An endurance test over thousands of kilometres. Nothing but good vibrations.

Driving along a road in a poor condition in the Audi Q7? No problem. Even if your vehicle is equipped with the bicycle carrier for the trailer towing hitch, for example, there is no reason for concern. The transport solutions from Audi Genuine Accessories are designed for such situations and are laboratory-tested by Audi. The hydro-pulse test simulates a real journey using a special test bench. During this test, both the entire vehicle and the equipped accessories are subjected to an endurance test over thousands of kilometres of poor road conditions. All transport solutions from Audi Genuine Accessories – such as the bicycle carrier for the trailer towing hitch or the carrier unit – have passed these tests, alongside numerous other tests, with flying colours. This claim means that you can rely on Audi Genuine Accessories – even on difficult terrain.
