

ix35

Drive your way

Compact SUV re-imagined

A car where everything we've ever learned
and everything we've ever dreamed come together.

With the ix35, Hyundai has created a new standard for Compact Sports Utility Vehicles. The bar has been raised. The game has changed.

In building this breakthrough urban cruiser, almost every system and component of the ix35 has been designed from the ground up. Our uncompromising aim has been to ensure that it delivers form with function; safety matched by comfort; technology that delivers simplicity; and power on the road that's complemented by exceptional performance and outstanding economy.

So if you're done with imagining, drive the ix35 and experience the incredible made possible.

Form meets Function

Developed in conjunction with Hyundai's European-based design and technical centre, the ix35 boasts an exterior based on Hyundai's 'Fluidic Sculpture' design philosophy with a muscular presence, sweeping curves and sharp creases that create a sophisticated athletic look.

It's a Compact SUV that will turn heads and make your heart beat faster. Yet at the same time, every aspect of the ix35 design has been developed to improve safety, increase passenger comfort and optimise driving pleasure. ix35's sleek body shape ensures a superior aerodynamic performance that delivers better fuel economy and greater road stability.

Smart thinking and styling is evident throughout and continues across every aspect of the ix35's superbly appointed five-seat interior. Comfort has been optimised with a roomier cabin that offers extra legroom and headroom, while a generous cargo space and a myriad of storage compartments ensure there's a place for everything you need, whether you're travelling cross-city or out into the countryside.

To help you maintain your concentration on the road, the instrument cluster has been positioned so that all key information is available at-a-glance, while blue backlighting provides exceptional clarity. The fully adjustable electric driver's seat takes the strain out of driving and provides a commanding view of the road.

From your first look, and right through all your journeys, you'll discover that every facet of the ix35's exceptional design goes beyond stylish looks to deliver superior functionality.

Drive in comfort...

Step into the ix35 and step into superior comfort and style. What surrounds you is important. The most precious environment is one you respond to naturally. Ergonomic, tactile and easy on the eye. Rigorous attention to detail, quality materials, and an unerring eye for sensuous flair see to that.

You want things just right. Then again sometimes you need to change them around. The ix35 lets you configure a multitude of seat arrangements to let you pack in all your life.

Overseas model shown

Keeping your focus on the road

Whether you're negotiating peak hour traffic, zipping along the freeway or out on the open road, your comfort contributes to safe driving. From an easy-to-view instrument panel and height adjustable seats offering lumbar support, through to smart technologies such as cruise control, steering wheel mounted audio controls and dusk sensing headlights, the ix35 has been designed to help remove unneeded distractions and give you more time to be focussed on the road.

Overseas model shown

...and advanced safety

All ix35's are equipped with a comprehensive array of advanced safety features that help you control the vehicle in challenging conditions. With so much attention to safety and occupant protection, no matter where you go in the ix35 you'll find peace-of-mind.

Highlander model shown in Sleek Silver

Greater control in all conditions

The Anti-skid Braking System (ABS) increases safety by preventing your brakes from locking up while Electronic Brake-force Distribution (EBD) distributes braking force according to your vehicle's load.

With the Elite and Highlander, on demand All-Wheel-Drive (AWD) distributes power evenly to all four wheels to improve traction, giving you greater control and confidence on slippery, wet or uneven surfaces.

Multiple layers of protection

Through extensive use of ultra-high tensile strength steel, the ix35's body shell is stronger and stiffer – as well as lighter. Similarly, excellent structural integrity is provided by side impact beams, integrated front and rear crumpled zones, strengthened window sills and safety engineered doors with internal guard beams.

Airbags front and back

With six airbags standard, the ix35 provides comprehensive occupant safety. The protection of driver and front passenger airbags is reinforced by dual-side front (thorax) airbags, while roof-mounted side curtain airbags extend from front to rear.

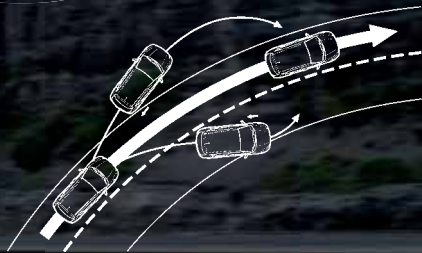

Other standard protections include front-seat active head restraints that automatically shift upward in the event of an impact to reduce head, neck and shoulder injuries, as well as three-point retractable seat belts for all occupants.

Active locking

For additional safety and security, the speed sensing Hyundai Active Locking Operation (HALO) system, locks all the doors once your speed exceeds 15kph. Front seat occupants can override the system to easily exit the vehicle.

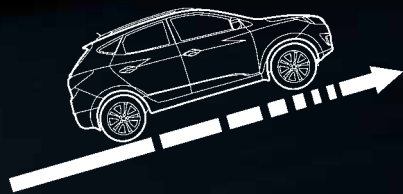

Reverse with ease

Highlander models are fitted with a built-in rear-view camera that shows an LCD colour image within the driver's rear-view mirror. Smart Parking Assist shows the width of the vehicle and the position of any objects behind it.

