4 Front Parking Sonars

Optitron Combination Meter

Moonroof

Leather accented interior

Rear Seat Entertainment System

Satellite Navigation

Privacy Glass

Altitude Exterior Badging

Back Guide Monitor

We've taken the advanced capabilities of Prado GXL then equipped it with some additional luxuries to take your adventures to new heights.

Special Edition Prado Altitude gives you the elegance of a leather accented interior, so you can travel in ultimate comfort and style. You're entertained by an audio system with a 6-disc in-dash CD changer and 14-speaker surround sound. Meanwhile, your passengers will enjoy the Rear Seat Entertainment System with a large 9" monitor and the convenience of a remote control. Fortunately 3 wireless headphones are included, so while movies are playing in the back you won't be distracted from what's ahead.

You're guided to your destination by a Satellite Navigation<sup>1</sup> System which displays maps on the 7" Electro Multi Vision (EMV) screen, supported by spoken commands. Enroute, the power operated moonroof brings the freshness of the great outdoors in.

Even parking manoeuvres are a breeze thanks to a ParkAssist Sonar System<sup>2</sup> with four parking sensors on the front and on the rear. Then as you select reverse, the Back Guide Monitor<sup>2</sup> overlays guidelines on the Reversing Camera<sup>2</sup> image to aid parking. Looking ahead, an Optitron Combination Meter displays speed and trip information with optimum clarity by providing greater visual contrast between the meter itself and the meter readings.

The Special Edition colour palette even reaches new heights with a selection which extends to the lustre of 'Crystal Pearl'<sup>3</sup>, a finish normally reserved for VX and Kakadu models. Privacy glass on the rear windows gives Prado Altitude a smarter look, while making it harder for intruders to look in. Then for the finishing touch, there's 'Altitude' badging on the rear tailgate.

Need more motivation? You have the choice of a 202kW quad cam V6 engine or 127kW turbo-diesel backed by a 5-speed automatic transmission. As you journey to far away places, Prado Altitude's added technologies and luxuries, together with its serious off-road capabilities ensure you'll be ready for anything along the way.

<sup>1</sup> Current navigation mapping database encompasses major capital and primary national road networks as well as offering some coverage in regional areas.

<sup>2</sup> Reversing Camera/ ParkAssist/Back Guide Monitor are designed as driver assist devices only and should not be used as a substitute for skilled driving and/or safe parking practices. The area into which the vehicle is to be driven must be visually monitored by the driver.

<sup>3</sup> Paint featured is an optional extra at additional cost.
