

Das Auto.

Volkswagen Tiguan

The Tiguan – it's good to know you can.

The new Tiguan was designed to suit your every need. It is compact yet comfortable, but still boasts magnificent performance on all terrain – combining impressive power with eco-friendly economy. It has all the benefits of a compact SUV with the sleek style of a sports car. The new Tiguan comes with three high-power, low fuel consumption engines: the innovative 2.0 litre TSI versions (125kW or 147kW) drive the petrol models, while the 103TDI diesel version is a 2.0 litre TDI engine with 103kW power and

an impressive 320Nm of torque. With so much choice, the Tiguan sets new standards in its class.

It's good to know you can enjoy the assurance of **precision laser welding** construction – increasing body rigidity for more precise handling dynamics and increased safety, ensuring tight panel gaps and a quiet interior. It is also supported by a **12-year anti-corrosion perforation warranty**.

Overseas specification vehicles are shown in this brochure.
Some features and options may not be available in Australia.

The distinctive, solid 'thunk' of the door closing reassures you of the build quality and Volkswagen's commitment to safety. It's good to know you can appreciate intelligent features such as headlights that automatically turn on in low light, or rain sensing windscreen wipers that intuitively activate during rainfall (both standard on the 147TSI).

The Tiguan is ideal for drivers who want the unique look and versatility of an SUV, but also demand premium levels of comfort, agility and flexibility. Designed from the chassis up for driving enjoyment and safety, the Tiguan has created a new benchmark.

The completely new and quiet TDI Common Rail engine with diesel particulate filter delivers power from just above idle speed. Parking problems become a thing of the past with the Tiguan's optional Park Assist feature which tackles the job with precision. You'll never get lost in the Tiguan with the latest optional RNS510 satellite navigation system guiding you with finesse. And with more than 1500 litres of cargo space, the Tiguan is unbeatable value in its class.

Design.

Combining style and substance, the new Tiguan is distinctively unique. The Tiguan truly is an all-rounder – agile and comfortable to drive, extremely practical and full of ground breaking technology. No other car has so many different qualities.

The Tiguan inspires the senses – its engaging design matches its impressive luxury. The Tiguan is clearly Volkswagen-designed, but it is instantly different from all the other models in the Volkswagen range. At the rear, the lights are integrated into the shoulder section, while the steep slope of the tailgate extends right down to the bumpers, giving the Tiguan an unmistakable SUV design.

Packed with class-leading safety features, the Tiguan is a pleasure to drive. The eye-catching headlights are not only elegant but practical, lighting up the bends in the road with its optional dynamic or static cornering lights featuring bi-xenon technology. You can even create an open-top cabriolet feel with the optional panoramic sunroof. Open it up to let a liberating view of the outside world flood in.

6

The Tiguan range.

Each model is manufactured to the highest standards with the focus on comprehensive safety features, top quality, elegant styling and impressive performance from one of Volkswagen's class-leading petrol or turbo diesel engines. Engine power is delivered by either the sporty manual or

the latest automatic six-speed transmissions. Equipped with Volkswagen's 4MOTION all-wheel drive, the Tiguan exudes adrenalin-fuelled adventure.

The **Tiguan 125TSI** is an exciting combination of sports-inspired performance with refined and responsive handling. The **Tiguan 103TDI**'s Common Rail injection brings extreme strength and fuel economy while still being whisper-quiet. It features 103kW of power, with an

enormous 320Nm of torque, plus a diesel particulate filter. At the top of the range, the outstanding **Tiguan 147TSI** with a 147kW petrol engine is immensely powerful thanks to its TSI technology creating 280Nm of torque for performance without compromise.

- 01** The Tiguan provides an array of versatile storage options.
- 02** Practical features are part of the Tiguan's design philosophy.
- 03** Sliding and split folding rear seats provide optimum flexibility.

Leather upholstery is an optional extra.

Flexible Interior.

If the outside of the new Tiguan is inspiring, the inside is amazing. Its compact size disguises an exceptionally spacious interior. Using only high quality materials in its sporty design, the new Tiguan's spacious cabin is supremely elegant. Its sense of style and ergonomic design create ultimate comfort and refinement, with everything intuitively in just the right place. The seats are upholstered in a stylish hard-wearing fabric to survive harsh day-to-day wear while still looking great.

The Tiguan's clever design has created maximum storage space. Hidden compartments in the roof console and doors, as well as beneath the front seats in the 147TSI, complement the spacious luggage compartment. The rear seats split-fold in a 60:40 ratio, and individually slide and recline, letting you increase rear legroom or just create the storage space you need. The front passenger seat backrest also folds down to give you plenty of room for transporting bulky items (standard on the 147TSI).