Electronic Stability Control

Comes into its own when sudden braking or turning leads to a lack of control. ESC senses wheel speed, the manner in which the car is turning, the angle of the steering wheel and input from the pedals.

Hill Start Assist Control

It's sometimes tough pulling away when you're facing uphill. No matter. Hill start Assist Control minimises backward rolling on steep ascents.

Downhill Brake Control

To keep control and maintain steady speed on steep, downhill descents, engage Downhill Brake Control.

Packed with smart, cutting edge technology

The ix35 showcases our passion for making rich technology and cutting edge innovation accessible to everyone. Throughout the ix35 you'll find an array of extremely advanced smart technologies working intuitively behind the scenes to make driving safer, easier and more enjoyable.

Proximity Smart Key and Push Button Start*

Proximity Smart Key technology enables you to unlock and lock your ix35 without taking the key from your pocket – something you'll really appreciate when your arms are full, or when you're rushing to escape the elements. Turning on the engine is as easy as pushing the start button – there's no need to insert a key. Just as importantly, your proximity key offers greater security and theft deterrence than a conventional key.

Electric folding mirrors[^] and a light to see you to the door

When manoeuvring into a tight space, you can fold-in the side mirrors by simply pushing the controls located on the door. Just as convenient, the headlamps remain lit for 30 seconds after you close the ix35's doors, lighting your way to the front door or along a pathway.

Dusk sensing headlights*

Dusk sensing headlights will ensure your vehicle is visible to oncoming traffic when daylight begins to fade. They also turn on automatically when entering poorly lit areas such as tunnels or car parks.

Take your tunes with you

ix35's premium audio system lets you enjoy your favourite tunes. On the large screen display, play music any way you want it, from full function iPod connectivity, CD, Radio, MP3 or USB all delivered through a six speaker system with tweeters.

Panorama glass roof[^]

Let the light in and the spirits soar for both front and rear passengers with ix35's audacious panorama glass roof.

Safety window

To prevent accidental injury, the driver's side window will automatically stop and go down if it is travelling upwards and any part of your body – or any other object – is in its path.

One-touch triple signal indicators

By simply depressing the turn indicators for a moment whilst driving, they will signal three times before returning to the neutral position. This feature is ideal for changing lanes on motorways and helps you maintain focus on the road ahead.

Rear-view camera[^]

Reverse with safety and ease with a rear camera display, including Smart Park Assist guide, cleverly and conveniently incorporated into the electro-chromic rear view mirror.

Travel safer up and down steep slopes

The ix35 includes two new innovative Hyundai safety technologies: Hill-start Assist Control (HAC), which minimises back roll on steep ascents, and; Downhill Brake Control (DBC), which helps you maintain control and speed on steep descents. Both give you greater control and safety in challenging driving situations and are standard across all models.

*Available on Elite and Highlander models

[^]Available on Highlander models

Built to perform in the city or the open road

Delivers big car torque with small car economy

The ix35 doesn't just offer sculpted muscular styling, it also delivers that promise in terms of performance and handling. And if being fun to drive isn't reward in itself, the ix35 goes even further by offering outstanding economy.

Overseas model shown

Choose the performance and economy that meets your needs.

The ix35 offers three new engine variants across its model line-up, each offering more power yet greater fuel efficiency.

All terrain capability

A true crossover, the ix35 is available in the Active 2-wheel drive (2WD) model or the Elite and Highlander on-demand All-Wheel-Drive (AWD) models. Whether your driving keeps you within urban limits, or you prefer the flexibility to venture out into all terrains, there's an ix35 model that meets your needs and delivers an exceptional driving experience.

The ix35 suspension system has been developed and tuned especially for Australian road conditions to ensure agile handling and responsive steering on a wide variety of road surfaces. While McPherson Strut front suspension enhances steering wheel feel, manoeuvrability and stability, a compact rear multi-link suspension improves responsiveness whilst maximising interior cabin space.

The revolutionary R-series Diesel

The R-series turbo Diesel engine benefits from being the third generation of Bosch's common rail system, whose piezo-electronic injectors deliver fuel at 1800 bar with an unprecedented degree of accuracy and control, resulting in greater power, lower fuel consumption with CO₂ emissions a very low 198g/100km[^]

Helping you drive cleaner and smarter

To help you get the best efficiency and reduce your running costs, the ix35 includes a standard trip computer that provides distance to empty, average fuel consumption, average vehicle speed, elapsed time and instant fuel economy.

2.0 Theta-II

Available with the Active model, this latest generation all aluminium four cylinder petrol engine delivers 122kW power via 5 speed manual or optional 6 speed automatic transmission and delivers smooth performance and a frugal 8.5 l/100km* fuel economy.

2.4 Theta-II

This double overhead cam petrol engine delivers extra power and torque for the all wheel drive Elite model, yet has excellent 9.2l/100km* fuel economy.

