## SAFETY SYSTEMS ENHANCE DRIVING 1997 CHEVROLET VENTURE AND PONTIAC TRANS SPORT

**Dual air bags.** Restraint systems include standard driver and passenger-side air bags. Additionally, front seat lap/shoulder belts have adjustable pivots while rear seat lap/shoulder belts have comfort guides for passengers in outboard positions.

**Anti-lock brakes.** Anti-lock brakes are standard on all 1997 Chevrolet Ventures and Pontiac Trans Sports.

**Available full-function traction control.** An available full-function traction control system uses electronic controls to limit engine power and selective brake intervention to control wheel spin.

**Available self-sealing tires.** Special sealants inside the tires are designed to plug a tire puncture of up to 3/8 inch in diameter.

**Limp home feature.** This feature enables the 1997 Chevrolet Venture and Pontiac Trans Sport to continue to operate for a limited distance following a total loss of coolant.

**Safety cage 1998 side impact standards.** Longitudinal rails under the floor help protect against crush forces in front and rear collisions. Cross-car beams help maintain structural integrity during side impacts and high strength steel side-guard door beams enable the 1997 Chevrolet Venture and Pontiac Trans Sport to meet 1998 side impact standards.

**Available two integral child seats.** The 1997 Chevrolet Venture and Pontiac Trans Sport are the only minivans that offer one or two integral child seats with modular bucket or bench seating.

**Great visibility.** Windshield wipers have an overlapping sweep pattern that cleans more than 70 percent of the large windshield. The rear window wiper provides a 180-degree sweep for exceptional rear window visibility.

**Large mirrors.** At 40 square inches, the mirrors provide the driver with confident visibility at a glance.
