

TOYOTA **LAND CRUISER**

FJ40
135HP

WORLD'S TOUGHEST ALL PURPOSE 4-WHEEL-DRIVE VEHICLE!

There is no other 4-wheel-drive vehicle from which you can ask so much—and get it! The powerful Toyota Land Cruiser easily carries half-ton loads, rolls at 85 MPH on the highway, pushes through sand or swamp or snow, climbs steep 67% grades. The Toyota Land Cruiser goes where other vehicles can't. The Toyota Land Cruiser goes anywhere!

The tough, durable Toyota Land Cruiser is engineered to perform reliably through continuous rough use. It is designed to provide maximum passenger comfort and safety in every driving situation. From its rugged, extra heavy box and channel-ladder frame to its sturdy, 14 gauge steel body, added strength is built into every Land Cruiser component!

Pleated, full foam rubber seats assure a ride of maximum comfort for seven husky men over the roughest terrain. The efficiently arranged instrument panel is easily read at a glance. All switches and levers are within fingertip reach.

Rear-mounted spare tire provides maximum clearance when driving through rough country, yet swings to the side for easy loading of passengers and equipment through the full-sized tail gate.

Simple, pull-out, 4-wheel-drive transfer controls, mounted on the dashboard within easy reach of the driver, can be operated while moving at speeds up to 45 MPH. And, with the gear shift on the steering column, the floor is clear!

For work or play, you just can't beat the TOYOTA LAND CRUISER

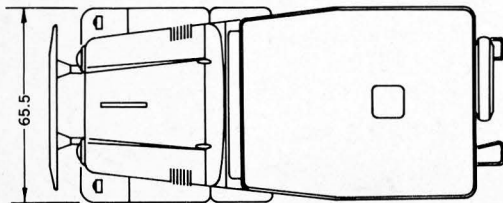

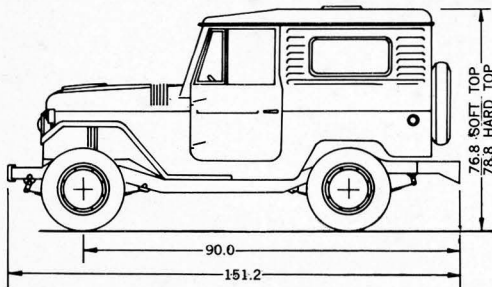

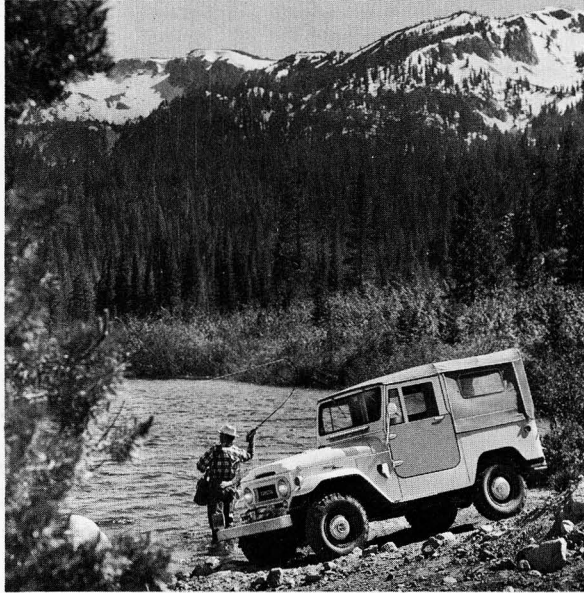

Whatever the job, the Toyota Land Cruiser works harder, faster, more reliably than any other 4-wheel-drive utility vehicle you can find!

Load it up! With the rear seats folded, you can load the Toyota Land Cruiser with more than a half ton of equipment and still have room up front to seat three husky men comfortably!

The Toyota Land Cruiser takes you where you want to go! Drive through swamp, over sand or snow, up steep 67% grades to those out-of-the-way, hard-to-get-to fishing, hunting and camping grounds!

Move it out! Drive all day at 85 MPH on the highway. When you run out of road, don't stop, just switch into 4-wheel-drive and keep on going!

SPECIFICATIONS

DIMENSIONS

Wheelbase	90.0 inches
Overall Length	152.4 inches
Overall Width	65.6 inches
Overall Height	76.8 inches
Road Clearance	8.3 inches

WEIGHT

Net Vehicle Weight	3414 lbs. (hardtop)
	3263 lbs. (soft top)
Seating Capacity	7

PERFORMANCE

Maximum Speed	90 MPH
Min. Turning Radius	17 feet

ENGINE

No. of Cylinders	6
Bore and Stroke	3.543 x 4 inches
Displacement	237.3 cubic inches
Compression Ratio	7.5:1
Gross HP	135 @ 3800 RPM
