

*The* NEW HOLDEN  
**UTE**

**THE NEW  
HOLDEN UTE  
HAS ARRIVED  
READY FOR  
WORK.**

The legendary Holden Ute now has a host of innovations inside and out. From subtle touches like the new four spoke steering wheel through to "firsts" for an Australian utility, including the option of driver and passenger airbags.

The Holden Ute has a new engine, the remarkable ECOTEC V6 with more power, yet better economy.

Improved brake pedal feel complements the load-sensing braking through four wheel power disc brakes.

Rear coil spring suspension gives the Holden Ute a smoother ride, even over rough roads. While Holden Ute already scores well with 14% greater volume carrying capacity than its nearest competitor.

Holden's world class security system makes this Ute exceptionally well protected against theft. And inside you'll find the cabin comforts and features of a modern sedan.

For those who want more, the

'S' Ute is loaded with practical features like a visual and audible warning system for Speed Alert, low fuel and handbrake on.

**WORKING MORE EFFICIENTLY  
IN EVERY AREA.**

Powering the Holden Ute is the brilliant new ECOTEC V6, 3.8 litre engine, or in the 'S' Ute there's the option of Holden's mighty 5 litre V8. This new V6 engine now delivers 147kW at 5,200rpm and 304 Nm at 3,600rpm. At the same time, ECOTEC V6 has even lower fuel consumption than before. Overall, more powerful, more fuel efficient, more responsive and quieter.

**HARD WORK  
NEVER FELT SO GOOD.**

Your working day is made easier with thoughtful features like the mobile phone power socket now fitted as standard and the FM stereo radio/cassette sound system with its PIN code for added security.

And whether you choose the practical bench/bucket seat option or bucket seats with high rise centre console and armrest, you'll sit comfortably in the new full cloth fabric.

For more information see your nearest Holden Dealer, or call 1800 035 464 for a free brochure.
