further advanced Electronic Stability Program (ESP) enables the driver to maintain even better control over the vehicle. An outstanding space concept with exceptional functionality and a level of variability that provides almost unlimited scope for realising individual requirements underlines the high utility value of the Audi Q7 in impressive style. Inside the Audi Q7, the driver and passengers will find premium quality, luxury and comfort. Mobility is thus transformed into an experience that knows no limits.

*“Best 4WD over \$40,000”
Drive Car of the Year, 2006*

Audi wins 2006 ‘Drive car (drive.com.au) of the year’ award for best SUV over \$40,000 with the Audi Q7 4.2

The pinnacle of luxury driving.

Cars are built to be driven. The Audi A8 is built to inspire. Combining sporty performance with elegance and comfort, you'll enjoy outstandingly dynamic driving facilitated by the latest-generation Audi Space Frame (ASF). Thanks to its greater rigidity, ASF provides increased safety and more agile handling. Across the Audi A8's range of engines each sets standards in its class, and with constant optimisation, emphasises our philosophy of "Vorsprung durch Technik".

The Audi A8 is equipped with electronically controlled adaptive air suspension, incorporating an infinitely variable damping system that adjusts the suspension to the road conditions, guaranteeing a superb drive on almost any surface. In addition, the driver can choose any of four driving modes manually; Automatic, Dynamic, Comfort and Lift. The Multi Media Interface (MMI) is another special feature of this luxurious Sedan. With this integrated control concept, you can operate the systems and controls intuitively by the same simple logic. Clear, convenient and easy to understand. Which means you can concentrate on the most important thing of all – driving.

The Audi A8L W12 quattro

The Audi A8L W12 quattro is the Audi flagship. This exclusive comfort version, which is 130mm longer than a standard A8, is propelled by the most powerful engine ever installed in this model: an awesome 6 litre, 12-cylinder unit with 331kW and maximum torque of 580Nm. The quattro permanent all-wheel driveline, electronically controlled adaptive air suspension system and the all-aluminium Audi Space Frame body guarantee an optimum ride for driver and passenger alike. This combination of luxury performance, control, comfort and comprehensive specification offers the ideal blend of sporty driving and smooth coasting.

*Audi A8 wins 2007 NMVTRC Secure by Design award,
"Luxury Car Category"*

*"Winner in the luxury class"
auto motor und sport magazine, 2005 & 2006*

The fearless leader. The Audi S8.

Sportiness can be found in the genes of all Audi models – however for those special cars badged with the letter ‘S’ it is taken to the highest level and stands for absolute sports car authenticity.

From the very first glance, the Audi S8 is clearly a vehicle possessed of an unmistakable promise of power. When combined with the traditional Audi A8 brand values of absolute luxury, superb quality and the latest technology, the performance potential of this superlative sports car is unparalleled.

The heart of the Audi S8 beats like that of a highly-tuned athlete as the power and dynamic performance are allied in absolute harmony. In a single moment the entire reserve of power from the all-aluminium 5.2-litre V10 engine can be unleashed. At 7,000 rpm, the Audi S8 achieves an astonishing 331kW of power and the engine reaches its maximum torque of 540Nm at 3,500 rpm. Impressively, 90 percent of this enormous power reserve is available from only 2,300 rpm. The result is tremendous acceleration all the way up to a governed top speed of 250km/h.

The Audi S8 is characterised by a virtually instantaneous reaction to the throttle, its 5.2-litre V10 FSI direct fuel injection powerplant offering irresistible acceleration and superb traction by virtue of Audi's new quattro permanent all-wheel drive system. With the company's new asymmetric/dynamic torque distribution characteristic, Audi's quattro system ensures all of the engine's power is applied directly to the road.

The Audi S8 is equipped with an innovative adaptive air suspension with sport S specific setting allowing dynamic driving agility without any sacrifice to comfort.

From every perspective, the Audi S8 combines performance and design in a single, standout package. The high shoulderline, distinctive dynamic line and taut, athletic appearance is enhanced by Audi's striking single frame grille. The eye-catching 20-inch aluminium wheels with S-styling and wide road stance work together to ensure that the power of the engine can be applied to the road with ultimate effectiveness.

Supreme power and superb luxury can exist hand-in-hand, and with the Audi S8, this symbiosis is taken to the highest possible level.

Pure energy. The Audi TT Coupé.

The Audi TT Coupé is an uncompromising sports car, bursting with energy down to the smallest detail and exploding with dynamism on the road. Reflecting a sharper, more mature design the TT Coupé remains a symbol of iconic style and power, delivering dynamic acceleration thanks to its race-bred engine.

The TT Coupé is available in a choice of two engines – the award-winning 2.0 TFSI engine, voted engine of the year for three consecutive years by a panel of 56 judges from 26 countries. The engine's class leading performance was praised by the jury for its exceptional power and torque. There is also an exhilarating V6 engine with a 3.2 capacity, 184kW, and a maximum torque of 320Nm. Incorporating Audi's legendary quattro permanent all-wheel drive, for greater driving stability and precision road handling.

