Volkswagen Tiguan

18" New York alloy wheels, fog lights and bi-xenon headlights shown are optional extras.

The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our new low emission engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

18" New York alloy wheels, bi-xenon headlights and fog lights shown are optional extras.

Tiguan.

The Tiguan is ideal for drivers who want the unique look, versatility and all the benefits of a compact SUV, but also demand premium levels of comfort, agility and sleek style. It exudes a constant spirit of adventure with sports inspired performance and responsive handling. The Tiguan's intelligent 4MOTION® all-wheel drive provides maximum traction and added safety.

Bi-xenon headlights shown are an optional extra.

Design.

The Tiguan inspires the senses – its engaging design matches its impressive luxury. Combining style and substance, the Tiguan is distinctively unique. At the rear, the lights are integrated into the shoulder section, while the steep slope of the tailgate extends right down to the bumpers, giving the Tiguan an unmistakable SUV design.

The eye-catching headlights are not only elegant but practical, lighting up the bends in the road with optional bi-xenon technology, featuring dynamic and static cornering lights. You can even create an open-top feel with the optional panoramic sunroof. Open it up to let a liberating view of the outside world flood in.

Panoramic electric glass sunroof shown is an optional extra.

Technology.

Volkswagen's constant aspiration for excellence means that affordable innovative technology is at your fingertips in any model within our product range. With technical expertise and the power of innovation, Volkswagen brings moving ideas to the road.

TSI Technology. A Miracle Of Performance

TSI describes Volkswagen's twin or single-charged petrol engines with direct injection. This innovative engineering has created high tech engines boasting excellent torque and power output at low revolutions, combined with lower fuel consumption and emissions.

The Tiguan TSI engine is an innovative 2.0 litre unit that saves petrol while delivering impressive power and performance thanks to the turbocharger and direct petrol injection. A turbocharger compresses the air required for combustion. Compared with a naturally aspirated engine with the same displacement, a turbocharged engine can produce higher power and torque, as well as being highly efficient.

TDI Technology

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology – injecting precise amounts of fuel at exceedingly high pressure. The result is a cleaner burning engine with exceptional fuel economy, impressive torque and compelling performance.

7-Speed Direct Shift Gearbox (DSG)

7-speed DSG is an advanced 7-speed gearbox in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

RNS510 Satellite Navigation System ☐

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

Auto Hold Function

As soon as the Tiguan comes to a complete stop, the ABS hydraulic unit retains its final braking pressure. So even when you take your foot off the brake pedal, the brakes remain applied to all four wheels, providing increased comfort in stationary traffic. When you drive off again, a touch on the accelerator automatically releases this function, and your journey continues.

☐ Optional extras.

Park Assist □

Thanks to this innovative technology, reverse parking has never been so easy. When driving past a parking space at up to 30 km/h, ultrasonic sensors compare the available space with the length of the vehicle. Park Assist is able to manoeuvre the vehicle into spaces with as little as 1.1 metres in addition to the length of the vehicle, with several moves if necessary. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear.

The accelerator, clutch and brake are all you need to control as the Tiguan is expertly parked for you. Naturally, the driver is fully responsible for monitoring the speed of the vehicle and the distance between it and other vehicles, even when the Park Assist system is operating.

Adaptive Chassis Control □

Adaptive chassis control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics.

Adaptive chassis control uses wheel movement and body acceleration sensors to determine wheel positions, speeds and chassis motion, then adjusts the damping for individual wheels every millisecond. It analyses signals from the steering, engine, gearbox, brake system and driver assistance systems.

By selecting Normal, Sport or Comfort modes, the damper controls adapt from comfort-oriented to a firmer, sporty characteristic. Sport mode suppresses rolling and pitching and adjusts the electro-mechanical power steering to achieve sporty and dynamic handling. Comfort mode improves ride quality, especially when driving on poor road surfaces at slow speeds.

Media Device Interface (MDI) □

This sophisticated new interface facilitates connection to USB audio devices, data storage devices and Apple iPod®*. The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself. The MDI system also provides a charging function.

* iPod® is a registered trademark of Apple Inc.

Static Cornering Lights* □

When the steering wheel is turned or the turn indicator is operated, a small additional reflector with a separate halogen bulb illuminates the area into which the vehicle is turning. As a result passers-by are picked up sooner and more easily by the driver, and the attention of other road users is increased by the clear signal effect of the Static Cornering Light.

