

Mercedes-Benz Vito

Panel Van, Crew Cab, Wagon

Mercedes-Benz

Mercedes-Benz Vito.

Love your work.

When you consider how much of your life is taken up with work, you want to make the most of it. And thanks to the Mercedes-Benz Vito, you can. With its outstanding blend of comfort, economy and safety, the Vito has lifted van standards to a level you'll love.

The Vito range has now been expanded to cater for an even wider spectrum of working applications. Of course, whether you choose the Vito Panel Van, Crew Cab or Wagon, whether you want it longer, taller or stronger, each and every Vito model comes standard with the world-class quality that Mercedes-Benz is renowned for.

With its streamlined exterior, the Vito cuts a dynamic profile on the road and lets everyone know that you care about your business. Inside, smart use of space and driver-friendly ergonomics make the Vito a van that can go the distance. And it's not just a van that drives like a car; it's a van that drives like a Mercedes-Benz.

Vito has already built a reputation for excellence and is rightly seen as the intelligent choice for businesses that want to stay one step ahead. When you get behind the wheel of a Vito, you'll understand why work's a whole lot easier when you love what you drive.

Not just a van for all businesses. A van for your business.

More and more, business success depends on getting the small things right. Which is why the choices within the Vito range are now even greater.

Our engineers have challenged themselves to come up with the right van for every application, every activity and every day. The Mercedes-Benz Vito proves it can be done. And it also shows that apart from being flexible, it's also possible to provide extremely high levels of specialisation.

The three different models of the Vito – Panel Van, Crew Cab and Wagon – are now available with an expanded range of high-

performance Mercedes-Benz engines. There's a choice of three powerful CDI diesels with outputs from 70 to 150kW (95 –204hp)*. Choosing the right engine for your driving preferences and load carrying requirements is now that much easier.

Importantly for the driver, the Vito is blessed with exceptional dynamism and agility. When it comes to coping with difficult entrances, narrow streets and congested city centres, Vito has the ability to make light work of tricky situations.

Every Vito features a comfortable, ergonomically designed driving position. The cabin has a high-quality look and feel and a number of thoughtful touches

such as the loading facility under the front seats, which increases the maximum load length by 200mm.

What's more, there's bound to be a body length to suit your individual needs. Whether you opt for compact, long or extra long, each of the three body lengths give your Vito its own distinct character and specific capabilities.

For even greater scope, there are two wheelbase selections and two roof heights. With so many opportunities to combine different features, you can be sure of finding the ideal Vito for your business.

*Not all engines are available with all bodies.

The Vito Panel Van – more space, more possibilities.

Open up the dual sliding doors to the load compartment of the Vito Panel Van and you'll be amazed at the amount of useable space. All three body lengths – compact, long high roof and extra long – offer extremely generous load capacity. The doors open wide for easy access and the low loading height makes loading from the rear and dual side sliding doors a straightforward task.

The load width between the wheel arches is designed for pallet access while the lashing eyelets integrated into the compartment floor allow loads to be safely secured. With a choice of two wheelbases, three body lengths, high roof on long body and optional barn doors, matching your Vito Panel Van to the specific demands of your business becomes a much more straightforward task.

With load volumes ranging from 4.65m³ to 6.49m³ and payloads up to 1110kg – as well as ultra-compact exterior dimensions and the highest possible degree of reliability – the Vito Panel Van is a lesson in how to create a work van that meets highly specific requirements.

In fact, the Mercedes-Benz Vito goes much further and actually redefines the entire vehicle segment. By combining optimum practicality with unprecedented

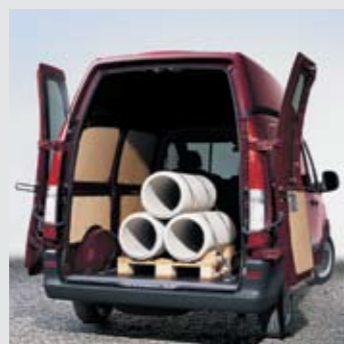

comfort and exceptional design, the Vito has raised the bar by a considerable margin.

It doesn't take long to discover that the driving characteristics, comfort and styling levels are strongly influenced by the Mercedes-Benz passenger car range. However, this certainly isn't at the expense of any commercial vehicle requirements. The Vito is designed to work hard. Just like all the vans that we've built over the years.

