

1 More passenger room up front.

By moving the dashboard 5 inches forward, we've gained more passenger room up front. We've given your controls international symbols.

There's a new, wide-faced speedometer. Glare has been reduced on all instruments.

The dash is safety padded, so is the steering wheel. Steering column is energy absorbing.

Kingswood's clear, easy to read dash.

2 Bumpers that beat the bingles.

Expensive repairs from those little bingles that push bumpers onto body panels are cut down.

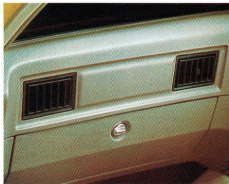

On new Holden the bumpers are spaced well away from the bodywork. Their brackets are designed to help absorb damage. And we've put strong vinyl protective mouldings along the car's sides to protect you from other people's carelessness.

3 Improved flow-thru ventilation.

Kingswood's improved flow-thru ventilation has been designed for Australian conditions. Fresh air is directed by fingertip louvres on the dash.

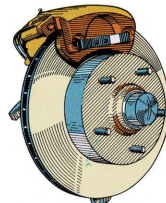

As an option, there's power assisted ventilation that works even when you're stationary.

4 Power disc brakes. Standard.

The big '3300' engine in your new Kingswood wants to go until you say stop.

Put your foot down on the power assisted front disc brakes—and you rein in those 135 horses. Discs are ventilated to reduce brake fade.

10 great reasons for choosing new Holden Kingswood.

HOLDEN KINGSWOOD

with a touch of class.

5 A full-foam bench that's 3 seats in 1.

Holden's new, long distance front bench seat puts comfort ahead of everything. Yet it offers you a driving position and support you wouldn't expect in a bench seat.

Made from a specially developed resilient foam, it contains thousands of tiny air cells that give gently to your shape. Holds you and two front passengers in comfort.

Or you can choose full-foam buckets.

6 You get a bigger engine.

Put your best foot forward with Holden's powerful, smooth '3300' 6-cylinder engine.

It's standard, rated at 135 bhp giving the power you need, even for towing long distances.

Built rugged, dependable for all Australian road conditions and weather.

And now there's an important feature in every Holden engine—a main bearing rope seal that makes oil leaks less likely.

7 Jetsmooth 4 coil suspension, upgraded.

We've improved Holden's 4 coil jetsmooth suspension. Spring rates and shock absorber valving have been refined for a smoother, more comfortable ride.

8 A go-further 16 gallon tank.

New Holden Kingswood is designed to take you anywhere in this big country.

It has a new 16-gallon fuel tank that's designed for easier, faster filling.

9 Holden's safety package.

Looking for a safer car? With Holden you get an underlung, 16 gallon fuel tank with external fuel lines. In the event of an accident, this reduces the possibility of petrol entering the passenger compartment.

A steel cargo barrier stops your luggage entering the passenger compartment in a collision.

Toughened windshield with modified zone in front of driver. Safety glass windows all round.

Wrap around turn signal and parking lamps. Lane changer. Shatter-proof internal mirror with a spring loaded, knockout mounting.

Big, glare reduced external mirror. Seat belts for everybody. Energy-absorbing steering column. 4-jet electric windshield washers. 2-speed windshield wipers, glare reduced. Articulated right hand wiper arm—so you can see more.

Brake failure and parking warning lamp. And more . . .

10 Holden makes sense for Australia.

Kingswood is designed to come together better. Parts are given intensive additional examination.

Constant inspection on the assembly line helps ensure reliability. You get the biggest dealer and service network.

Holden's Service Efficiency Award keeps your dealer keen.

There's an honest 12 month or 20,000 km warranty you can depend upon.
