

## 1 Powered ventilation that works wonders.

Even when you're stationary, Premier Wagon's powered ventilation system pulls in fresh air. It is a standard feature on this wagon.

As you move, the flow-thru ram jet ventilation system which is also fitted gives you more fresh air. The Kingswood Wagon has the flow-thru system, standard. Or you can choose powered ventilation.

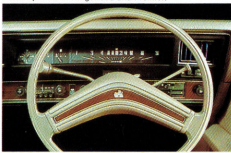

## 2 A dashboard with more dash.

The instrument panel has a fresh look. The controls have international symbols on them.

There's a new, wide faced speedometer. Glare has been reduced on all instruments.

We've set the dash back on the passenger side, giving five inches more room. And Premier Wagon has an electric clock—standard.

Radio optional in Kingswood and Premier.

## 3 Full-foam seats in both wagons.

The Premier Wagon comes fully equipped with Holden's new, long distance seats. These are full-foam, and fully reclining.

Orthopaedically designed, they're built for comfort—and a great driving position.

Made with specially developed foam. As you sit, thousands of tiny air cells give gently to your shape, support you properly in the right places, keep your body relaxed yet held securely.

This design reduces fatigue on the longest journey.

The Kingswood Wagon has a full-foam bench seat that seats three in comfort. It offers a driving position hard to match in bench seats.

Or you can order bucket seats at extra cost.

## 4 Tailgate electric window.

Premier Wagon has a convenient electric rear window as a standard feature. You can operate it either from the dash or at the rear of the car with its locking key.

The Kingswood Wagon has a manually operated rear window or you can order the electric version at extra cost.

## 5 Bumpers that beat the bingles.

Both Premier and Kingswood Wagons have bumpers designed to beat those little bingles.

At front and rear, the bumpers are spaced away from the bodywork. So in a minor collision, the bumper and its brackets absorb the damage. Repair expenses are cut down.

Both Wagons also have strong protective vinyl mouldings along the sides.

# 10 great reasons for choosing new Holden Wagon.

## HOLDEN WAGON

with a touch of class.

Holden Premier Wagon with its standard bumper impact strips and optional white-line tyres.

## 6 The get up and go Holden '3300' engine.

Premier and Kingswood Wagons come with the '3300' Holden engine standard. And power disc brakes.

The Premier Wagon has Tri-matic automatic transmission, standard. Kingswood has a 3-speed column shift.

Available as an option is a 4.2 litre V8. This has a 3-speed manual shift or you can choose a 4-speed manual or Tri-matic.

There's also a 5 litre V8. This has a high performance 4-speed manual or you can order Turbo-Hydrumatic transmission.

## 7 Jetsmooth 4 coils, now upgraded.

Both Premier and Kingswood Wagons have Holden's 4-coil ride.

Now we've improved the ride still further. Spring rates and shock absorber valving have been refined.

The front chassis is insulated from the passenger compartment by rubber bushes. These insulate you from engine and road sound.

## 8 It's a pushover to convert.

Whether you want to load up or sleep in your Holden Wagon, you'll find its rear seat gets out of the way fast.

To get a huge, flat floor measuring 2045 mm (6'8½") by 1564 mm (almost 5'), with 1220 mm (4') between wheel arches, is a pushover. Because that's all you do.

Push the back seat forward and let it click into place behind the front seats. That 4 feet between wheel arches means you can stow a 4 foot chest or wall board between them.

## 9 Holden's safety package.

If you're looking for a safer wagon—choose Holden. The underslung, 16-gallon tank has external fuel lines. In accidents, this reduces the chance of petrol entering the passenger compartment.

Toughened windshield with modified zone in front of driver. Safety glass windows all round.

Wrap around turn signal and parking lamps. Lane changer. Shatter-proof internal mirror with a spring loaded, knockout mounting.

Big, glare reduced external mirror. Seat belts for everybody. Energy-absorbing steering column. 4-jet electric windshield washers. 2-speed windshield wipers, glare reduced. Articulated right hand wiper arm—so you can see more.

Brake failure and parking warning lamp.

And much, much more . . .

## 10 Holden makes sense for Australia.

You know Holden's jealously guarded reputation for reliability.

Now, not only are the new Holden Wagons designed to come together better but the parts themselves give intensive additional examination. And when they're put together, constant inspection up and down the line helps make sure of Holden's reliability.

Holden is the biggest dealer and service network in the country.

Holden's Service Efficiency Award keeps your dealer keen to give every satisfaction. There's an honest 12 month or 20,000 km warranty you can depend upon.
