MEGANE SEDAN

SOPHISTICATION, COMFORT, WELL-BEING...

The dynamic and refined style of the Mégane's exterior lines extend to its interior. This is a true sporting sedan with the added benefit of generous space and comfort in the rear thanks to the extended wheelbase. The climate control ensures that the interior temperature is always exactly how you like it, while advanced soundproofing makes the cabin one of the quietest in its class.

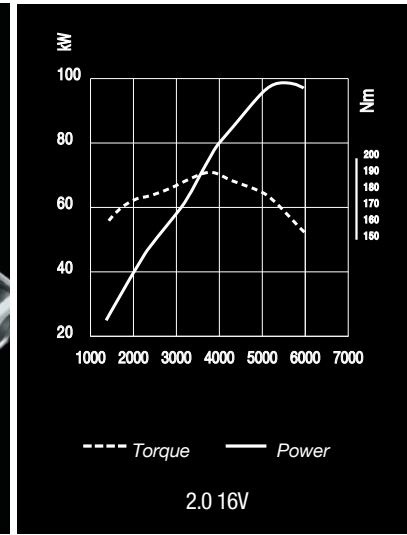

European model shown

FLUID LINES, DYNAMIC STYLING

When it comes to engines and transmissions the Mégane Sedan offers a range of solutions. The familiarity of petrol or the innovation of diesel? A sporty 6-speed manual transmission or optional silky smooth automatic transmission? The choice is yours.

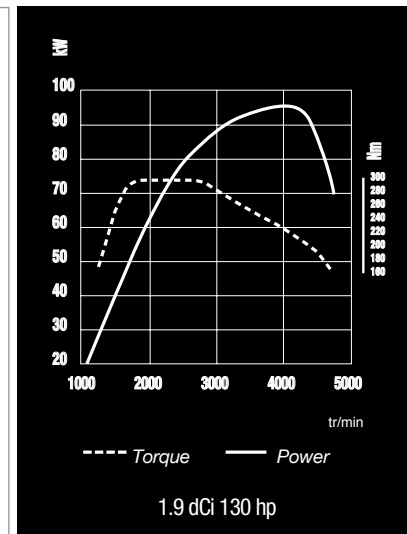

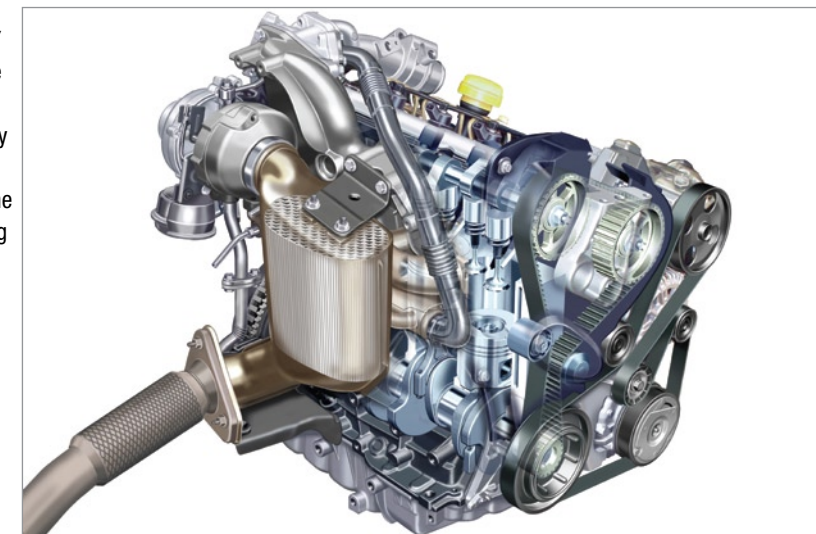

2.0 16V PETROL ENGINE

With a torque of 191Nm at 3,750 rpm and a generous 98kW at 5500 rpm of power thanks to the variable intake control, the 2.0 litre 16 valve petrol engine offers high levels of performance and driving pleasure.