2.0 R-series

The top of the range all wheel drive Highlander and Elite are both equipped with the stunning 2.0 R-series CRDi turbo Diesel engine – the most powerful Diesel engine in its class, delivering 135kW of power. And with a staggering 392Nm torque, similar to much larger engines, the ix35 2.0 R-series delivers sporty acceleration and agility yet with the economy of a small car – just 7.5 l/100km.*

[^] Australian Design Rule 81/02 static laboratory combined CO₂ emission for 2.0 R-series Diesel. CO₂ emissions will vary depending on a combination of driving habits and the condition of the vehicle.

* Australian Design Rule 81/02 static laboratory combined average city and highway cycle test.

Fully Featured

Alloy wheels

The ix35's dynamic looks are further enhanced by sporty 17" dual 5-spoke alloy wheels on the Elite and aggressive 18" dual 5-spoke alloys on the Highlander. 17" steel wheels with attractive covers are standard equipment on the Active.

Push button start

(Elite and Highlander)

The push button start, which can only be activated by an ID signal sent from your Proximity Smart Key, offers cutting edge convenience and ease, while adding a further level of theft deterrence.

Rear-view camera

(Highlander)

For parking with safety and ease, Highlander is fitted with a reversing camera that's built into the vehicle's rear garnish and provides an LCD colour image of the area behind the vehicle that be viewed in an integrated display within the driver's rear-view mirror. For additional safety, colour distance-indicators show the width of the ix35 and the distance to an object behind the vehicle.

Dusk sensing auto headlights

(Elite and Highlander)

To increase driving safety and the visibility of your vehicle to other drivers, headlights are automatically turned on as light begins to fade.

Driver Information

To help you maintain your concentration on the road, the instrument cluster has been positioned so that all key information is available at-a-glance, while blue backlighting provides exceptional clarity.

Dual-zone air conditioning unit with cluster ionizer

The standard easy-to-use manual temperature control air conditioning has separate vents for back seat passengers. Highlander models feature automatic dual-zone climate control with cluster ionizer that automatically cleans the air when the air conditioner or heater is running.

Highlander model shown in Grey Titanium

CD Player with USB/iPod®/Aux connectivity.

Play your favourite music in your preferred format and keep the whole family entertained and happy with this state-of-the-art six-speaker audio system that includes iPod® connectivity. Four-function steering wheel audio controls add convenience and safety.

Heated front seats (Highlander)

For an extra touch of comfort and luxury, the Highlander features heated front seats.

Hyundai.

Where everything comes together.

At Hyundai we understand that life is about continual change. As a company, our progress isn't measured by our actions in the past, but by how we respond to our environment and listen to our customers. Only by re-imagining how tomorrow's world could be, can we continue to evolve and meet your needs today and into the future.

So whatever your dreams, wherever you're going, whoever you want to be...the discoveries, the adventures, the challenges that await. It's your journey and we'll take you there.

Behind you all the way

The ix35 is backed by Australia's First 5 Year Unlimited Kilometre Warranty. It's Hyundai's standard promise of excellence. In addition, ix35 comes with 12 months Hyundai Premium Assist – a 24 hours, 365 days a year roadside assistance service that will never leave you stranded.*

All Genuine Hyundai Accessories are covered by Hyundai's Australian First 5 Year/Unlimited Kilometre Accessories Warranty*.

* All Accessories are subject to warranty conditions. Warranty only applies to purchases from 1 September 2008. See your nearest Hyundai Dealer or visit our website at hyundai.com.au for full warranty terms and usage recommendations. Some Genuine Hyundai Accessories are not applicable to all Hyundai models. All Genuine Hyundai Accessories purchased and fitted to a Hyundai vehicle by a Hyundai dealer or authorised service outlet are covered against manufacturing faults and defects of the product for a period of 5 years from the date of purchase with no kilometre usage limit. Receipts are required to support warranty claims. This warranty does not cover minor cosmetic defects or damage or defects caused by improper maintenance or repair, fair wear and tear, accident, misuse, abuse, or unauthorised modifications. Hyundai Motor Company Australia will without charge replace or repair any defective Genuine Hyundai Accessory if work is completed by an authorised Hyundai Dealer. Any Genuine Hyundai Accessory/ies not fitted by a Hyundai dealer or authorised service outlet, will only have the benefit of a 12month/20,000kms warranty period, which ever occurs first. All warranties are additional to the implied warranties under the Trade Practices Act 1974. Accessories pictured are all sold separately at additional cost.

¹ Refer to your Apple iPod® instruction Manual. iPod® is a registered trademark of Apple Computer Inc., registered in the U.S. and other countries.

² 60kg rating. Dual position side curtain airbag compatible. Only suitable for vehicles fitted with side curtain airbags.

³ Load capacity = 75kg evenly distributed over 2 bars.

⁴ Park Assist Sensors are designed as driver assist function only and should not be used as a substitute for skilled driving and safe parking practices. The area into which the vehicle is heading must be visually monitored by the driver while parking.

⁵ Maximum ball download = 120kg (Active) or 140kg (Elite and Highlander). Towing capacity = (1600kg braked & 750kg unbraked). Towbar capacity subject to regulatory requirements, towbar design, vehicle design and towing equipment limitations.