Flexible Interior.

Comfort and convenience surround you in the Tiguan, with an eight-speaker, MP3-compatible radio/CD player, complete with AUX-in socket for external multimedia sources. Fold down the load-through flap in the rear and two cup holders match the two in the front. Whether you're looking to transport friends, kids, luggage or almost

anything else, you'll find the Tiguan rewards you with all the freedom you need.

Passengers travel in exceptional comfort, both in the front and rear. Like cinema seating, the rear seats are slightly higher for a better view outside to make the journey fly by.

The Tiguan also boasts practical features like a multi-function leather steering wheel, a Multi-Function Display 'Plus' and a height-adjustable front centre armrest with storage box.

- 01** The already generous boot space expands to a massive volume of 1510 litres when the seats are folded.
- 02** The Tiguan impresses with a Multi-Function leather steering wheel and a Multi-Function Display 'Plus.'
- 03** The Tiguan's rear seats are positioned to provide passengers with an optimal view. (leather upholstery optional).

Safety.

The Tiguan has an extremely rigid frame for maximum protection inside the passenger safety cell, yet its body panels constructed from high tensile steel, are designed to crumple in the event of an accident, absorbing the energy of the impact.

4MOTION all-wheel drive.

All-wheel drive is vital for maximum traction and the Tiguan's intelligent all-wheel drive adds to its active safety features. The latest generation of 4MOTION all-wheel drive is standard and available with manual or automatic six-speed transmissions.

The new active safety system standard on every Tiguan includes **ABS with Brake Assist and Electronic Stabilisation Program (ESP)**. The ESP detects potential accidents and brakes individual wheels while reducing engine power to help keep the vehicle under control.

In emergencies, the **Anti-Lock Braking System (ABS)** and **Brake Assist** work with the ESP to automatically increase the braking effort. **Three-point seatbelts** on all seats are teamed with belt force limiters on the front seats to reduce chest impact, and three child seat anchor points are fitted in the rear. Safety optimised head restraints are available on the front seats. Six airbags (twin front, side and curtain) are also standard features.

In an accident, depending on the severity of the impact, the Tiguan's safety features work together to protect occupants by deploying the belt tensioners and airbags. The system also activates the hazard warning lights, the doors are unlocked, interior lights are switched on and the fuel pump is deactivated. Pedestrian safety is also improved with a deformable bonnet and foam sections behind the front bumpers to minimise leg injuries.

Electro-mechanical parking brake and Auto Hold function.

You can climb any mountain with the standard equipped electro-mechanical parking brake and Auto Hold. As soon as the Tiguan comes to a complete stop, the ABS hydraulic unit retains its final braking pressure. So even when you take your foot off the brake pedal, the brakes remain applied to all four wheels, providing increased comfort in stationary traffic. When you drive off again, a touch on the accelerator automatically releases this function, and your journey continues.

- 01 4MOTION all-wheel drive is standard and available with manual or automatic six speed transmissions.
- 02 ABS with Brake Assist identifies an emergency stop and boosts braking pressure to maximum, reducing the stopping distance.
- 03 With just a push of a button, Auto Hold automatically activates the electronic parking brake, holding the Tiguan in a stationary position.
- 04 The Tiguan's advanced key features are accessible at the touch of a button.

The Tiguan owes its high safety rating[#] to its rigid body structure which creates a solid passenger cell, surrounded by energy-absorbing crumple zones and a protection system. The Tiguan's lightweight construction is reinforced with hardened, high strength steel to give occupants maximum protection in an accident.

#Award source: 2007 Volkswagen Tiguan awarded "5 stars" by independent European motor vehicle safety assessment organisation Euro NCAP (European new Car Assessment Programme) during Euro NCAP Spring testing, September 2007.

125TSI.

The powerful 125TSI delivers exhilarating performance from its 2.0 litre direct injection, turbocharged petrol engine. With 125kW of power and 280Nm of torque via the 4MOTION all-wheel drive, and either 6-speed manual or Tiptronic automatic transmissions, it's a driving delight. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front,

side and curtain airbags. Driver comfort hasn't been overlooked with cruise control, semi-automatic air-conditioning, and a Multi-Function Display 'Plus'-all standard on every model. Enjoy the convenience of the sliding and split-folding rear seat, height-adjustable front seats and 12V accessory sockets in the centre console.

TSI Technology. A miracle of performance.

TSI is Volkswagen's twin or single-charged petrol engines with direct injection. TSI combines FSI direct injection petrol technology with turbocharging. This innovative engineering has created high tech engines boasting excellent torque and power output at low revolutions, combined with lower fuel consumption and emissions.