1.9 dCi – RENAULT DIESEL TECHNOLOGY

The new turbo-charged 1.9 litre dCi engine captures the Renault driving experience. Powerful, yet smooth, quiet and remarkably economical, while the low emissions also help to protect the environment. This engine produces up to 300Nm of torque, delivering exceptional flexibility and versatility.

PERFORMANCE A PASSION, SAFETY A PRIORITY.

Mégane acts on 3 levels to provide an exceptional level of safety for the driver and passengers.

Prevention: Features such as cruise control (with speed limiter), satellite audio controls, automatic headlights and rain sensors that automatically activate the windscreen wipers to allow the driver to concentrate on the road.

Correction: Mégane enhances driver control in hazardous situations with ABS, Electronic Brake Distribution (EBD) and Emergency Brake Assist (EBA). The ESP (Electronic Stability Programme) with understeer control corrects your trajectory in the event of a loss of traction.

Protection: Mégane protects each and every occupant thanks to the Renault SRP (System for Restraint and Protection) consisting of adaptive airbags, front seatbelts with dual pretensioners and rear seatbelts with pretensioner and load limiter.

Mégane Sedan has been designed to the same stringent criteria as Mégane Hatch, the first model in its category to have been awarded a 5-star rating in the Euro NCAP crash tests* and one of 8 vehicles in the global Renault range. That's real peace of mind.

* Euro NCAP (European Car Assessment Programme) is an independent organisation.

European model shown

SAFETY

PREVENTION

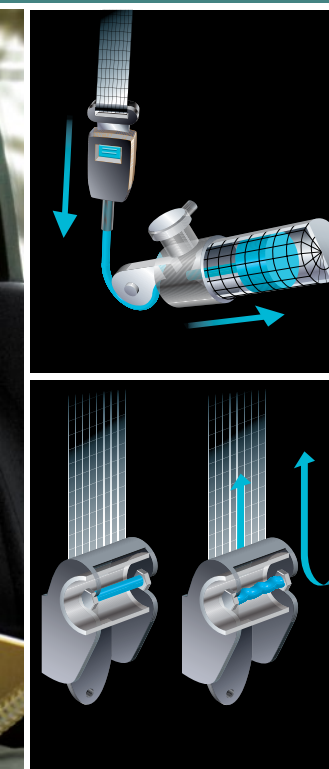

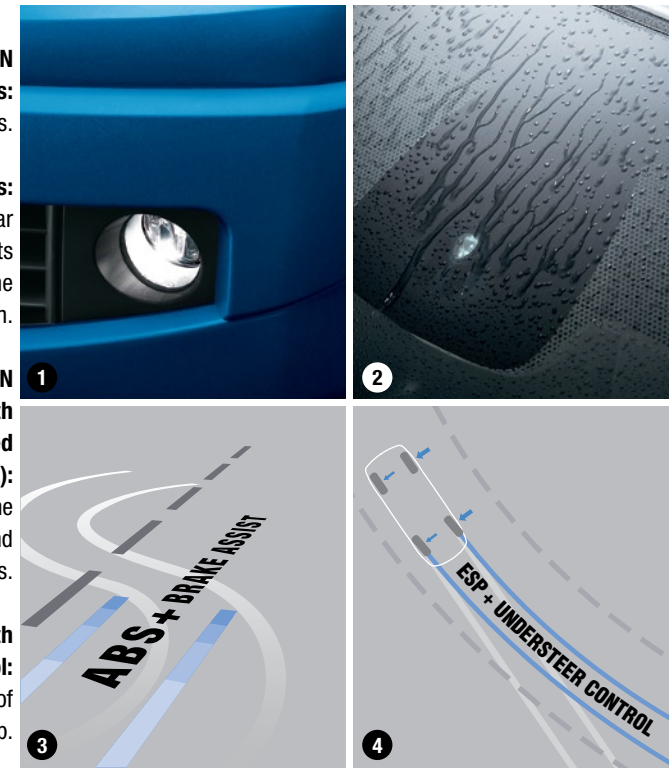

1. Front fog lights: improve visibility in foggy or rainy conditions.

2. Light and rain sensors: located on the windscreen alongside the rear view mirror, these sensors activate the headlights automatically if light levels drop, and start the windscreen wipers in the event of rain.