This year, the improvements continue. In keeping with our desire to set the highest possible standards, all engines are more fuel efficient, bringing them into line with the latest Euro 4 specifications. The 109CDI has been given more power. We have also added a new variant, the 120CDI, which has a multi-stage V6 turbodiesel engine with an output of 150kW. GVM has now been increased to 2940kg and air conditioning is standard across the range.

The all-new Crew Cab - staying flexible.

If you need to transport people as well as equipment or goods, you'll find the Vito Crew Cab measures up perfectly, thanks to its ability to carry six occupants* and a sizeable load of cargo.

From building to industry to municipal services - many activities require vans that offer more than just the largest possible cargo area. Having the flexibility to move people and goods at the same time is a very important business attribute.

Enter the Vito Crew Cab - a van that shows it is perfectly possible to do both and more. Because, as well as providing room for up to six* and being an extremely competent load carrier, the Vito Crew Cab also excels in offering a dynamic driving experience.

A talented all-rounder

The versatile Vito Crew Cab lends itself to such a wide range of uses you'll find it's equally adaptable to both work and leisure.

The flexible seating concept (comes with five seats as standard or six seats as an option) is just one of many strengths that include a generous amount of interior space, dual adjustable sliding side doors, a large tailgate or, for greater rear access, optional rear barn doors.

There's even a removable row of rear seats for extra cargo. It also comes with wooden floors and windows in the sliding doors.

And because the Vito Crew Cab is designed to care about passengers, it offers them interior appointments and ride comfort along with the levels of safety that only Mercedes-Benz can deliver.

In the comfort zone

The Vito Crew Cab stands out from the crowd thanks to its

attractively designed body and outstanding low drag coefficient of 0.33.

High-quality interior panelling and a comprehensive range of comfort features give the sense of a welcoming atmosphere on board. While the newly developed chassis and rear-wheel-drive deliver dynamic, neutral handling at all times.

In the Vito Crew Cab, there's no reason why business can't also be a pleasure.

Crew Cab	Compact	Extra Long

115 CDI	✓	✓
120 CDI	n/a	✓

Some models shown may have non standard options available at extra cost. *Six seat optionally available as front three-passenger bench seat.

With loading lengths of up to 1712mm behind the back row of seats there is plenty of room for the crew and the cargo.

The rear seats of the crew cab can be removed to create more room for bigger loads. *Optional bench seat for three passengers shown.

The all-new Vito Wagon.

The new way to travel in style.

Moving people safely and in style is where the Mercedes-Benz Vito Wagon excels. With its superior ability to transport up to nine passengers* in comfort, the Vito Wagon also brings new levels of versatility to the people-mover segment. Best of all, because it's a Mercedes-Benz, quality and reliability is a given.

With an engine that meets the new Euro 4 specifications - a CDI diesel delivering 110kW and 330 Nm (150 hp)- the Vito Wagon is powered by the latest technology.

Underpinned by a rugged monocoque body structure, the Vito can tackle the rough as well as the smooth. It's just as comfortable on back streets as it is on the open road.

Thanks to a low drag coefficient of just 0.33, the all-new Vito Wagon is a smooth cruiser. The slippery shape is backed up by four-wheel independent suspension that cushions the journey whether you're travelling solo or carrying a wagonload.

Inside, the cabin boasts a range of creature comforts that exceed the levels of many passenger cars. Storage compartments, front and rear air conditioning, front power windows, a vanity mirror and a full headliner bring practicality and purpose to the business of getting around.

Options, as you'd expect, are extensive. With up to nine seats as an option*, the interior space is very passenger-friendly. And for those times when you need more luggage space, the Vito Wagon's rear seats fold flat or are removable.

An electric tilting and sliding sunroof and reading lamps can

be added. Or you can further personalise your Vito with items like Speedtronic cruise control, metallic paint, 16-inch alloy rims and roof rails. Recently, we've made electric sliding doors available as well. Across the Vito range, there are many ways to do what's best for your needs.

Naturally, the Vito Wagon is a study in safety, with a long list of Mercedes-Benz safety innovations such as the new ADAPTIVE ESP® system which includes ABS, ASR and EBD as standard. Also standard are driver and front passenger airbags as well as three-point seat belts with pretensioners and limiters.

Turbocharged Toolbox. Vito 120CDI. The most powerful van in Australia.

With its three-litre V6 multi-stage turbo diesel cranking out 150 kilowatts, the new Mercedes-Benz Vito 120CDI is better than your average box. As a matter of fact, it's the most powerful van in Australia.