Both engines feature the innovative, race-bred dual clutch transmission – S tronic – which provides seamless exhilarating performance. An additional sporty manual transmission is also available on the 2.0 TFSI.

The Audi TT Coupé is distinctive sports car; the body is constructed according to Audi Space Frame (ASF) technology, combining steel and aluminium components ensuring better handling characteristics, better acceleration and high body rigidity and stability.

The Audi TT Coupé captures the original design icon, and progresses it to the next generation to create an uncompromising sports car.

"Audi is crowned 2006 'Drive car of the year' with TT 2.0 TFSI"

*"Best Performance Car over \$60,000"
Drive Car of the Year, 2006*

*"Most Beautiful Car in the World"
Auto Bild magazine, 2006*

Boundless open-topped driving pleasure: the Audi TT Roadster.

The iconic design of the original Audi TT Roadster elevated it to the status of a cult classic. This stunning design has been carefully reinterpreted to create a progressive design language for the second generation Audi TT Roadster.

The Audi TT Roadster is now even more athletic in appearance by virtue of its taut lines, forward urge, wide stance and the dynamic Audi single frame radiator grille. The soft top of the Audi TT Roadster forms a clear design contrast, giving the overall impression of a more elongated, geometric look. Not to mention offering driver and passenger an exhilarating open-topped driving experience.

The Audi TT Roadster is built using the principles of Audi Space Frame (ASF) technology construction of aluminium and steel that offers a weight-saving advantage, balanced weight distribution and a high level of strength and rigidity.

This second generation Audi TT Roadster is available with the same choice of two high performance engines that feature in the TT Coupé - the 3.2 V6 which has quattro permanent all-wheel drive ensuring maximum stability and precise road-holding grip, and the award winning 2.0 TFSI. Both engines are combined with the S tronic 6-speed dual clutch transmission.

The Audi TT Roadster is a car for those with a pure passion for convertible driving pleasure.

TTS

The new Audi TTS. Get carried away.

Exciting around every bend, the Audi TTS provides a thrilling step up from our standard TT models. Whether you choose the Coupé or Roadster version, the sporty details, uncompromising performance and incomparable blend of dynamic performance and ride comfort make every trip a memorable experience.

The 2.0 TFSI engine kicks out a spine-tingling 200kW, and is available with a choice of two transmissions: sporty 6-speed manual gearbox or innovative, race-bred S tronic dual clutch transmission, providing super fast, seamless gear changes for even better performance. Both models incorporate Audi's legendary quattro permanent all-wheel drive, offering greater stability and precision road handling.

A glance at the interior also makes clear that the Audi TTS is all about performance. The instruments, with white-on-grey dials, are complemented by a high-resolution driver information system and lap timer. The Audi TTS Coupé and TTS Roadster brim with technical innovations, and a huge range of sporty equipment as standard.

The new Audi TTS is a clear embodiment of Audi's "Vorsprung" philosophy - leading performance, superior design and the ultimate in prestige.

R8

The new Audi R8. Born of Powerful ideas.

Sharing the name of the most successful Le Mans 24-Hour Race car of all time, the new Audi R8 arouses both fascination and enthusiasm.

And like the original racing car, the Audi R8 bears the imprint of its developer's passion and desire to push back the frontiers of technical feasibility. Never before have motor racing, series car production and supreme technical achievement been linked so closely as in the new Audi R8.

The Audi R8 is a thoroughbred sports car that delivers enduring driving performance thanks to its all aluminium mid-engine concept, in conjunction with superior quattro permanent all-wheel drive technology and Audi Space Frame (ASF). The Audi R8 delivers the concentrated essence of inspired engineering, passion and true Vorsprung.

The muscular, clear-cut lateral contours combined with the trademark sideblades concealing the over-sized air intake instantly allude to its racing origins. With its high-revving 4.2-litre V8 FSI engine, the Audi R8 evokes the dynamism of a high-performance sports car with driving experience that is equally at home on a racetrack as it is on the road.

The genes of a winner. The new Audi R8.

Audi Exclusive

Exclusive

Every Audi is intrinsically exclusive. The breathtaking design, the exceptional engineering, the Vorsprung durch Technik. But for that added element of exclusivity – that distinguishing look that sets you apart from the rest – you can individually specify your Audi with options from Audi Exclusive.

Want a completely bespoke, custom-mixed paint scheme? We will provide it. Perhaps you'd like to make the interior your very own, with a range of beautiful upholstery trims, with matching carpets and floor mats? Our master craftsmen will create it. Perhaps you'd like an accent of personal style with your choice of wood grain, or to bring out your sporting side with aluminium fascia styling? If you're worried about having to make too many decisions, then try the Audi Exclusive Line – a range of custom packages that offer an individual touch to your new Audi. Again, the choice really is yours.

Ask your Audi dealer for details of how you can heighten your sense of individuality.