CORRECTION

3. ABS anti-lock braking system with Electronic Brake Distribution (EBD) coupled with Emergency Brake Assist (EBA): enables the driver to maintain control of the vehicle's trajectory in the event of braking and optimises the stopping distances.

4. ESP (Electronic Stability Programme) with ASR traction control and understeer control: controls the stability of the vehicle in the event of avoidance manoeuvres and/or poor surface grip.

PROTECTION

Dual pretensioners on the front seatbelts and pretensioners on the rear outer seatbelts: hold the occupants back against the seat in the event of high intensity impact. Three-point front and rear seatbelts.

Load limiter on all five seats: reduces the pressure exerted by the seatbelt on the thorax and shoulder of the occupant in the event of impact.

Renault System for Restraint and Protection (SRP): adaptive driver and passenger frontal airbags inflate according to the intensity of the impact and the size of the occupants.

Lateral thorax airbags for driver and front passenger.

Front and rear curtain airbags.

COMFORT AND CONVENIENCE

1. Renault remote control card: allows you to lock and unlock the doors at the simple touch of a button. With the card inserted in the reader, simply press the 'Start' button to start the engine.

2. Fuel flap with integrated cap: the watertight flap, which moves aside when the fuel nozzle is inserted, reduces the mess associated with handling the fuel cap.

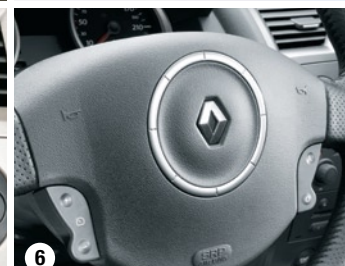

3. One-touch front and rear windows with anti-pinch facility.

4. Parking proximity sensor (Privilège only): when reversing your vehicle, the system detects and warns you of possible obstacles to the rear by means of a sequence of beeps, which get faster as you approach the object.

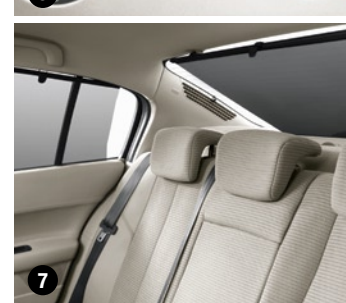

5. Climate control: electronic adjustment and display of the temperature and ventilation settings. Rapid demisting function and sunshine sensor.

Combined passenger compartment filter: reduces the penetration of particles (e.g. pollen) and unpleasant odours (e.g. pollution).

6. Cruise control/speed limiter with steering wheel controls: select a constant speed (control function) or set a maximum speed (limiting function).

7. Rear window and rear side window sunshades.

8. 'See me home' headlights: the lights remain illuminated for two minutes after you have left your vehicle to guide you in the dark.

TRANSMISSION

1. Manual 6-speed gearbox: offers precision and driving comfort and enables the engine's potential to be fully exploited, whilst offering better pick-up on the intermediate gears. The sixth gear provides enhanced driving pleasure and reduced fuel consumption.

2. Proactive automatic 4-speed gearbox: thanks to the sequential shift you always have a choice between manual and automatic modes. In the latter case, it adapts to your driving style, to the profile of the road, as well as to the driving conditions to leave you free to concentrate on the road.

STORAGE

1. Closed compartment tray on the rear parcel shelf.

2. Central rear armrest: incorporates a storage compartment and two can holders (Privilege only).

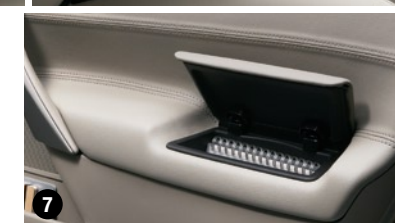

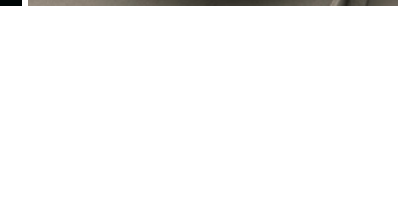

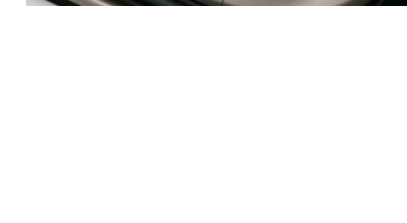

3. Luggage compartment: large and functional, volume 520 litres.

4. Driver and passenger lockers under the floor (2 x 3 litres).

5. 17-litre glovebox (cooled with air-conditioning): offers a generous storage space. Can hold a large bottle of water, maps and CDs.