Dynamic Cornering Lights* □

Bi-xenon headlights with Dynamic Cornering Lights provide better illumination of corners or the turn-off area. The headlight beams follow the steering angle of the vehicle's steering wheel with the aid of small servomotors in the headlight units. The improved visibility enables obstacles to be detected earlier, and the driver gains additional reaction time.

*Static and Dynamic Cornering Lights are combined with optional bi-xenon headlights.

Bluetooth Phone Connectivity □

Volkswagen's Bluetooth Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book.

Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the Tiguan. With a maximum 5 Star Rating awarded by ANCAP# plus a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered.

The Tiguan owes its high safety rating# to its rigid body structure which creates a solid passenger cell. Its body panels are designed to crumple in the event of an accident, absorbing the energy of the impact. The Tiguan's lightweight construction is reinforced with hardened, high strength steel to give occupants maximum protection in an accident.

In an accident, depending on the severity of the impact, the Tiguan's safety features work together to protect occupants by deploying the belt tensioners and airbags. The system also activates the hazard warning lights, the doors are unlocked, interior lights are switched on and the fuel pump is deactivated. Pedestrian safety is also improved with a deformable bonnet and foam sections behind the front bumpers to minimise leg injuries.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

Active Safety – Everything designed to help prevent accidents from happening.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Electronic Brake-pressure Distribution (EBD)

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

4MOTION® All-Wheel Drive

All-wheel drive provides maximum traction and the Tiguan's intelligent all-wheel drive adds to its active safety features. The latest generation of 4MOTION® all-wheel drive is standard and available with manual or 7-speed DSG transmissions.

Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.

Passive Safety – Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.

Airbags

Six airbags (twin front, side and curtain) are standard features. Airbags combine with the seat belts to reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

Safety Optimised Head Restraints

Safety Optimised Head Restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

Seatbelts

Front seat passenger seatbelts are equipped with belt pre-tensioners and belt force limiters. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce seat belt forces on front seat occupants and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and three child seat anchor points are fitted in the rear.

 Leather upholstery shown is an optional extra.

Interior.

The Tiguan's compact size disguises an exceptionally spacious interior. Its sense of style and ergonomic design create ultimate comfort and refinement, with everything intuitively in just the right place.

The Tiguan's clever design has created maximum storage space. Hidden compartments are found in the roof console and doors, as well as beneath the front seats in the 147TSI. The rear seats split-fold in a 60:40 ratio, and individually slide and recline. The front passenger seat backrest also folds down to give you plenty of room for transporting bulky items (standard on the 147TSI).

Comfort and convenience surround you with an eight-speaker, MP3-compatible radio/CD player, complete with auxiliary input socket for external multimedia sources. Whether you're looking to transport friends, kids, luggage or almost anything else, you'll find the Tiguan rewards you with all the freedom you need.

147TSI model shown. Park Assist and RNS510 satellite navigation shown are optional extras.

18" New York alloy wheels, fog lights and bi-xenon headlights shown are optional extras.

The Tiguan Range.

Each model in the Tiguan range benefits from active safety systems such as Electronic Stabilisation Program (ESP) and Anti-lock Braking System (ABS) with Brake Assist. Passive safety is also covered with six airbags and safety optimised front head restraints as standard. The Tiguan's combined safety features earned a maximum 5 Star Rating by ANCAP. Innovative technology is always at your fingertips via the electro-mechanical parking brake and Auto Hold function or the Multi-Function trip computer. 4MOTION® all-wheel drive, cruise control and remote central locking are amongst other impressive standard features.

Each Tiguan model comes standard with alloy wheels, new anti-theft wheel bolts have been designed to provide protection against theft and turn indicators are integrated into the door mirrors. Volkswagen's TSI direct injection petrol engines or TDI Common Rail turbo diesel engines deliver exhilarating performance, coupled with either manual or 7-speed DSG transmissions.

Bi-xenon headlights and fog lights shown are optional extras.

125TSI. Quality and substance that delivers powerful performance.

The powerful 125TSI delivers exhilarating performance from its 2.0 litre direct injection, turbocharged petrol engine. With 125kW of power and 280Nm of torque via the 4MOTION® all-wheel drive, and either 6-speed manual or 7-speed DSG transmissions, it's a driving delight. Safety features include Anti-lock Braking System (ABS) with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags. Driver comfort hasn't been overlooked with cruise control, air conditioning, and a Multi-Function Display (MFD Plus) - all standard on every model. Enjoy the convenience of the sliding and split-folding rear seat, height-adjustable front seats and 12V accessory sockets in the centre console. 16" San Francisco alloy wheels are also standard.

