Mercedes-Benz designer wheels

Presence plus dynamism. The impressive Mercedes-Benz A-Class has a design which is both independent and powerful. How can you make this look even more distinctive?

By adding the dazzling refinements shown here - chromed exterior mirror housings or high-sheen **incenio** designer wheels, for example - to create individual highlights.

If you want to round off the look to perfection, we recommend indicators with a reflective chrome-look lamp head - genuine highlights in the truest sense of the word.

MOBILE PHONE HOLDERS

When it comes to selecting a mobile for your Mercedes, you've never had so much choice. One "click" is all it takes to replace the system's intelligent mobile phone holder. It takes a matter of seconds and is as straightforward a process as inserting the mobile into the holder itself. Changing your mobile and even alternating between different models of mobile no longer presents a problem. There are no compromises when it comes to convenience-enhancing technology either: the telephone can be operated via the multifunction steering wheel and the telephone status and call information are displayed in the central multifunction display - as you would expect.

To use a mobile phone holder, your car must be factory-fitted with one of the two following optional extras:

Holders are available for many popular Nokia, Siemens und Sony Ericsson mobile phones | see list on page 26 |
