

Das Auto.

Scirocco R

The car of your dreams.

Volkswagen's legendary Scirocco R has arrived. Its style is unmistakable, its performance undeniable, its appeal unshakeable. It's not your average car but then again, it's not for your average driver.

The Scirocco R has been created specifically for those who value performance, individuality and precision engineering. Powered by a turbocharged 2.0 litre TSI engine mated to a six-speed manual or optional DSG transmission, 188kW and 330Nm have rarely felt this immediate.

Immediate, but not raw. Volkswagen has brought all its technical expertise to bear on the Scirocco R, so drivers will enjoy the benefits of its finely-tuned suspension, adaptive chassis control system, extended electronic differential lock (XDL) and more.

And you'll be pleased to know that it's not short of creature comforts. From the stylish interior design to the Media Device Interface (MDI) and Multi-Function Display (MFD Plus), from the aluminium pedals to the leather-wrapped steering wheel, and from the gloss black highlights to the sports seats, you'll be kept comfortable and well-tended as you work the curves and straights.

But the Scirocco R doesn't just pamper you with comfort and thrill you with performance. It also pleases you with its lines. Its bodywork is pure Volkswagen – with a twist.

Exterior.

Looks to match its performance.

Dynamic and sporty. Just one look at the Scirocco R tells you all you need to know. This is a car whose streamlined bodywork, pronounced hip-line and low profile has been purposefully designed to enhance its performance and to send a message to onlookers – beware! It’s also a car that abounds with carefully thought-out details and refinements, the result of Volkswagen’s accumulated engineering and design knowledge.

No matter which way you look at it, the Scirocco R will please the eye. Its stance is sporty and its lines uncompromising. It’s the perfect body to contain the high-performance beast that lurks within.

01. Radiator Grille

The Scirocco R’s grille features our ‘R’ badge and a unique gloss black finish, and also directs a steady flow of air to the radiator.

02. Talladega Alloy Wheels

The Scirocco R is equipped with Talladega 19x8-inch alloy wheels, wrapped in low profile 235/35 R19 tyres. Like everything else on this car, their looks are every bit as good as their performance.

03. Bi-Xenon headlights

Bi-Xenon headlights offer superior clarity and provide the illumination you need, right where you need it.

04. Rear spoiler with integrated brake light

The Scirocco R features a large rear spoiler with integrated third brake light for a sporty style.

Interior.

Comfort and style.

When you're driving the Scirocco R, the interior is your cockpit, and our designers have worked hand-in-hand with our engineers to ensure that every control falls logically to hand, every amenity is available, and every view is pleasing to the eye.

Whether you're admiring the interior's trim or its ergonomics, you'll find the Scirocco R embraces you firmly and puts you in complete control of your driving environment. From comfort touches to functional controls, everything is where it should be, allowing you to concentrate on what interests you the most – driving.

01. Upholstery

The Scirocco R's sport seats combine adjustability and excellent ergonomic design with our stylish and durable 'Kyalami' cloth and 'San Remo' microfibre. They'll help keep you warm in winter, cool in summer, and comfortable on every drive.

02. Steering wheel and instrument pod

The Scirocco R's leather-bound, steering wheel looks a treat and it's functional too, with gearshift paddles for DSG-equipped models. The instrument pod features blue needles, for easy visual recognition in all conditions.

03. Unique interior styling

Unique to the Scirocco R is its interior styling, with triangular door handles, a gloss black finish on the door handles and centre console, and aluminium front door sill inlays with the 'R' logo.

A close-up photograph of a blue car's body panel. The focus is on a chrome 'TR' badge, where the 'T' is a stylized block letter and the 'R' is a rounded, script-like letter. The badge is mounted on a dark, glossy surface. Several bright, diagonal light streaks, likely from motion blur or reflections, cut across the frame from the top right to the bottom left. The background is a solid, vibrant blue.

TR

Technology.

Designed for drivers.

From the engine package to the transmission and suspension, you'll find the Scirocco R's technologies make day-to-day driving safer, easier and overall much more pleasant. It's every inch the driver's car, but it's also civilized enough to allow drivers of all dispositions to enjoy their motoring.

01. TSI engine

Volkswagen's TSI technology features direct-injection and turbocharging for peak performance. Not only does the Scirocco R's engine deliver plenty of power, it also outputs plenty of torque and performs strongly at low revs.

02. Adaptive Chassis Control

Volkswagen's adaptive chassis control system actively monitors and adjusts the Scirocco R's handling. With three damper settings – normal, comfort and sport – easily selected with a centre console button, the optimum ride is always available.

03. Extended Electronic Differential Lock (XDL)

The Scirocco R's XDL reacts to load relief at the front inside wheel when cornering hard. It helps prevent traction loss or slippage, which means you can tackle corners with more confidence and more safety.