6. 6-litre storage compartment in the front central armrest.

7. Enclosed storage compartments in the armrest and open storage pocket in the front door.

RENAULT, THE ONLY CAR MANUFACTURER TO HAVE 8 VEHICLES AWARDED 5 STARS IN THE EURO NCAP CRASH TESTS

Renault's passion for performance, style and safety is what drives us to create unique automotive concepts, ranging from practical and versatile people movers to high performance coupés and hot hatches. But there is one thing that they all share in common, and that is the race-bred technology that makes every Renault a pleasure to drive and own.

Our Formula 1 programme provides a perfect test bed for technological innovation and development, with many of the new materials and technologies developed to produce a winning race car finding their way into our road-going vehicles. Constant improvements in performance, handling and safety can be directly attributed to Renault's passion for racing and the transfer of skills between the Renault Technocentre and our Formula 1 team. Our goal is to create the ultimate Renault driving experience. Drive a Renault today and you'll understand what we're talking about.

ECOLOGICAL ECONOMICAL

Renault's environmental policy is based on an understanding of the ecological challenges that our planet faces. This policy has three commitments; to be one of the world's top three car makers for low level emissions of CO2. To offer a range of models powered by biofuels such as bioethanol and biodiesel and to develop a wide range of technologies.

Renault underlines its commitment to protecting the environment and so offers a range of vehicles that are both economical and ecologically sound.

- Ecologically sound through a commitment to reducing the environmental impact for the entire lifespan of the car. From the outset, each new project incorporates production processes, choice of materials, pollutant and CO2 emissions, fuel consumption and recycling.

- Economical in terms of fuel consumption. Renault emphasises that the solution to too many great ecological challenges lie in technological advancements that can be applied to the majority of vehicles whilst maintaining attractive pricing.

- Recycling Renault strives to manufacture vehicles that are environmentally safer than ever before. One of Renault's strengths is its capacity to integrate the environment into every stage of a vehicle project right from the design phase until the end of its life cycle. Eco-design of current Renault vehicles enables 95% of their weight to have a second life. It also means that an increasing number of components are made of recycled plastics and renewable materials.

FORMULA 1, A SCHOOL OF EXCELLENCE

Formula 1 is an extremely demanding sport. It teaches us that whatever counts, besides performance, is the ability to construct reliable cars which won't let you down, despite being subjected to extreme physical conditions.

We have applied this philosophy not only to our racing cars. Because our commitment to Formula 1 has only one aim: to teach us how we can offer you reliable, safe, high-performance cars, upon which you can always rely.

SERVICE AND MAINTENANCE.

