The iconic Shelby GT has returned with more power, performance and Shelby styling! The newly designed Shelby GT combines terrific handling, strong V8 power, muscular exhaust note, and handsome good looks. The naturally aspirated version produces 460 horsepower. The additional horsepower comes from a new exhaust, while a supercharger is available that can boost horsepower to 750HP\*

Shelby also worked with Ford Performance to tailor the suspension and maximize the car's capabilities, all without sacrificing ride quality. The exterior features proprietary bodywork and stylish new wheels, while Shelby touches can be found inside the sporty interior.

Available directly through Shelby American, the 2018-2023 Shelby GT offers thrilling performance and dynamic handling in a car that owners will love to drive all day, every day. The car can be ordered as a fastback or convertible in any color available from Ford. Drivetrain options include a 6-speed manual or a 10-speed automatic transmission. Every Shelby GT will receive a Shelby serial number and be included in the official Shelby Registry.

Starting at <sup>USD</sup>\$28,995

*Pricing includes base Mustang, pricing based on manual transmission, 300A coupe. Includes 3 Year / 36,000 miles warranty. Additional*
