## BLACK / MAGIC

Black and red are the colours of mystery and seduction, so it's fitting that the WRX has adopted them as its signature. The use of solid black from roof to floor adds to cabin ambiance. Fitted with the latest technology, including an advanced Multi-Function Display, and high-tech connectivity, the WRX is all about eliminating distractions and getting back to the thrill of driving. Meanwhile steering wheel-mounted controls provide the driver with instant tactile input.

Contrasting red is used throughout in the gauges and on the stitching of the new sports seats. The WRX interior is also an inspiring everyday drive, roomier and more luxurious than ever before with more leg, elbow and shoulder room. New 60/40-split folding rear seats, along with a larger boot opening have expanded the cargo space for greater versatility. Other intelligent innovations include daytime running lights and new hawk-eye-shaped LED headlights, that throw long clear light for superior night vision.

# THINK OUTSIDE THE BOXER

## SOLID. BRAVE. PROVEN.

Subaru's Boxer engine design lies at the heart of the Subaru WRX. However the innovation doesn't stop there. Every inch of the Subaru WRX is a tribute to the boldness of Subaru's visionary designers.

GET THE FACTS ABOUT THE BOXER AT [SUBARU.COM.AU](http://SUBARU.COM.AU)

→ ALL NEW 2.0-LITRE DIRECT INJECTION TURBOCHARGED HORIZONTALLY-OPOSED BOXER PETROL ENGINE WITH ACTIVE VALVE CONTROL SYSTEM (AVCS)

→ HIGHLY ADVANCED SAWD WITH CUTTING EDGE ACTIVE TORQUE VECTORING SYSTEM

→ ADVANCED VEHICLE DYNAMICS CONTROL (VDC) SYSTEM

Consistent across the Subaru WRX range is the famous turbocharged Boxer engine that has been designed to sit lower and flatter in the engine bay than other engines. Due to this unique design it delivers less noise and vibration to the cabin, while the lowered centre of gravity improves stability, cornering and traction with the road. Coupled with the Subaru WRX's symmetrical drivetrain, this configuration delivers superior handling confidence, better balance, smoothness and ultimately, outstanding driver enjoyment. The intelligent drive systems incorporated into the new Subaru WRX include the Active Torque Vectoring system which supplements the SAWD system, making handling more precise and allowing for improved cornering speeds. In addition, multi-mode VDC has been added to make the WRX a true high-performance vehicle.

The all-new 2.0-litre Direct Injection Turbocharged horizontally-opposed Boxer engine has been finely tuned to deliver optimum power, torque, exhaust emissions, fuel economy and idling stability via Subaru's Dual Active Valve Control System (DAVCS). This helps the Subaru WRX produce an astonishing 197kW of power at 5,600rpm and maximum torque of 350Nm at 2,400rpm-5,200rpm, the optimum band providing thrilling sports performance and driveability. The Subaru WRX is a pure performance pedigree that delivers power and control in equal measures. It demands and delivers the best with the choice of a six-speed manual transmission or Sports Lineartronic™ Continuously Variable Transmission (CVT).

# LOVES A BIT OF 4 PLAY

## SCIENTIFICALLY CONCEIVED

Rigorously tested for the last 40 years. Subaru's iconic Symmetrical All-Wheel Drive system is the pinnacle of superior Japanese technology. Technology that sets you free.

## CONFIDENCE UNDER ALL CONDITIONS

The sign of a true performer is good balance. And when it comes to driving a Subaru, superior balance equals superior vehicle control. That's why Subaru has built its reputation on its Symmetrical All-Wheel Drive (SAWD) system that delivers an innate sense of balance from the ground up.

SAWD provides engine power to all four wheels simultaneously. Having power distributed across all four wheels, rather than two, gives you twice the grip capacity. So under acceleration there's more grip for cornering and more capacity to keep on track through the corners. Ultimately, having the driving force spread across all four wheels means greater control and confidence under all conditions.

The traction and control delivered by SAWD is further enhanced by the Subaru WRX's suspension. The wide track rigid front suspension produces more responsive steering and cornering, while the independent double wishbone rear suspension lets you enjoy sharper handling and grip, instinctive responsiveness, better balance and a better feel on the road.

For you, the driver, it all adds up to an agile and responsive vehicle with optimum balance, control and confidence in a variety of driving conditions.

OVERSEAS TESTING SHOWN

# SAFETY WE'RE PROUD TO RALLY BEHIND

On the rally track conditions can change in an instant. Driver reflexes are coiled tight, their attention is unwavering. Confidence in their car is paramount. While Subaru rally cars proudly carried the scars of uncompromising terrain, the lessons we've learned from their adventures are designed to help keep you unscathed.

## CRUNCH TIME

Because you never know what's around the corner, Subaru have made safety an integral part of every vehicle. By incorporating the very latest safety technology, every vehicle in the Subaru range proudly carries the maximum five-star ANCAP\* crashworthiness rating for occupant safety. The ring-shaped passenger cell is made from high-tensile strength steel, which directs impact energy around the passenger compartment, not through it.

Thanks to Subaru's electronic driver assist system, called Vehicle Dynamics Control (VDC), a range of stability and braking technologies step in to maintain safety in extreme situations. By automatically acting on information transmitted from a sophisticated array of sensors, the factors influencing the Subaru WRX's stability are constantly monitored to help the driver stay in control.

Subaru Vehicle Dynamics Control incorporates:

- > Electronic Stability Control (ESC)
- > Active Torque Vectoring System
- > Traction Control System (TCS)
- > TCS Limited Slip Device (LSD)

- > Anti-lock Braking System (ABS)
- > Brake Override System (BOS)
- > Electronic Brakeforce Distribution (EBD)
- > Hydraulic Brake Assist (HBA)

Active safety features on the Subaru WRX are complemented by an optimum blend of passive safety, designed to enhance driver and passenger protection:

- > The Boxer engine sits low in the engine bay to help protect occupants by sliding below the cabin - not into it - in the event of a severe frontal collision.
- > Ring-shaped passenger safety cell combines rigid reinforced sections with crumple zones designed to absorb impact energy and reduce injury.
- > Seven SRS airbags - dual front, dual front side and curtain airbags and driver knee airbag.
- > Front seatbelts feature pretensioners and load limiters.
- > Automatic Emergency Locking Retractors on all rear seatbelts.