The stylish 16" San Francisco alloy wheels are standard on the 125TSI and 103TDI.

103TDI. Sophisticated refinement that delivers impressive torque performance with exceptional efficiency.

The 103TDI offers astonishing power from its 2.0 litre Common Rail turbo diesel engine with diesel particulate filter. With 103kW of power and 320Nm of torque, 4MOTION® all-wheel drive and 6-speed manual or 7-speed DSG transmissions, it combines fuel economy with sheer strength. Safety features include Anti-lock Braking System (ABS) with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags. The 103TDI makes life comfortable with its electronic parking brake with Auto Hold function, multi-function steering wheel, remote central locking, MP3-compatible radio/CD player and 12V accessory sockets in the centre console. These are also standard on the 125TSI. Extra storage is available in roof compartments and the height-adjustable front centre armrest. 16" San Francisco alloy wheels are also standard.

The stylish 16" San Francisco alloy wheels are standard on the 125TSI and 103TDI.

18" New York alloy wheels and bi-xenon headlights shown are optional extras.

147TSI. Luxurious finesse and innovative technology combined with energetic strength.

The prestigious 147TSI boasts sports car-like performance from its 2.0 litre direct injection, turbocharged petrol engine. With 147kW of power and 280Nm of torque delivered through the 4MOTION® all-wheel drive and a 7-speed DSG transmission, it can take you anywhere. Safety features include Anti-lock Braking System (ABS) with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags, to name but a few.

The 147TSI is appointed with class-leading technology including rear parking distance sensors, dual zone climate control air conditioning with air quality sensor, automatic headlights with 'coming home' function and rain-sensing windscreen wipers. It's perfectly finished with sports seats in premium cloth trim, a foldable front passenger seat and storage drawers under the front seats. It is the ultimate Tiguan. The RCD510 in-car entertainment system features a high-resolution large colour TFT display with touch screen operation, a six disc CD changer with MP3 compatibility, auxiliary input interface for connecting a mobile audio player, as well as an SD memory card slot. 17" Boston alloy wheels are also standard.

The stylish 17" Boston alloy wheels are standard on the 147TSI.

Optional Equipment.

Bluetooth Phone Connectivity

Volkswagen's Bluetooth Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book.

RNS510 Satellite Navigation System with Rear View Camera Plus*

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

Adaptive Chassis Control

Adaptive chassis control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics, based on a newly developed control algorithm.

Off-Road Technology

With the push of a button the Tiguan can adapt for all terrain types. Off-Road Technology such as Hill Descent Assistance, a compass and low tyre pressure indicators let you go almost anywhere.

Media Device Interface (MDI)

The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself.

Leather Appointed Seating

The Tiguan offers an optional leather appointed seating package with heated front sports seats and electric adjustment for the driver.

*RVC Plus is also included in the optional RNS510 satellite navigation package.

Panoramic Electric Glass Sunroof

The optional panoramic electric glass sunroof with sunblind creates an open-top feel.

Bi-Xenon Headlights

Bi-xenon headlights with dynamic and static cornering lights are optional for the Tiguan range.

Rear View Camera (RVC Plus)*

Even the trickiest parking spot becomes a breeze with the Rear View Camera, giving the driver clear sight of what's behind the vehicle. On-screen guidance lines simplify entry into difficult parking spaces.

18" New York Alloy Wheels

Attractively styled 18" New York alloy wheels are available to add a more powerful stance to your Tiguan.

Park Assist

Park Assist is able to manoeuvre the vehicle into spaces with as little as 1.1 metres in addition to the length of the vehicle, with several moves if necessary. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Tiguan is expertly parked for you.

*RVC Plus is available as a separately orderable option in the 147TSI. RVC Plus is included in the optional RNS510 satellite navigation package.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Tiguan in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Tiguan, visit your local Volkswagen Dealer.

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every model year 2011 Volkswagen Tiguan is covered by a 3 year (unlimited kilometre) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3 year paintwork and 12 year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen Extended Warranty

To give you added peace of mind and security, you can choose to extend your warranty to suit your vehicle and ownership cycle. If your Volkswagen is still covered by the existing Volkswagen Manufacturer's Warranty, you can purchase Volkswagen New Vehicle Extended Warranty, providing you coverage on all original Manufacturer's components with no payment claim limits.