The Tiguan TSI engine is an innovative 2.0 litre unit that saves petrol while delivering impressive power and performance thanks to the turbocharger and direct petrol injection. From the driver's seat, all you feel is one continuous, exhilarating surge as it produces high torque at low revs and an abundance of power. You can continue driving all day because, if there's one thing the TSI engine hates, it's petrol stations. It's as economical as many engines with half as much power.

RCD310 entertainment system.

The new RCD310 in-car entertainment system features a large display, a single disc CD player with mp3/wma compatibility, as well as an AUX-IN interface for connecting a mobile audio player. This is standard for 125TSI and 103TDI.

01 The RCD310 premium CD sound system is mp3/wma compatible.

103TDI.

The 103TDI offers astonishing power from its 2.0 litre Common Rail turbo diesel engine with diesel particulate filter. With 103kW of power and 320Nm of torque, 4MOTION all-wheel drive and 6-speed manual or 6-speed Tiptronic automatic transmissions, it combines

fuel economy with sheer strength. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags. The 103TDI makes life comfortable with its electronic parking brake with AutoHold function, multi-function

leather steering wheel, remote central locking, MP3-compatible radio/CD player and 12V accessory sockets in the centre console. These are also standard on the 125TSI. Extra storage is available in roof compartments and the height-adjustable front centre armrest.

- 01** Turn indicators are integrated into the door mirrors as an added safety feature. The side mirrors are electrically heated and adjustable.
- 02** Cruise control is standard for the entire Tiguan range.
- 03** Semi-automatic air conditioning is standard on the 125TSI and 103TDI.
- 04** The stylish 16" San Francisco alloy wheels are standard on the 125TSI and 103TDI.

147TSI.

The prestigious 147TSI boasts sports car-like performance from its 2.0 litre direct injection, turbocharged petrol engine. With 147kW of power and 280Nm of torque delivered through the 4MOTION all-wheel drive and a 6-speed Tiptronic automatic transmission, it can take you anywhere. Safety features include ABS with Brake Assist,

Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

The 147TSI is appointed with class-leading technology including rear parking distance sensors, dual zone climate control air conditioning with air quality sensor, automatic

headlights with 'coming home' function and rain-sensing windscreen wipers. It's perfectly finished with sports seats in premium cloth and Alcantara trim, a foldable front passenger seat and storage drawers under the front seats. It is the ultimate Tiguan. The new **RCD510 in-car entertainment system** features a high-resolution large colour TFT display with touch screen operation, a six disc CD changer with mp3/wma functions, AUX-IN interface for connecting a mobile audio player, as well as SD/MMC memory card slots.

Optical parking system.

The Optical Parking System (available in conjunction with factory fitted parking sensors) displays a silhouette of the Tiguan on the radio or navigation system screen during parking. This shows the Tiguan's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown in colour. This feature is optional for 103TDI and 125TSI.

- 01 The 147TSI offers dual zone climate control air conditioning with air quality sensor for maximum comfort.
- 02 The Optical Parking System shows the Tiguan's position and distance from obstacles.
- 03 The new RCD510 system, with a high-resolution touch screen colour display and a six disc CD changer.
- 04 The 147TSI features front fog lights, adding a sporty element and an additional safety feature.
- 05 The stylish 17" Boston alloy wheels are standard on the 147TSI.

20

- 01** Bi-xenon headlights with dynamic and static cornering lights are optional for the Tiguan range.
- 02** The Tiguan offers an optional leather upholstery package with heated front sports seats and electric adjustment for the driver.
- 03** The optional panoramic electric glass sunroof with sunblind creates an open-top cabriolet feel.
- 04** The optional DYNAUDIO premium audio system delivers superb sound quality.
- 05** The Rear View Camera Plus provides a clear view of what's behind and also displays on screen parking guidance lines.
- 06** Attractively styled 18" New York alloy wheels are available to add a more powerful stance to your Tiguan.

Optional equipment.

RNS510 Satellite Navigation System with Rear View Camera Plus.

Stay on track with the RNS510 Satellite Navigation System. A user-friendly touch sensitive screen with a high resolution display shows 3D maps, pictures and video. The new system calculates your travel route with incredible speed. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an MP3 compatible aux-in multimedia socket or SD memory card slot.

Even the trickiest parking spot becomes a breeze with the Rear View Camera Plus feature, giving the driver clear sight of what's behind the vehicle. Onscreen guidance lines simplify entry into difficult parking spaces.

Optional equipment (continued).

Park Assist.

The new Tiguan makes life simple for you. The Park Assist feature acts like an extra set of eyes and an expert pair of hands, with parking distance sensors front and rear. Thanks to this technology, reverse parking has never been so easy.