The new Vito 120CDI is the first turbocharged V6 diesel van in the one tonne market and comes with a comprehensive package of standard equipment to complement its high-performance qualities.

Apart from the latest-generation Mercedes-Benz V6 powerplant which has a torque rating of 440 Nm, the Vito 120CDI comes standard with a five-speed automatic gearbox, 17-inch six spoke alloy wheels fitted with 225/55 tyres, colour coded bumpers, a leather-wrapped steering wheel and gear stick. As well as tinted rear window on the Crew Cab.

With greater practicality than a ute, because you can lock all your

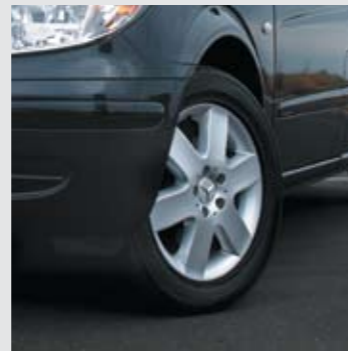

tools away out of sight and the ability to customise the interior to suit your needs, the Vito 120CDI makes a real statement on the road. And at the worksite.

Powerful new 3.0 litre, V6 CDI with multi-stage turbo charging.

17 inch, 6 spoke alloy rims. Tyre size 225/55/17. Colour coded bumpers.

Easy access to the comfortable interior via dual sliding doors.

Some models shown may have non standard options available at extra cost.

The interior. It's all about delivering the feel-good factor.

Where business meets pleasure

The spacious, bright and welcoming look of the driver's area strikes you the moment you open the door, while the low access height is a particularly welcome feature on runs that involve frequent stops.

The driver and front passenger have four-way adjustable seats as standard and ergonomically designed height-adjustable head restraints and seat belts.

If further seating is required, a front three-person bench seat is also available as an option.

The cockpit: everything in sight, everything within reach

Foremost in the driver's field of vision is the attractively styled instrument cluster with large and legible dials and displays.

All controls are positioned logically in accordance with ergonomic principles - including of course, the joystick-type gear selector lever - which is integrated into the instrument panel for easy operation and to permit quicker access to the side and rear.

Numerous, well thought-out stowage facilities provide handy accommodation for mobile phone, drinks, logbooks, pens and documents - all within easy reach of the driver.

Other key items of standard equipment for the Mercedes-Benz Vito range

- Driver airbag
- Dual sliding doors
- Power-assisted steering
- Remote central locking
- Front power windows
- Steering wheel adjustable for height and reach
- Walk-through access to cargo area in Panel Van and Crew Cab variants.
- Powerful, 5-speed heating and ventilation system
- 6-speed manual transmission for 109CDI
- 5-speed automatic transmission for 115CDI and 120CDI
- In-dash CD
- Standard air conditioning

When you're contending with congested roads on a daily basis, you appreciate all those things that make it easier to get the job done - like the Vito's comfortable working environment. Its high-quality interior, which sets new standards in practicality, ergonomics and comfort, also makes sound business sense because a motivated driver is a better driver.

Dash-mounted gear shift for easier access.

Drink bottle holder in door.

New sound 5 CD player. Convenient pen holder.

The safety concept: more is better.

To our way of thinking, there's nothing more important than safety. That's been the Mercedes-Benz way, right from the beginning. All our commercial vehicles must meet the highest standards of practicality and economy, but this is always combined with the utmost attention to keeping the driver and passenger as safe as possible.

Safety: our first design principle

Because the Vito is built by Mercedes-Benz, you get the benefits of over 100 years of innovations and leadership in the area of vehicle safety. Every Mercedes-Benz is built to the highest possible safety specifications, whether it's a van or a passenger vehicle. With its wealth of safety features, the Vito meets the highest standards of active and passive safety.

Circuits that keep you on the safest track

Standard equipment includes our new ADAPTIVE ESP® system, which combines anti-lock braking (ABS) in combination with

acceleration skid control (ASR); electronic brake force distribution (EBD) and a brake assist system (BAS). Together, these systems greatly improve directional stability and traction in critical situations.

Working in conjunction with the Vito's powerful brake system, ABS, BAS and EBD keep stopping distances reassuringly short and ensure that the vehicle remains easy to control, even during emergency braking.

