

PAJERO

LOVE THAT CAR

THE LEGEND CONTINUES.

The mere mention of the word Pajero will bring images of the Bungle Bungles and Uluru flooding back. The Mitsubishi Pajero has been part of Australia's greatest adventures since 1983. And its revolutionary technology has been tested, stretched, reshaped, strained and stressed to triumph over the most gruelling conditions on earth including the Dakar Rally.

Whatever you put in front of Pajero, it will prevail. Bold, elegant, tough and reliable, the Pajero is admired on many levels.

A new styled front features a chrome radiator grille and aggressive bumper with integrated fog lamps and LED Daytime Driving Lamps. Heated door mirrors will never fog and approach lights and side turn-indicators signal your every move.

GO ANYWHERE. BE COMFORTABLE.

Isn't that the rule for an adventurous life? The interior of the Pajero Exceed is a far cry from the terrain it was designed to conquer.

Comfortable and inviting, illuminated meters and leather-wrapped controls are all ergonomically arranged and awaiting your command. The soft leather seat facings and luxurious appointments tempt you to forget your destination and simply keep driving. Even looking at the dashboard is enough to quicken your pulse. The silver and leather gearshift knob, meter detailing, soft dash panel, door trims and rich materials make journeys in this Pajero 'roughing it in style'. Next-generation communications and entertainment technology complete the experience.

At the heart of Pajero Exceed lies a Rockford Fosgate® premium audio system featuring 12-surround sound speakers including an integrated 10 inch subwoofer powered by a 860 watt amp.

Satellite navigation in the impressive Mitsubishi Multi Communication System (MMCS – available in GLS and Exceed) will guide you through clear, turn-by-turn directions shown on the high definition 7" touch screen. And as soon as you engage reverse, the screen displays the images taken by the rear view camera, making tight-space parking in cities and towns effortless. In all Pajero models, the camera's view will appear in the full colour touch screen display. While reverse parking sensors, standard on GLS and Exceed, alert you when you're getting a little close to objects.

Pajero GLS and Exceed also alert you when dusk and rain is falling. Dusk sensing headlamps and rain sensing wipers help you stay focused on the road at all times.

As inviting as it is spacious, Pajero's interior delivers a ride of luxurious comfort for you and your passengers. Generous head and legroom for up to seven occupants: versatile seating arrangements to match your carrying needs; Third row seats that can easily be stowed under the floor to create a wide, flat storage space or removed completely to give you a convenient underfloor compartment; And second row seats that can also be folded down to provide space for nearly anything you want to bring – no challenge is too big for Pajero, inside and out.

WHAT TAKES YOU THERE
WILL BRING YOU BACK.

POWER BEGETS PERFORMANCE

The Pajero driver demands an engine with enough strength and muscle to conquer all punishing terrains. An advanced 3.2 litre Common Rail Direct Injection Diesel (DID) engine provides 147kW of power and an impressive 441Nm of torque. It will take Pajero anywhere, quickly, smoothly and quietly and is available in 5-speed manual (GLX only) and INVECS II 'Smart Logic' 5-speed automatic transmission with Sports Mode.

MORE ABOUT INVECS II WITH SPORTS MODE

This Intelligent and Innovative Vehicle Electronic Control System (INVECS II) is Pajero's smart thinking, five speed automatic gearbox. It's designed to make your life easier- by simply shifting the lever across into Sports Mode and pushing the lever up or down the appropriate direction, you will shift gears almost instantly and smoothly.

MITSUBISHI'S FAMOUS ALL TERRAIN TECHNOLOGY

Mitsubishi's Super Select 4WD II system is not just about control but confidence. Because handling capability, as you change from motorway cruising to even the most extreme off-road driving conditions, demands that.

2H (2WD high range)

Ideal for cities and motorway driving, the rear wheel drive mode gives a quiet ride with smooth on-road performance and economy.

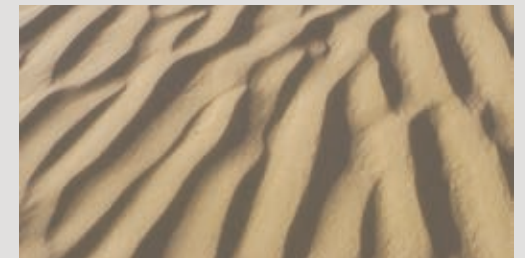

4H (4WD Full-Time 4WD)

When the weather turns bad and the road gets rough, get added traction in 4H mode. The dynamic front/rear torque split adjusts between 33:67 up to 50:50 for added traction and safety.

4HLC (4WD high range with locked centre differential)

Keeping you on track in rugged or slippery conditions, 4HLC distributes power equally to the front and rear axles to meet off-road challenges with a steady, controlled confidence.