When driving past a parking space at up to 30 km/h, ultrasonic sensors compare the available space with the length of the Tiguan. If there's enough room to park, Park Assist automatically takes charge when you put it into reverse. Accelerator, clutch and brake are all you need to control as the Tiguan is then expertly parked.

Off-road Technology.

With the push of a button the Tiguan can adapt for all terrain types. Off-road technology such as Hill Descent Assistance, a compass and low tyre pressure indicators let you go almost anywhere.

- 01** Park Assist is activated via a button conveniently located on the centre console.
- 02** If there's enough room to park, Park Assist automatically takes charge when reverse gear is selected.
- 03** The advanced instrument panel provides visual feedback when Park Assist is activated.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Tiguan in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Tiguan, visit your local Volkswagen Dealer.

Owning a Volkswagen

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year/100,000km (whichever occurs first) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen Extended Warranty

Why not continue the confidence of a Volkswagen Warranty by purchasing Volkswagen Confidence Plus – an Insurance Policy designed to provide cover for the repair or replacement of a failed mechanical or electrical part, after the expiration of the Volkswagen standard new vehicle warranty. Volkswagen Confidence Plus is available for an additional period of 12 or 24 months unlimited kms. In addition, Volkswagen Confidence Plus includes the continuation of your Volkswagen Assist, our 24-hour roadside assistance program. You can purchase Volkswagen Confidence Plus at any time within your Volkswagen standard new vehicle warranty (3-year/100,000km). For more information contact your participating local dealer or visit volkswagen.com.au

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 2-year warranty on Genuine Parts from the date of purchase.

Volkswagen Finance

Buying, Borrowing or Leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers, across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are personalised to suit your individual requirements. You design your plan so that it meets your budgeting needs and can rest assured that there will be no surprises along the way. Speak to your local participating Volkswagen Dealer today to put together a financial solution that best suits your lifestyle.

Glossary

4MOTION

An all-wheel-drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Auto Hold function

As soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicles final braking pressure. So even when you take your foot off the brake pedal, all four wheels brakes remain applied, providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS, EDL and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with predetermined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Engine Braking Control (EBC)

Prevents the driven wheels from locking if the accelerator is lifted very suddenly or the vehicle is braked sharply because a low gear is engaged.

Glossary (continued)

Park Assist*

Park Assist actively helps the driver when reversing into parallel parking spaces. The system works by using sensors mounted either side of the front bumper together with parking distance sensors front and rear.

To parallel park the driver needs to press the Park Assist button and use the appropriate indicator before the car passes the potential parking space. Sensors in the front bumper then scan the size of the parking space as the car is driven slowly past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and let's go of the steering wheel.

Park Assist will alert the driver of the intended reverse path in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course. The driver can however take over the control of the steering at any time and end the automatic parking procedure. The system can reverse into parking spaces on both the left hand and right hand side of the road, for example on one way streets.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

Off-road Technology*

With one switch, off-road technology mode activates an integrated group of assistance systems that substantially enhance control in an all-terrain environment. Off-road technology includes **Hill Descent Assistance** which ensures by means of controlled brake applications that the vehicle does not go out of control when descending a steep hill. Hill Descent Assistance will only operate when speeds are lower than 20km/h, the gradient is greater than 20%, the engine is running and the accelerator and brake pedals are not pressed.

*Optional equipment

Volkswagen is distributed by Volkswagen Group Australia Pty Ltd, The Lakes Business Park, 6 Lord Street, Botany, NSW 2019. ABN 14 093 117 876. Specifications are as planned at June 2008, for Model Year 2009 and are subject to change without notice or obligation. Cars and accessories shown may not depict Australian specifications. Fuel consumption figures according to Australian Design Rules (ADR) 81/01. All Volkswagen approved parts and accessories are warranted for 2 years/unlimited kilometres. All information in this brochure is correct at the time of publication, however variations may occur from time to time and Volkswagen, in so far as it is permitted by law to do so, shall not be liable in any way as a result of any reliance by any person on anything contained in this brochure. The colours shown in this brochure are indicative only and may vary from actual items owing to the printing process. Authorised Volkswagen dealers will provide up-to-date information on model application, design feature, prices and availability on request.

Volkswagen Insurance & Volkswagen Extended Warranty are provided by Allianz Australia Insurance Limited (Allianz), AFS Licence No. 234708, ABN 15 000 122 580. In arranging this insurance Volkswagen Financial Services Australia Limited, ABN 20 097 071 460 & Volkswagen Group Australia Pty Ltd, ABN 14 093 117 896 and the authorised dealers act as agents of Allianz and not as your agent. Volkswagen Finance is a trading name of Volkswagen Financial Services Australia Limited. Locked Bag 5009, Alexandria NSW 2015. Tel: 02 9695 6311.
