Whether it's an iPod or another MP3 player, with the Media Interface from Mercedes-Benz your valuable player stays hidden from prying eyes while you control the playback and listen to the music

Media Interface video cable¹

Transforms your Mercedes-Benz into a cinema: the Media Interface video cable allows various video sources (e.g. camcorder, iPod video, iPhone, video players produced by various manufacturers, etc.) to be connected to the Media Interface via AUX. The videos are played on your COMAND APS monitor when the vehicle is stationary. (Only in conjunction with Media Interface, Code 518)

¹ Does not support your iPhone's phone function.
Please contact your Mercedes-Benz partner for details of other function restrictions

COMAND APS with 6-DVD changer

The new COMAND APS now offers even more convenience and freedom when you're on the move: your route is navigated with impressive speed, thanks to the integral hard drive. The MUSIC REGISTER has up to 4 GB of memory, offering virtually unlimited space for your favourite music. COMAND APS plays back music from DVDs and CDs and from SD memory cards. The optional Media Interface (see page 16) also allows you to connect your mobile music player. And for convenience and enhanced safety, all of these functions can be controlled via your COMAND system. Other features: Bluetooth® connectivity, 6.5" colour display, dynamic route guidance (RDS/TMC), double-tuner radio with 4-channel amplifier for outstanding sound, DVD changer controls

Freedom

A Roadster is all about openness. Living life to the full and savouring that feeling of the wind in your hair.

The telematics systems in your SL are as open as the roof of your car in spring. Have your SL factory-fitted with the Media Interface and hook up the music player of your choice.

Now all you have to do is decide whether you prefer the sound of music or the rustling wind.