04. Direct Shift Gearbox (DSG) (not pictured)

The Scirocco R's DSG is an advanced 6-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional

flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

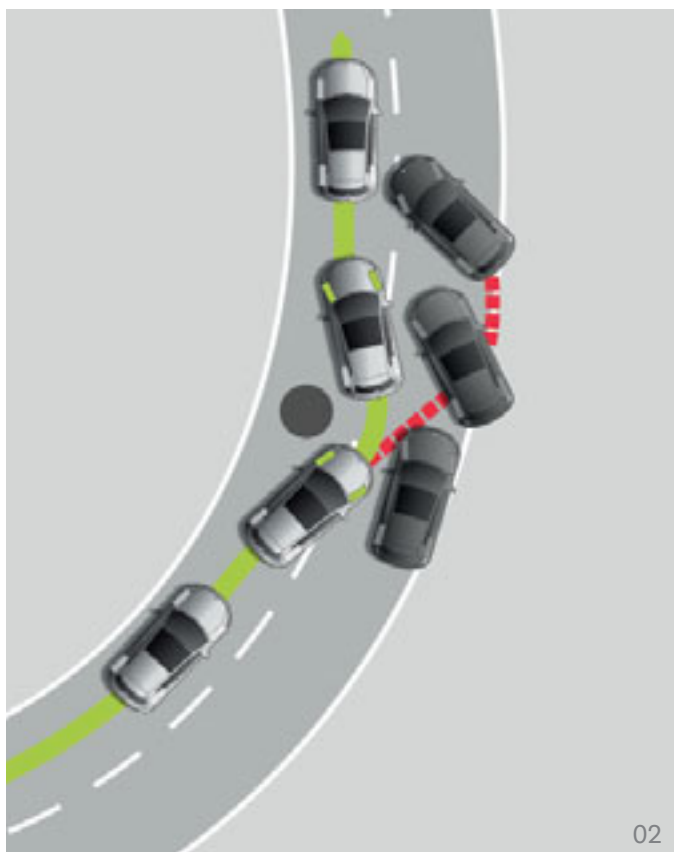

Safety.

Safety comes as standard, every time.

Nothing is more important to Volkswagen than the safety of its vehicles, or more properly, the safety of our vehicles' drivers and passengers. That's why the Scirocco R, like all our models, has two different types of safety measures built in: active and passive. This helps to prevent accidents and also provides the best protection we can offer if one occurs.

Active safety systems help to prevent accidents from occurring, while passive safety systems help to protect occupants from injury and reduce the impact of collisions. Working together, they help to reduce both the incidence and severity of accidents.

01. Airbags

The Scirocco R features six airbags (twin front, front side and full length curtain) as standard. Airbags combine with seatbelts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body, distributing the resulting loads over as large an area as possible.

02. Traction Control (EDL, ASR and ESP), Braking Control (Brake Assist, ABS and EBD)

Our traction control systems help you to maintain control of your vehicle even in difficult driving situations. Built around three

distinctive functions – Electronic Differential Lock (EDL), Anti Slip Regulation (ASR) and Electronic Stabilisation Program (ESP) – traction control plays a significant role in keeping you out of danger.

03. Safety Optimised Head Restraints

Working in unison with its seatbelts, the Scirocco R's front seat Safety Optimised Head Restraints are designed to reduce whiplash injury, ensuring optimal protection when you need it most.

04. Seatbelts (not pictured)

Every seat in the Scirocco R features three-point seatbelts, while front seats also have belt pre-tensioners (which tighten the belt on

impact) and belt force limiters (which reduce forces on passengers). These help position the body so as to minimise injuries in the event of a crash.

05. Hill Start Assist (not pictured)

Hill Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

Optional Equipment.

Make it yours.

What is a car? Certainly it's a way to get from point A to point B, but most of us realise a car is more than that. A car makes a statement about its owner's personality, and Scirocco R owners are rarely short of personality. Their car already makes them stand out from the crowd but we understand that some owners have particular likes and requirements. That's why we offer a number of equipment options that allow you to build the car of your dreams, to make it truly yours.

01. Panoramic tilting glass roof

The Scirocco R has been built for driving, but whether you're taking a leisurely cruise by the beach or a spirited drive on your favourite road, a touch of sun and fresh air can make a big difference. The optional panoramic electrically tilting glass roof lets you control just how much of the outside world you let into your car.

02. RNS510 satellite navigation system

The road may be long and winding, but that's no reason to get lost. The optional RNS510 satellite navigation system is user-friendly, with a high resolution colour display for maps – and videos. With a 30GB hard drive and DVD functionality, storing your

music and navigation data is a breeze. It also features an auxiliary input socket and an SD card slot, so you can listen to your tunes no matter what device they're stored on.

03. Dynaudio 300W premium audio system

What's your favourite driving song? We all have them, and with the Scirocco R's optional Dynaudio premium audio system, you'll hear every beat, note and lyric. With eight speakers and plenty of punch, accurate pitch and deep bass, it just might become the best audio system you own.

Glossary.

Adaptive Chassis Control

The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the driver can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the front wheel on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

Hill Start Assist (HSA)

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with both the manual transmission and the Direct Shift Gearbox (DSG).

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometers manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 36 month/60,000km extension on the original warranty period already existing with your Volkswagen manufacturer's Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.

* Volkswagen New Vehicle Extended Warranty product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty policy document, available to you from your Volkswagen authorised motor dealer.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre is able to undertake work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Accessories®

Volkswagen Genuine Accessories® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Accessories®. Volkswagen Authorised Dealers offer a 3-years/ unlimited kilometres warranty on genuine accessories if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit volkswagenfinance.com.au.

VOLKSWAGEN FINANCE

Environmental

Creating a sustainable future.

Volkswagen is committed to sustainability. For us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and our behaviour. We call this attitude 'Think Blue'.

Our goal is to become the world's leading manufacturer of economical, environmentally responsible vehicles, making efficient, sustainable transport available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.

Our approach is based on the principles of good design. We've taken what works – diesel engines, emissions management systems, automotive engineering principles – and used them to create a vehicle that's the ultimate expression of our Think Blue philosophy.