Additional safety features:

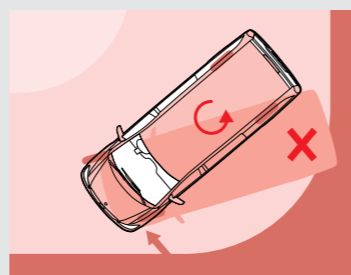

- Disc brakes all round
- 3-point seat belts for all seats, with pretensioners for driver and front passenger
- Driver side airbag
- Safety body with high-strength load-bearing members
- Adjustable steering wheel
- Headlight beam range control
- Rear centre stop light
- Halogen front and rear fog lamps

In a collision, the driver and co-driver 3-point seat belts are pulled taut against the body by the belt tensioners in fractions of a second.

ADAPTIVE ESP® helps to stabilise the vehicle in hazardous driving situations by applying a braking force to one or more wheels and adjusting the engine output as required.

It's all about the driver.

Driving pleasure? In a van? Until recently, these two concepts were unlikely partners. But the Vito crosses boundaries as easily as it crosses city streets. Technological refinement and clever engineering have made the Vito a real driver's machine. For our engineers, the measuring stick isn't other vans; it's our own passenger cars. You'll understand what we mean once you've discovered how the Vito's newly developed chassis and lively, high-torque engines add a new dimension of enjoyment to every journey, whether you're cruising on the freeway or hustling through city traffic.

Rear-wheel drive: proven to be the best

Regardless of the engine you choose, you'll be impressed by the dynamic characteristics of the Vito. A key feature of the Vito is its rear-wheel drive layout. This arrangement offers huge advantages for a van's dynamic handling properties, manoeuvrability and safety. It's a proven concept.

Rear-wheel drive keeps torque-steer effects to an absolute minimum and ensures that the handling retains its forgiving character even when the vehicle is fully laden. This becomes a particularly important safety factor when dealing with a permissible gross vehicle weight as high as 2.94t.*

Rear-wheel drive also has a positive effect on Vito's turning circles – at just 11.80m (short wheelbase) and 12.50m

(long wheelbase) – they are reassuringly small. As well as enhancing handling, rear-wheel drive offers better climbing and traction characteristics than front-wheel drive because the driven rear axle takes the weight of the load. This characteristic is invaluable when moving off on a slope or towing a trailer.

The ideal combination of power and control

In addition to the drive concept, ADAPTIVE ESP® and the independent suspension also play a key role in the Vito's safe handling characteristics.

*The safety systems described in this brochure have been developed to enhance active safety and to help van drivers devote their full attention to the situation on the road. Despite their capabilities, these innovative assistance systems cannot defy the laws of physics and do not absolve the driver of his duty to drive safely.

The best of both worlds: high performance and low fuel consumption.

The Vito is available with a choice of three second-generation Mercedes-Benz CDI diesels, which open up a new dimension of power and performance. It's something you'll notice right from your very first drive, every time you accelerate out of a bend, move off from traffic lights or join a freeway.

The CDI engines: dynamic and powerful

In the all-important low-rev range, the CDI diesel powerplants offer a degree of pulling power that makes for an extremely engaging driving experience. These units owe their high power output and impressive torque curves - which peak at 440Nm in the top-of-the-range multi-stage turbodiesel 120CDI V6 powerplant - to the very latest engine architecture.

The second-generation common-rail, direct-injection diesel technology features four valves per cylinder, a 1600 bar injection system and an exhaust turbocharger with a variable nozzle turbine. Good fuel economy figures complement the enhanced power and performance created by these engines.

All Vito engines feature an advanced electronic engine management system that communicates with the control units of the transmission and the dynamic handling systems such as ADAPTIVE ESP® via a CAN data bus.

The electronic immobiliser, which is standard equipment, acts directly on this control unit to prevent unauthorised starting of the vehicle.

Economy comes as standard

The combination of the standard ASSYST service interval indicator and the significant reduction in the scope of maintenance work required means that you can look forward to pleasantly low maintenance costs for the Vito - thanks in part, to the flexible oil-change intervals which are

based on the actual intensity of vehicle usage.

On average, your Vito may only need a workshop visit every 30,000km. And we've made sure the Vito is easy on your pocket in other areas - by designing it to be easy to repair, costs are as low as possible if the worst should happen.

To make you even more comfortable and to keep your business moving, Vito comes with a 3-year/200,000km warranty (whichever occurs first) and 24-hour Mercedes-Benz Van Roadcare assist support package for the duration of the warranty period.
