

**Open air  
at the touch of a button.**

Now you can enjoy all the delights of fresh air and sunshine at the touch of a button.

Holden is offering you the exclusive option of a push-button-controlled electric sunroof system to your new Calais or Berlina. That means you benefit not just from fresh air and sunshine, but also from the quality of fit and finish you only get with Holden approved equipment.

You also enjoy the reassurance of having a sunroof of a design that has been thoroughly and rigorously tested by Holden.

Holden's electric sunroof system integrates smoothly into the sleek roofline of your new Holden Calais or Holden Commodore Berlina to enhance its styling, whether open or closed.

The system features:

- high strength, solar-tinted, tempered glass,
- push-button, low noise motorized operation,
- a pop-up wind deflector,
- rear-edge-lift venting,
- a sliding internal sunshade which provides an effective barrier against heat and light, while giving added privacy.

Here at last is a world class sunroof system with an inbuilt glass moonroof for draught-free winter vision and noise-free touring with a view.

Functions include

- sunshade open as a moonroof,
- sunshade closed as a "conventional" roof,
- solar-glass tilted upward at the rear for improved ventilation,
- or open it up and you have a sunroof.

The choice is yours with the finest sunroof system available for your new Calais or Berlina. This sunroof will bring you a delightfully light and spacious interior.

Holden's world class, push-button electric sunroof system ... see your Holden dealer about having one fitted when you order your new car and open up a host of fresh new possibilities.