If you are purchasing a used Volkswagen and the original Volkswagen Warranty has expired, you can purchase Volkswagen Used Vehicle Warranty Insurance, providing selected component protection. Have the assurance that your Volkswagen remains a Volkswagen.

Eligibility Criteria apply for both the Volkswagen New Vehicle Extended Warranty and the Volkswagen Used Vehicle Warranty Insurance. For more latest information regarding Volkswagen New Vehicle or Used Vehicle Extended Warranties and how to enact coverage, always refer to www.volkswagen.com.au, consult your local Volkswagen dealer, and refer to the relevant Product Disclosure Statement.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 2-year warranty on Genuine Parts from the date of purchase.

Volkswagen Finance

Whether buying or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers, we offer a vast range of products, each with distinct advantages depending on your specific circumstances. We can easily and quickly design a solution to meet your budgeting needs, with no account keeping fees and no surprises along the way. Speak to your authorised Volkswagen Finance dealer today to see how Volkswagen Finance can help you achieve your motoring dream.

Owning A Volkswagen

Any information or advice contained here does not take into consideration your objectives, financial situation or needs, which you should consider before acting on our recommendations. You should read and consider the Product Disclosure Statement before deciding whether to acquire any product mentioned here. A Product Disclosure Statement (PDS) can be requested from your local Volkswagen Dealer or viewed online at volkswagen.com.au

Glossary.

Adaptive Chassis Control*

The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the customer can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

4MOTION®

An all-wheel-drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Auto Hold Function

As soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicle's final braking pressure. So even when you take your foot off the brake pedal, all four wheels' brakes remain applied, providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)*

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 wet multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate wet clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front / rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Engine Braking Control (EBC)

Prevents the driven wheels from locking if the accelerator is lifted very suddenly or the vehicle is braked sharply because a low gear is engaged.

Park Assist*

Park Assist actively helps the driver when reversing into parallel parking spaces. The system works by using sensors mounted either side of the front bumper together with parking distance sensors front and rear. To parallel park the driver needs to press the Park Assist button and use the appropriate indicator before the car passes the potential parking space. Sensors in the front bumper then scan the size of the parking space as the car is driven slowly past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and let's go of the steering wheel.

Park Assist will alert the driver of the intended reverse path in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure. The system can reverse into parking spaces on both the left hand and right hand side of the road, for example on one way streets.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

Off-road Technology*

With one switch, off-road technology mode activates an integrated group of assistance systems that substantially enhance control in an all-terrain environment. Off-road technology includes Hill Descent Assistance which ensures by means of controlled brake applications that the vehicle does not go out of control when descending a steep hill. Hill Descent Assistance will only operate when speeds are lower than 20km/h, the gradient is greater than 20%, the engine is running and the accelerator and brake pedals are not pressed.

*Optional equipment

Volkswagen's Australian Environmental Strategy.

Steps Towards Sustainability

To Volkswagen Group Australia, sustainability means taking responsibility for the environment, as well as actively participating in the development of society. We believe sustainability offers opportunities for long-term innovations, new approaches, efficient technologies and ground-breaking products. Our organisation has established an Environment Committee to manage our business activities and reduce our environmental impact.

Carbon Management Strategy

We have developed a Carbon Management Strategy to identify and manage carbon emissions from our business activities. Our fuel usage from company cars and energy usage were calculated to measure our Carbon Footprint, and comprehensive carbon reduction targets have been set. Volkswagen Group Australia aims to downsize its environmental footprint in the future.

Carbon Management Program

Our range of vehicles has earned a reputation for fuel efficiency. We're working to extend that efficiency throughout our entire operational structure. We've initiated a Carbon Management Program, to recommend changes to achieve emissions reductions. We're making real changes in reducing our carbon footprint.

Environmentally Friendly Engines

Our TSI twin or single-charged petrol engines achieve impressive fuel efficiency with reduced CO₂ emissions. Our TDI diesel engines use less fuel and have lower emissions, with the benefits of high torque and performance. Our diesel particulate filter extracts soot from vehicle exhaust emissions. Numerous engines already fulfill the stringent forthcoming Euro 5 emissions standard.

Environmentally Friendly Transmission

Our dual-clutch Direct Shift Gearbox (DSG) provides the comfort of a conventional automatic transmission and the dynamic drive of a manual transmission. DSG boasts significantly reduced fuel consumption compared to a conventional automatic transmission. The new 7-speed DSG transmission is the first dual-clutch gearbox with a 'dry' double clutch.