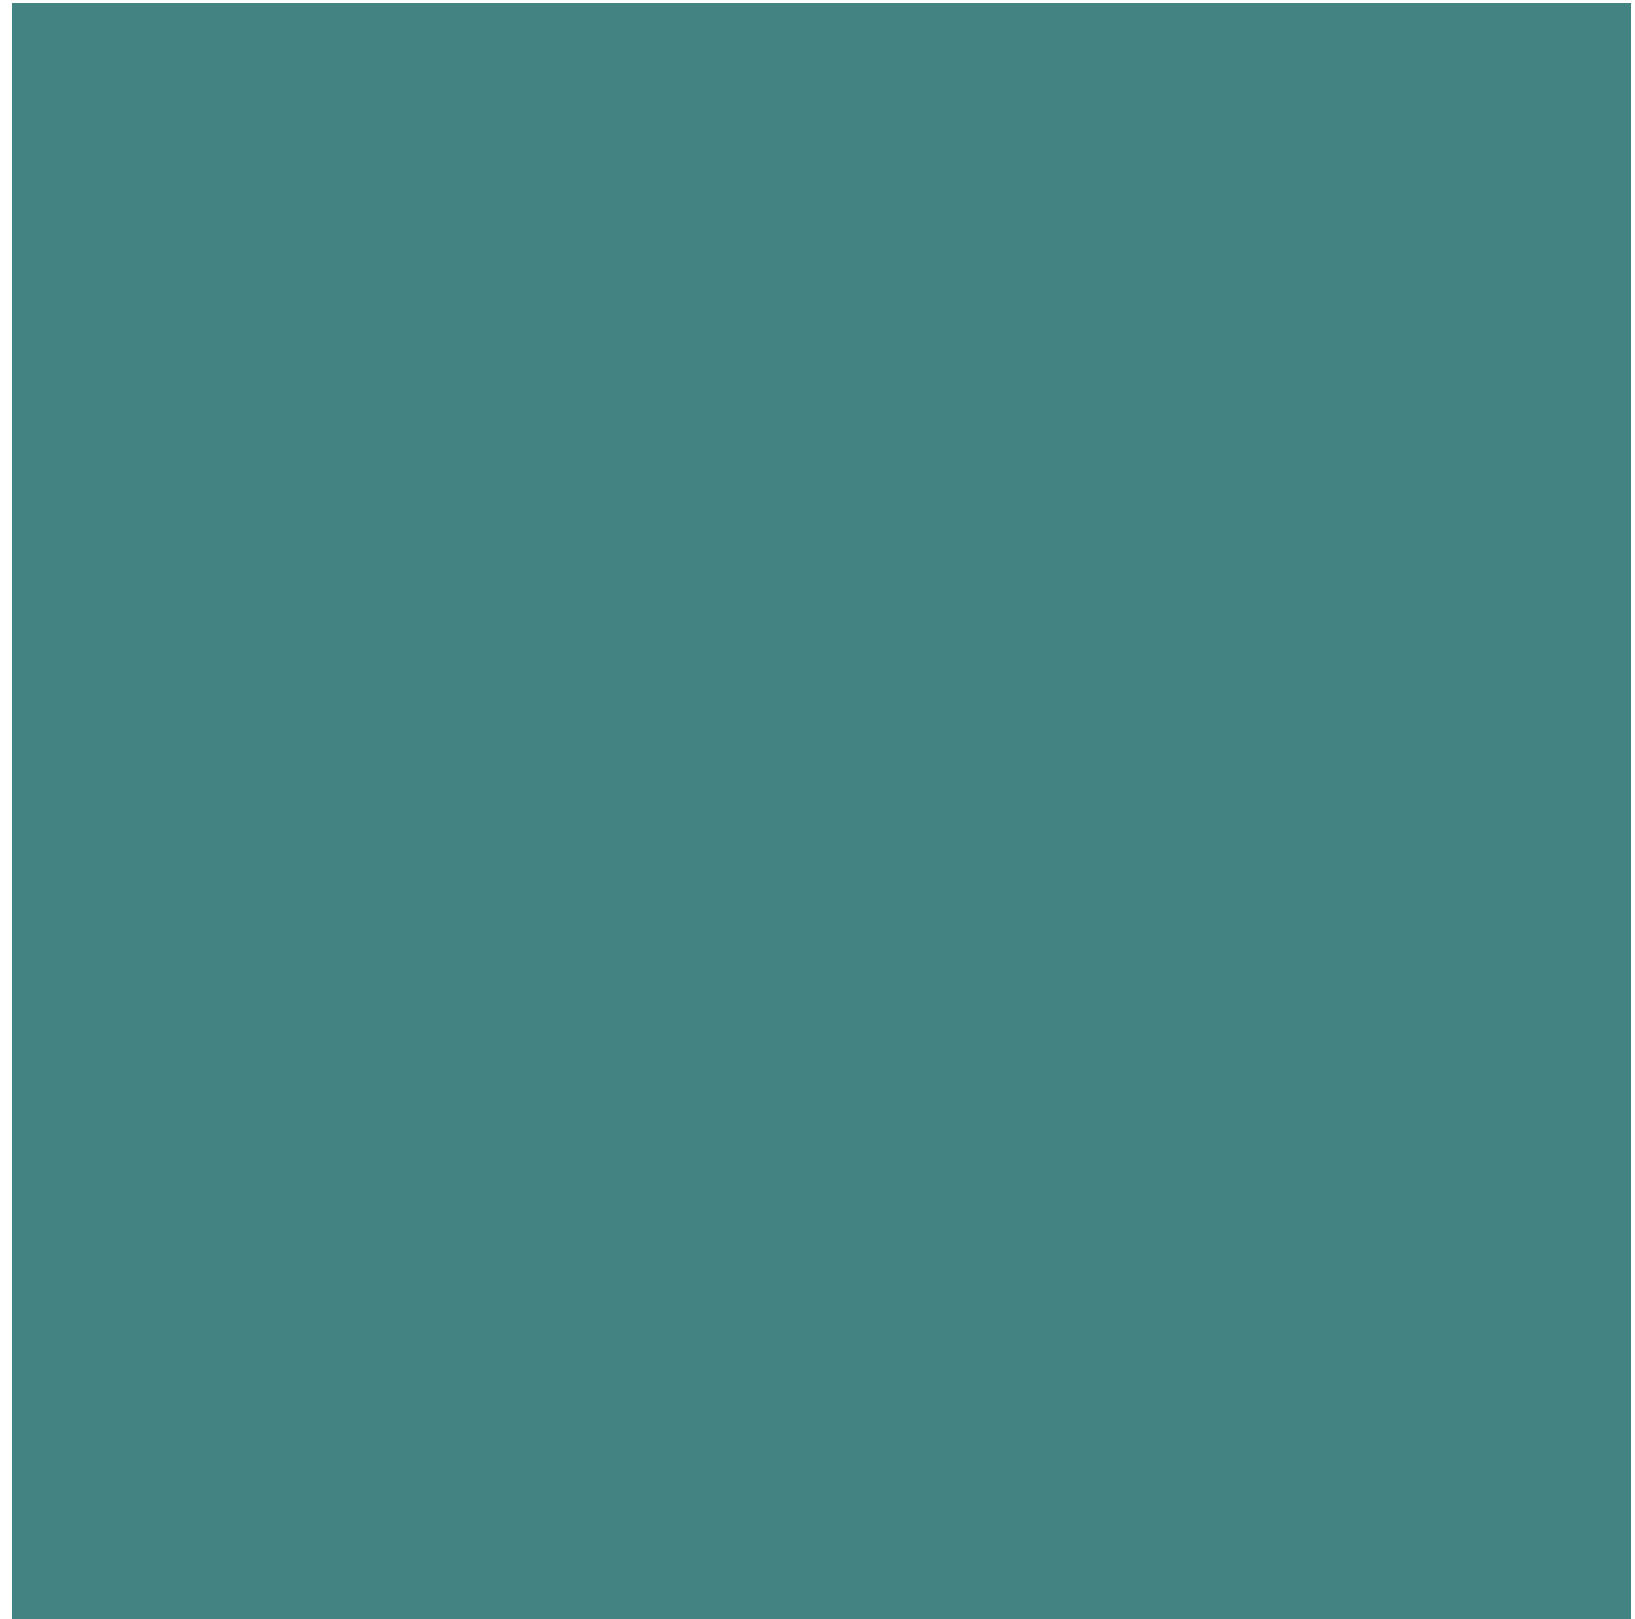

HELPING YOU STAY PRODUCTIVE AND COMPETITIVE...

All new Renault vehicles are covered by a 3 Year/100,000 Kilometre New Vehicle Warranty and Renault 24-hour Assistance Program.

With over 100 years experience as a motor vehicle manufacturer and as Europe's largest automotive brand the Renault service and maintenance network offers peace of mind for all new Renault owners.

Each of the approved and authorised Renault Dealerships across Australia have completed rigorous training programs in parts, service and maintenance.

They can maintain your new Renault at peak efficiency – in workshops equipped with the very latest technology and specialist tools. All Renault Dealerships can also supply you with parts, accessories, the latest Renault promotional merchandise and friendly, helpful advice.
