# Honda Sensing<sup>+</sup>

Enjoy more peace of mind wherever you go.

## Forward Collision Warning (FCW)

Alerts you when it detects the possibility of your vehicle colliding with the vehicle in front of yours.

## Collision Mitigation Braking System (CMBS)

CMBS is designed to alert you when a potential front collision is determined, as well as to reduce your vehicle speed to help minimise collision severity when a collision is deemed unavoidable.

## Lane Departure Warning (LDW)

When the vehicle enters the warning area, the LDW alerts you with slight steering wheel vibration as well as a warning display.

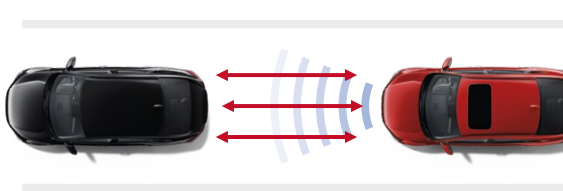

## Road Departure Mitigation System (RDM)

Alerts and helps to assist you when the system detects a possibility of your vehicle unintentionally crossing over detected lane markings.

## Lane Keeping Assist System (LKAS)

Provides steering input to help keep the vehicle in the middle of a detected lane and provides audible and visual alerts if the vehicle is detected drifting out of its lane.

## Adaptive Cruise Control (ACC)

Helps maintain a constant vehicle speed and a set following interval behind a vehicle detected ahead of yours.

<sup>+</sup>Honda SENSING technologies are driver-assist technologies and should not be used in place of safe driving practices. Drivers should continue to monitor the road at all times. The accuracy and operation of Honda Sensing technologies may vary based on weather, speed, traffic, road conditions, markings and other factors. Images used for illustration purposes only.

# Safe in every sense.

Intuitive safety tech is embedded everywhere. Because when it comes to staying safe, it's best to keep the surprises to a minimum.

## Blind Spot Information System

If there's an object in your blind spot when you go to change lanes, Odyssey will let you know.

## Multi-Angle Reversing Camera

Shift into reverse and the rear camera comes to life – with three views and dynamic guidelines to get you into or out of tight spots.

## ISOFIX

The internationally recognised standard for attaching child safety seats. Quick and easy to secure and protect your most precious cargo.

## Tyre Deflation Warning System (DWS)

If your tyres are running low on air, a little light will automatically alert you so you can pull over safely.

## Rear Cross Traffic Alert (RCTA)

If you're backing out of a tight spot, an alert lets you know if something is coming your way.

## Reservation Lock

A handy feature that lets you pre-lock the car before the doors are fully shut, so you don't have to fumble for the fob when your hands are full.
