# SV BLACK

## »» LAST OF THE BLOODLINE

For the first time, HSV's legendary 6.2 litre LS3 V8 is available in a new GEN-F2 SV Black Limited Edition. Right out of the gate, these exclusive, individually numbered, high-performance machines make a powerful statement. It starts with unique and aggressive looks destined to turn heads.

## »» THOROUGHbred LOOKS

One glance and it's obvious these SV Black Limited Edition models come from the HSV GEN-F2 stable. But what puts them in a class of their own is their dark, menacing looks. Satin Black 20" alloy wheels, black AP Racing forged 4-piston brake calipers, Shadow-Chrome exhaust tips, along with a Satin Graphite Lo-line spoiler on the sedan, let you know these vehicles are born to perform. With Pitch Black fender vents and mirror scalps, unique black badging, black door surrounds and black lower door accents, the look is meaner, leaner and more muscular than ever before.

## »» TAKE THE REINS OF POWER

Open the driver's door and leather-clad sports bucket seats, a unique SV Black I.D. plate, and sill plates on the sedan, instantly signal you're about to take control of something special. Press the start button and the thunderous roar from the Bi-Modal quad exhaust confirms it. Head out on the road and the LS3 V8's 340kW of power will leave you in no doubt that these SV Black Limited Edition models have been bred to exhilarate. Turn the Driver Preference Dial clockwise and the performance gets even better. However, if you want one, you'll have to move at a gallop. Because these rare and powerful beasts will never be seen again.