4LLC (4WD Low Range with Locked Centre Differential)

Switch to 4LLC when you need Pajero's 'tractor-like' crawling power. This maximised low-end torque will pull you through even the roughest terrain. Like you, Pajero loves to experience isolated spots.

Super Select 4WD II

SUPER SELECT 4WD II

Simply select the required best mode on the gearshift panel and the electronically controlled system will set the Pajero drive train to deliver superior performance under the most challenging driving conditions. The system also allows you to change from the fuel-efficient 2WD to 4WD even as the car is travelling at speeds of up to 100km/h – ideal when road surfaces suddenly become slippery. And when the going gets tough, you can lock the centre differential to evenly distribute power to both axles and maximise traction.

REAR DIFFERENTIAL LOCK

For extreme conditions you also have the option of locking the rear differential, creating side-to-side locking of the rear axle. As an example, when one of the rear wheels loses traction, with the rear differential lock engaged, the other wheel will always keep on moving. Ensuring you don't get stuck is a valuable Pajero capability.

ADVANCED 4-WHEEL INDEPENDENT SUSPENSION

The front double wishbone suspension and a multi-link rear axle, all with coil springs, ensures that each wheel moves independently to the wheel on the opposite side of the axle. A smooth comfortable ride and confident handling over every conceivable type of terrain is Pajero's forté.

6 SRS airbags

TOWING CAPACITY

Pajero's impressive power and torque provides a 3,000kg towing capacity. That's a boat/caravan/trailer/holiday adventure in the making.

HAVE FUN. BE SAFE.

The Pajero not only looks tough and protective, it acts the same way. Pajero's high driving position gives you a clearer view of obstacles on the road or track. High Intensity Discharge (HID) headlamps with auto levelling and headlamp washers ensure the way ahead is clearly visible. Even Mitsubishi's Reinforced Impact Safety Evolution (RISE) monocoque body with integrated chassis means Pajero wraps around occupants with a highly rigid one-piece shell. In the event of an accident, impact-absorbing crushable zones minimise the effect on passengers.

Reinforced critical points on the (RISE) body increase stability for handling and provide strength for recovery and towing.

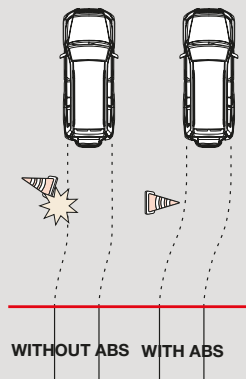

Pajero has dual-stage front SRS airbags, side airbags and curtain airbags for ultimate protection to driver and passengers. All seats are equipped with three-point seat belts with ELR (Emergency Locking Retractor) and the side power windows have automatic anti-trapping devices - they'll instantly stop when they detect anything in the way when closing.

And the surety you'll feel in Pajero has also been recognised with a 5 star ANCAP Rating. ANCAP stands for Australasian New Car Assessment Program and Pajero has been awarded the highest rating possible.

ANCAP
Safety ★★★★★

A DRIVER ONLY WITH EBD

B WITH PASSENGERS AND CARGO WITH EBD

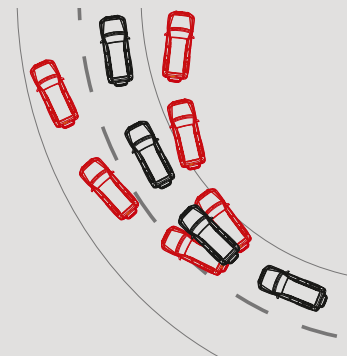

C WITH PASSENGERS AND CARGO WITHOUT EBD

MULTI-MODE ABS WITH EBD

Pajero's Anti-lock Braking System (ABS) fitted with Electronic Brakeforce Distribution (EBD) ensures even, efficient distribution of braking power to each wheel regardless of cargo or passenger load and road surface. It's all about maximising braking power and driving stability.

ASTC WITH BRAKE ASSIST SYSTEM

Active Stability and Traction Control rounds out Pajero's state-of-the-art safety system. It regulates braking force to each wheel during cornering to ensure excellent stability. And it also maintains optimum traction in all conditions, on and off-road. ASTC prevents tyre spin on slippery surfaces and minimises the risk of drift caused by over-accelerating in corners. The Brake Assist system increases braking pressure when panic braking is detected - it means faster and safer braking in emergency situations.

Accessories

Before you head off on your next escapade, get down to your Mitsubishi dealer and spend some time exploring our comprehensive list of Pajero accessories. Visit www.mitsubishi-motors.com.au for the complete listing.

Mitsubishi Genuine Accessories go through an extensive program of design, development and stringent testing to ensure they meet all applicable government standards as well as Mitsubishi's own rigorous engineering specifications and performance targets. Using Mitsubishi's Genuine Accessories will ensure you get the best quality accessories that are as durable and reliable as the Pajero you drive.
